
Trinity College

2009 *IVY*

TRINITY
COLLEGE
LIBRARY

*Hartford
Connecticut*

The background of the page features a photograph of yellow autumn leaves in the foreground, with a stone building visible behind them. A large black rectangular box is centered over the image, containing the title and the main text.

Dedication

The 2009 Trinity Ivy Yearbook is dedicated to those who guided us from the very beginning. We, the graduates of 2009, could not have reached this point without the dedication of the Trinity faculty and staff. From inauguration to commencement, whether that had been the typical four year or the prolonged five year journey, we the students had the opportunity to evolve into quasi-adults. As we take a leap forward, away from the comforts of our dorms, friends, and college community, we cannot help but remember those who prepared us for this move. We will no longer have someone to hold our hands as we clean our dorms or write our papers. And we will no longer have someone to blame for our petty misfortunes as we grow up to take full responsibility for our every action and choice. It must have been difficult at times for the staff and faculty to make us see a world beyond Trinity and our future to better that world, and we thank you for this. Please accept our most sincere gratitude for bearing with us since our first college class to our very last. We will never forget the advising sessions, kind words of encouragement, and the roles you played as our mentors; and we hope that you will not forget the Class of 2009.

Letter from the Editor

In the previous page, I wrote that the yearbook was for the faculty and staff. But, of course, this yearbook is also dedicated for the students it was made for. Most of us moved in our freshman year on a rainy and humid day which was the least of our troubles as we struggled with our senior thesis, witnessed students slander their peers for a variety of reasons, and read e-mails from Campus Safety concerning attacks on Crescent Street. So, whether we are an IDP, foreign, or a typical American student, kudos to all of us for making it through. This yearbook is for us and the community we created here at Trinity.

It was no easy task creating this yearbook, lack of staff, pictures, and information to say the least. However, since yearbooks serve as our memory and a showcase for future generations, I wanted to make an album that everyone in the Class of 2009 can see themselves in and one that will show future Trinity students who we are. I must thank Noreen Huth, the yearbook advisor, for devoting her time and effort. This yearbook certainly could not have been finished without her. Also, much thanks to Silvia Tjioe, Kasey Ording, and Samantha Brill for their photo contributions. Half the pictures would not have made their way to the yearbook without your help. And to those who submitted your pictures, thank you for making this yearbook process a bit easier.

We are no doubt graduating at a tumultuous time, but now we have more opportunities to offer our knowledge and services developed from our liberal arts education. Our most valuable education came from our interactions with our peers and the experiences that we shared. Despite the differences in the routes we have taken in Trinity and will take in the future, we share the same Alma Mater. And I hope this yearbook shows that we take pride in what we've accomplished at Trinity and that we are now ready to enter the real world as real adults.

- Sora Chung, Editor

'Neath the Elms

'Neath the elms of our old Trinity
'Neath the elms of our dear old Trinity
Oh it's seldom we'll meet
In the moonlight so sweet
'Neath the elms of our old Trinity.

College days are from care and sorrow free
And oft will we seek in memory
Those days that are past,
Far too joyous to last,
'Neath the elms of our old Trinity.

Then we'll sing to our old Trinity
To our dear old Alma Mater, Trinity,
We're together today,
And tomorrow away,
Far away from our old Trinity.

'Neath the elms of our old Trinity,
'Neath the elms of our dear old Trinity,
No more shall we meet,
Our classmates to greet,
'Neath the elms of our old Trinity

- Augustus P. Burgwin Class of 1882

Acade

*"All men by
nature desire to
know."*

- Aristotle

emic Majors

American Studies

The American Studies major gives students the opportunity to apply the methods and learning of several disciplines to the study of American culture and society. It draws upon the resources of many departments and programs to provide an interdisciplinary perspective on the United States. In the junior and senior seminars, majors work to integrate their knowledge and to master a variety of methodological approaches to American studies.

Courses

Intro to American Political Philosophy
History of American Education
Conflicts & Culture in American Society
Religion in American Society

Homosexuality & Hollywood Film
Comic Art in the U.S.
20th Century Afro-American Lit
Literary Losers

Women of Color in the U.S.
New England Architecture
Museum Exhibitions

Faculty List

Department Chair: Louis P. Masur

William H. Cohn
Eugene E. Leach
Scott H. Tang

Rob Alan Lawson
Melissa N. Stuckey
Scott Gac

Diana R. Paulin
Ann Fitzgerald
Mary E. McCombie

Nicholas J. Conway
Brennan Maier

Anthropology

It synthesizes the disciplines of a liberal arts education and applies them to the real world. Anthropology is not just done in the jungle. As different ethnic groups come together and break apart -- from Los Angeles to Bosnia -- anthropologists strive to understand cultural difference and social change. Why do people care about their heritages? Why do they fight for the right to practice their religions? How are cultural traditions invented, maintained, and transformed? These are anthropological questions which demand understanding of the cultural landscapes that, as humans, we create and inhabit.

Courses

World Ethnography

The Gypsies

Medical Anthropology

Folklore & Society

War & Culture

Women & Family in Middle East

Identities in Britain & Ireland

China Through Film

Peasants & Social Change

Anthropology of Food

Concept of Progress

Culture, Ecology, Environment

Faculty List

Department Chair: James A. Trostle

Andrew M. Conroe

Frederick K. Errington

Patricia Mangan

Jane H. Nadel-Klein

Beth E. Notar

Alanna E. F. Rudzik

Trinity's Art History faculty is one of many outstanding strengths. Department Chairman Michael FitzGerald, for example, publishes and lectures widely on 20th-century art, and his teaching encompasses the history of photography and film as well as specialized courses in the art market. Senior department member Michael Mahoney, who is pursuing research on the 17th-century painter Salvator Rosa, offers expertise in Baroque and Asian art. Alden Gordon specializes in 18th- and 19th-century European art and architecture, with a particular interest in the art patronage of the old regime in France. Kathleen Curran, whose research focuses on 19th-century German architecture, shares with students her knowledge of 19th- and 20th-century architecture and American decorative art. Jean Cadogan applies her expertise as a museum curator and scholar to teaching Medieval and Renaissance art, in addition to museum studies. Courses in many other disciplines of special interest to Art History Majors -- History, Italian Studies, and Religion, to name a few, as well as closely related topics, such as Classics, American Studies, and International Studies, are also offered as part of the Art History curriculum.

Courses

Introduction to Classical Art and Archaeology
 High Renaissance Art in Italy
 Madame Pompadour as a Patron of the Arts
 History of Photography
 Introduction to Asian Art

The Gothic Age: Art of the 12th and 13th Centuries
 Seminar in Architectural History: The Country House
 20th-Century Avant Garde in Painting and Sculpture
 History of World Cinema
 Seminar in Style and Connoisseurship

Faculty

Department Chair: Michael C. Fitzgerald

Art History

Biologists look at the marvels of the living natural world; they study LIFE. What we encounter in biology are the continuing consequences of events that began billions of years ago, yielding simple living forms capable of faithfully reproducing themselves. From this genesis evolved the many forms of life we recognize today. Though we know much in biology, we are learning even more at a breathtaking rate. Biology is the most fast-paced science of our time. Fundamental, history-making advances have been made in biology in just the last 30 years. For instance, biologists studying bacteria and viruses discovered that DNA is the genetic material. This major discovery led to the establishment of the field of molecular biology, whose implications for the future are still unfolding. Scientists are continuing to find through research how this molecule, DNA, affects genetic inheritance, physiology, and evolution. As research proceeds, new businesses in biotechnology, based on DNA engineering, are being developed. The prospects for future biologists are wide-ranging; there is so much yet to learn.

Courses

Biology I: Inquiry into Life
Biology IV: Genetics
Biochemistry
Drug Discovery

Biology II: Evolution of Life
Recombinant DNA Technology
Conservation Biology
Biology of Communication

Biology III: The Cellular Basis of Life
Botany
Histophysiology
Ecological Concepts and Methods

Biology

Chemistry

The Chemistry Department offers Chemistry and Biochemistry degrees, which are interdisciplinary in nature and deal with the composition, properties, and interactions of substances. They employ techniques from mathematics and physics and have applications in all of the sciences and engineering. The Chemistry degree is typically viewed as having five major areas: analytical, biological, inorganic, organic, and physical. The chemistry major at Trinity is structured to provide a balanced presentation of these areas. The Biochemistry degree is also structured to focus on learning in these areas but also emphasizes the biological sciences and biological chemistry.

Courses

Chemistry for Non-Scientists
Archaeological Chemistry
Analytical Chemistry
Methods of Chemical Analysis
Nuclear Magnet Resonance

Introductory Chemistry
Forensic Chemistry
Organic Chemistry
Inorganic Chemistry
Environmental Toxicology

Environmental Chemistry
Food Chemistry
Physical Chemistry
Physical Biochemistry

Science in Art
Origins of Life
Neurochemistry

Classics

At Trinity, the Classics are studied for one simple reason: the cultures of ancient Greece and Rome represent a continuum of which we - and our civilization - are a part. Together they form the axis of the humanities. Trinity's Classics Department - one of the College's oldest - offers the kind of comprehensive study of classical languages, literature, philosophy, art, and history that ordinarily is found only at much larger universities, while at the same time providing the individualized attention that is available only at a smaller school. Recently introduced courses in archaeology add a powerful new dimension to the Department, and because the study of classics intersects the academic areas of philosophy, history, political science, economics, sociology, literature, and art, Classics majors enjoy a broad and stimulating exposure to the liberal arts, which prepares them well for life after college.

Courses

Elementary Greek	Elementary Latin	Classical Art and Archaeology	The City of Jerusalem
Homer	Greek Tragedy	Spectacles of Power in the Age of Nero	
Celtic Britain and the Romans		Catullus & Elegiac Poets	

Faculty

Department Chair: Martha K Risser		
Michael J. Anderson	Peter Mazur	Michael J. Mordine

Computer Science at Trinity is a small, cohesive department offering a close working relationship between faculty and students, both in and out of the classroom. The department has been able to react quickly to the latest developments in computer technology by introducing new languages and systems in both elementary and advanced classes. Students in computer science classes have numerous opportunities for developing Internet skills and have access to state-of-the-art workstations.

