Report of the Dean

TO THE PRESIDENT OF TRINITY COLLEGE:

SIR:

Herewith is submitted my report as Dean of the College for the academic year 1960-61.

At the end of the year looking backward is rather more pleasant than looking forward. The school year of 1960-61 seems almost idyllic when viewed in retrospect. That impression of an uncomplicated and placid academic life will grow stronger, one suspects, as the months go by, and it is not impossible that some of us will come to think of 1960-61 as a paragon of school years.

At the same time, the wheels of Trinity life did not turn so smoothly without being attended. The untiring and unselfish efforts of the college staff were needed to produce the unhindered flow of the academic year just ended. Since I have occasion to observe the beneficial results of their zeal daily and directly, I would commend to you in particular the work of Dr. O. Wilson Lacy, Dean of Students, and Mr. Thomas A. Smith, Registrar and Assistant to the Dean of the College. I regret that the scope of this report does not permit me to recognize the many contributions of my colleagues to the common weal of the College. It would be easy to cite one instance after another of help proffered voluntarily by faculty members in order to assist students and student organizations. When one considers the financial hardships that have beset members of the teaching profession in recent years, one feels considerable satisfaction in realizing that professional standards of conduct at Trinity are higher than ever.

FACULTY

Of the many developments under continuous review, none is likely to be of more lasting significance than the changes in the composition, status, and organization of the faculty. It is axiomatic that a college can rise no higher than its faculty. In view of the almost certain dearth of well-qualified teachers in the years ahead—the pinch is already being felt in many fields—there is no aspect of administrative planning more deserving of concentrated attention than the policies which are needful to recruit and hold a faculty of the highest competence.

In 1960-61 we had 111 members of our faculty, eight of whom were teaching on a part-time basis, which gave us the equivalent of 106 full-time teachers. It is interesting to compare the situation last year with that of ten years earlier, as follows:

Academic Load, 1960-61

	<i>Full Time</i>	<i>Part Time</i>	<i>Total</i>	<i>Highest Earned Degree</i>			
				<i>Dr.</i>	<i>M.</i>	<i>Bach.</i>	<i>None</i>
Professor	24	2	(26)	18	6	1	1
Associate Professor	36	2	(38)	25	10	2	1
Assistant Professor	25	0	(25)	17	7	1	0
Instructor	17	0	(17)	3	12	2	0
Lecturer	1	4	(5)	1	3	1	0
Total	103	8	(111)	64	38	7	2

Academic Load, 1950-51

	<i>Full Time</i>	<i>Part Time</i>	<i>Total</i>	<i>Highest Earned Degree</i>			
				<i>Dr.</i>	<i>M.</i>	<i>Bach.</i>	<i>None</i>
Professor	15	2	(17)	12	3	0	2
Associate Professor	6	0	(6)	5	1	0	0
Assistant Professor	21	2	(23)	15	5	2	1
Instructor	30	0	(30)	7	19	4	0
Total	72	4	(76)	39	28	6	3

It appears, then, that we were at a point ten years ago where 30% of our faculty was in the ranks of Professor and Associate Professor, whereas in 1960-61 the corresponding percentage was 60%. The average salary without fringe benefits (which likewise were increased materially) rose by 86% from \$4288 to \$7963, while during the same period the Consumer's Price Index rose from 103 to 127, and the retail prices purchasing power of the dollar from 79 to 97. The ratio of faculty to undergraduate students decreased from 1:12 to 1:9, although this is tempered somewhat by an increase in the load of graduate instruction. Last year the average faculty member—who exists only on paper, of course—was 42 years old and had been at Trinity 9 years. His typical predecessor at the beginning of the decade was 39 years of age and had been with us 5 years.

The faculty-student ratio has been fairly constant in the last part of the fifties. Studies are under way aiming to ascertain whether by changes in teaching methods and by encouraging junior and senior students to undertake genuinely independent work the prevailing ratio may be raised without sacrificing quality. A more effective utilization of teaching time would be of material help in furthering the program of faculty salary increases as well as that of faculty research. There was no significant change in the pattern of the teaching load, which remains moderate by college standards.

While we have reason to find satisfaction in the gains made in faculty salaries recently, we cannot rest here. The Rockefeller Report on Education notes: "The real problem of the teaching profession remains financial. More perhaps than any other profession, teaching needs dedicated men and women to whom pay is not an overriding consideration, but until we pay teachers at least as well as the middle echelon of executives we cannot expect the profession to attract its full share of the available range of talent."

The following nine names appear in the faculty list for the first time in 1960-61:

Austin Claude Herschberger, Ph.D., Assistant Professor of Psychology
Ward Schenk Curran, Ph.D., Instructor in Economics
Howard DeLong, Ph.D., Instructor in Philosophy
William Daniel Donahoo, M.A., Instructor in Education
Arnold Lewis Kerson, B.A., Instructor in Modern Languages
Norman Richardson Long, M.A., Instructor in Modern Languages
Richard Edward Nolan, M.A., Instructor in Psychology
Lawrence Robert Stires, Jr., M.A., Instructor in Modern Languages
Paul Walter Meyer, B.A., Lecturer in Government

The following ten names appear in the faculty list for the first time in 1961-62:

Robert Dana Foulke, Ph.D., Assistant Professor of English
Donald Dwight Hook, Ph.D., Assistant Professor of Modern Languages
Charles Robert Miller, B.S., Assistant Professor of Physics
Martin Boris Friedman, B.A., Instructor in English
Thomas Cartwright Mentzer, M.S., Instructor in Geology
David Solomon Salsburg, B.A., Instructor in Mathematics
Charles Freeman Sleeper, B.D., Instructor in Religion
William Ruthven Smith, III, M.S.E., Instructor in Engineering
James Warren Wightman, M.A., Instructor in Economics
Louise Johnson Rosenbaum, Ph.D., Lecturer in Mathematics

The following names, included in the faculty list of 1959-60, do not appear in the list for 1960-61, through expiration of term or death or retirement or resignation:

LeRoy Carr Barret, Ph.D., Hobart Professor of Classical Languages, Emeritus, *deceased*
Edward Frank Humphrey, Ph.D., Northam Professor of History and Political Science, Emeritus, *deceased*
Arthur Adams, Ph.D., S.T.M., Professor of English, Librarian and Registrar, Emeritus, *deceased*
Harry Todd Costello, Ph.D., Brownell Professor of Philosophy, Emeritus, *deceased*
Harold John Lockwood, E.E., Hallden Professor of Engineering, *deceased* in his 17th year of service at Trinity
Paul Winter Kurtz, Ph.D., Associate Professor of Philosophy, resigned in his 8th year of service at Trinity
Jack N. X. Oanh, Ph.D., Associate Professor of Economics, after 5 years
Thomas Owen Pinkerton, Ph.D., Assistant Professor of Modern Languages, after 3 years
Andrew Peter Debicki, B.A., Instructor in Modern Languages, after 3 years
Edward Baker Williams, A.M., Instructor in Modern Languages, after 4 years
James Leo Noonan Egan, LL.B., Lecturer in Roman Law, after 14 years
Alfons Krenn, Ph.D., Lecturer in Modern Languages, after 1 year

