Hartford, Connecticut

1823-1930

**T**RINITY COLLEGE, known until 1845 as Washington College, received its charter by act of the General Assembly of the State of Connecticut on May 22, 1823. The following year the College was organized, the work of instruction was begun, and two buildings, Seabury Hall and Jarvis Hall, were erected on the ground now occupied by the State Capitol. In 1845, on petition of the Corporation, at the recommendation of the Alumni, who represented that there were sundry other colleges in the United States bearing the name of Washington College, the name was changed to Trinity College, and the Alumni, who in 1831 had formed a voluntary Association, were organized into a constituent part of the academic body. In 1883 the Charter was so amended as to provide for the election by the alumni of three of the Trustees.

The college campus having been sold in 1872 to the city of Hartford as a site for the State Capitol, a new site of about eighty acres was purchased in the southwestern part of the city. In 1875 ground was broken for the new buildings, which were first occupied in 1878, and which were named, like the old buildings, Seabury Hall and Jarvis Hall. Four years later the west side of the great quadrangle, more than six hundred feet in length, was completed by the erection of the central building, which, after the name of its donor, is called Northam Towers. The St. John Observatory was built in 1883, and the President's house in 1885. The Gymnasium and Alumni Hall, erected through the generosity of Junius S. Morgan, Esq., of London, and others, was completed in 1887, and the building called the Jarvis Laboratories, the gift of George A. Jarvis, Esq., of Brooklyn, N. Y., was completed in 1888. A building

for the department of Natural History was completed in June, 1900, and has been named the Boardman Hall of Natural History, in memory of the late William Whiting Boardman, LL.D., Trustee of the College from 1832 to 1871. Williams Memorial, the Library and Administrative building, the gift of the late J. Pierpont Morgan, LL.D., long a member of the Corporation, was completed in 1914. On the campus, facing the buildings, stands the bronze statue of Bishop Brownell, the Founder and the first President of the College, which was presented to the College in 1867 by Gordon W. Burnham, Esq., of New York. In accordance with the agreement between the city of Hartford and the Trustees of the College, certain land west and south of the College buildings, between Summit and Zion streets, formerly known as the Stone Quarries, has been laid out and established as a public park, known as Rocky Ridge Park.

In June, 1923, Trinity College celebrated the one hundredth anniversary of its foundation. Appropriate exercises were held on the campus in the presence of a large gathering of Alumni and distinguished guests; and a tablet was placed in the east portico of the State Capitol to mark the original site of the College. The Centennial Fund of one million dollars for the endowment of the College was reported completed at this time.

Plans are now being drawn for a new Chapel and a new Chemical Laboratory; the first unit of a new Gymnasium is now finished. These new buildings will add to the efficiency of the College.

**THE TRINITY COLLEGE BULLETIN.** This quarterly includes nearly all the official publications of the College.

**INFORMATION ABOUT THE COLLEGE.** Copies of catalogues and information concerning the courses of instruction, scholarships, etc., can be obtained from the Registrar or the Secretary of the Faculty.

## Admission to College

### Requirements for Admission

**C**ANDIDATES for admission to the Freshman Class must be at least fifteen years of age, and must bring testimonials of good moral character, preferably from the principal of the school last attended. Those who are from other colleges must present certificates of honorable dismissal in good standing. All testimonials and certificates should be presented as early as possible and preference will be given to early applications.

All candidates are required to take the Scholastic Aptitude Test which is offered by the College Entrance Examination Board in June and at the College in September.

All candidates are required to present a certificate of vaccination.

In order to meet the Scholastic Requirements for Admission (listed on the next page) it is assumed that all candidates will have pursued a four years' course of study in a high school or academy, following a grammar school course of eight years, or the equivalent.

To be admitted unconditionally\* a candidate must be credited with 15 units of the Requirements for Admission unless he present both three years of Greek and four years of Latin, in which case 14 units will be sufficient. Entrance deficiencies must be made up in the manner prescribed on *page 34*.

A unit represents a year's study in a secondary school, constituting approximately a quarter of a full year's work. It is assumed that the study is pursued five periods a week for an entire school year.

Inability to write good English will be sufficient ground for the rejection of a candidate.

\* Under exceptional circumstances a student may be admitted who is deficient in two units.

The Scholastic Requirements for Admission may be satisfied by one of the methods explained in detail below:

1. Examinations under the Old Plan.
2. Examinations under the New Plan.
3. Regents' Examinations.
4. Certification.

### Admission by Old Plan Examinations

To be assured of admission under the Old Plan, a candidate must pass the examinations in the required units as specified above from the subjects listed below; the scale of values indicated is expressed in terms of the units adopted by the College Entrance Examination Board:

\* Candidates who may desire to satisfy the requirements in Latin by other examinations offered by the College Entrance Examination Board should inform themselves as to which examinations will be satisfactory.

† For candidates already credited with 2 units in the subject.

‡ or Mathematics Cp. 3.

° or Mathematics Cp. H.

All candidates must present English, one unit of History, Mathematics A (Elementary Algebra), and Mathematics C (Plane Geometry), equalling 7 units, the remaining 8 units to be made up from the Requirements for Admission. Candidates for the degree of Bachelor of Arts may present either Greek or Latin or both. Candidates presenting Latin only must include at least 4 units; candidates presenting Greek only must include at least 3 units.

Not more than 3 units in History may be presented by any candidate. It is recommended that candidates for the degree of Bachelor of Arts present History A (Ancient History).

No division of the requirements in any subject is permitted except as specified above.

### Admission by New Plan Examinations

A graduate of a school which has an approved four-year course of study (including English, Mathematics, and foreign

languages) will be admitted to full standing in the Freshman Class on the following conditions:

He must file an application for admission by this method, and must submit therewith a transcript of his record in school. If the school record is found satisfactory, he will be given permission to take the New Plan examinations. He must pass with credit the Comprehensive examinations for admission in English, and in three of the following six subjects: (1) Latin; (2) Greek; (3) German; (4) French; (5) Mathematics; (6) a science (Physics or Chemistry). The examination must, in each case, include the work of the last year in each subject.

The question papers for the June examinations are prepared and the examinations are administered by the College Entrance Examination Board. The September question papers are prepared by the College Entrance Examination Board, but the examinations are administered by the officers of the College and are held in Hartford only. A pamphlet giving detailed definitions of the subjects and full information in regard to the examinations may be obtained from the Board (431 West 117th Street, New York) at a cost of twenty cents.

For examining each candidate for admission a fee of ten dollars is charged by the College and a fee of ten dollars by the College Entrance Examination Board. This fee must be paid before the candidate presents himself for examination.