Courses

Senior Project Computational Biology
High-Performance Computing
Computing Artificial Intelligence
Languages Systems Software
Topics Application
Computation for Humanity

Software Development
Database Fundamentals
Analysis of Algorithms
Computer Graphics
Open Source Software
Mathematical Foundations of Computing

Discrete Math & Computer
Compiler Theory Distributed
Foundations of Programming
Principles of Software
Internet Computing

Labor Economics
Quantitative Economics
Basic Economic Principles
Econometric

Economic Systems and Development
Money and Finance
Social Policies and Economic Research
Microeconomic Theory
Studies in Social Policy and Economic Research

Intl Economics
Public Policy Issues
Independent Research
Macroeconomic

The world of economics encompasses fundamental institutions and activities that govern “economic” outcomes—prices of goods, the amount of private and public investment, the wealth or poverty of nations and persons, unemployment rates, the structure of organizations, the benefits and burdens of globalization and trade, the quality of the environment and health care, etc. We use this way of thinking to understand how different institutions promote or retard growth, the effects of differing monetary and fiscal policies, markets for health, labor, environmental goods, investments and invention, financial assets, trade; yes, even sports and art.

Educational Studies

The interdisciplinary major enables students to integrate knowledge and research methods from several academic disciplines into a focused examination of the field of education. It provides opportunities for students to analyze the learning process, the organization of schooling, its links to broader contexts, and the potential for change. The interdisciplinary major is not a teacher certification program. Rather, it is designed for students who seek a richer understanding of education grounded in the liberal arts, whether they aspire to become educators, researchers, or policymakers, or simply in their role as informed citizens. In addition to core courses taught by Educational Studies faculty, the major draws upon selected offerings by participating departments and programs, such as Psychology, Sociology, Anthropology, Philosophy, Political Science, and Theater and Dance. Students also learn through field experiences offered in cooperation with Hartford-area schools, educational centers, and campus-community initiatives such as the Learning Corridor.

Courses

Analyzing Schools
Multiculturalism & Ethnicity
Immigrants and Education
Higher Education in America

Schooling in America
Gender and Education
Latinos in Education
Special Education

Anthropology and Education
Education Reform: Past and Present
Cities, Suburbs, and Schools
Race, Class, and Educational Policy

Engineering

Trinity College has been committed to engineering instruction for over one hundred years, offering civil and mechanical engineering courses as early as 1856. Today, Trinity is one of just a few highly-selective liberal arts colleges that offers three degree paths in engineering: an ABET-accredited Bachelor of Science degree, a Bachelor of Arts degree, and an M.S. in Electrical Engineering or Mechanical Engineering from the Rensselaer Polytechnic Institute through Rensselaer at Hartford after an additional year. These degrees prepare students for careers in industry and for further study in engineering graduate programs or post-graduate schools of law, medicine, and business.

Courses

Principles of Flight	Linear Circuit Theory	Mechanics	Automatic Control Systems
Neural Engineering	Thermodynamics	Fluid Mechanics	Architectural Drawing
Heat Transfer	Electrophysiology	Design Seminar	Intro. to Engineering

In the English Department at Trinity College, faculty and students collaborate closely together as they explore a wide range of literary forms, genres, and media from an equally wide range of periods and cultures. We are proud of our faculty members, who are actively publishing scholars and artists as well as dedicated teachers and mentors. And we are equally proud of our students, who work hard alongside the faculty to discover meaning in literary texts and to express ideas, images, and arguments in well-honed, well-crafted writings of their own. Trinity English majors have become award-winning novelists, poets, and playwrights as well as lawyers, doctors, professors, editors, and marketing specialists.

Courses

Writing Creative
Research Writing
Global Short Fiction
The Art of the Essay Writing

Writing History of Drama
African American Lit.
Gender Race & Ethnicity
Contemporary Black Women Writers

Expository Writing
Victorian Lit.
American Fiction

American Lit.

Caribbean Dramatic Lit.
19th-Century British Romance

Environmental Science

Trinity College's location in the capital of Connecticut offers a wide range of opportunities for the study of a complex urban environment and direct contact with city, state, and federal regulatory agencies. Although many people equate environmental science with the natural world, most humans live in metropolitan areas. These areas have a tremendous impact on the environment: energy, water, food, housing and transportation. The urban focus of the Environmental Science program is enhanced by the Trinity College Field Station, located about 45 minutes east of Hartford in Ashford, Connecticut, in a rural community. Its woods, fields and a river provide an ideal location for biological and geological studies and for comparative rural and urban studies.

Courses

Geographic Information Systems
Wildlife Issues in a Changing World
Advanced Seminar in Env. Science

Honors Research
Field Study in Environmental Science
Research in Env. Science Library

The Earth's Climate
Methods in Env. Science

We believe historical study is simultaneously about self-discovery and discovering the world. We strive to cultivate giftsof empathy , moral imagination, and critical understanding; to give students insight into human situtations fardifferent from their own; and, we hope, to help students decide where they want to go both in their lives and their learning , and then to develop their power to get there.

History

We live in a world of interdependent parts. Shared dilemmas and challenges tie together all the peoples of the world. If we are to participate in our global culture, a sophisticated understanding of peoples, cultures, political systems, intellectual disciplines, and technologies is vital. Trinity encourages International Studies majors to pursue some form of practical exposure through foreign study. An appropriate and enriching foreign study program may be designed with the help of your faculty adviser and the Office of International Programs. Trinity, in addition to its own campus in Rome and consortial study program in Spain, has established informal relationships with a number of other American colleges and universities offering accredited programs in over 20 locations, including Argentina, China, the Czech Republic, Denmark, France, Germany, Greece, Hong Kong, Italy, India, Israel, Japan, Nepal, Russia, Great Britain, and Australia.

Courses

International Studies

Jewish Studies

Jewish studies is a multi-disciplinary, College-wide investigation of Jewish civilization in its many historical and geographical manifestations. The scope of the Jewish studies curriculum covers Jewish civilization from its ancient Near Eastern origins through its contemporary history and culture in Israel and the diaspora communities around the world. It is a secular, academic program with diverse, cross-cultural emphases.

Courses

Modern Israeli Literature and Jewish
Modern Israeli Culture
Jewish Issues in Western Music
Jews Among the Greeks & Romans
Sects and Texts

HeritageThe Re/Invention of the Jewish Bible
Gender and Identity in Jewish Experience
Anti-Semitism in the Ancient World
The Making of American Jews

Language & Culture Studies

The Department of Language and Culture Studies offers students a wide variety of opportunities for communication and intellectual stimulation beyond the typical classroom setting. The one-on-one relationships that develop between student and professor, between student and student, and between student and other speakers of foreign languages are benchmarks of the program and an enduring source of personal and professional satisfaction. Student clubs feature practical exposure to foreign languages in a fun and relaxed atmosphere. Trinity has majors in seven principal modern languages - Chinese, French, German, Italian, Japanese, Russian, and Spanish - as well as studies in Arabic and Hebrew. Our distinguished faculty provides instruction at all levels, from elementary classes to advanced courses in literature and other cultural aspects of the chosen language. The curriculum in Language and Culture Studies is not limited to courses in language, but also includes a rich array of classes, taught in English, focusing on topics such as the civilization and literary traditions of foreign cultures.

Courses

Arabic	Chinese	French	German	Modern Hebrew	Spanish	Italian	Japanese	Portuguese	Russian
Intro Linguistics & Lab			Introduction to Cultural Analysis			Foundations of Literary and Cultural Analysis			
St Petersburg: Russian Culture			Cancion			Iberian and Latin American Film and Conversation

The Department of Mathematics at Trinity is committed to providing a superior education in mathematics within the context of a liberal arts college. The quality and scope of the curriculum in mathematics at Trinity are comparable to those available to undergraduates at larger colleges and universities, and faculty are dedicated to providing the individual attention necessary to ensure that each student - regardless of major - has ample opportunities for intellectual growth. In particular, students who major in mathematics can avail themselves of a wide range of regularly offered courses and can also take advantage of department members' willingness to supervise independent studies and tutorials in various areas of mutual interest.

Courses

Statistics
Mathematics for the 21st Century
Cityscape: Analyzing Urban Data
Judgment & Decision Making
Mathematics of Equity

Calculus
Probability
Analysis
Earth Algebra: Modeling Our Environment
Mathematics of Games and Gambling

Mathematics

Trinity College's Music Department is a place to make music and to learn about it; to practice, perform, study, and create. The teachers in the department have made this an environment where making music, thinking and talking about music, and understanding music are taken seriously; and a place where commitment to high standards is matched by a concern for developing the talents of each individual student. As a group, Trinity's Music faculty offer their students a curriculum designed to foster a comprehensive understanding of both the theoretical and practical aspects of music in all its forms - Western and non-Western alike. Course offerings range from performance to academic classes, from Medieval music to modern sounds, from Beethoven to rap to samba. Students majoring in Music at Trinity are required to complete courses in music theory, history of western music, and world music; a guided elective chosen from one of three special topic areas; an advanced course at the 400 level; three elective courses; and musical performance.

Courses

Basic Musicianship	Trinity College Choir	Concert Choir	Instrumental Ensemble	Jazz Ensemble
Samba Ensemble	World Music	Women in Music	Music of Black America	
American Popular Music	The Birth of Modernism	Music, Gender, & Society		
Beethoven: His Life and Music	Jazz: 1900 to the Present	Song and Songwriting		
World Music Ensemble: Javanese Gamelan		Italian Music of the Renaissance and Baroque		
Diatonic Harmonic Practice		Conducting and Orchestration		

Faculty

Department Chair: Gail H Woldu				
Kristopher D. Allen	Nancy A Curran	Eric A. Galm	Douglas B Johnson	Christine Melson
Gerald Moshell	John Platoff	Dan Roman	John Rose	

Music

Neuroscience

Neuroscience is a broad, multidisciplinary field concerned with the nervous system, its components, and functional activities, including behavior and consciousness. How do nerve cells function and develop, and how do they communicate? How do brains work, and how have they evolved? What is the nature of consciousness, and the neural basis for behaviors and for human brain dysfunction? These are among the many questions being answered by contemporary neuroscience. Neuroscience at Trinity involves faculty from the Departments of Biology, Chemistry, Engineering, Philosophy, and Psychology. The major is designed to give students a fundamental grounding in the sciences, and the flexibility to direct their studies towards biological, behavioral, and cognitive aspects of neuroscience. A major in Neuroscience can lead to a career in scientific research, the health professions, education, business, law, or government. The Trinity major also prepares students for further study in graduate school and medical school.