The following names, included in the faculty list of 1960-61, do not appear in the list for 1961-62, through expiration of term or retirement or resignation:

Morse Shepard Allen, Ph.D., James J. Goodwin Professor of English, Emeritus, retired after 41 years of service
Donald Layton Herdman, Ph.D., Associate Professor of Education, after 11 years of service
William Howard Mee, Major, USAF, Associate Professor of Air Science, after 3 years
Victor Gilpin, Ph.D., Assistant Professor of Chemistry, after 7 years
William Latimer Trousdale, Ph.D., Assistant Professor of Physics, after 6 years

Charles William Welby, Ph.D., Assistant Professor of Geology, after 3 years
Juan Estarellas, Ph.D., Ed.D., Assistant Professor of Education, after 5 years
Jose Angel Diaz, M.F.A., Instructor in Modern Languages, after 5 years
Richard Warren Berry, Ph.D., Instructor in Geology, after 2 years
Nathaniel Stone Preston, Ph.D., Instructor in Government, after 2 years
William Daniel Donahoo, M.A., Instructor in Education, after 1/2 year
Richard Edward Nolan, M.A., Instructor in Psychology, after 1 year

Promotions in rank were as follows, the new title being included in each instance:

Gustave William Andrian, Ph.D., Professor of Modern Languages
Eugene Wood Davis, Ph.D., Professor of History
Karl Kurth, Jr., M.Ed., Professor of Physical Education
Daniel Bond Risdon, M.A., Associate Professor of English
William Alexander Johnson, Ph.D., Assistant Professor of Religion

During the academic year 1960-61, Dr. Robert D. Meade, Associate Professor of Psychology and Mr. José A. Diaz, Instructor of Romance Languages were away on leaves of absence. Sabbatical leaves were granted to Dr. Richard K. Morris, Associate Professor of Education, and Dr. Walter D. Leavitt, Associate Professor of Modern Languages, in the Christmas Term; to Dr. Lawrence W. Towle, Professor of Economics, in the Trinity Term; and to Dr. Randolph W. Chapman, Professor of Geology, for the entire year.

The retirement of Professor Morse S. Allen, noted above, calls for more than passing comment, although I can pay only a most inadequate tribute in these few lines. He has been for the past forty-one years a popular and devoted teacher of English and will always be remembered for his understanding of the student as well as the subject. His great patience and his unflinching good humor made his teaching unusually effective and rewarding to his students. It was this combination of qualities that enabled him to open new vistas in literature for his students and inspired many to enter careers in the teaching of English. I join my colleagues in wishing for him many years of happiness in his new status.

CURRICULUM

In spite of our hopeful resolutions, the authorized course of study continues to grow in size, although at a somewhat retarded rate. Last year we added the equivalent of seventeen half-courses while dropping the equivalent of ten for a net gain of seven. Specifically, we added *Economic Development*, *Economics Tutorial*, *Advanced General Physics*, *Advanced Physical Chemistry*, *Graphics*, *European History Seminar*, *History Thesis Research*, *Engineering Graphics*, *Linear Programming*, *Problems in Christian Ethics*, in addition to various courses authorized for the graduate and summer programs. The course entitled *Major Figures of Biblical Thought* was expanded from a half-course to a full year. We dropped two full and two half-courses in Chemistry and four half-courses in Engineering.

On the subject of educational policies and objectives, there is a paramount interest currently in our new course of study. It may be well to remind ourselves that educational goals have a fundamental stability which must not be lightly challenged. This coming year inaugurates a new experiment in our educational program, the common curriculum for both baccalaureates. Yet this endeavor on our part does not entail any change in the primary objectives of the College. The common curriculum, it is hoped, will turn out to be an improved means for realizing educational objectives we have long held here at Trinity. We shall have to give the most careful concern to its operation in the years immediately ahead. The inauguration of this program is simply the start of experimental efforts which will continue for a number of years to come. The decision to make this effort was determined last year and now all of us must give our best efforts to a fair testing of the program. While many of its issues are by no means settled, we must at the same time move forward to a consideration of other problems facing the College.

STUDENTS

On the second Sunday in June, 221 students were graduated as the Class of 1961. However, 17 of these recipients of degrees were originally members of earlier classes—the Class of 1960, for the most part—who had failed to graduate with their class for one reason or another, including academic failure, illness, military service, and financial difficulties. There were 3 graduates who had joined the Class of 1961 as transfer students. In other words, 201 young men were left after four college years from the 270 who entered Trinity in September, 1957, which represents a loss of 25.5%. Ultimately, still other members of the original class will receive degrees—chiefly in June, 1962—and the percentage of retention should rise to 80%. It does seem to be a tragic waste, however, that one man in five of a carefully chosen group should fail to complete his college education.

The intricate scheduling of events on the college social calendar continued to present a challenge to the ingenuity, cooperation and intelligence of students, faculty, and administrative staff. Well over a thousand events had to be scheduled, many of them being all-campus in nature and thus receiving priority of scheduling. The remainder involved important segments of the student body, such as clubs, honoraries, fraternities, and other organizations.

The Senate, the Medusa, and the Interfraternity Council continued to exercise significant campus leadership. Members devoted much time and energy to student affairs and are to be complimented for the excellence of their cooperation and loyalty.

The student body made good use of the new Mather Student Center and showed its appreciation for facilities which were provided for participation in extra-curricular activities. Since the overall academic average of our students continues to show improvement, it is evident that they are willing to take part in desirable activities without permitting their scholarship to suffer.

FROM THE ACADEMIC RECORD

MEDICAL REPORT

The college year 1960-61 revealed the health status of the student body to be good.

Of the contagious diseases we had 1 chicken pox case confined to Hamlin and no spread; 1 infectious hepatitis, mild; 1 known infectious mononucleosis and 1 reported as such without proof of diagnosis; 3 appendectomies; 1 mesenteric adenitis operated on while on vacation at home with a post-operative complication of abscess; 1 viral pneumonitis; and a few gastro-intestinal dysfunctions with one student having severe bleeding from a gastritis or small ulcer.

There were many mild upper respiratory infections with sinusitis but nothing suggestive of influenza.

About four students of the entire student body needed psychiatric help.

With no definite cyclical course of influenza and new variant strains appearing and having been free of massive involvement since 1957 it behooves us to be aware of the possibility of an outbreak and be ready to inoculate the necessary individuals during the coming year.