### Preliminary Examinations

Candidates are allowed to divide the examinations, and to pass preliminary examinations in a portion of the requirements.

Candidates presenting themselves for the preliminary examinations must bring from their teachers certificates that they are prepared to pass in the subjects which they present, and they will not be credited with any subject in which they are not so certified.

# College Entrance Examination Board

Examinations of June 16-21, 1930

The application for examination should be addressed to the College Entrance Examination Board, 431 West 117 Street, New York, N. Y. It should be made upon a blank form to be obtained from the Secretary of the College Entrance Examination Board.

If the application be received sufficiently early the examination fee will be \$10.00 for each candidate whether examined in the United States, Canada, or elsewhere. The fee, which should accompany the application, should be remitted by postal order, express order, or draft on New York to the order of the College Entrance Examination Board.

Applications and fees of candidates who wish to be examined outside of the United States and Canada should reach the Secretary of the Board at least six weeks in advance of the first day of the examinations, that is, on or before May 5, 1930.

Applications and fees of candidates who wish to be examined in the United States at points west of the Mississippi River or in Canada should be received at least four weeks in advance of the first day of the examinations, that is, on or before May 19, 1930.

Applications and fees of candidates who wish to be examined in the United States at points east of the Mississippi River or on the Mississippi River should be received at least three weeks in advance of the first day of the examinations, that is, on or before Monday, May 26, 1930.

When a candidate has failed to obtain the required blank form of application for examination the usual examination fee will be accepted if the fee arrives not later than the specified date accompanied by a memorandum containing the name and address of the candidate, the exact examination center

selected, and a list of all the subjects in which he expects to take the Board examinations.

Applications for examinations other than the Scholastic Aptitude Test received later than the dates named will be accepted when it is possible to arrange for the examination of the candidates concerned, but only upon payment of an additional fee of five dollars.

A list of places at which examinations are to be held in June 1930 will be published about March 1. Requests that the examinations be held at particular points should be transmitted to the Secretary of the College Entrance Examination Board not later than February 1. The designation of the center to which the candidate will go for examination is regarded as an indispensable part of his application for examination.

Detailed definitions of the requirements in all examination subjects are given in a circular of information published annually by the College Entrance Examination Board. Upon request a single copy of this document will be sent to any teacher without charge. In general a charge of twenty cents, which may be remitted in postage, will be made.

### Regents' Examinations

The credentials issued by the Regents of the University of the State of New York will be accepted for admission to Trinity College on the same conditions as the certificates of the College Entrance Examination Board.

### Admission on Certificate

Candidates for admission to the Freshman Class presenting certificates from certain schools which have courses of instruction approved by the Faculty are admitted without further examination on the studies covered by the certificates. Certificates will not be accepted for more than the total number of units required for admission. But this does not preclude fully certified candidates from offering themselves for examination in additional studies of the examination programme, as stated on *page 34*.

Certificates should be addressed to the Committee on Admission, and must be accompanied by the registration fee of ten dollars (\$10). Checks should be made payable to the “Trustees of Trinity College”.

No student will be admitted on certificate unless he be a graduate of the school from which he comes; but no person not a graduate is thereby precluded from presenting himself for examination.

The privilege of certification will be withdrawn from the certifying school if it becomes evident that the preparation of students from it is materially defective. Schools from which no graduate has been enrolled in the College for a period exceeding one year will be dropped from the list of accredited schools.

### Removal of Entrance Deficiencies

Entrance deficiencies may be made up only by taking courses in College, except that credit for English, the one required unit in History, Mathematics A (Elementary Algebra) and C (Plane Geometry), Latin, and Greek, of the Requirements for Admission may be obtained by examination after admission to College.

Students who complete in four years the 20 units necessary for graduation, including courses specifically required, with the grade required for graduation, will be recommended to the Trustees for their respective degrees without regard to deficiencies at admission.

### Anticipation of College Studies

Candidates for admission, besides satisfying the Requirements for Admission, may accumulate additional credits by passing also examinations upon such of the courses of instruction offered by the College as may properly be anticipated by examination. The College courses in French, German, Italian, and Spanish, numbered 1, 2, and 3, may be anticipated by the College Entrance Examination Board's examinations in those subjects numbered respectively Cp. 2, Cp. 3 (or B), and Cp. 4. Likewise Plane Trigonometry, Solid Geometry, Physics A, and Chemistry A may be anticipated by the College Entrance Examination Board's examination in those subjects. Examinations in other subjects will be held in Hartford only at the time of the examinations for admission in September, provided that not less than two

weeks' notice of intention to take such examinations shall have been given by the candidate to the Registrar.

Except in English, History, Elementary Algebra, Plane Geometry, Greek, and Latin, opportunity to pass by examination subjects which may be offered for admission ordinarily ceases with admission to College.

### Admission to Advanced Standing

Applicants for admission to any of the higher classes must sustain, besides the examinations for admission to the College, further examinations in the studies already pursued by the class which they propose to enter. Students who have been in attendance for not less than one year at other colleges of a grade similar to Trinity College and who present letters of honorable dismissal in good standing and who otherwise satisfy the Committee on Admission will be admitted, without examination, to such classes as their previous record may warrant. The papers of such candidates, together with a catalogue of the college previously attended, should be sent to the Registrar, if possible not less than three weeks before the beginning of the college year, in order that they may receive proper consideration.

### Special Students

Students regularly admitted who do not propose to pursue all the studies of either of the courses leading to a degree may be permitted, under the name of Special Students, to attend any class in such studies as upon examination they are found qualified to pursue. They are subject to the same rules and enjoy the same privileges as other students; and, upon honorable dismissal, they are entitled to a certificate from the President, stating the studies which they have pursued. All special students will be required to pursue studies amounting to at least twelve hours a week.

## Non-Matriculated Students

Persons of maturer years, who may desire to pursue the study of one or more subjects as non-resident students, may, upon satisfying the instructors concerned that they are qualified to perform the work in those subjects which they propose to elect, be admitted, by vote of the Faculty, as non-resident students without matriculation. But they will not be allowed to count courses pursued in College toward satisfying the requirements for admission. Such students are not members of the College, and they are not permitted to reside in the college buildings.

## Matriculation

Matriculation consists in signing, in the presence of the President and two or more Professors, the following promise:

"I promise to observe the Statutes of TRINITY COLLEGE; to obey all its Rules and Regulations; to discharge faithfully all scholastic duties imposed upon me; and to maintain and defend all the rights, privileges, and immunities of the College, according to my station and degree in the same."

All duly qualified students are matriculated on the first day of November (All Saints' Day — Founders' and Benefactors' Day).