Courses

The Brain	Nervous Connections	Principles of Neuroscience	Clinical Neuroanatomy
Psychobiology	Fundamental Neuroanatomy	Current Issues in Neuroscience	Neurochemistry
Neurophysiology	Cellular and Molecular Neurobiology	Chemistry of Neurodegenerative Diseases	

Faculty

Department Chair: Sarah A Raskin			
Chris Swart	Robert S. Astur	David N. Ruskin	Daniel G Blackburn
J. Harry Blaise	Joseph D Bronzino	William H Church	Kent D Dunlap
Hebe M Guardiola-Diaz	Dan Lloyd	William M. Mace	Susan A. Masino

Philosophy

According to the presocratic philosopher, Thales, widely regarded as the first philosopher, "The most difficult thing in the world is to know thyself." That recognition and challenge has inspired philosopher throughout the history of philosophy to pursue that most difficult of challenges, self-knowledge. It is no exaggeration to say that the history of philosophy has been informed by that challenge. Not surprisingly, widely different, sometimes even incompatible responses have been offered to that challenge by the greatest philosophers. To understand both the profound plausibility and the great difficulty of some of those responses is the beginning of our own quest for self-knowledge. That is why at the Philosophy Department at Trinity strongly emphasizes the history of philosophy as the beginning - but only the beginning - of a philosophic education.

Courses:

Intro. to Political Philosophy	Symbolic Logic	Persons & Sexes	Existentialism
Prostitution & Pornography	Business Ethics	American Philosophy	African Philosophy
Concepts of Madness	Jewish Mysticism	Philosophy of Sports	Theory of Knowledge

Erik Vogt

Physics

Have you ever wondered why, when you clap your hands in a tunnel, the sound echoes the way it does? Have you noticed how cars in the movies explode in the most improbable, seemingly incombustible situations? Christopher R. Koning '02 says he can't help being curious about such things. And ever since he became a Trinity physics major, he has been happily learning the theories, gaining the hands-on laboratory experience, and developing the analytical tools to, as he puts it, "figure out how stuff works." Using such tools as analyzers of nuclear decay, lasers, and powerful microscopes that operate on the atomic scale, the physics department at Trinity shows students that, in the words of Professor of Physics Mark P. Silverman, "the universe is comprehensible and worth comprehending."

Courses

Principles of Physics
Stars & Galaxies
Frontiers of Physics

Environmental Physics
Mechanics & Heat
Geophysics

Relativity & Quantum Physics
Statistical Physics
Mathematical Methods of Physics

Optics & Modern Physics
Energy & Society

Faculty

Department Chair: Mark P Silverman

Christoph Geiss

Political Science

At Trinity, the study of Political Science is much more than an academic window into the distant forces that shape our world. Here, Political Science is infused with the vitality inherent in three-dimensional study and firsthand experience. Trinity's faculty encourage and advise students across the disciplines, and the Political Science curriculum is designed to provide majors with the larger context – an understanding of the complexities that mark life on this planet. Integral to this vision is an appreciation for the evolution of political ideas that have molded human events, institutions, and systems; the sources of conflict among local, national, and international groups; and the political techniques employed to resolve such conflicts. Key to gaining that appreciation is a strong grasp of the three areas the Department defines as subfields: American Government and Politics; Comparative and International Politics; and Political Theory.

Courses

American National Government
Political Philosophy
Politics and Film
Politics of Developing Countries

Comparative Politics
Formal Organizations
Urban Politics
World Poverty

Intro. to International Relations
Separation of Church & State
Politics & The Internet
International Law

Because Trinity College's Psychology Department is large enough to offer its students a wide range of courses - from psychobiology to clinical psychology - yet small enough to allow undergraduates to pursue their own research interests. The Department's outstanding faculty take full advantage of Trinity's location in a capital city by encouraging internships in the many businesses, health care institutions, or government agencies to which Greater Hartford is home. It is just such experience - in combination with a strong liberal arts education - that prepares Trinity psychology majors for a variety of future paths, from counseling youths, teaching psychology at the college level, managing a research project on early childhood, to directing the patient relations department of a major teaching hospital.

Courses

Intro Cognitive Science

Drugs and Behavior

Achieving Quality and Integrated Education

Psychology of Human Sexuality

Psychosocial Perspectives of Asian Americans

Artificial Intelligence

Psychology of Aging

Health Psychology

Perception

Learning and Memory Laboratory

Stereotypes, Prejudice, and Discrimination

Neuropsychopharmacology

Adolescent Psychology

Psychology

The Public Policy and Law major is an interdisciplinary program in which students learn and practice methods and modes of thinking required to understand and become actively engaged in the analysis of legal and public policy issues. Grounded in the liberal arts, the program provides students with the tools of analysis in social science, law, and the humanities needed to understand the substance of public policy concerns. Trinity College is a particularly appropriate place to study public policy and law because students have ready access to state, regional and local governments, as well as to lobbyists and numerous non-profit and advocacy organizations involved in the making of law and policy.

Courses

- | | | | |
|---|----------------------------|---|--------------------------|
| Introduction to Law | Judgment & Decision Making | American Public Policy | Art and the Public Good |
| Media & Public Policy | Public Economics | American Legal History | Law & Environment Policy |

Public Policy & Law

Religion

As a student of Religion at Trinity, you learn to develop and exercise a respectful and open attitude toward a variety of beliefs and practices among the peoples of the world. You are challenged to learn critical thinking in order to separate the "wheat from the chaff," the substance from the superficial, not only in the discipline itself, but in all of life's endeavors. You study many religious persuasions; Tibetan Buddhists, Swiss Calvinists, French Catholics, Irani Muslims, while maintaining an enlightened balance between understanding and acceptance. Religion as a major engages you in studies of history, literature, philosophy, science and economics.

Courses

Jewish Tradition	Biblical Tradition	Sanskrit Tutorial	The Asian Mystic
The Religion of Islam	Hinduism	Roman Catholicism	Eastern Orthodox Tradition
The Apocrypha	Religion & Public Life	The Survival of God	Conflict & Belief
Atheism & the Eclipse of Religion	Myth, Rite, and Sacrament	Journey to Heaven & Hell	
Religion & Social Change in the Modern Middle East		Magic, Possession, and Spiritual Healing	

Faculty

Department Chair: Frank Kirkpatrick			
Leslie G. Desmangles	Gary Dorrien	Ellison Banks Findly	Ronald Kiener
Seth L. Sanders	Mark R. Silk	Andrew H. Walsh	Homayra Ziad

Sociology

*if you define a situation
as real
it will be real
in its consequences*

W.I. THOMAS

Sociology, broadly defined, is the "study of social life, social change, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations, and societies, and how people interact within these contexts." Trinity students are attracted to Sociology for all kinds of reasons. A curiosity about how society works or a concern about social issues will bring a student to the major. Taking one of the Department's introductory-level courses on a topic such as the family, social problems, race and ethnicity, or world population often leads a student to pursue further study in Sociology. The desire to work with people, families, community organizations, or societal institutions often prompts students to major in Sociology. Wherever they go and whatever they do, Trinity Sociology majors share common strengths: the ability to organize and interpret data, and the ability to analyze human behavior and social structures - processes fundamental to success in virtually every life pursuit.

Courses

World Ethnography	Sociology of the Indian City	Social Problems in American Society
Sociology of Health & Illness	Doing Sociological Field Work	The Sociology of Globalization
Family and Society	Social Class and Mobility	Reproduction, Birth, and Power
Urban Sociology	Society, State, and Power	Corporations and Communities
Research Methods in the Social Sciences

Trinity's Studio Arts Program offers a rich and diverse studio art curriculum within a liberal arts environment. Courses are well defined and rigorous, with emphasis on personal growth and introspection, as well as the development of technical mastery through experimentation and innovation. The Program equips majors with substantial expertise in the primary media, the ability to identify and define content, and a solid grounding in the history of art. Trinity's Studio Arts majors receive the training and inspiration necessary to enhance their future educational and professional endeavors. Trinity's Studio Arts facilities allow students to explore new technologies as well as classical media. As they advance through the major, students work in their own studio space. The Broad Street Gallery serves as a venue for student exhibits as well as Senior Thesis exhibitions and gives students hands-on experience with preparing and mounting professional art exhibitions. Graduating Trinity Studio Arts majors may apply for the Fifth Year Fellowship. Fifth Year Fellows receive a stipend and remain at Trinity during the academic year following graduation. During that period, they manage the Broad Street Gallery, serve as mentors to other Studio Arts students, and assist the Fine Arts technician. They are provided with a studio space on campus and are encouraged to build up a consistent body of work beyond their senior thesis and to apply to graduate school.

Courses

Studio Arts

Students in the Theater and Dance Department at Trinity experience what it means to be a performing artist engaged in creative work in both the studio and on the stage. Our innovative cross-disciplinary curriculum integrates theater and dance and explores contemporary directions in performance. The curriculum links the study and practice of the individual disciplines of theater and dance as well as exposes students to the history, theory and philosophy of performance. Students have an opportunity to engage in a diverse range of performance opportunities and to take advantage of the artistic resources of the city of Hartford and beyond. Students are encouraged to investigate the ways in which performance relates to other arts disciplines and to history, philosophy, religion, science, technology and more. Theater and Dance at Trinity is an opportunity to discover the connection between you the artist and the world around you.