Although there was more than a three-fold increase, in the United States, in viral hepatitis and many cases appeared in southern Connecticut we were fortunate to have only one student mildly ill. In 1954-1955 we had nine students severely ill and two had to withdraw from college.

Occasionally a case of passing small kidney stones appears over the years and this year we had two.

From the accident viewpoint the report is not as good. Although intercollegiate sports accounted for a shoulder separation and a torn cartilage in a knee, motor vehicles were responsible for more serious injuries and touch football a greater number. The skiers with very little experience and still awkward on their feet returned from the northern slopes of New England invariably with an injury. In baseball there was a fracture of the leg incurred while sliding.

Many minor accidents were due to thoughtlessness on the part of students and possibly the philosophy that they were immune to injury.

The yearly inoculations against smallpox, typhoid and tetanus were given to the AFROTC students who were scheduled to attend summer camp.

FRANCIS L. LUNDBORG, M.D.

PLACEMENT

During the academic year on campus, the Class of 1961 consisted of 212 members. As of August 1st, the class breaks down as follows:

Graduate School — September, 1961	91	43.0%
Graduate School — applications pending	10	4.7%
Graduate School — accepted, no decision yet	2	.9%
Employed	48	22.0%
Military Service	35	17.1%
Traveling	1	.5%
Unemployed	10	4.7%
No information available	15	7.1%
	<hr/> 212	<hr/> 100.0%

In December 132 companies were scheduled to visit Trinity during the months of February, March and April; nine companies cancelled their dates and we cancelled 15 due to lack of interest, leaving a total of 90 companies which interviewed students on campus. These companies held 745 interviews, which resulted in 162 invitations for further interviews and 57 job offers. Twenty-one companies visited Trinity to interview sophomores and juniors for summer programs, resulting in 20 offers and 13 acceptances.

Salaries continue to increase; the salary range for fifth-year engineering graduates was \$6400-\$7320, average \$6808; range for B.S. graduates was \$5000-\$6804, average \$6203; range for B.A. men was \$3380 (a small town newspaper)-\$5880, average \$5135. Teaching salaries for private schools average \$3000 plus maintenance; public schools—\$4800.

The annual mailing of senior resumes to approximately 700 companies was continued. Career Day was held on Tuesday, January 31; the sessions which had the largest attendance were those concerned with graduate study.

DEPARTMENTAL REPORTS

AIR SCIENCE (LT. COLONEL RICHARD B. OLNEY)

The Department of Air Science began this academic year with a total enrollment of 142 cadets, an increase of 40% over the cadet enrollment at the end of the previous academic year. Attrition reduced enrollment to 137 cadets by the start of the Trinity Term:

<i>Enrollment</i>	<i>Christmas Term</i>	<i>Attrition</i>	<i>Trinity Term</i>
Air Science 1	64	2	62
Air Science 2	51	1	50
Air Science 3	12	2	10
Air Science 4	15	0	15

The very encouraging increase in enrollment resulted from the Faculty Advisers' cooperation in acquainting new students with the contents of the Air Science Department's presentations. Indications are that the continued support and encouragement of the Faculty will result in even further cadet enrollments next year.

In the fall Colonel Olney recommended to the President and the Faculty the revision of the Air Science Department's academic presentations to permit the condensation of Air Science 101, 102, "Foundations of Air Power I," into a semester course, Air Science 102, to be presented in the Trinity Term of the freshman year. Additionally, Air Science 201, 202, "Foundations of Air Power II," will be condensed into Air Science 201, to be presented in the Christmas Term of the sophomore year. Air Science students will be permitted to take certain semester course electives in the Christmas Term of the freshman year and Trinity Term of the sophomore year in lieu of Air Science with full credit being given for these substitute courses towards the cadet's commission as an Air Force officer. These recommendations were approved and will be placed into effect in September 1961.

Trinity College's leadership in the Air Force's program to revise, strengthen and modernize the Air Force Reserve Officers Training program was brought to the attention of New England residents by this Department's presentation over WHNB-TV's "Trinity Spotlight" in January. The program has been enthusiastically received.

The Annual Spring Review and Awards Ceremony saw the first visit to the Trinity campus of Connecticut's Governor John N. Dempsey who received the Review. Students, the Faculty and the public enthusiastically applauded the USAF Exhibition Drum and Bugle Corps from Washington, D. C., which participated in the Review Ceremony and put on a band concert and exhibition drill on the campus quadrangle.

Personnel changes during the year saw Technical Sergeant Frederick J. Webb replace Master Sergeant Harold L. Austin as the Sergeant Major and as an Air Science instructor.

RICHARD B. OLNEY—*Honors, Grants etc.*: Awarded Master of Arts degree, Trinity College, June 1961.

Public Lectures etc.: "The Air Age," lecture series at the West Hartford Children's Museum Summer Session, West Hartford, June 1960; "The Air Force and Industry," lecture at East Hartford High School, East Hartford, November 1960; "Trinity Spotlight," Channel 30, January 1961.

Committee and Other Activities: Armed Forces Week Committee, State of Connecticut, May 1961; Parade Marshal's Staff, Memorial Day Parade, Hartford, May 1961.

Meetings: Air Science Professor Conference, New England colleges and universities, held at Massachusetts Institute of Technology, Cambridge, Mass., January 1961.

JOHN F. LAMAR—*Honors, Grants etc.*: Awarded Master of Arts degree (Education), Trinity College, June 1961.

Public Lectures etc.: "The Realities of Deterrence," St. Augustine Men's Society, Hartford, October 1960; Memorial Day Address, Wethersfield Conn., May 30, 1961. Hartford, October 1960; Memorial Day Address, Wethersfield, Conn., May 30, 1961.

WILLIAM H. MEE—*Public Lectures etc.*: "The Air Force in 'Brush Fire' Wars," Bridgeport, Conn., December 1960; "Strategic Striking Force," Springdale, Conn., February 1961; "The Air Force Missile Mission," Fairfield, Conn., April 1961; "Trinity Spotlight," Channel 30, January 1961.

Committee and Other Activities: Military Advisor to the Barnum Festival, Bridgeport, Conn., 1961; Parade Marshal's Staff, Armed Forces Day Parade, Hartford, May 17, 1961.

MORTON R. TRACY—*Public Lectures etc.*: "Strategic Air Command," Manchester, Conn., November 1960; "Man In Space," East Hartford, Conn., April 1961.

BIOLOGY (DR. J. WENDELL BURGER)

The activities of the Department members are listed below:

J. WENDELL BURGER—*Grants*: National Advisory Health Council RG-7458; New York Heart Association.

Committee and Other Activities: Director & Secretary, Mt. Desert Island Biological Laboratory; Director and Chairman, School of Nursing Committee, Hartford Hospital; Commissioner, Conn. Geological & Natural History Survey.

JAMES M. VAN STONE—*Grants*: Public Health Grant B-1705.