## Registration

All students are required to register on or before the first day of the Christmas Term at the office of the Registrar.

A registration fee of ten dollars (\$10) (not returnable) must accompany each application for admission, but candidates who have already paid the examination fee of Trinity College or of the College Entrance Examination Board will receive credit for ten dollars on their bill for the first semester.

Candidates who take examinations for admission in September will be required to pay the examination fee of ten dollars.

# Course of Study and Degrees

THE College course normally requires four years for its completion. Students completing in four years the twenty units required for the degree of Bachelor of Arts or Bachelor of Science, including courses specifically required, with the grade required for graduation, will be recommended to the Trustees for their respective degrees without regard to deficiencies at admission.

## Credit for Work in Summer Schools

Work done at an approved summer school may be counted toward satisfying the requirements for a degree. In order to have such work so counted, application must be made to the Committee on Examinations and Standing, and its approval secured before taking up the work. The applicant must state the courses proposed and the institution he proposes to attend. No course will be approved that duplicates in any way work previously credited to the applicant, nor that covers the same ground as any course required specifically for a degree. The Faculty reserves the right to examine upon all such work before allowing credit therefor.

## The Course of Study

The following schedules show the studies of the Freshman year and of the several groups.

Freshmen are required to take the following course of study:

## Sophomore, Junior, and Senior Years

At the close of the Freshman year, the student will elect one of the ten Groups of Studies described below. The completion of the studies of one of these Groups, together with credit for certain subjects specified in the statement of the Requirements for Degrees, is essential to the attainment of a degree. The object in these prescriptions is twofold: first, to acquaint the student with certain fundamental subjects; and secondly, taking into account special aptitudes and interests, and plans for a future occupation, to ensure that he shall carry his studies in some subjects beyond the elementary stage. Though the college is in no sense a professional or technical school, yet the curriculum is planned so as to make it possible for a student to secure adequate training for study after graduation in such schools. It is believed that a course of study of this character is likely to prepare the student more adequately than an equal amount of work chosen with a less definite intention. Studies aggregating fifteen hours per week are to be chosen from the courses described on *pages 53-71*. In choosing these studies students must take into account the necessity of including in their courses the subjects specifically required for their respective degrees and the subjects making up the Group elected.

## Honors Courses

Any Professor may recommend to the Faculty in the Trinity Term that certain designated Sophomores or Juniors have permission to study during the following year in his Department as honor students. Only students with an average of

80 per cent may be so recommended. Such students shall continue work in regular courses for the equivalent of at least three courses for their Junior year and at least two courses for their Senior year, devoting the rest of their time to individual study under the direction of the head of the Department recommending them. At the end of April, in their Senior year, they shall present themselves for a general examination on the subject in which they have been doing their individual work. In no case shall this procedure operate to excuse a student from any of the courses required for the B. A. or B. S. degree. The privilege of working as an honor student may be withdrawn at any time by the Faculty or by the Professor concerned.

## The Groups

### 1. The Classics

Four courses in Latin and Greek in college: at least one course in each department must be included.

### 2. Modern Languages

Six courses in French and German in college; including French 3, 4, and 5 and German 3 or 4; or German 3, 4, and 5 or 6, and French 3.

### 3. English

Four courses in English in addition to English A, and two in Economics, History, or Philosophy.

### 4. Economics

Four courses in Economics and two in History.

### 5. History

Four courses in History and two in Economics.

## 6. Philosophy

Four courses in Philosophy including Philosophy 3; and three other courses closely related to each other and approved by the Department of Philosophy.

## 7. Chemistry

Five courses in Chemistry, two in Physics, Mathematics 1 and 2.

## 8. Mathematics and Physics

Five courses in Mathematics and Astronomy, Physics 1, 2, and 3, one course in Chemistry, and one in Drawing, *or* five courses in Physics, Mathematics 1, 2, and 3, two courses in Chemistry, and one in Drawing.

## 9. Biology and Pre-Medical

Three courses in Biology, four courses in Chemistry, Mathematics 1, one laboratory course in Physics (to be taken in college), and one course in Physiology.

## 10. Preparatory to Engineering

Four courses in Civil Engineering and Drawing and Astronomy, two in Mathematics, and four in Physics and Chemistry; all to be taken in college.

Studies, amounting to fifteen (15) hours per week for each year, are to be chosen from the courses described on *pages 53-71*. In making their choices, however, students must be careful to plan for the completion of the Group elected and to include the courses required for their degrees as stated on *pages 41-43*.

All matriculated students are required to take Physical Training (*see page 42*).

## Classification of Students

Students will be classified according to the amount of work that they have satisfactorily completed, including both the examinations for admission and the college course. The examinations for admission are reckoned as equivalent to fifteen (15) units (*see page 29*). In College, students are required to complete each year not less than five courses, or five (5) units (*see pages 37, 38*), so that, normally, the total number of units standing to the credit of the student at the beginning of the several years will be as follows:\*

At admission to Freshman year		15 units
At beginning of Sophomore year	$(15+5) =$	20 "
At beginning of Junior year	$(15+5+5) =$	25 "
At beginning of Senior year	$(15+5+5+5) =$	30 "
Required for graduation	$(15+5+5+5+5) =$	35 "

Students will be admitted, and promoted from class to class, in spite of slight deficiencies. The following table shows the minimum requirements for promotion:

Minimum for advance to Sophomore Class	18 units
Minimum for advance to Junior Class	23 "
Minimum for advance to Senior Class	28 "

## Requirements for the Degrees of B.A. and B.S.

In order to be recommended for a Bachelor's Degree a candidate

(1) must be credited with not less than 15 units\* of the requirements for admission (*page 29*; but see also *page 34*) and not less than 20 units (120 semester hours) of college work:

(2) must not have grades below 70 in more than 6 of the 20 college courses (but a grade of 80 or better in any course may offset a grade lower than 70 in any other course of equivalent length):

\* For students who present Latin A and B and Greek A and B for admission these numbers are reduced by one unit.

(3) must have received credit for all the courses specifically required for that degree for which he applies (as enumerated below), and also credit for the courses required in one of the ten groups of studies described on *pages 39 and 40*:

(4) must have completed satisfactorily the required Physical Education.