Courses

Basic Acting	Elements of Movement	Theatrical Performance	Ballet
Improvisation	Production Tech	Narrative & Performance	Indian Dance
Costume Design	Writing for Film	Politics & Performance	Playwrits Workshop
Dance History	Shakespeare	20th Century European Drama	Dance & Music

Women, Gender & Sexuality

The program in Women, Gender, and Sexuality takes gender and sexuality as its critical terms of inquiry, exploring them as social constructs and analyzing their impact on the traditional disciplines. The program draws on the liberal arts and sciences to examine a wide range of topics relating to gender and sexuality, including women's varied experiences in different historical periods and cultures, as well as their contributions to culture in all its forms; the relationship among sex, gender, and sexuality; lesbian, gay, and transgender subcultures, and their histories and politics; and the institutional and discursive regulation of gender and sexuality. Recognizing that gender and sexuality cut across most fields of knowledge and that race, class, and nation are crucial components of gender and sexual identities, the program has both an interdisciplinary and cross-cultural focus.

Courses

Sex Gender and Power	Homosexuality & Hollywood Film	History of Sexuality
Drink & Disorder in America	American Women Artists & Cold War Culture	Feminist Economics
Gender & Education	Sexual Orientation & the Law	Women in Sports
Western Feminist Thought	Contemporary Black Women Writers	
Gender & Multiculturalism in Trinidad and Tobago

community

The Outing Club

The Trinity College Outing Club provides a wide variety of outdoor activities, including winter camping and climbing, rock climbing, cross-country skiing, and hikes. It also runs special trips, such as a downhill ski week, tubing, scuba diving, and wind surfing.

Biology Club

The Biology Club encourages interaction among students with an interest in biology, and faculty of the Biology Department, and other biologists from outside the Trinity Community. The Biology Club sponsors lectures, field trips, and social events.

Shotokan Karate

The Trinity Shotokan Karate Club is dedicated to the study and teaching of traditional Shotokan Karate-do. Shotokan Karate-do is a traditional martial art from Japan. Utilizing all parts of the body, karate training increases strength, speed, stamina, coordination, reflexes, and balance. It is the ultimate art of unarmed self-defense.

Accidentals

The Accidentals were founded in 1993 as an all-male Accapella singing group. Their repertoire includes classis rock, R&B, Barbershop, Jazz and Pop. The Accidentals pride themselves on high quality original arrangements and musicality. The group has rehearsals five days a week with many performances throughout the year both on and off campus.

Mock Trial

Dischord

The Dischords are Trinity's newest co-ed a cappella group, which has been hoppin' and boppin' since 2005. Their repertoire of original and unique arrangements are constantly growing. They sing a wide variety of music ranging from old classics to the soulful one-hit wonders of the 80's to contemporary hits of today and tomorrow.

Hillel

Hillel is an organization to bring together students in an open forum who wish to discuss issues dealing with Judaism. Also an outlet to facilitate the observance of Jewish holidays and practices.

The Quirks are Trinity's newest all-female a capella group. Founded by two students in 2003 as their Tutorial College project, today the group consists of 14 members. The Quirks' repertoire includes close harmony arrangements of a wide range of musical genres, including jazz, rock, R&B, and pop

The Quirks

MSA Muslim Student Association

MSA provides support, services, and advocacy for the Trinity Muslim community. MSA serves as a bridge to promote understanding and good will between religious and cultural organizations in the greater Hartford area. MSA also strives to establish a forum whereby all students and the greater community can learn about the Islamic faith and way of life.

AASA was created to provide a sense of community to Asian and Asian- American students and others interested in Asian cultures. AASA attempts to promote awareness of the Asian cultures to the Trinity community.

AASA **Asian-American Student Association**

ACES **Annual Community Events Staff**

Each year, ACES, a group of about 20 students, works to put together well-known, annual events such as Halloween on Vernon Street, the Spring Auction, Souper Bowl, Sponsor a Snowman, and Do-It-Day. These mostly one-time projects take long term planning.

The Trinity Pipes are a small, coed singing group founded in 1938 by four men from St. Anthony Hall. The group enjoys singing a wide variety of music from 1940s close harmony to modern pop and rock arrangements.

The Pipes variety of versatility and unique use of instruments such as guitar, string bass, and flute, distinguish them from other groups. The group has toured extensively.

CANDIOS

08 09 A Year In The Life

Headline News

Housing Crisis

The housing market hit crisis status in 2008. With the rise in unemployment, one in 10 homeowners was at least one payment behind on their mortgage or in foreclosure. Nationwide, median home prices fell more than 11 percent to \$183,000—the largest year-over-year drop on record since 1968.

Billion-dollar Bailout

The U.S. Senate sparked intense debate when it approved a \$700 billion plan to rescue Wall Street. The bailout came in response to months of retail sales decline, home foreclosures and record drops in the stock market (dropping 777 points on September 29). Worldwide \$30.1 trillion of global stock market value was lost.

Americans Ditch Cars

With a recession in full swing and commuters concerned about record gas prices, drivers traded their cars for bikes. The Federal Highway Administration reported that Americans drove 9.6 billion fewer miles over the previous year. With consumers buying fewer cars, the big three American automakers felt the pinch. Seeking relief, they asked for and received a \$13.4 billion piece of the federal bailout originally intended for Wall Street.

Hurricane Ike Hits Texas

Thousands of residents evacuated coastal and inland areas of Texas in preparation for Hurricane Ike, which turned out to be the third most destructive hurricane ever to hit the U.S. The early evacuation efforts (put in place after Hurricane Katrina) undoubtedly saved thousands of lives.

Energy Independence

The U.S. Congress agreed with President Bush's decision to lift the almost 20-year ban on offshore drilling operations. The high price of crude oil as well as the strategic importance of energy independence led to the decision.

U.S. Troops

After more than five years of war, plans to reduce the presence of U.S. troops in Iraq were moved forward. A new agreement between U.S. and Iraqi officials was ratified, outlining the withdrawal of U.S. troops by 2011. At the same time, in Afghanistan there were 31,000 U.S. troops, and that number is expected to double in 2009.

Cleared for Takeoff

It's official—Delta bought Northwest Airlines for \$3.1 billion, creating the world's largest airline. The combined new airline now serves more than 390 destinations in 67 countries. It is expected to generate about \$35 billion in yearly revenue and employ 75,000 people.

Winning against Cancer

New diagnoses and deaths from cancer both fell for the first time in the U.S. according to the National Cancer Institute's 2008 report. The overall death rates fell for the most common cancers, dropping .08 percent annually from 1999 to 2005 for both men and women. While overall cancer rates decreased, lung cancer remains a concern in the Midwest and the South. Both areas have yet to adopt anti-smoking laws that ban smoking in public places or to increase taxes on cigarettes.

Crisis in Gaza

The long-standing conflict in Gaza rose to war when hundreds of civilians lost their lives and thousands were injured in airstrikes and mortar shell attacks waged separately by the Israeli military and Hamas militant groups. Hamas is listed as a terrorist organization by the U.S. and many other Western nations. In January 2009,

Israel withdrew its troops and the Hamas groups declared a cease-fire, ending the three-week war; however tensions between the two sides remain high.

Obama Elected 44th President

In a historic moment, 47-year-old Barack Obama, a freshman senator from Illinois, became America's first African-American president. In addition to shattering 200 years of history, he became the fifth youngest president ever when he was sworn in to office on January 20, 2009. In his inauguration speech, President Obama delivered a message of bipartisan hope and expectation to a crowd of over one million people in Washington D.C. and to millions more via television and the Internet.

Cease Fire

Following a short yet destabilizing conflict, the governments of Georgia and Russia signed a U.S. brokered cease-fire, which required all Russian troops to withdraw to their pre-invasion positions. The invasion was in response to Georgian suppression of Russian supported separatist rebels in the breakaway region of South Ossetia.

Earthquake Rocks China

A 7.9 magnitude earthquake rocked southwest China leaving 4.8 million people homeless. More than 60,000 people were injured while over 20,000 people lost their lives. To help rebuild the livelihoods, schools and basic services the area needs, several United Nations agencies have set up continuing operations in China.

Prepared for Landing

In January 2009, US Airways' Pilot C.B. "Sully" Sullenberger prepared for impact less than 90 seconds after taking off from LaGuardia International Airport in New York, as Flight 1549's engines went out after hitting a flock of birds. The pilot decided the safest place to land was in the icy waters of the Hudson River. Pilot Sullenberger's skill and quick response saved the lives of all 155 passengers.

Adventurer to the End

Almost 13 months after adventurer Steve Fossett disappeared in a single-engine plane over Nevada and a year to the day since the search was called off, hikers found his airplane and remains in the Sierra Nevada Mountains. Fossett holds many world records including being the first person to fly solo nonstop around the world in a hot air balloon.

Mumbai Targeted

Over three days in November, India's city of Mumbai was attacked by terrorists, allegedly backed by a Pakistani-based Islamic militant group. Over 160 people lost their lives in the planned attack which targeted India's financial center.

Goodnight Nighthawk

After three decades of exemplary service as the first aircraft in history to successfully make use of stealth technology, the F-117 Nighthawk was retired at a private military ceremony. The "Stealth" gained notoriety through now famous camera footage of its precision performance in Desert Storm in the early 1990s.

Myanmar Devastation

A massive cyclone hit the small country of Myanmar in May 2008, tallying an eventual death toll of over 100,000 people. The military government of Myanmar initially refused foreign aid and asserted that it could handle all relief and rescue efforts. According to International Red Cross reports, the lack of immediate international support most likely cost thousands of lives.

An Election to Remember

The nation witnessed several history-making events during the 2008 presidential election.

Alaskan Governor **Sarah Palin** became the first female Vice Presidential candidate for the Republican Party.

New York Senator **Hillary Clinton** made a run at America's number one seat as a candidate in the Democratic primary. After withdrawing from the race, Clinton went on to accept the role of Secretary of State in President Obama's administration.

Voters turned out in record numbers with over 133 million Americans showing up at the polls. Social networking websites like YouTube, MySpace and Facebook played a major role in yielding the highest turnout in 40 years.

President Obama's inauguration was visible from space. Satellite images showed the record-breaking 1.8 million people gathered on the National Mall in Washington, D.C. to be a part of the historic event.