CHEMISTRY (DR. STERLING B. SMITH)

The first term of this academic year I was on sabbatical leave and was able to complete enough research to submit a paper for publication. During my absence, the Department was in the capable hands of Dr. Robert H. Smellie.

The Department was host to the Connecticut Valley Section of the American Chemical Society for its October meeting. Five chemistry majors graduate this year; three have been accepted for graduate work in chemistry and one in medicine. The fifth expects to go to a graduate school of business administration.

The acceptance of the pre-medical seniors is progressing satisfactorily. To date, fourteen men have been placed. This past summer one sophomore was taken into the new Johns Hopkins program.

It is apparent that the better men are being accepted early and the poorer ones eventually taken. It seems to me that the present shortage of doctors will not be solved by building more medical schools, but by producing more *really good* pre-medical candidates.

Financial grants to the Chemistry Department this year have been made by E. I. duPont de Nemours and Co., the Stauffer Chemical Co., the American Sealants Corporation and the Shell Oil Co. This money has been used for research apparatus and for student aid.

STERLING B. SMITH—*Public Lectures, etc.*: Speaker at the Hartford Alumni Club luncheon, Hartford, October, 1960.

Committee and Other Activities: Judge at Northern Connecticut Science Fair, State Armory, Hartford, April, 1961.

Meetings: Connecticut Valley Section of the American Chemical Society, Hartford, October, 1960.

ROBERT H. SMELLIE, JR.—*Publications and Reviews*: "The Interpretation of Filtration Rates of Flocculated Colloidal Suspensions" (with V. K. LaMer), *Proceedings of Ninth Annual Clay Conference* — Pergamon Press, 1961.

Honors, Grants, etc.: Presided at the 3rd Session of the First Conference on Nuclear Reactor Chemistry — Sponsored by Oak Ridge National Laboratory, at Gatlinburg, Tenn., October, 1960.

Public Lectures etc.: "The Stabilization of Aqueous Suspension of Thorium Oxide" (with V. K. LaMer and T. Mahr, Columbia University), paper presented at First Conference on Nuclear Reactor Chemistry, October, 1960.

Committee and Other Activities: Editorial Board, *Journal of Colloid Science*.

Meetings: First Conference on Nuclear Reactor Chemistry, Gatlinburg, Tenn., October, 1960.

W. SCOTT WORRALL—*Publications and Reviews*: "Synthesis and Reactions of Glycidonitriles. Transformation into -Haloacyl Compounds and Aminoalcohols" (co-authors: Gilbert Stork and J. J. Pappas), *Journal of the American Chemical Society*, Vol. 82, (1960) 4315; "Parallel Amide Groups," *Journal of the American Chemical Society*, Vol. 82, (1960) 5707.

Meetings: Participant in the Conference on Undergraduate Chemical Education at Bucknell University, Lewisburg, Pa., June 1960; Welch Foundation Conference: Molecular Structure and Organic Research, Houston, Texas, November 1960.

EDWARD BOBKO—*Public Lectures etc.*: "Secondary School Science Instruction," Trinity College Alumni Seminar, June 1960.

Meetings: American Chemical Society, Connecticut Valley Section, Hartford, October 1960; American Association for Advancement of Science, New York, N. Y., December 1960; Medical Education at Albany Medical College, Albany, New York, October 1960.

C L A S S I C S (PROFESSOR JAMES A. NOTOPOULOS)

The Department was host to the joint annual meeting of the American Philological Association and the Archaeological Institute of America which met at the Statler-Hilton in Hartford, December 27-30, 1960. Close to 700 scholars, from all parts of the world, attended this meeting. We are grateful to Dean Hughes for giving the welcoming ad-

dress. The Moore Greek Lecture this year was given by Professor Mabel Lang of Bryn Mawr College who spoke on "The Tablets of Pylos: New Light on the Mycenaean World." Professor Lang continued the tradition of scholarly excellence associated with this lecture. This year the Department was fortunate in receiving from an anonymous donor a fund whose interest will be used annually for two freshman prizes for excellence in Latin. The addition of this prize to our other prizes, the Goodwin Greek Prize and the Melvin Title Latin Prize for upperclassmen, gives balance to our prizes in both languages. The performance of the undergraduate prize winners this spring was high in all aspects of the examinations. Two of our present seniors have been accepted by graduate schools for further study in the classics. There is great need of classics teachers and we are pleased with Trinity's steady contribution to the ranks of classics teachers. The Department wishes to commend Mr. John Stambaugh, a senior majoring in the classics, for his competent assistance in the teaching of the laboratory in Greek 112 this year.

JAMES A. NOTOPOULOS—*Publications and Reviews*: "Homer, Hesiod and the Achaean Heritage of Oral Poetry," *Hesperia*, XXIX (1960), pp. 177-197; "Originality in Homeric and Akritan Formulae," *Laographia*, XIX (1959), pp. 423-431; "Emerson in Greece," *Emerson Society Quarterly*, No. 22, 1961, pp. 42-43; Review of B. A. Van Groningen, *La composition litteraire archaïque grecque* (Amsterdam, 1958), *American Journal of Philology*, LXXXI (1960), pp. 435-440; Review of A. B. Lord, *The Singer of Tales*, *Classical Journal*, 56 (1961), pp. 367-370.

Honors, Grants, etc.: Invited to be Visiting Professor of the Classics at Harvard University 1961-1962, also to give the Jackson Lectures at Harvard, 1962; Honorary Board of *The Charioteer*, a quarterly review of modern Greek culture.

Public Lectures etc.: "Kazantzakis' *Odyssey*," read at Connecticut Section of Classical Association of New England, Fairfield University, October 1960; "Oral Improvisation in Crete," read at Freshman Honors Group, Harvard University, January 1961; "The Homeric Hymns," read at Columbia University, February 1961; "Towards a Poetics of Heroic Oral Poetry," read at Michigan University, March 1961; "The Homeric Hymns," read at Michigan University, March 1961.

Committees and Other Activities: College Board Examiners' Committee in Latin; New England Editor of *Classical Journal*; Chairman of local committee for the annual meeting of the American Philological Association and Archaeological Institute of America, Hartford, December 1960; Executive Committee of Gennadius Library in Athens; Committee on Classical Textbooks for American Philological Association; Advisory Council of Classics Department of Princeton University.

Meetings: Connecticut Section of New England Classical Association, Fairfield University, October 1960; Annual meeting of the American Philological Association and Archaeological Institute of America, Hartford, December 1960; New England Classical Association, Worcester, Mass., April 1961; University Seminars on Classical Civilization, Columbia University, 1960-61.

ALBERT MERRIMAN—*Meetings*: Connecticut Classical Society, Fairfield, October 1960; American Philological Association, Hartford, December, 1960.

GOODWIN B. BEACH—*Public Lectures, etc.*: "Living Latin & Teaching Methods": Albany, N. Y.; Eastern Zone Teachers Association; Vermont Classical Association, October 1960; Burlington, Vermont, October 1960; Foreign Language Conference.