A candidate for the degree of BACHELOR OF ARTS must include in his course of study

German 1, 2, and 3 <i>or</i> } French 1 and 2, and } German 1 and 2 }	3 or 4 courses
English <i>or</i> } Economics <i>or</i> } History }	2 courses not in the same department

### Requirements for the Degrees of M.A. and M.S.

The degree of Master of Arts or Master of Science will be conferred upon Bachelors of Arts or of Science, respectively, of this College or of other colleges approved by this Faculty, who shall have satisfied the requirements as stated in the following paragraphs:

The applicant must register his name, and present studies for approval, not later than the 15th of October of each year in which he desires to be considered as a candidate. He must in one of the ten groups of studies complete at least three courses beyond the minimum requirement of his principal subject. He must also complete two additional courses in the same group or in some other group approved by the Committee. These last two courses must in general be not more elementary than the third year of college work in the Department in which they are elected. The courses elected by the applicant must be approved by the Committee on Graduate Students and by the heads of the departments in which they are taken. Examinations on this work shall be held at the College at the time of the regular examinations of Trinity Term, or at such other time as may be appointed.

Upon passing these examinations and presenting also a satisfactory thesis, if required, the candidate will be recommended for the appropriate degree. No course will be credited for the Masters' degree in which the grade attained is less than 80 per cent.

By arrangement with the Hartford Seminary Foundation, students of that institution who are candidates for the Master's degree in Trinity College may elect a part of the courses required for the Master's degree from certain approved courses offered by the Hartford Seminary Foundation.

A candidate studying *in absentia* will not ordinarily be granted the Master's degree in less than three years after being admitted to the Baccalaureate degree, unless two years shall have been spent in study at some other college or university.

Graduates of other colleges desiring either of these degrees must study as resident graduate students at Trinity College for not less than one year.

No candidate will be recommended for a degree unless his work shall have been completed on or before the Thursday immediately preceding Commencement.

### Advisers

On his admission to College, a student is assigned to a member of the Faculty who will act as his adviser. The student is expected to consult him as to his choice of a Group; the relation of his studies to his occupation in life; and indeed on any other subject or problem of college life in which he may be interested or in which he feels the need of counsel.

### Planning a Course of Study

Since a rational plan of study deliberately made and conscientiously pursued is far more profitable than studies chosen from year to year without plan under the influence of tem-

porary preferences, students are strongly urged to choose their studies with the greatest care, under the best advice, and in such manner that the work of their college course may form a rationally connected whole. To this end the Faculty has arranged groups of studies that may profitably be pursued by those who intend to devote themselves to certain professions. For example, a student planning to enter the Ministry might elect Group 1 or Group 6; a student expecting to study Law, Group 4 or Group 5; Medicine, Group 9; Engineering, Group 10; Business, Group 4 or Group 5; etc.

In a group of studies leading to a scientific profession the sequence of the courses is important. For this reason a number of plans are given below in each of which the sequence of the courses is specified.

A student who desires to emphasize a particular branch of learning which is not given sufficient prominence in any of the plans outlined, may do so (1) by electing that plan which best lends itself to this purpose, (2) by choosing electives with the desired emphasis in view, and (3) by substituting courses from the particular branch desired for one or more of the listed courses.

In choosing electives the student should have requirements for degrees in view.

### First Year

The studies of the Freshman year are the same for all students in Groups 7 to 10, with the exception of Chemistry which is replaced by Drawing (Dr. A, or 1) for students in Group 10.

## Choice of Elective Studies

A student in making his elections for a given year should be careful to take into account the choices which the schedule allows for the following year, as well as the subjects specifically required for his degree and the subjects making up the Group he has elected.

Notice of choices, stating the subject and number of each course and the period in which it belongs, must be presented in writing to the Committee on Electives. Students in the College during the Trinity Term must present their choices of studies for the next year to the Committee not later than one o'clock on the Saturday immediately preceding the final examinations of the Trinity Term or pay \$5 to the Treasurer on later enrollment. All students must present their choices of studies for the year to the Committee not later than 4.30 p.m. on the Friday in September on which the college year begins or pay \$3 to the Treasurer on later enrollment. No student in regular standing is allowed to enroll himself in any one year, in less than five or in more than seven full courses (or their equivalent), and for all courses in excess of five he must obtain special permission from the Committee on Electives.

Changes in electives will be allowed in exceptional cases, but ordinarily cannot be made after the first day of October. Petitions to make such changes must be presented in writing to the Secretary of the Committee, on forms provided for that purpose.

## Religious Services

The President is the Chaplain of the College, and is assisted by the clerical members of the faculty.

Prayers are said in the College Chapel on week-days at five minutes past eight in the morning. Attendance of

resident students is required daily and of all students on Wednesdays.

On Sundays all students who reside in College, unless excused on request of their parents to attend church elsewhere, attend Morning Prayer (with sermon) in the chapel at half-past ten o'clock. The Holy Communion is celebrated every Sunday at a voluntary service at eight o'clock, except on the first Sunday of the month, when the celebration is held at half-past ten o'clock. On Saints' Days and Holy Days the celebration is at half-past seven o'clock.

### The Union

A large room in Seabury Hall is set apart as a centre for the social life of the students. It is provided with a piano, pool and billiard tables, and other conveniences for recreation. The Union is under the control of a committee of the student body.

## The Library

THE Library occupies Williams Memorial, completed in 1914, erected in memory of Bishop John Williams with funds presented by the late J. Pierpont Morgan, LL.D. It is a modern fireproof library building with shelf space for 170,000 volumes, and a Reading Room with seats for one hundred readers. The ground floor of the east wing is occupied by the administrative offices.

The Library is open during term time from 8.45 a.m. to 12.45 p.m., and from 1.45 to 4.45 p.m. (except Saturdays, when it closes at 1 p.m.), and from 7.30 to 10 p.m., every evening in the week, except Saturday.

The literary material used to supplement the instruction of the class-room and laboratory comprises (1) the best of the more recent works on the subjects taught, and (2) the most important of the authoritative and indispensable older books. To the first class belong over one hundred current periodicals and journals of learned societies. Substantial additions have recently been made in the modern literature of chemistry, economics, philosophy, history, psychology, physics, sanitary science, and engineering. The second class includes, in part, a good equipment for undergraduate needs in classical and other European lexicography, Greek and Latin epigraphy, modern European and English literature; the best editions of the complete works of many of the great astronomers, chemists, mathematicians, and physicists from the earliest times to the present; and an unusually full series of the public documents and state papers of the United States government from the formation of the Union to the present Congress.

The Reference Room contains 8000 volumes placed on open shelves for free and unrestricted use. These have been carefully selected so as to facilitate the academic work of the students, and to make readily accessible for purposes of general culture a representative body of the best literature on all

subjects. The system of classification and the other details of book arrangement in this room have been entirely subordinated to these higher aims. The Librarian aids the students in their use of the books, and assists them in the many other ways which his position makes possible.