Test Your Presidential Knowledge

1. What is the name of the President's office?

- a. Square Office
- b. Oval Office
- c. Circular Office
- d. Presidential Office

2. The President often flies on a plane provided by the Air Force. What is the name of the plane?

- a. Whitehouse Air
- b. President's Plane
- c. Air Force One
- d. U.S. Force One

3. Which state has yielded the most U.S. Presidents?

- a. Illinois
- b. Texas
- c. New York
- d. Virginia

Headline News

Kennedy Diagnosed with Cancer

Senator Edward "Ted" Kennedy was diagnosed with a malignant tumor after suffering a seizure. The tumor was located in the 76-year-old politician's left parietal lobe, near the top of his brain. Recommended treatment included a combination of radiation, chemotherapy and surgery to remove as much of the tumor as could be safely done without harming the senator.

Peanut Butter Recall

An outbreak of salmonella traced to tainted peanut butter products prompted President Obama to order a complete review of the U.S. Food and Drug Administration process. The contaminated products sickened 529 people in 43 states and may have led to the deaths of nine people. King Nut, the company charged with distributing the products filed Chapter 7 bankruptcy.

Ivory Legally for Sale

For the second time in nearly two decades, ivory was offered for sale legally. According to the watchdog group CITES, the United Nations-approved ivory sales will be followed by a resting period of nine years to safeguard elephant stocks. The group reported that the elephant population has increased in recent years and the animal is no longer threatened with extinction. The amount of ivory for sale was equal to the yield from 10,000 or more elephants.

Smart Ride

Washington rolled out America's first high-tech bike-sharing program this year. SmartBikes come with key-card locking systems and tracking devices to prevent theft. Denver and Minneapolis launched bike-sharing programs in the summer, with Chicago, San Francisco, Seattle, Portland, Oregon and Arlington, Virginia making plans for the near future.

Torch Relay Ignites Protest

Thousands of protesters turned out after the Olympic torch flame arrived in San Francisco, waving flags and signs with sayings like "No human rights, no Olympics."

Protesters cited

China's actions on Tibet, its policies in Darfur and human rights violations against Chinese citizens. Around the world, similar protests delayed the torch's progress.

Clinton Endorses Obama

After 17 months of campaigning against him, Senator Hillary Clinton officially conceded victory to Barack Obama. Clinton repeatedly called on her supporters to unite behind her former opponent. Even though her campaign was not successful, Senator Clinton paved the way for a woman to win the White House in the future.

Dam in Grand Canyon Bursts

In August 2008, a remote dam in the Grand Canyon region burst, leading to the evacuation of hundreds of residents, campers and visitors. The waterlogged dam burst after a torrential rain accumulated eight inches in two days. The flooding waters poured into Cataract and Supai Canyon, washing out some hiking trails and footbridges.

Space Travel

Traveling to space is a childhood dream for many people and soon they could achieve it. Virgin Galactic, owned by billionaire Richard Branson, unveiled plans for their suborbital spaceliner. Test flights began in the summer of 2008. Tickets are being offered for an initial price of \$200,000.

In the Doghouse

Killys, a 70-pound pit bull, went for a joy ride that started and ended at an Oklahoma car wash when he was left alone in a car and accidentally slipped it into reverse. After crossing the highway and hitting a curb, the car turned and circled back to the car wash. The dog couldn't quite reach the brakes and crashed into the side of the building. No one was injured and the police officer on the scene let the bewildered dog off with a warning.

Medal of Honor

Army Master Sgt. Woodrow "Woody" Keeble was awarded the Medal of Honor nearly 26 years after his death for his heroic efforts during the Korean War. Keeble was the first full-blooded Sioux Indian to receive the honor and the 10th person to receive the medal from President Bush. Keeble's family, fellow soldiers, tribal members and four U.S. senators lobbied for years to approve the nomination.

Extreme Thin Outlawed

French lawmakers presented a bill banning the glamorization of extreme thinness. The bill recommends fines of up to \$71,000 and three years in prison for people or businesses that promote extreme thinness. If the bill passes, the law would be the strongest of its kind anywhere in the world.

Hands On

The American Heart Association announced that the "hands on" CPR method works just as well as the mouth-to-mouth technique in most cases of cardiac arrest. The announcement will hopefully encourage hesitant bystanders to step forward to provide life-saving CPR in critical situations.

Fishy Business

Beth Nudelman quickly notified officials of their mistake when she received voter registration material for her deceased goldfish, Princess. The paperwork sent to "Princess Nudelman" likely came from the Women's Voices, Women Vote project, which sent nearly 1 million mailings to Illinois households using a list that mistakenly included pets.

Smoking Genes

Scientists identified genetic variations that raise the risk of lung cancer in smokers. The research also revealed evidence to suggest that these variations could make carriers more addicted to tobacco.

Russian Blue Wins

A 1.5-year-old Russian Blue cat named Blade Runner won Best in Show at the CFA-Iams Cat Championship in New York. Over 248 cats in 41 breeds competed for various honors throughout the event. Blade Runner became the first Russian Blue to win the title.

Warm the Heart

A recent study suggests that people view others more positively when they're holding something warm, like a cup of coffee or cocoa. The experimenters suggest that the connection between heat and emotion is a result of early associations in childhood.

Pirates Hijack Tankers

In the largest modern-day case of piracy on the high seas, pirates seized a massive Saudi-owned oil supertanker loaded with crude oil and carrying 25 crew members off the Kenyan coast. The hijacking was one of several attacks this year by Somali pirates seeking ransoms. After taking over the vessel, the pirates took it to a Somali port that has become a haven for bandits and seized ships.

Economic Ups & Downs

With the economy in turmoil, unemployment rose to 7.2 percent. More than 2.6 million jobs were lost in 2008, the highest number since World War II.

Starbucks, the reigning king of coffee, announced that it would close 600 stores. With increased competition from McDonald's and Americans making financial sacrifices, the coffee chain faced an uncertain future.

Despite economic instability, Google chose to keep employee perks, like ping pong and free lunches, as other companies slashed costs and benefits. Google maintains that their laid-back atmosphere leads to devoted and focused employees.

Many teens were not troubled by the economic crisis. In a survey of 769 high school students, 8 percent owned an iPhone and 22 percent expected to buy one in the next six months.

Test Your Election Knowledge

1. A third party candidate won the presidential election in 1984.
True or False
2. How many electoral votes are necessary to win the presidential election?
a. 270 b. 51
c. 1776 d. 102

3. Your right to vote can be taken away.
True or False

Answers: 1. False 2. a 3. True

Planet Earth

Teens Take Title

A high school team from Mater Dei High School in Evansville, Indiana beat out students from 23 universities to take the Shell Eco-marathon grand prize for designing, building and driving a vehicle that went the farthest distance using the least amount of fuel.

The three-wheeled combustion engine car achieved an amazing 2,843.4 miles per gallon. The students won \$10,000 for their invention.

Bird, Mammal or Reptile?

One of the most curious animals on the planet, the platypus, has a duck's bill, mammal fur and snake-like venom. Scientists mapped its genetic makeup, which indicates that this strange looking creature is, in fact, a little bit of all three—bird, mammal and reptile.

Earth Invades Mars

Usually we think of Martians invading Earth but it looks like Earthlings will make contact first. In May 2008, NASA's Phoenix Lander arrived on Mars and for the first time discovered ice on the Red Planet.

Trash to Gas

The high price of gas in 2008 put a spotlight on the study of alternative fuel sources. In America, at the University of California at Davis, engineers repurposed table scraps into bio-gas. In similar studies in the United Kingdom and Japan, jellyfish, spoiled milk and confectionary waste were all given new life as alternative fuel sources.

Run Green

Did you know that a running shoe can last 1,000 years in a landfill? Brooks® has designed a shoe that reduces your carbon footprint—literally. The shoe features a new kind of midsole called BioMoGo, which degrades 50 times faster than a standard running shoe. Brooks® estimates that its green footwear will reduce 30 million pounds of landfill waste over a 20-year period.

Ancient Sea Creature Discovered

A new group of plesiosaurs, a reptile species that swam in ancient seas, was discovered in North America. The plesiosaurs roamed during the Jurassic and Cretaceous periods—about 65-205 million years ago. This find represents one of the oldest and most complete skeletons of a prehistoric aquatic reptile ever discovered in North America.

Shipwreck Treasure

Geologists searching for diamonds off the coast of Africa discovered a treasure far more rare—a shipwreck loaded with gold and silver coins, as well as ivory and cannons used to fend off pirates. The ship is thought to be around 500 years old, dating back to the time of Vasco de Gama and Christopher Columbus.

Farms of the Future

In the future, farms could rise straight into the air resembling skyscrapers instead of sprawling acres of land. "Vertical" farming presents many advantages over traditional farming, mainly growing more food on less land. Currently, it takes a plot of land as large as Virginia to grow enough food for approximately 8 million people.

Sustainable Dave

Cameraman Dave Chameides embarked on a study to reduce waste. To showcase his effort he saved all of his trash for one year—only 30.5 lbs. In comparison, the average family throws away 1,700 lbs. of trash annually. Chameides conducts seminars and writes a sustainability blog teaching that "no one can do everything, but everyone can do something."

Stone or Glass?

Add countertops to the list of eco-friendly products. BottleStone, a Los Altos Hills company that makes ceramic stone countertops out of recycled glass, walked away with the \$100,000 prize from the CleanTech Open, a contest showcasing the newest innovations in the world of sustainability. The company said that zero emissions are created in the production of the new surface material, yet the glass countertops are as strong as concrete and cost less than marble or granite.

Tejon Ranch Protected

Conservationists and developers in California reached a historic agreement that will permanently protect the Tejon Ranch, 240,000 acres of land just north of Los Angeles. The newly protected area provides a critical habitat to many wildlife species. The strong support for environmental conservation is a sign of the times and will guarantee public access for generations to come.

Running on Air

Zero Pollution Motors, together with automaker MDI, plans to produce an affordable, environmentally-friendly car powered by air.