Committees and Other Activities: Participant in Panel Discussion, Lexington, Ky., April; New England Classical Association, Wellesley College, April; Living Latin and Teaching Methods, Florida Classical Association, Jacksonville, Fla., March 1961.

Meetings: Classical Association of New England, Wellesley, Mass., April 1961; American Philological Association, Hartford, December 1960.

The Department of Economics was privileged in the fall to move into a suite of six new offices constructed on the third floor of Williams Memorial. These offices, which adjoin the Accounting-Statistical Laboratory built some three years ago with the financial assistance of the General Electric Company, have done much to expedite the work and strengthen the *esprit de corps* of the Department.

After countless meetings and discussions extending over much of two years, alterations in the Department's curriculum that seek to bring the Department's program into conformity with the principles adopted by the Faculty the preceding year were finally worked out and approved by the Faculty. These changes involved the addition of two courses to the curriculum, changes in the requirements for the major, and provisions for study for senior honors.

The Department sponsored two public lectures during the year. Professor Charles Williams of the Harvard Graduate School of Business Administration gave the George M. Ferris Lecture in Corporation Finance and Investments in November on the subject "Financing in the 1960's." Professor Gottfried Haberler of Harvard University delivered the Mead Economics Lecture in December; his subject was "The State and Prospects of the United States Economy."

In October the Department played host to the Connecticut Valley Economists. Mr. Frazer B. Wilde, chairman of the Connecticut General Life Insurance Company, was guest speaker and addressed the assembly on the subject "Economic Growth — What Is It and How Do You Get It?"

The Department suffered a personnel loss just before the opening of college in September in the resignation of Professor Jack N. X. Oanh, who severed his ties with the College in order to accept a post with the International Monetary Fund. We were fortunate in securing the services of Professors Basil Moore and William Barber of Wesleyan University to take over Professor Oanh's graduate courses during the year and are most grateful for their competent services.

Professor Towle was on sabbatical leave during the Trinity Term, part of which term he spent in Florida studying some problems of monetary policy and international trade.

LAWRENCE W. TOWLE—*Public Lectures etc.*: Radio talks and panel discussions, Hartford, Fall 1960.

Committee and Other Activities: Executive Council, Psi Upsilon Fraternity.

Meetings: Connecticut Valley Economists, Hartford, October 1960; Danforth Campus Workshop, Colorado Springs, Colo., June-July 1960.

RICHARD SCHEUCH—*Publications and Reviews*: Consultant on pamphlet published by the Greater Hartford Council on Economic Education.

Public Lectures etc.: A number of TV programs including "Trinity Spotlight" and "Connecticut Looks Ahead."

Committee and Other Activities: Member of Council, Trinity College Library Associates; Corporator, Renbrook School; Member of Council, Greater Hartford Council on Economic Education.

Meetings: AFL-CIO seminar, French Lick Springs, Indiana, April 1961; Fall meeting, Connecticut Valley Economics Association, Trinity College, October 1960; Spring Meeting, Connecticut Valley Economics Association, Wesleyan University, April 1961.

LEROY DUNN—*Grants*: Danforth Foundation, summer 1960.

Public Lectures etc.: "Trinity Spotlight," Channel 30, December 1960.

Meetings: Connecticut Valley Economics Association, fall meeting, Trinity, October 1960; spring meeting, Wesleyan, April 1961.

ROBERT A. BATTIS—*Grants*: Danforth Foundation Study Grant, 1960.

Public Lectures, etc.: "Critique of Profit, Performance and Progress," Hartford, January 1961; Paper delivered before the Conference on Profit Planning sponsored by Southern New England Telephone Co., Wallingford, March 1961; "Trinity Spotlight," Channel 30, February 1961.

Meetings: Economic History Association, Philadelphia, Pa., September 1960.

EDUCATION (DR. DONALD L. HERDMAN)

The year 1960-1961 was, for the Department of Education, marked by staff adjustments to enable the College to offer regular undergraduate and graduate programs to a slightly increased number of students. In the Christmas Term, Professor Morris was on leave to continue work on several writing projects, and Mr. William Donahoo, a graduate student at Johns Hopkins University, joined the Department. At mid-year, Dr. Juan Estarellas left Trinity to accept a position in his special area of psycholinguistics, and Dr. Absalom Vilakazi was brought in part-time to offer a graduate course in cultural anthropology. The close of the academic year found Dr. Morris preparing to embark upon a summer study trip to India, and the College engaged in a study of the best way to incorporate teacher preparation into the new curriculum.

DONALD L. HERDMAN—*Publications and Reviews*: "The Barnard Collection" (Reprint), *Teacher Education Quarterly*, Vol. XVIII, No. 2, Winter 1960-61.

ENGINEERING (PROFESSOR EDWIN P. NYE)

Focal point for much of the activity of the past year in the Department of Engineering was a visit for two days in mid-January by an Accreditation Inspection team from the Engineer's Joint Council for Professional Development. The results of this team's careful scrutiny of the Department (and the College) will not be known until early fall when the National Accreditation Committee holds its annual meeting. In the meantime we are cautiously optimistic that the name of Trinity College will be added to the rather select group of schools which is allowed to offer Accredited Curricula in Engineering.

It was not possible in the short time between Professor Lockwood's death and the start of the next school year to secure a qualified, full-time staff member. Therefore, two Fifth-year students (Richard Machol and Robb Russell) were employed as Laboratory Assistants during the year in order to help ease the work load. They performed their work well, and were of real assistance to both the Department and the College. For the longer pull William R. Smith, III, '56, comes to us as an Instructor in Engineering in September 1961. Mr. Smith brings new strength and diversity of specialization to the Department Staff. Although he was graduated from Trinity as a Physics major in 1956, his graduate work has been in Electrical Engineering and his Ph.D. research has been concerned with computer theory and design. We feel very fortunate that we have been able to add a man of his potential to the Faculty of the College.

Inasmuch as the ultimate measure of the effectiveness of any educational program is the record made by its graduates, we are greatly encouraged to believe that Trinity College's Five-Year Program in Engineering is soundly conceived. Three of the seven students who were presented for Engineering degrees in 1961 are continuing their studies at recognized graduate schools, assisted by substantial fellowships. William J. Paterson was awarded a National Science Foundation fellowship for study at MIT; Richard E. Machol holds a fellowship for study at Brown University; and Robb N. Russell holds a Ford Foundation fellowship at the University of Illinois. It is, we believe, a good beginning.