Many single works of great value and interest are contained in the collection. Among them are: two Greek manuscripts of the twelfth century, several illuminated Latin Books of Hours of the fourteenth and fifteenth centuries, fine examples of books printed before the year 1500 (Incunabula), rare mathematical and medical works of the sixteenth, seventeenth, and eighteenth centuries, an exceptionally fine copy of Audubon's great work, "Birds of America," and first editions of the books of many English and American writers whose works form a permanent part of literature.

The Library now numbers over 100,000 volumes and 45,000 pamphlets. The funds, from which its income for the purchase of books is derived, are the following:

**THE BURGESS FUND**, founded in 1843 by a gift of \$500 from the Rev. George Burgess, of Hartford, afterward Bishop of Maine.

**THE ELTON FUND**, founded in 1854 by a gift of \$5000 from John P. Elton, Esq., of Waterbury.

**THE SHEFFIELD FUND**, founded in 1856 by a gift of \$5000 from Joseph E. Sheffield, Esq., of New Haven.

**THE PETERS FUND**, founded in 1858 by a legacy of \$3000 from the Hon. John S. Peters, LL.D., of Hebron.

**THE THOMAS RUGGLES PYNCHON ALUMNI LIBRARY FUND**, founded in 1859 by subscriptions from the Alumni, and now amounting to about \$3300.

**THE ATHENAEUM FUND**, founded in 1870 by a gift of \$300 from the Athenaeum Literary Society.

**THE NORTHAM FUND**, founded in 1887 by a legacy of \$12,000 from Charles H. Northam, Esq., of Hartford.

THE SAMUEL HART FUND of \$2500, founded in 1901 by Alumni in honor of the late Rev. Samuel Hart, D.D., D. Can. L., LL.D., of the class of 1866, formerly Professor of the Latin Language and Literature.

THE J. EWING MEARS LIBRARY FOUNDATION ON SANITARY SCIENCE, established October 17, 1904, by Dr. J. Ewing Mears, of the class of 1858.

THE THOMAS BALCH FUND of \$3000, founded in 1918, the income to be used primarily for the purchase of books relating to International Law and kindred subjects.

THE CHARLES LATHROP PACK FUND, founded in 1921 by a gift of \$1000 from Charles Lathrop Pack, LL.D., and increased by a further gift of \$1000 in 1922. The income is to be used for the purchase of books relating to American History.

Other special funds are:

THE JACOBS LIBRARY FUND, established in 1888 by a legacy of \$500 from the Rev. James G. Jacobs, of the class of 1847. So much of the income of this fund, amounting to about \$20 annually, as may be necessary is expended in the purchase of text-books, which are loaned to students of very limited means.

THE ROBERT HITCHCOCK CANFIELD LIBRARY FUND, founded April 29, 1905, by a gift of \$2000 from Mrs. R. H. Canfield, of Hartford, Connecticut, in memory of her husband. The income of this fund is to be used exclusively for necessary binding in the College Library.

THE J. PIERPONT MORGAN FUND, founded in 1910 by a gift of \$100,000 from J. Pierpont Morgan, Esq., of New York; his son, J. Pierpont Morgan, Esq., made in 1917 a further gift of \$150,000. The income of this second gift is to be used primarily for the administration and maintenance of the Library.

**THE BAGUIO FUND.** In 1920 former pupils of President Ogilby in the Baguio School in the Philippines raised a fund for the purchase of books dealing with the history of the Pacific Ocean, its islands, and adjacent countries. A distinctive book-plate has been designed by a former Baguio boy.

In view of the great expense involved in the purchase of even the works most necessary to keep the Library abreast of the development of modern science and learning, the generous aid of the Alumni and friends of the College is especially invited to the increase of these funds and the establishment of new ones.

Title XV, Section 2, of the Statutes of Trinity College provides that "A book shall be kept by the Librarian, in which shall be inscribed the names of all contributors to the Library, together with a list of the books which they have contributed. And if any person shall make a donation of books to the value of five hundred dollars, his name shall be conspicuously inscribed in some appropriate place in the Library."

Every book given to the Library is duly acknowledged, inscribed with the name of the donor, and recorded in the Annual Report of the Librarian. The Librarian will be glad to inform Alumni and friends of the College of the departments in which their gifts will be most effective in meeting pressing needs.

Books may be taken by the following persons: Members of the Corporation, benefactors of the College, its officers, graduates, and undergraduates. The privileges of the Library are also extended to the citizens of Hartford, and to other persons, as the President may approve.

### Other Library Facilities

There are also available and accessible to the students the six collections of books named below. These comprise, with

the College Library, over 400,000 volumes, exclusive of pamphlets and manuscripts.

**THE HARTFORD PUBLIC LIBRARY.** All students of the College are allowed, upon special conditions prescribed by the authorities, to make use of the well-selected collections in the Hartford Public Library. The Library, which is located on the first floor of the Wadsworth Athenaeum, consists of over 180,000 volumes. It is open on week days from 9 a.m. to 8 p.m., and on Sundays its Reading and Reference rooms are open from 1 p.m. to 7.30 p.m. The Librarian prepares lists of references on current topics, which are of considerable service to the students. The current numbers of over 250 periodicals are on file in the Reading Room.

**THE WATKINSON LIBRARY OF REFERENCE.** The collection of the Watkinson Library numbering over 75,000 volumes, is entirely free for consultation by all students of the College. It is located on the second floor of the Wadsworth Athenaeum, and is open on week days from 9.30 a.m. to 5.30 p.m. It is especially rich in works on the Fine Arts, Romance Languages, English Philology and Literature, English and American History, and in sets of the Transactions and Proceedings of Foreign Scientific and Learned Societies.

**LIBRARY OF THE CONNECTICUT HISTORICAL SOCIETY.** Through the courtesy of the Connecticut Historical Society, its Library and Museum, located in the Wadsworth Athenaeum, are accessible to the public free of charge. The library contains over 50,000 volumes, 35,000 unbound pamphlets, and 50,000 manuscripts. It is open on week days from 9.30 a.m. to 5.30 p.m. It offers exceptional facilities for thorough research, not only in all subjects relating to the history of Connecticut and New England, but also in many departments of general American history.

**CONNECTICUT STATE LIBRARY.** This collection of about 200,000 volumes and over 50,000 manuscripts relating to the

early history of Connecticut is open to the public, for reference use, from 9 a.m. to 5 p.m., except on Sundays. It comprises a Legislative Reference Department, a Department of Archives and History, and the Supreme Court Law Library. The last makes accessible a commendably complete collection of the statute and case law of English-speaking people, and the more recent codes of many of the other countries. Students who intend to take up the study of law may profitably avail themselves of its resources.