While it won't run like a sports car, it can reach speeds of 35 miles per hour for 60 miles on a tank of compressed air, a sufficient distance for 80 percent of consumers to commute to work and run errands. On highways, it can cruise at interstate speeds for 800 miles with a small motor that compresses outside air to keep the tank fueled. Vehicle sales are slated for 2011.

Quarter-Sized Slither

A U.S. scientist discovered the world's tiniest species of snake, measuring only four inches long, on the island of Barbados in the Caribbean. Out of 3,100 known snake species, the newly named Zootaxa snake is so small it can curl up to the size of a quarter.

Colossal Carats

A potentially record-breaking diamond, totalling 478 carats, was found in the small southern African country of Lesotho. Although not the largest diamond found to date, this particular stone is valued for having the highest possible color rating for a white diamond and its potential to produce a polished stone of over 100 carats—now that's a rock!

Super Earth Planets Discovered

Astronomers discovered 45 "super Earth" planets, indicating that one-third of all stars have a solar system in orbit with planets similar to Earth in size. Don't hold out for tiny green men, these planets orbit close to their stars (measuring mean temperatures of 354 degrees Fahrenheit) and cannot harbor life.

Elusive White Whale Spotted

A rare sighting of a white killer whale had biologists running for their cameras. The scientific team on board the Oscar Dyson spotted the nearly mythical creature off of Alaska's Aleutian Islands. According to the research biologist who snapped a photo of the animal's back and fin, it was the equivalent to finding a "needle in a haystack."

Find at Ferry Farm

George Washington's boyhood home was discovered at Ferry Farm, along the Rappahannock River near Fredericksburg, Virginia. The exciting find revealed many artifacts that could have been used by Washington while he lived on the farm from 1738-1754. Archaeologists were able to piece together the home's structure, making it possible to build a replica.

Solar Wind Source Found

With the help of images shot from the Hinode space observatory, scientists pinpointed the source of the stream of particles that make up slow solar wind. Astronomers knew where fast solar wind originated but knew little about slow solar wind. Now scientists know that it comes from the region above the Sun's equator allowing them to better understand the dynamics of space weather and solar storms.

Under the Sea

A marine survey revealed thousands of discoveries from beneath the surface of the sea, including a city of starfish and a carpet of crustaceans. The Census of Marine Life is part of a worldwide project to understand life under the sea. The census is expected to reveal important information about 230,000 known marine species and possibly identify more than 5,500 new species.

Eye on the Environment

Around the globe, evidence of climate change continued to make news.

In 2008, a 160-square mile chunk of Antarctic ice—seven times bigger than Manhattan—broke away, placing more glacial ice at risk.

Carbon dioxide is entering the atmosphere at a faster rate than plants and oceans can absorb it.

More than a million species face extinction due to climate change including the polar bear, which in May 2008 was officially added to the list of endangered species.

Some scientists warn that sea levels could rise as much as 23 inches by the century's end. Rises of just four inches could flood many South Sea Islands and swamp large parts of Southeast Asia.

Test Your Environmental Knowledge

1. How much water can you save per day by turning off the faucet while you brush your teeth?

a. 8 gallons

b. 100 gallons

c. 20 gallons

d. 50 gallons
2. If every household in the U.S. used recycled paper towels, how many trees would be saved each year?

a. 1,000

b. 544,000

c. 200

d. 200,000
3. Over one million plastic bags are used per minute worldwide.

True or False

Answers: 1. a 2. b 3. True

Tech Topics

Walk This Way

Discovering new ways to generate energy is a top priority. Kinesiologist Max Donelan from Simon Fraser University invented a device that harvests energy from the simple and routine act of walking. The 3.5 lbs. device wraps around each knee generating five watts of power—enough to charge 10 cell phones.

© Simon Fraser University

Large Hadron Collider

Scientists at the European Organization for Nuclear Research developed the Large Hadron Collider (LHC) that smashes atom protons together at 99.9999% of the speed of light. The \$9 billion device allows scientists to test physics theories and better understand the nature of matter. Unfortunately, nine days after its debut, the "atom smasher" suffered \$21 million in damages as the result of an electrical failure. Research is planned to resume after the repairs are completed.

© PHIL JORDAN

Get a Life-Form

It's not what "they" will think of next, but what gamers will create in their own video game experience. Spore™, the new game by Will Wright, the creator of SimCity and the Sims, allows players to design their own unique life-form and manage every aspect of its progression through centuries.

Floating Ads

Created by a company called Flogo, these new floating advertisements can take the shape of anything you want—from simple messages to images of superheroes. The "clouds" are made by combining soap-based foams with lightweight gases such as helium. The company uses re-purposed artificial snow machines to create the floating ads which last 30-40 minutes on average and don't pollute the environment.

© SnowMasters

Let's Get Chumby

The newest form of on-the-go entertainment, Chumby connects to your wi-fi to keep you up-to-date on your favorite music, podcasts, celebrity news, videos, games, photos and more. Chumby technology delivers your favorite parts of the Internet, leaving the keyboard and computer behind.

© Photo courtesy of Chumby Industries

Computer Hears

Dictation software is nothing new but Nuance's Dragon® NaturallySpeaking® 10 is the first program on the market that adjusts for the different ways people speak. The program recognizes eight accents including Australian, British, Spanish and Southern United States and

understands basic commands such as "italicize" and "search." Now if it could only do your homework.

© Courtesy of Dragon® NaturallySpeaking®

Back in the Swim of Things

Pierre, a 25-year-old penguin at the California Academy of Sciences, was losing his feathers. Without waterproof feathers penguins cannot survive the cold. An aquatic biologist created a wetsuit for him like the ones humans wear making it possible for him to join his fully-feathered friends.

© California Academy of Sciences

Cuba Gets Wired

Desktop computers, a technology that is considered a necessity in the U.S., became available to Cuba's public market for the first time ever. While few could afford the QTech computers that cost nearly \$800, electronic stores throughout Cuba drew crowds of excited onlookers.

© ENRIQUE DE LA OSA/Reuters /Landov

Superhuman Contacts

Soon you may be able to use bionic contacts to zoom in on distant objects, displaying useful facts about what you see. These super-power lenses use tiny light-emitting-diodes (LEDs) powered by solar cells and a radio frequency receiver to display images and information in midair. The invention could prove beneficial to drivers and pilots as well as video gamers by projecting directions and speed within their view, eliminating the need for external screens.

© University of Washington

Clean Keys

Seal Shield LLC introduced the world's first fully submersible, dishwasher safe, antimicrobial, glow-in-the-dark keyboard. The Silver Seal Flex™ keyboards have the potential to reduce the risk of getting sick from colds and other communicable diseases.

© STEVE MARCUS/Reuters /Landov

Going Digital

U.S. households prepared for television's final transition from analog to digital. To help consumers absorb the cost of a necessary converter box, the government issued \$40 vouchers. The Obama administration sought support from Congress to postpone the transition after the Commerce Department reached its funding limit. The request was passed by the Senate as consumers continued to prepare for the digital switch.

© JO YONG-HAK/Reuters /Landov

Off the Chain

No need to worry about pinching your finger or getting your pants stuck in a bike chain. Wisconsin-based Trek Bicycle introduced two models of chainless bikes that move using the same technology as motorcycles and snowmobiles. These bikes are low maintenance, environmentally friendly and light weight making them ideal for city commuters.

© Trek Bicycle Corporation

No Ordinary Pen

The Pulse™ smartpen developed by Livescribe is the latest "it" gadget that transforms an ordinary pen into a digital tool. The high-tech pen records what you hear or

say while writing, plays back your recordings and provides visual cues on a tiny imbedded display screen. The information can then be downloaded to your computer for easy editing.

You Play, i.play

Playgrounds in the U.K. are taking on a new look with the i.play system. This breakthrough combines interactive electronics with conventional playground equipment. The system's intelligent design adjusts according to a child's performance to keep them engaged and moving.

Goodbye Dentist Drill

It won't get you out of your yearly dental checkups, but the dentist drill could soon be gone.

Scientists began development on a formula to allow teeth to re-grow the crystals that make up dentin and enamel; materials that make teeth the strongest element in the body.

Sitting on Cloud 9

Forget sandy beaches, the British have a new way to relax: an acrylic lounger that can hover in midair. The gravity-defying chair developed by Hoverit LTD works by repelling magnetic forces producing the sensation of floating on a cloud.

High-Tech Gift Cards

Retailers went high-tech with gift cards to entice consumers. Best Buy created a card with tiny speakers and a headphone jack allowing users to listen to their favorite music, while Target® introduced a 1.2 megapixel camera gift card. Lucky recipients enjoyed two gifts in one.

Design for a Cause

Dell unveiled an exclusive gallery of artistic designs that consumers may purchase to personalize their laptop. With every sale, Dell contributes \$20 to The Global Fund, a charity helping AIDS patients in Africa.

COLOUR PANELS INSPIRON STUDIO

Bionic Hand

The world's first bionic hand was created by Touch Bionics. The iLimb's revolutionary motorized fingers have the ability to grasp narrow objects and the power to hold heavier objects like coffee cups, giving users more independence.

Test Your NASA Knowledge

Did you know? NASA celebrated its 50th birthday this year. What started in 1958 as a small laboratory with 80 employees is now an agency with more than 17,000 people in 10 centers around the country.

- NASA has focused its efforts on a return to the moon, where they intend to _____.**
 - Someday build a sustainable long-term human presence
 - Return moon rocks from previous missions
 - Have a fashion show featuring newly designed space suits
- What is the name of the Galaxy in which we live?**
 - Andromeda
 - Milky Way
 - Galactose
 - Alpha Quadrant
- Astronauts will soon be able to send and receive emails while in space.** True or False

The Auto Age

One-hundred years ago the Ford Model T was introduced. In the years to follow, vehicle technology and innovation continued to evolve.

The Model T changed the face of transportation when Henry Ford began using the conveyor belt for production, making cars affordable for the masses. Following in its footsteps came the "family utility" vehicles, the station wagon (1947), mini van (1983) and SUV (1990), accommodating the growing needs of busy families.

Hybrid technology emerged as consumers demanded fuel efficiency. Honda's Insight, the first hybrid marketed in the U.S. led the way for many other top automakers to develop their own line of gas/electric vehicles.