ENGLISH (DR. FREDERICK L. GWYNN)

Personnel. In the 1960 Summer Sessions, visiting teachers were: Miss Leonie Adams (Columbia), John C. Gerber (State University of Iowa), H. Allan Gleason (Hartford Seminary), Samuel F. Morse (Mount Holyoke), Harland L. Nelson (University of Connecticut), and Frank W. Wadsworth (University of California at Los Angeles). In September J. Bard McNulty became a full professor and George E. Nichols, III, an associate professor. Miss Barbara Barrett served as part-time departmental secretary.

Curriculum. 26 entering freshmen received exemption from English 101 and 7 from English 102 under the Department's placement testing — a notable increase over previous years. In January, however, 42 freshmen failed the Department's Proficiency Test, which had been administered for the first time in July 1960. In February, the freshman course introduced a new emphasis on the method of teaching literature. Department opinion held that the entering class was better qualified than before, and that the imposition of more uniform standards of writing and literary concepts would guarantee higher subsequent achievement.

Major Work. 24 seniors completed the new intensive 491, 492 course involving independent reading, tutorial with an instructor, colloquium with the entire staff, and a modification of a general examination. In graduate courses there was an average enrollment of 68, an increase over previous years; 7 students completed theses for the M.A. degree. Most of the members of the Department taught one day of English in a local high school in an effort to further understanding of problems common to schools and colleges.

FINE ARTS (PROFESSOR JOHN C. E. TAYLOR)

As noted below, the Fine Arts Faculty gave lectures to various groups and organizations, as we have done in past years. As practising artists, we also engaged in various activities. Of special interest to the Trinity community is Professor Pappas's portrait of Professor Morse Allen which was painted in honor of Professor Allen's fortieth anniversary as a member of the Faculty. Mr. Ferguson's and my productions are noted below.

In regard to exhibitions, the Olsen Foundation loaned us an interesting collection entitled *Sculpture through the Ages*. This was shown in the Library lobby and reading room from March 20th to April 14th and was installed by Mr. Ferguson. During the last few weeks of the Trinity Term we set up an exhibition of students' work—painting, prints, photographs, and sculpture—in Wean Lounge. The show was one of the largest and best of this kind that our students have yet presented.

We were all very much pleased and gratified upon the arrival, on April 17th, of eight Renaissance paintings which are a gift to the College from the Samuel H. Kress Foundation of New York. The group, known as the Kress Study Collection, were on exhibition in the Library during the latter part of June. Thereafter, the pictures are to be used as "teaching tools" in art history courses.

JOHN C. E. TAYLOR—*Art Activities*: Design for Bissonnette pew-end, pew-end dedicated in Chapel, April 23, 1961; Designs for pair of kneeler-ends, kneeler-ends dedicated in Chapel, June 10, 1961.

G O V E R N M E N T (Dr. VERNON L. FERWERDA)

The revised curriculum in government proved to be a satisfactory adjustment of available manpower to the demands of undergraduate and graduate instruction.

The new Government 100, *Introduction to Politics*, under the direction of Rex Neaverson, provided the Department with a long-needed first course whose objective is to define the scope and methods of political science as the field becomes increasingly diverse and complex.

The new course on the Government and Politics of Asia introduced to the College Paul Meyer, recently retired foreign service officer, whose background and experience in Asia proved stimulating to both graduate and undergraduate students.

Senior seminars on Africa and the Arab World completed a useful study of the non-western world, whose importance is growing at a significant rate.

which was an unqualified success. The members of the Department continued their writing and research. Dr. Cooper was appointed the editor of *The Journal of British Studies*. In addition, Dr. Cooper served the College magnificently moderating the weekly Trinity television series and impressed all by his deft handling of the programs which varied in emphasis at almost every showing. Many professional meetings were attended by the staff, not only as observers but also as active participants.

College committee work and its responsibilities were fully shouldered by the History faculty, with Dr. Cooper chairman of the Committee on Appointments and Promotions, Dr. Black chairman and Dr. Davis a member of the Joint Committee on Educational Policy, Dr. Thompson chairman of the Curriculum Committee and the rest of the staff serving on other committees. Dr. Downs' work in helping choose the furniture and plan the layout for the Faculty Lounge was much appreciated. All were pleased when Dr. Davis was promoted to a Professorship.

Nine of the ten Trinity seniors who have completed the major in mathematics plan to enter graduate schools next fall. Four will continue in mathematics (Yale, University of Pennsylvania, New York University, University of Kansas), three will study physics (two at Wesleyan, and one at Dartmouth), and two will attend schools of business administration (Columbia and Chicago). The tenth senior will be employed by Mutual Life Insurance Company of New York.

Under the sponsorship of the Mathematical Association of America, with support by the National Science Foundation, Dr. Herman H. Goldstine visited the College on March 22, 1961. Dr. Goldstine, who is Director of Mathematical Research for International Business Machines Corporation, gave a lecture that evening on "Fundamentals of Computers and Logical Design." Earlier that afternoon he lectured informally to the members of the Mathematics Department and the Physics Department on "The Mathematical Foundations of Quantum Mechanics," and was also entertained at a tea given jointly by the two departments.

MODERN LANGUAGES AND LITERATURES

(DR. ARTHUR H. HUGHES, DR. LOUIS H. NAYLOR)

The combination of all the languages taught at Trinity College into one department has formed the largest department of the College. It enjoyed its usual heavy registration, especially in the elementary and intermediate courses, and provided instruction for a variety of majors. The languages taught at Trinity were French, German, Italian, Russian and Spanish.

Undoubtedly, the most important matter to be noted is the fully deserved promotion of Professor Gustave W. Andrian from Associate Professor to the rank of full Professor of Modern Languages and Literatures. He is indefatigable in his service to the College, and now, in addition to teaching a full complement of courses in Spanish and French, he is devoting an extraordinary amount of time and effort, as Chairman of the Lecture Committee, to arrange for speakers for the coming academic year.

Professor Walter D. Leavitt worked during his leave of absence during the Christmas Term on a review grammar of Russian.

Professor Campo and Professor Naylor acted as hosts for the second consecutive year for the New England Chapter of the American Association of Teachers of Italian which met at the College in October 1960.

The Cesare Barbieri Center of Italian Studies offered the following lectures during the academic year 1960-1961:

G. E. Kidder Smith: *The New Architecture of Italy*

H. Stuart Hughes: *The Italian Risorgimento: Some Unfinished Business.*

The Center, together with the Avery Memorial, arranged a noteworthy exhibition of paintings by Italian artists of the last one hundred years. It was a contribution to the world-wide observance of the centenary of Italian Independence. The *Cesare Barbieri Courier* kept up its usual standard of excellence.

Professor Hans F. Frese, Professor Carl V. Hansen and Mr. Albert L. Gastmann carried a full load of courses in German. Professor Hansen also directed the activities of the German Honorary Fraternity, Delta Phi Alpha.