**HARTFORD BAR LIBRARY ASSOCIATION.** A reference law library of over 13,500 volumes, together with some 3,000 records and pamphlets in the County Building. It comprises also a small circulating department, from which books may be borrowed by any member of the Hartford County Bar, or by any one else on written introduction by a member.

**THE CASE MEMORIAL LIBRARY.** The Case Memorial Library of the Hartford Theological Seminary, at Elizabeth Street and Girard Avenue, is equalled in its special fields by few, if any, libraries in this country. It numbers over 125,000 volumes and 67,000 pamphlets. It is open every week day from 8 a.m. to 9.30 p.m., and students may have free use of its books both for consultation and withdrawal. It is especially rich in collections of documents relating to Church history; in works dealing with textual criticism; in the literature of the Reformation and in the literature of modern missions; in Patristics, Lutherana, Orientalia, and in English Hymnology.

## Laboratories

### The Jarvis Laboratories

**T**HE Jarvis Laboratories, devoted to the departments of Physics and Chemistry, are in a building on the south campus, the gift of the late George A. Jarvis, Esq. When the new Chemistry Laboratory is constructed, plans for which are

now being drawn, it is proposed to turn the Jarvis Laboratories over to the Department of Physics.

The Department of Physics has lecture and apparatus rooms, a large laboratory for work in the elementary courses, and several smaller laboratories adapted and devoted to advanced work of a special character. In addition to the liberal annual appropriation of the Corporation for its development, the Department enjoys the income of the Cheesman Fund, given by the late Dr. T. Matlack Cheesman in memory of his son, Professor Louis M. Cheesman, formerly Professor of Physics in Trinity College.

The Department of Chemistry is provided with a lecture room and necessary laboratories. It is well equipped for work in general experimental and organic chemistry, in qualitative and quantitative analysis, and gas-analysis.

The main laboratory is devoted to work in general experimental chemistry and qualitative analysis. For work in quantitative analysis, organic chemistry, and physical chemistry separate laboratories are provided and properly equipped.

### Boardman Hall of Natural History

The Boardman Hall of Natural History is situated on the south campus. Its three floors are devoted to the laboratories and classrooms of the Departments of Biology, Geology, Mathematics, Civil Engineering, Drawing, Physiology, and Psychology.

**BIOLOGY.** The laboratories for General Biology, Zoology, Embryology, and Microbiology have a comprehensive equipment, including charts, models, projection lantern, compound and dissecting microscopes, lantern slides, microscopical preparations, and demonstration material for class use. The laboratory for advanced courses is well equipped with apparatus for embryological and bacteriological work.

**GEOLOGY.** The equipment for instruction in geology is

modern, and includes, besides the exhibition collections of rocks, minerals, and fossils in the museum, a large number of topographic and geologic maps of the United States Geological Survey, and of the surveys of other governments, lantern slides, models, and numerous specimens of rocks, minerals, and fossils suitable for handling, in laboratory work. The equipment for mineralogy, in addition to the excellent collections in the museum, includes sets of crystal models, a lathe for grinding thin sections of rocks and minerals, and a Leitz petrographic microscope.

**PSYCHOLOGY.** The Psychological Laboratory occupies rooms in Boardman Hall, and is adequately equipped for purposes of instruction, and for research in certain limited directions.

### The Museum of Natural History

In the Museum, located in Boardman Hall, are the collections of the departments of Biology and Geology.

**BIOLOGY.** In the biological section of the museum there are on exhibition: a series of Ward models of extinct vertebrates; skeletons and mounted specimens of modern vertebrates, chiefly mammals; the Collins and Seinoth collections of local birds; the Trowbridge collection of birds' eggs and nests; and an extensive collection of invertebrates, including representative groups of insects and a variety of marine animals from the shores of New England, the Bahama Islands, and the Pacific coast. The museum also contains an herbarium of about two thousand specimens of Connecticut plants prepared by the Horticultural Society of Connecticut for the Louisiana Purchase Exposition at St. Louis, and presented to Trinity College. The local flora is further represented by the Lorenz collections of New England ferns, mosses, and liverworts.

**GEOLOGY AND MINERALOGY.** A great variety of rocks and minerals are adequately represented in the collections located on the third floor of the Museum. These collections have been

derived from a number of different sources, but for the most part are scientifically arranged as a unified whole. Especially valuable is the Caswell Collection of 4000 mineral specimens, illustrating unusually well the crystal forms for many types. The invertebrates are displayed on the third floor, where they are arranged according to the periods of the geological time which they represent; the vertebrates are on the first floor.

### The Observatory

The Observatory, erected on the college campus in 1883 is furnished with sufficient apparatus for elementary work in practical Astronomy. The equipment now comprises a six and a half inch refractor by Brashear, mounted by Warner and Swasey, a two and a half inch transit, the gift of the late Dr. S. B. St. John and Miss St. John, of Hartford; a standard clock by the Howards, of Boston; a chronograph by Saegmueller; and an alt-azimuth instrument.

### Physical Education

**F**RESHMEN and Sophomores are required to report for Physical Education three hours per week, Juniors two hours per week, throughout the college year. A regulation uniform is required.

The work in the gymnasium is in charge of the Director of Physical Education to whom all students are required to report on entering college. A thorough physical examination under the supervision of the Medical Director is given early in the fall and his prescription is followed in the selection of the gymnastic and athletic activities. He also has medical superintendence of all candidates for athletic teams, of the health of all students, and of the hygienic conditions of all college buildings.

### Rooms and Medical Care

**M**OST of the rooms in the college buildings are so arranged that two students rooming together have a common

study and separate bedrooms. All the rooms are heated by steam; furniture must be supplied by the student, except freshmen living in Northam Towers.

Every student will be required to sign an agreement covering the terms upon which his room is assigned to him, and he will be held responsible for all damage done to his room during his occupancy.

All students are required to reside in the college buildings, unless they have permission from the President to room elsewhere.

Students who are ill are at once visited by the Medical Director. In some cases, the patient may be admitted to the Hartford Hospital, where adequate provision is made for students of the College.

### Freshmen Dormitories

Northam Towers and the two upper floors of Middle Jarvis have been set aside as dormitories for the Freshmen so that the new men may be brought close together.

### Expenses

**T**HE college charge of Trinity College is \$350, which includes tuition and all fees with the exception of the registration fee of \$10. All other fees, laboratory fees, athletic fees, student tax, incidentals, etc., are covered by the charge of \$350.

It is understood that of this amount, \$250 covers the charge for tuition; students holding scholarships entitling them to free tuition only will be required to pay \$100 a year to cover charges other than tuition.