In the Next 100 Years, automakers plan to push automotive technology even farther by promoting eco-chic cars, electrically powered luxury vehicles for drivers who don't want to compromise strong design for environmental friendliness.

Answers: 1. a 2. b 3. True

The Scoreboard

© SHAUN BEST/Reuters /Landro

Steel-ing the Win

The Pittsburgh Steelers won a record-setting sixth Super Bowl title by defeating the Arizona Cardinals. A game-winning touchdown in the final seconds moved the score to 27-23, giving the Steelers a tension-packed last-minute win. Steelers' wide receiver Santonio Holmes was named MVP.

Double-Dutch

Double-dutch is now an officially recognized sport in New York City high schools. A year after cricket was inducted as a varsity sport, school administrators have added double-dutch as a way to increase student participation in competitive sports. Cycling, badminton and netball are also being considered.

Striking Gold at the X Games

Ryan Sheckler, the X Games' youngest street skateboarding gold medalist at age 13 in 2003, struck gold again at the 2008 Games. Female skateboard champ, Elissa Steamer, returned to claim her fourth gold medal.

© Landov

Eight is Great

Michael Phelps was the shining star of the 2008 Beijing Olympics, winning eight gold medals, breaking Mark Spitz's record for most gold medals won in a single Olympic Games. Phelps swam 17 times over nine days and broke the world record in four of his five individual swims. His three relay teams also set world records. Phelps' achievements led to Sports Illustrated naming him 2008 Sportsman of the Year plus numerous endorsements.

© LESLIE BILLMAN/A. Wire /Landro

Serena's Comeback

A backhand shot signaled tennis star Serena Williams' return to glory. With her 6-4, 7-5 victory over Jelena Jankovic at the US Open, Williams regained the No. 1 world ranking, a title she last held in 2003. The gap between achieving No. 1 world rankings is the longest in history for a woman or a man.

Racing Victories

2008 was a year of surprises in car racing, especially for Danica Patrick and Jimmie Johnson. Patrick was in the spotlight, becoming the first woman ever to win an Indy Car race. Johnson won his third straight NASCAR Sprint title, making him one of two drivers in NASCAR history to win three championships in a row in the marquee series. With his win, Johnson tied Cale Yarborough's 30-year record.

Celtics Win 17th NBA Title

The Boston Celtics won their first NBA title in 22 years. In Game 6 of the playoffs they won with a 131-92 blowout over the Los Angeles Lakers. The win was also the first for the "Big Three," Paul Pierce, Kevin Garnett and Ray Allen.

Silver Stars Shock-ed

The Detroit Shock swept a three game series over the San Antonio Silver Stars to win their third WNBA title. Katie Smith, Detroit's leading scorer in all three games, was named Finals MVP.

© MANDY WEINSTEIN/Landro

Immelman Grabs Green

Trevor Immelman overcame Tiger Woods and Phil Mickelson with a score of 75 in the final round to win the coveted green jacket at the Masters in Augusta, Georgia. Vijay Singh was the season's overall winner scoring the most points and claiming the FedEx Cup and its \$10 million prize.

© MIKE BLAKE/Reuters /Landro

Win for Shin

Twenty-year-old Ji-Yai Shin of South Korea became the first non-LPGA member to win three LPGA events with her win at the ADT Championship, marking her 11th worldwide victory in 2008. The event was bittersweet for women's golf legend Annika Sorenstam who failed to make the cut in her last official LPGA tournament before retirement.

© JIMMIE DUNN/Reuters /Landro

Tiger Tamed

After winning the U.S. Open, golf legend Tiger Woods announced that he had been playing with a leg injury. Despite his injury, Tiger played 91 holes, defeating Rocco Mediate on the 19th hole of the playoff. Woods chose to end his season early to treat his injury. The famous golfer has 65 victories; ranking third of all-time on the PGA Tour with 14 professional majors, making him second only to the record 18 won by Jack Nicklaus.

© Kyodo /Landro

Hole-in-One Times Five!

Amateur golfer Curt Hocker of central Illinois hit five hole-in-ones in one week at the El Paso Golf Club. The 22-year-old, who works in the club's pro shop, has recorded seven aces (five on par-4s) and two other double eagles in the past year. Hocker, along with his friends and family who witnessed his strokes of luck, is mystified by the repeat performances.

© JAMES MCKEY

Olympic Moments

In August, 204 countries participated in the Summer Olympic Games in Beijing, China and captured the attention of a global audience.

Opening Ceremony - At promptly 8 p.m. on the eighth day of the eighth month of 2008 (eight is considered one of the luckiest numbers in China) millions of people around the world watched the opening ceremony. The extravaganza was a mix of music, artistry and fireworks showcasing China's national pride and 5,000 years of tradition. The \$300 million event with a cast of 14,000 raised the bar for future Olympics.

Fabulous over 40

Dara Torres, 41, surprised everyone when she returned to her fifth Olympic Games with teammates nearly half her age. Torres won the silver medal in the 50 meter freestyle sprint final, swimming a personal best of 24.07 seconds, but missing the gold by just .01 seconds.

Bolt Sprints to Win

Jamaican born Usain Bolt took the track by storm with three record-setting runs which all won him gold medals. Bolt now boasts the title "Fastest Man Alive," running the 100 meter dash in 9.69 seconds.

Wimbledon Winner

The 122nd Wimbledon Championship concluded with a grand finale, when Spain's Rafael Nadal brought down five-time champion Roger Federer in the longest men's final in the history of the All England Club. Nadal's victory took four hours and 48 minutes of actual playing time.

Science of Swimming

Speedo's LZR Racer, a new high-tech one-piece swimsuit, molds a swimmer's body into an aerodynamic shape, potentially giving swimmers more buoyancy in the water. Several swimmers, including Michael Phelps, debuted the suits at the 2008 Summer Olympics.

Kickin'!

The U.S. Women's Soccer National Team captured the Algarve Cup once again, defeating Denmark 2-1 at Municipal Stadium in Portugal. The team went on to win the 2008 Peace Queen Cup with a 1-0 victory over Canada. The victory marked the second time the U.S. has defeated Canada by a 1-0 score to win the Peace Queen Cup.

MLS Cup Glory

For the first time in franchise history, the Columbus Crew became Major League Men's Soccer champions with a 3-1 win over the New York Red Bulls. League MVP Guillermo Barros Schelotto scored a Cup Final-record three assists to help deliver the championship in only his second season.

Run for the Roses

Big Brown won the 134th running of the Kentucky Derby in a final kick that gave him a 4 3/4-length victory before a crowd of 157,770, the second-largest in history. With this win Big Brown became the seventh undefeated Kentucky Derby winner in history. The victory celebration was eclipsed by a fatal injury to Eight Belles, the second place winner.

Fantastic Phillies

After 25 years, the Philadelphia Phillies' won the World Series trophy. Despite a rain-delayed game, they took down the Tampa Bay Rays 4-3 in Game 5 to win their second World Series title. The team named Cole Hamels MVP. Hamels out pitched Scott Kazmir for a 3-2 win in the opener, then tossed six effective innings before the delay, but never pitched in the final game. Hamels finished 1-0 with a 2.77 ERA in two World Series starts.

Red Wings Capture Cup

After a surprising loss in Game 5, the Detroit Red Wings made a triumphant comeback in Game 6 of the 2008 Stanley Cup Finals, winning 3-2 against the Pittsburgh Penguins. The Stanley Cup win was the fourth for the team in 11 seasons.

Test Your Baseball Knowledge

Did you know? The catchy jingle, "Take Me Out to the Ball Game," written by Jack Norworth, is 100 years old.

- Which Major League Baseball player holds the record for the most homeruns?
 - Alex Rodriguez
 - Babe Ruth
 - Barry Bonds
 - Hank Aaron
- What is the most popular food to eat at a baseball game?
 - Pizza
 - Hot Dogs
 - Peanuts
 - Cracker Jacks®
- How many Major League Baseball teams are there in the U.S.?
 - 30
 - 75
 - 15
 - 102

Answers: 1. c 2. b 3. a

Chart Toppers

Battle of the Davids

David Cook and David Archuleta were the last contestants standing in the 2008 *American Idol* Finale. Cook won the seventh season of *American Idol*, receiving 56 percent of the 97.5 million votes cast, beating Archuleta by a margin of 12 million.

Juanes Sweeps Latin Grammys

The 2008 Latin Grammy Awards was a night to remember for Colombian rocker Juanes, who took home five awards for Record of the Year, Album of the Year, Song of the Year, Best Short Form Video and Best Male Pop Vocal Album. Newcomer Kany Garcia won Best New Artist and Best Female Pop Vocal Album. Marc Anthony also walked away with the Best Salsa Album award.

AMA Winners

Chris Brown was the big winner at the American Music Awards taking home three awards including Favorite Male Pop/Rock Artist. Kanye West, Rihanna and Alicia Keys also walked away with multiple awards, while newcomer Taylor Swift was awarded Favorite Female Country Artist.

John Adams Rules

HBO ruled the 60th Primetime Emmy Awards, winning a record 13 Emmys for its hit mini-series *John Adams*. The first Emmy for outstanding host for a reality or reality-competition program was awarded to Jeff Probst of *Survivor*. *The Daily Show* with Jon Stewart prevailed as outstanding comedy series and CBS's *The Amazing Race* was named outstanding reality-competition program—both show's victories marked a record breaking six straight wins.

Mariah Moves Up

Chart-topper Mariah Carey broke Elvis Presley's record for No. 1 hits on the Billboard Hot 100 with her 18th hit single, making her second only to The Beatles. The single that broke The King's record comes from her latest album *E=MC²*—a follow up to her best-selling Grammy-winning release, *The Emancipation of Mimi*.

Moon Man Madness

The Video Music Awards gave out the famed moon man trophy to the year's top video performers. Chris Brown won Best Male Video for *With You* and Lil Wayne won Best Hip-Hop Video for *Lollipop*. Britney Spears took home three awards for her *Piece of Me* video winning Video of the Year, Best Female Video and Best Pop Video.