The Department has been very fortunate in securing three excellent new Instructors: in Spanish, to replace Messrs. Diaz and Debicki, we now have Mr. Arnold Kerson, who has come to us from Yale University. He has nearly completed work on his doctoral dissertation to be submitted to Yale; the title is *Rafael Landivar and the Latin Literary Currents of New Spain in the Eighteenth Century*.

Also in Spanish we have Mr. Lawrence Stires, who has been teaching for some time at Duke University and who is a candidate for the Ph.D. at Duke.

In French, to replace Mr. Edward B. Williams who resigned in the spring of 1960, we are indeed fortunate to have secured Mr. Norman R. Long who had been teaching French for four years at the University of Michigan; he is a man of wide interests, among which is his work as Director in France of groups of young men and women belonging to the Experiment in International Living.

Professor Naylor was invited by the University of Kentucky to speak at their fourteenth annual conference on foreign languages, held in Lexington at the University on April 28 and 29 of this year. He read a paper on the *Influence of Virgil on Chateaubriand*. He has also continued as one of the Directors of l'Alliance Francaise, groupe de Hartford.

During the Christmas Term, Professor Waterman conducted a seminar course on the contemporary French novel; in the Trinity Term, Professor Leavitt gave a seminar course on Existentialism in French Literature.

During the Christmas Term, Professor Andrian offered a seminar on *Cervantes*; and in the Trinity Term, Mr. Kerson gave a seminar on *Spanish-American Literature*.

This report would not be complete without a word of tribute to our colleague Mr. Albert Gastmann, who after teaching most successfully Spanish and German in our De-

partment for several years, is henceforth to be a member of the Department of Government, which is really his chosen field of academic endeavor.

MUSIC (PROFESSOR CLARENCE E. WATTERS)

No startling events dramatized the work of the Department in this academic year, that was characterized rather by marked increase of activity in a number of areas. On-campus events were numerous and varied. Outside activities of the two professors brought the attention of the public to the College in more than a dozen events, while the name of Trinity was honored by more than twenty appearances of the Glee Club.

Lectures and concerts at the College numbered ten. Perhaps the outstanding of these were the three Chamber Concerts given in Mather Hall, two by the College Chamber Orchestra of Connecticut, and one by the Low Madrigal of Cambridge, Massachusetts.

Chapel events of special interest to the public were the Service of Lessons and Carols by the Cantores Sancti and the performance of the Beethoven Mass in C by the combined Glee Clubs of Connecticut College and Trinity College with the assistance of the Boston Oratorio Quartet.

Not less important (especially to our students) were the Christmas Vespers sung by the Christmas Choir of the Day Prospect Hill School of New Haven and the Trinity College Chapel Choir, the Lenten Vespers sung by the Choir of the Ethel Walker School of Simsbury and the Chapel Choir, and the annual service of English Renaissance Music sung by the Cantores Sancti.

The Glee Club enjoyed its most extensive season in concerts earlier mentioned. The Fall Tour led to the New York area, the Spring Tour to New Jersey, Maryland, South Carolina and Florida. Several broadcasts and a telecast rounded out the activities.

Two lectures that proved interesting to students and faculty were "Debussy the Unknown" by Alberto Salimbeni and "Opera Staging" by Elemer Nagy. To Oswald and Doris Lehnarts of the Hartford Conservatory we are grateful for a fine violin and piano recital.

The student Chamber Music Club continues to attract students not occupied with other musical organizations. The Recorder Ensemble performed on television, in local secondary schools, and in a concert of the College Chamber Orchestra. Recorders were purchased for a complete quartet.

One hardly needs to be reminded that the College Band under Mr. Greene has been brought to enviable standards of performance.

Dr. Barber's "extra-curricular" activity knows no wane. Dr. Barber continues as Membership Chairman of the College Music Society, as author and editor (reviews in fall and spring issues of the *Cesare Barbieri Courier*; new edition of the libretto of Charpentier's opera "Medee"), as lecturer (Hartford Symphony; Conard High School; Loomis Institute), and as ambassador (three meetings of the College Music Society and three meetings of the American Musicological Society).

Your Professor of Music has traveled far and wide in concerts and lectures during the year: Inauguration of the organ in the Church of the Good Shepherd, Hartford, in October; Lecture-Recital for the Hartford Chapter of the American Guild of Organists in November; Recital at Colby Junior College in November; Lecture and recital for Seminar on Church Music at Davidson College in November; Recital for the December conclave of the American Guild of Organists at St. Louis; Soloist for the St. Thomas Choral Society, N. Y., N. Y., in May; Recital for the Regional Convention of the American Guild of Organists at Boston, in June.

The Department acknowledges with gratitude the gift by Dr. Hans Frese of a rare German violin of the school of Augsburg, ca. 1700. This fine instrument will be a valuable addition to the collection of the new Arts Building. A second gift of Dr. Frese was a fine German practice violin for student use.

Through the cooperation of WRTC the Department for the first time has a complete set of tape recordings of all important music events of the year.

PHILOSOPHY (DR. BLANCHARD W. MEANS)

This year the Department initiated a series of five departmental seminars required of all philosophy majors. These meetings were held jointly with the Philosophy Club and included three papers by outside speakers, one by Dr. Stoutland, and one by Paul Rohlfsing, our only senior to receive Honors in Philosophy. These seminars were quite successful in stimulating serious discussion of philosophic problems of common interest to the students regardless of their courses and freed from any hampering considerations of grades or credits. Certainly, these seminars were of benefit to the staff as well as to the students, and we intend to continue them as part of our enhanced program of study.

In my report for last year, 1959-1960, I commented to the effect that in an effort to cooperate with the implied principle of the New Curriculum the Department had revised the entire schedule and content of its courses, primarily to provide an enhanced program of study in the third and fourth year. In this revision we introduced one new course, Philosophy of History, and made provision for advanced individual study. At the same time we re-named one course, Philosophy of Science, and grouped several courses under a single title, Special Studies in Philosophy. In this way we retained these several courses with the official recognition of the Curriculum Committee to be given in alternate years or at the discretion of the Department. Superficially, by this revision we evidently appeared to be adding five new courses, whereas in fact we reduced our yearly offering by four to five courses. We perhaps too easily assumed that this revision would replace the old program in its entirety and, hence, that the deletions involved would be apparent without specific action for each particular course concerned.

PHYSICAL EDUCATION (PROFESSOR RAY OOSTING)

Intercollegiate Athletics

The 1960-61 season was not a good one from the standpoint of athletic success against our normal rivals. The varsity teams won 38 contests while losing 55 for an average of 40.9%. The freshman teams fared a little better, winning 33 contests, losing 34, for a 49.3 average.

The football team scored victories over St. Lawrence, Franklin & Marshall, and the U. S. Coast Guard Academy, and tied favored Wesleyan in the season's finale. With very few of the regulars graduating, and the members of a fairly strong freshman team available, prospects are brighter for the coming year.