Rent for rooms in the dormitories varies: Freshmen may obtain rooms at costs from \$55 to \$95 per year: other students from \$100 to \$155 per year.

Board can be obtained at \$9 a week, and upwards, making the cost for thirty-seven weeks, at the lowest rate, \$333. To this must be added laundry charges, together with the expense of books, furniture, clothing (including a uniform for physical training), and travel, which varies according to the taste and habits of the student, and of which no estimate can be given.

A registration fee of \$10 (not returnable) must be paid by each student before registration (*see page 36*).

**FEES FOR SINGLE COURSES.** The fee for a single course of instruction (three hours per week) is \$80, and for each additional course \$70, not including laboratory fees; but in no case does the charge for tuition and incidentals exceed \$350.00.

**FEES FOR THE MASTER'S DEGREE.** A fee of \$35 (which includes also the diploma fee) is charged for registration and examination for the degree of Master of Arts or Master of Science, except in the case of candidates who have paid not less than one year's full tuition as resident graduate students, who are liable only for the diploma fee. Ten dollars of the fee must be paid when the application for registration is made.

**PAYMENT OF COLLEGE BILLS.** The charges for tuition and incidentals for the Christmas Term must be paid before registration at the office of the Treasurer. The remainder of the bill for the Christmas Term and the bills for the Trinity Term must be paid within ten days after the date they are rendered. Non-payment renders the student subject to suspension until such time as payment is made. Nothing is to be deducted or refunded for courses dropped, or for absence, unless occasioned by illness, nor, in such cases for a period less than half a term.

All checks and drafts should be made payable to the order of the "Trustees of Trinity College," and communications

regarding bills should be addressed to the "Treasurer of Trinity College, Hartford, Conn."

No student can receive his degree, or an honorable dismissal, until the Treasurer certifies that all his college bills have been paid, and that, so far as the Treasurer knows, there are no lawful claims against him for board, washing, or lighting.

**STUDENT EMPLOYMENT.** While it has been proved possible for students to earn considerable part of their college expenses by work out of class hours, experience has shown that a Freshman should not expect to be able to take regular outside employment and at the same time maintain his studies satisfactorily. It is strongly recommended, therefore, that no student come to college unless he is able to maintain himself for at least the first half-year without the necessity of earning funds for his college bills or his board.

## Standing and Appointments

**A**T the close of each term a report of the scholarship of each student is sent to his parents or guardian.

The record of the scholarship of each member of a class is published at the end of his Junior year, and at the end of his Senior year.

A student admitted to advanced standing before the middle of the Sophomore year is ranked on the basis of the work actually performed by him in the College. The rank of a student entering after the middle of the Sophomore year is computed in like manner, but with a deduction of five per centum for the period of his absence.

The official estimate of the work of each student in each course of study is indicated on the basis of one hundred.

Sixty is the "passing" grade. Grades below sixty denote failures.

A "conditioned" is a special grade given by the instructor when in his opinion there is a deficiency that may be made up without repeating the course. A student "conditioned" in a course will be credited with that course if he shall pass a satisfactory examination at the stated time for making up conditions; and he shall have but one trial. If he fails at this, he shall be considered as having failed in the course.

There is one stated time for making up conditions, namely, within one month after the opening of College in September. Entrance conditions may be made up only at the regular examinations for admission in June and in September.

In the twenty best courses presented for graduation (including all required courses) the number of grades below seventy shall not exceed the number of grades of eighty or better by more than six.

Any matriculated student whose record of work completed is less than twelve hours a week for any term will be put on probation for the following term.

Any student, for neglect of work, may at any time be put on probation by vote of the Faculty.

When a student is placed on probation, notice of this action will be sent to his parents or guardian.

A student on probation will not be permitted to be manager or assistant manager of any college organization, or to take part in any public musical or dramatic performance, or in any public athletic contest; and he may be required to put himself under the direction of a private tutor approved by the Faculty. But nothing in this section is to be so construed as to forbid students on probation to engage in intra-mural sports.

The College may at any time require any student to withdraw without assigning a reason therefor.

## Honors at Graduation

**T**HE high excellence of a student in the general work of his college course, or in the work of individual departments, will be recognized at his graduation by the award to him by the Faculty of honor rank in general scholarship, or in certain special subjects in which the student shall have shown himself proficient.

The two members of the Senior Class having the highest standing are designated, respectively, Valedictorian and Salutatorian.

Honors awarded at graduation, whether in general scholarship or in special subjects, will be noted on the Commencement programme of the year in which they are awarded, and in the next issue of the College Catalogue.

A student attaining the grade of 90 or better in all the courses required for his degree is graduated with the title of **OPTIMUS**.

The special subjects in which Honors may be awarded are: Philosophy and Psychology, History, Economics, Classics, English, Modern Languages other than English, Mathematics, Civil Engineering, Physics, Chemistry, and Biology.

In order to be awarded Honors in any special subject, the candidate must have passed with credit in all the courses required for Honors in that subject, and also in such special examinations as may be prescribed. He may also be required to present a satisfactory thesis.

In detail the requirements for Honors are:

**GENERAL SCHOLARSHIP.** The distinction of honor rank in general scholarship will be awarded at graduation to such students as shall have attained a grade not below eighty in each of not less than twenty full courses (of three hours each per week for the year), or their equivalent, and shall have attained a grade of ninety in not less than sixteen full courses or their equivalent. Of students who have been in residence

less than four years a proportionate attainment will be required.

**ENGLISH.** Not less than six courses, of which at least four shall be in English, and shall include English 6 a and 6 b. The remaining two may be chosen from the courses offered in English, Latin, Greek, German, and French, except that Greek A, German 1 and 2, and French 1 and 2, may not be counted.

**MODERN LANGUAGES.** Not less than six courses, of which

five shall be in French and in German, the remaining course to be chosen from the courses offered in German, French, Spanish, or Italian. The candidate must have an accurate knowledge of the grammar and pronunciation, and a fair working vocabulary of each of the languages presented; he must, in one language, be able to express himself by speech and in writing, and must have a good general knowledge of the literature, of the geography, and of the political institutions of the country. The candidate may also be required to pass with credit a special examination.

**MATHEMATICS.** Not less than six courses, including Mathematics 2, 3, and 4, or 6. The remaining courses may be chosen from the courses in Mathematics, Astronomy, Civil Engineering, and Physics. Drawing 2 may also be offered. The candidate may be required to pass with credit a special examination on the solution of mathematical problems.

**BIOLOGY.** Not less than six courses, of which at least four shall be in Biology and Physiology and Hygiene. The remaining two must have the approval of the Department.