Black Entertainment Television Awards

The 2008 BET Awards was a night of wins for all-star entertainers like Missy Elliott, who won Best Female Hip-Hop Artist and Kanye West, who took home Best Male Hip-Hop Artist. UGK and Outkast won Video of the Year for *International Player's Anthem (I Choose You)*. Heartthrob Chris Brown snagged the Best Male R&B Artist award and Alicia Keys won Best Female R&B Artist.

Surfboard Goes to...

Gossip Girl has six more reasons (in the form of surfboard trophies) to rule the school. The Teen Choice Awards were selected based on over 30 million votes cast online by teenagers who hailed the prep-school drama as their top choice. Chace Crawford and Blake Lively each took home a Breakout Actor Award. The Jonas Brothers also took home six awards: Choice Breakout Band, Choice Male Hotties and Choice Male Red Carpet Icons, Choice Music: Single, Choice Music: Summer Song and Choice Music: Love Song.

Gone Country

George Strait took home four trophies from the 42nd annual Country Music Awards. To date he has received 22 awards, an industry record. Kenny Chesney picked up his fourth Entertainer of the Year Award, and Brad Paisley won his second Male Vocalist and fourth Music Video of the Year Award for *Waitin' on a Woman*. The night wasn't all about the guys. Carrie

Underwood, who also became the newest member of the Grand Ole Opry, snagged her third consecutive Female Vocalist of the Year Award.

Five for Feist

Singer/songwriter Feist was nominated for five Juno Awards and took home all of them, beating out Avril Lavigne and Celine Dion. Feist's awards included Artist of the Year, Album of the Year and Pop Album of the Year for *The Reminder* and Songwriter of the Year for *My Moon My Man*, *1234* and *I Feel it All*. Michael Bublé won the Fan Choice Award and Serena Ryder won New Artist of the Year.

Top 5 of 2008

Movies

1. *The Dark Knight*\$530,722,000
2. *Iron Man*\$318,313,199
3. *Indiana Jones and the Kingdom of the Crystal Skull*\$317,023,851
4. *Hancock*\$227,946,274
5. *WALL-E*\$223,719,052

(According to Box Office Mojo)

Mega Musicians

According to the *Rolling Stone* list of *100 Greatest Singers of All Time*, Aretha Franklin, the queen of soul, was named No. 1. Ray Charles, Elvis Presley, Sam Cooke and John Lennon rounded out the top five.

Academy Awards®

Slumdog Millionaire emerged the big winner of the 81st Academy Awards, picking up eight Oscars including Best Motion Picture, Best Director and Best Adapted Screenplay. Sean Penn upset sentimental favorite Mickey Rourke in the Lead Actor category, while Kate Winslet won for Lead Actress. The late Heath Ledger won for Best Supporting Actor and Penelope Cruz became the first Spanish actress to win Best Supporting Actress.

Songs

1. *Low*
Flo Rida Featuring T-Pain
2. *Bleeding Love*
Leona Lewis
3. *No One*
Alicia Keys
4. *Lollipop*
Lil Wayne featuring Static Major
5. *Apologize*
Timbaland featuring OneRepublic

(According to Billboard Hot 100)

People Award

The Dark Knight emerged as the people's favorite in the movie category, winning five People's Choice Awards including Favorite Action Movie and Favorite Superhero. Other winners included 27 Dresses for Favorite Comedy, *Heroes* for Favorite

Sci-fi/Fantasy Television Show and *The Simpsons* for Favorite Animated Comedy. Tina Fey won Favorite Funny Female Star and Ellen DeGeneres won Favorite Talk Show Host. In vocals, Jordin Sparks, Carrie Underwood and Chris Brown all took home awards.

Music's Biggest Night

Robert Plant and Alison Krauss were the big winners at the 51st Annual Grammy Awards. Plant and Krauss received five Grammys, including the night's biggest award, Album of the Year for *Raising Sand* plus Record of the Year, Best Pop Collaboration, Best Country Collaboration with Vocals and Best Contemporary Folk/American Album. The other top winners were British band Coldplay who grabbed three awards and Lil Wayne who received four awards.

Test Your Music Knowledge

1. At 14 years old, this person was the youngest to ever win a Grammy.

The Scoop

Sole Survivor

Thanks to decades of fans who have adopted Converse shoes as part of their rock-star wardrobe the company celebrated its 100-year anniversary. Converse reinvented classic designs in its Century footware collection to honor its achievement.

Text Mania

Figures show that traditional landlines are becoming a thing of the past. The cell phone is increasingly important, especially for tweens and teens whose personal style is expressed with cell phone accessories and whose communication revolves around email and text messaging. According to Neilson ratings, the average teenager texts 1,742 times per month—that's an average of 58 times per day!

Long Overdue

A library book checked out from a Tulsa, Oklahoma high school in 1947 was returned 61 years later. The book, *New World Analysis: Or, School Etymology of English Derivative Words* was discovered by the woman who had originally checked it out when she was cleaning her home. She sent the book back to the library with a note and a check for \$250 to cover any late charges.

Superhero Fans Rejoice

Forty-five years after it was created by Stan Lee and Jack Kirby, X-Men fans celebrated the 500th issue of the popular comic book. The anniversary was marked with a surprise move: the outcast heroes left their Westchester, New York mansion for San Francisco.

Tough Guys Rule

"Tough Guy TV"—reality shows chronicling the lives of men in life-threatening professions, from king crab fishermen to ice road truckers to adventurers relying on survival skills in the wilderness, is dominating the airwaves. This new genre has audiences riveted with its realism, documentary-style format and unpredictable action. The Discovery Channel's shows *Deadliest Catch* and *Man vs. Wild* are among cable TV's highest-rated unscripted series.

100 Years of FBI

Established in 1908 by the Attorney General, the Federal Bureau of Investigation started with only 34 special agents. Today, the FBI, headquartered in Washington D.C., employs over 30,000 people including more than 1,200 special agents and over 18,000 professional support staff in offices around the world.

Dark Knight Shines Bright

The Batman sequel *The Dark Knight* earned \$314 million in just 10 days, making it the fastest film to earn \$300 million. The previous record was held by *Pirates of the Caribbean: Dead Man's Chest*, which reached \$300 million in 16 days.

Thank You Mom

Mother's Day turned 100 in 2008. The U.S. Census Bureau estimates that there are 83 million mothers who celebrate Mother's Day. The National Retail Federation estimates that Americans spend \$15 billion a year honoring their mothers; however, the holiday is celebrated in 52 countries around the world.

Box Office Gold

Disney's *High School Musical 3: Senior Year* banked \$42 million in its opening weekend. The big screen sequel to the Disney Channel TV movies, starring Zac Efron and Vanessa Hudgens, beat the previous record for best opening weekend of \$27.8 million set by *Mamma Mia*.

Fabulous Fashion Finale

After a season filled with drama and over-the-top fashion, soft-spoken Portland, Oregon designer Leanne Marshall was named the winner of Bravo's hit reality show *Project Runway* hosted by supermodel Heidi Klum. Marshall beat out contestants Korto Momolu and Kenley Collins to win the \$100,000 grand prize to start her own line and the opportunity to sell her collection on Bluefly.com. The series finale was the first time in the history of the show to feature an all-female lineup.

Tina Fey Impersonates Sarah Palin

Actor and comedian Tina Fey returned to *Saturday Night Live* to portray Republican vice presidential candidate Sarah Palin. In the skit, Fey debated Amy Poehler, who played Senator Hillary Clinton. Fey's depiction of the Alaska governor generated so much attention that the real Sarah Palin appeared twice on the show.

Facebook safeguards

Social networking site Facebook added more than 40 safeguards to protect its users from cyber bullies and online predators. Precautions included banning sex offenders and limiting adult-user access to profiles of users under 18 years old.

Feathers Fly!

The first World Pillow Fight Day brought thousands of people together turning 35 cities into playgrounds. The event's intent was to promote creative uses of public spaces and the power of a shared common goal. Plus, it was a lot of fun!

Lights Out for TRL

MTV's famed countdown show, *Total Request Live (TRL)*, aired its final episode in New York City. The show debuted in 1998 and boosted the careers of superstars like Justin Timberlake, Christina Aguilera and Destiny's Child. Beyoncé gave a show-stopping performance during the show's finale.

Vacation Idol

The new *American Idol* attraction at Disney's Hollywood Studios in Lake Buena Vista, Florida is similar to the Fox singing competition—allowing theme park guests to show off their singing skills by auditioning and performing before a live studio audience.

A Toy for the Imagination

Despite all the fancy high-tech toys available, nature's own stick was inducted into the National Toy Hall of Fame this year. Toy experts selected the stick because of its versatility, natural ingredients, appeal to the imagination and it's free. More traditional inductees this year included the baby doll and skateboard.

Say Papaya

As if ice cream wasn't good enough, scientists are working on a way to make your favorite flavor extra velvety smooth. Using gelatin and papaya protein, a University of Wisconsin researcher developed an "edible antifreeze" that prevents ice crystals from forming in ice cream, so that it stays creamy and smooth with every bite.

Get Smart ... Feed the Hungry

Sixth-graders in Indiana have no shortage of motivation to learn new words. When students play a vocabulary game at FreeRice.com, 20 grains of rice are donated to the World Food Programme for each correct answer. Eight thousand miles away, students at Palwong Elementary in northern Uganda receive a nutritious lunch. The game has generated 28 billion grains of rice ... that's enough food to feed more than 1 million people for one day.

Trend Watch

This year's fashions reflected the style of the 80s. From the runway to the real world, here's a look at some of the popular trends.

Patent Leather handbags, shoes and belts added shine to outfits from coast to coast.

Skinny Jeans were paired with a variety of footwear. Girls wore them with knee-high boots, flats or platform sandals while guys wore them with tennis shoes or motorcycle boots.

Eco-wear Collections from designers and clothing manufacturers such as Levi's introduced products made from organic cotton and other earth-friendly materials.

Metallics added glamour to accessories, shoes, jeans and dresses.

Technicolor Fashion had clothes covered—from dresses, tops and leggings to jewelry, shoes and other accessories.