The varsity soccer team enjoyed a 6-3 season and finished 6th in the 28-team New England Intercollegiate Soccer League. Alex Guild, the second Trinity athlete to represent the U. S. in Olympic competition, was again outstanding.

The varsity basketball team just about reversed its fine showing of the previous year, winning only four games of its 17-game schedule. Here again, prospects are brighter for the coming year.

The swimming team won 3 of 10 meets. David Raymond set new college records in the 200-yard backstroke and the 200-yard individual medley events.

The track team continued the success of the previous year, with a 4-3 record and a creditable second place in the Eastern Intercollegiate Track Association Championship meet. Captain Mark Smith was again outstanding and was well supported in the dash events by John Szumczyk and John Wardlaw.

The baseball team after a successful spring vacation trip finished with a 6-8 record. Victories over both Wesleyan (16-1) and Williams (3-2 in a 13-inning contest) were the season's highlights.

The golf and tennis teams enjoyed winning records; golf 4-3-1 and tennis 4-2.

Lacrosse, recognized as a varsity sport for the first time, had a disastrous 1-6 season, in spite of considerable enthusiasm for this increasingly popular addition to the spring program.

Another sport showing considerable student interest is rowing. Several races were arranged on an informal basis and the results were very encouraging. A crew coach of renown has moved into the Hartford area and has volunteered to coach the team next season.

Intramural Athletics

An all-year battle between Alpha Chi Rho and Alpha Delta Phi for the Alumni Trophy was decided at the Intramural Track Meet. Although 14 other organizations were in the running, Alpha Chi Rho finished first with 698 points. Almost 50% of the entire student body took an active part in this 11-sport program.

Required Physical Education

The emphasis in this program is in developing skills, knowledge and interest in sports having a lifetime carry-over value. The Department has also stressed activities which develop fitness in line with President Kennedy's National Program of Physical Fitness.

PHYSICS (Dr. F. WOODBRIDGE CONSTANT)

The Department regretted the loss of Dr. William Trousdale, who left at the end of the Christmas term to take a full-time research position at the University of Pennsylvania. His place was partly and ably filled by Mr. Al Howard of the Yale Physics Department, who commuted to Trinity three days a week. Dr. Trousdale's position will be filled in September 1961 by Dr. Charles Miller, who will come to Trinity from Bryn Mawr.

The Department enjoyed visits and talks by Dr. Herbert Pohl of Princeton, Dr. P. Kusch of Columbia (who spoke at the Science Symposium in April), and by Dr. G. W. Hinman of Carnegie Tech (who came as a Visiting Scientist under the sponsorship of the National Science Foundation).

A Steering Committee for the Physics-Mathematics Building at Trinity was organized and met frequently. Mr. Perry W. Pratt, Vice-President of the United Aircraft Corporation, very kindly consented to be the Chairman of this committee. Agreement was reached in regard to the site and the plans for the new building as drawn up by the architect for the College, Mr. O'Connor.

The Department's curriculum was revised so as to strengthen preparation for graduate work. Thought was also given to an expanded research program involving resident graduate students, a program which the new Physics-Math Building will make possible.

PSYCHOLOGY (Dr. M. CURTIS LANGHORNE)

Pursuant to your memorandum of May 18th I am outlining herewith a brief report of the activities of the Department of Psychology for 1960-61.

This has been a good year for the Department of Psychology. The staff has worked together most harmoniously and morale has been high. Student enrollment is rising both in classes with regard to the number of students majoring in the Department. The Department has been strengthened greatly by the addition of Dr. A. C. Herschberger. He is an excellent teacher and a hard worker. He has done an excellent piece of work with the Psychology Club. Mr. Richard E. Nolan has filled in admirably the temporary vacancy caused by Dr. Meade's leave of absence. Student reaction to both of these men has been most gratifying. Dean Lacy has had good enrollment in his classes and fits in well with our departmental staff needs. Dr. Meade has been traveling in Japan, Asia, Africa, and Europe. He has had the opportunity of visiting a large number of colleges and universities and has talked to psychologists, psychology seminars, and psychology students in many of these institutions. So far three of our students have been accepted into graduate schools at Southern Illinois University, Columbia University, and the University of Delaware. One was awarded a \$2400 assistantship. Significant additions have been made to our laboratory and equipment needs.

M. CURTIS LANGHORNE—*Publications and Reviews:* "The Roles of Psychological Associations," *The American Psychologist*, No. 16, 1961, pp. 41-43.

Public Lectures, etc.: Six lectures on Freshman-Sophomore Advisory Council Series, October-April; "Authentic Higher Education," New Britain Trinity Club, January; "Personality of Elementary School Children," Lincoln School PTA, Manchester, Conn., February; "Man's Search for Himself," two-day retreat of Newington Congregational Church, held at Senexet, Conn.; "What Men Live By," Trinity Vesper Services, February; "The Future is Now," National Honor Society, Maloney High School, Meriden, Conn., March; "The Future is Now," Trinity Freshman Class Matriculation Ceremony.

Committee and Other Activities: Steering Committee, New England Psychological Association; Organization and Functions of State Association Commission of American Psychological Association; "Task Force E" (Committee to Study Relations of Education & Psychology) of American Psychological Association; Immediate Past President of South-eastern Psychological Association with membership on Executive Committee; Board of Religious Education, Newington Congregational Church.

Meetings: Eastern Psychological Association Meeting, Phila., Pa., April 1961; Connecticut Valley Association of Psychologists, Fairfield University, April 1961.

RELIGION (DR. EDMOND LAB. CHERBONNIER)

A growing problem for the Department of Religion has been its abnormally high ratio of students to faculty. Thanks to the generosity and concern of a friend outside the College, the situation has been relieved by the appointment of a fourth member of our teaching staff, Mr. C. Freeman Sleeper, who will come to Trinity in September 1961. A graduate of Colby College and Yale Divinity School, Mr. Sleeper is completing his doctorate at Vanderbilt University. His arrival will not only add flexibility and balance to the Department, but will also make it possible for each member of the Department to devote himself to his own special field.

The two new courses introduced by Dr. Johnson this year have been highly successful: "Major Issues of the Reformation" and "Religious Existentialism." For the coming year, the Faculty has approved our proposal to restore a badly needed course in Christian Ethics. The addition of this course rounds off our six-year attempt to build a sound program in Religion. At the moment we foresee no need to expand our offerings further.

1960-1961 was the second year in which students have been able to major in Religion. Of eight majors in the graduating class, only one plans to do graduate work in the field. This proportion reflects our determination not to let the Department become "professional." In the Junior Class, twenty students are majoring in Religion. We expect this figure to be reduced considerably with the adoption of the new curriculum.

Finally, it is worth mentioning that for the first time the members of the Department have adjoining offices. The result has been a significant increase, not only in communication, but also in *rapprochement*. The planning and expense which the new offices entailed have raised efficiency and morale beyond our expectation.