The candidate may also be required to pass with credit a special examination, or present a satisfactory thesis.

### The George Sheldon McCook Trophy

The George Sheldon McCook Trophy, the gift of Professor and Mrs. John James McCook in 1905, is awarded annually by the Athletic Association of the College, through the Committee of the Faculty on Athletics and College Organizations and the Captains and Managers of the teams, to a student in the Senior Class, who must be in good scholastic standing, on the basis of distinction in athletics. In determining the award, diligence and conscientiousness in the observance of all rules of drill, training, and discipline are taken into account, as well as manliness, courtesy, selfcontrol, uprightness, and honor at all times, especially in athletic sports and contests. The name of the student receiving the award is attached to the trophy on a silver bar bearing his name and class date. He receives as his permanent property a bronze medal bearing among other things his name and class date. This trophy is the athletic distinction most coveted in the College. In 1929 the trophy was not awarded.

### The Scholarship Cup

A silver cup is awarded annually by the Hartford Alumni Association to the Chapter of a Fraternity attaining the highest rank in scholarship. The award is made to the Chapter receiving the highest percentage of marks higher than eighty. The name of the Chapter receiving the award is engraved on the Cup. In 1928 the Cup was won by the Chapter of the Alpha Tau Kappa Fraternity.

## Phi Beta Kappa

**T**HE Phi Beta Kappa Fraternity, founded at the College of William and Mary, December 5, 1776, is an honorary society, membership in which is conditioned upon high scholastic standing. The Trinity Chapter, known as the Beta of Connecticut, was chartered by the Yale Chapter, the Connecticut Alpha, June 16, 1845, and is the eighth in order of foundation.

The Charter stipulates that persons elected to membership in the Beta of Connecticut shall be men of honor, probity, and learning. To satisfy the scholastic requirements, a student must have attained at least the equivalent of Grade A (the highest grade of excellence) in at least ten courses, and of Grade B (the second highest grade) in ten additional courses. Election to Phi Beta Kappa has always been regarded as a mark of high distinction in scholarship.

## Scholarships

COLLEGE expenses are considerably reduced to holders of scholarships. Scholarships are assigned in accordance with the conditions indicated on *pages 96-101*, of this Catalogue. They are of different values, and the income of each is credited on the Treasurer's books to the holder, to be applied toward the payment of college bills. Any surplus is paid in cash to the beneficiary.

For holders of those scholarships which remit the entire charges for tuition, the Treasurer's bills (exclusive of room-rent) are reduced to \$100; and the necessary expenses of such students, including board and other personal items, need not exceed \$500 or \$600 a year.

The Trustees have voted that all appointments to scholarships shall be made for one year, and that scholarships shall be forfeitable for serious misconduct, or for serious deficiency

in college work; they have ruled that no student who has been liable, during the year, to serious college censure shall be considered as a candidate for any competitive College Honor, Prize, or Scholarship.

Students of limited means can be provided, to some extent, with text-books from a library fund established for that purpose. This fund consists of \$500, the legacy of the late Rev. James G. Jacocks, of the class of 1847.

## List of Fellowships and Scholarships

*For further information as to the conditions of Fellowships and Scholarships, or for further particulars in regard to them, application should be made to the President of the College (see above).*

The incumbent holds the Fellowship for two years.

## Prize Graduate Scholarships

At a meeting of the Corporation on June 25, 1901, it was *voted*, "That one Prize Graduate Scholarship, with remission of tuition and room-rent, be established in each Department of the College, under the supervision of the President."

## Scholarships for Undergraduates

In order to receive a scholarship a student must first demonstrate his need of assistance and second, he must achieve definite grades. At present the minimum on which applications are considered is that a student must be passing in five courses with an average of 75%. Averages higher than this are as far as possible rewarded by more generous scholarships.

### I. Competitive Scholarships

Certain scholarships are awarded on the basis of competition.

THE HOLLAND SCHOLARSHIPS were established by Mrs. Frances J. Holland of Hartford, daughter of Bishop Brownell, the founder of the College, in memory of her husband, Thomas Holland. They are three in number, each having an annual value of \$600. They are awarded by the Faculty at Commencement to the students attaining the highest rank in the Junior, Sophomore, and Freshman classes respectively, to be held the following year.

THE GOODWIN-HOADLEY SCHOLARSHIPS were established by Daniel Goodwin and George E. Hoadley. These are four in number and entitle the holders to free tuition, the equivalent of \$250. One is awarded each autumn to the student of the highest scholastic rank from the public schools of Hartford who enters Trinity College; the nomination to these scholarships is vested in the Board of Education. The recipient may hold the scholarship throughout his entire course, if he maintains a satisfactory standing in his studies.

THE MEARS SCHOLARSHIP, having an annual value of \$500, was founded by J. Ewing Mears, M.D., LL.D. in memory of his mother, Caroline Sidney Mears. When vacant it is awarded on the basis of competition to a Freshman in need of assistance who gives indication of being a young man of promise. The incumbent may be reappointed each year while he is in college if he maintains a satisfactory standing in his studies; he is ineligible for any other scholarship.

THE ELTON SCHOLARSHIP was founded by gifts from James S. Elton, Esq. and John P. Elton, Esq. of Waterbury, Connecticut, and has an annual value of \$450. As adequate provision is made elsewhere for aid for students resident in the State of Connecticut, this Scholarship will

be awarded in July to the member of the incoming class, not a resident of the State of Connecticut, who makes the best record in the College Entrance Board Examinations. If the examination record of two candidates is practically the same, their school records will also be taken into consideration. The award is for one year only.

A CONVERSE SCHOLARSHIP of \$500, from a fund established by E. C. Converse, Esq., of Greenwich, Connecticut, will be awarded to the member of the Freshman class who makes the best record in a competitive examination held at the beginning of the college year. The respective school records of the applicants will also be taken into consideration. The award is for one year only.

The Sarah Gregor Scholarships	Five of \$250 each

### 5. Hartford Scholarships

Sixteen scholarships entitling the holders to free tuition have been established by the Trustees. They may be awarded to students from Hartford, who give evidence of superior ability and who are in need of assistance.

### 6. Scholarships for Freshmen

Freshmen holding any of the above scholarships are required to pass five courses with an average grade of seventy per cent at the end of the Christmas Term. To be eligible for a scholarship for their second year they must pass five courses with an average grade of seventy-five per cent at the end of the Trinity Term. In some cases provisional scholarships are awarded to new students with the understanding that the applicant will not receive the stipend unless he attains satisfactory grades at the end of the Christmas Term.
