1988-89

The Annual Report of President James F. English, Jr. 1988-1989

TRINITY COLLEGE
HARTFORD, CONNECTICUT

The year just past was an unusually important one for Trinity, as it marked the end of James F. English, Jr.'s eight-year presidency and the successful conclusion of a nationwide search for his successor. As the new college year opened on July 1, 1989, Tom Gerety was on hand to assume his responsibilities as Trinity's seventeenth president. It seems appropriate that this report contain brief comments by each: a review of the past, and some thoughts about the future.

As recently retired president of Trinity, I am pleased to report on 1988-89, the eighth and final year of my administration. First, I am delighted the Board of Trustees has placed the leadership of the College in the capable hands of Tom Gerety, who took over as Trinity's 17th president on July 1. Formerly Nippert Professor of Law and Dean of the Law School at the University of Cincinnati, Tom has had a distinguished career teaching constitutional law, ethics and political philosophy. Along with his academic credentials, he has a consistent record of leadership and community service and a deep understanding of the urban environment. I wish him every success in his endeavors, and I congratulate the search committee of trustees, faculty and students for its skill in selecting Tom Gerety out of a national pool of exceptional candidates.

This past year also marked the completion of The Campaign for Trinity, which came in significantly over its \$42 million goal, and the implementation of many of the principal objectives contained in the College's Long Range Plan, developed five years ago. Indeed the two were closely linked; we could not have carried out our plans without the extraordinarily generous support elicited by The Campaign.

The central element in Trinity's plan was a substantially revised non-major curriculum, approved by the Faculty and made effective for freshmen entering in the fall of 1988. Few would argue that the quality of a college is best defined by the intellectual interchange which takes place in the classroom, and that the nature of that interchange is more nearly determined by the quality of teacher and student than by the structure of the

curriculum. But the curriculum remains important. It is the essential mechanism by which the institution can hope to give some direction to the interchange, and it provides a helpful stimulus to the activities of both faculty member and student.

The components of the revised curriculum have been described in previous reports. They are now in place. No doubt some future refinements will take place, but implementation thus far has proceeded smoothly. Twenty-three Interdisciplinary Minors, covering a remarkably broad range of topics, have been developed and are offered. These six-course sequences, each involving at least three different academic departments, have proved to be appropriate and convenient vehicles for the exploration, at the undergraduate level, of interesting themes, periods, and places. More than 70 faculty members have shared in preparing the minors, and nearly 100 are contributing courses to them. Now they are eagerly awaiting the reaction of the students, who are required to select one in addition to their major.

The new distribution requirements—at least one course in each of five general areas—are also in effect. Their principal consequence will be somewhat larger enrollments in mathematics and natural science courses, a result consistent with other efforts to increase student interest in these areas. Our two new proficiency requirements—in writing and in mathematics—have been successfully implemented. Added staffing is in place, and appropriate space has been provided. The Writing Center is located in a soon-to-be-completed addition to the English Department building, and the Math Center, now in temporary quarters, will have a prominent place in the new academic building now under construction.

Space needs have, in fact, posed a major challenge to the College during my years as president. In the early years, concern centered on overcrowding in the dormitories and lack of adequate space for dining and social activities. These issues prompted a major renovation and enlargement of Mather Hall, construction of the new Vernon Street Dormitory and Koepfel Student Center, and renovation of a number of older residence halls. While further improvement of our residential plant remains a long-term priority for the College, substantial progress has been made since the early 1980s.

Other pressing space needs soon became apparent, however, and a number of these were addressed in The Campaign for Trinity. Thanks to the success of that effort, several important projects have been completed, and others are under way. An enlargement of the Ferris Athletic Center provided improved locker facilities for women athletes and a larger rowing tank and weight room. The construction of added squash courts will commence next spring. Through the generosity of the Heublein Corporation, the Biology Department has been provided with a long-needed greenhouse for its botanical studies.

Construction recently began on two other important projects. Thanks in large part to a generous gift from Gwendolyn Miles Smith in honor of her late husband, Allan K. Smith '11, we will renovate and enlarge a substantial Victorian house on Vernon Street to provide an attractive facility for the use of alumni and faculty members. Appropriately named Smith House, it will contain handsome meeting and dining facilities as well as several rooms for the accommodation of overnight visitors to the College.

Our largest project is the new academic building now under construction. A distinctive structure designed by the firm of Cesar Pelli and Associates, it will house the departments of Engineering and Computer Science and of Mathematics, as well as the College's Computing Center. As these activities move into the new building in 1991, substantial space will be vacated elsewhere that is much needed by other academic and administrative departments. On completion, this building will define the fourth side of an attractive new quadrangle at the south end of the campus. It is Trinity's most extensive building project since the 1960s, and we are most grateful to the many individuals, corporations, and foundations who have made it possible.

The past year also saw substantial progress in making several long overdue improvements to Trinity's administrative infrastructure. We finally acquired an up-to-date telephone system and also extended air conditioning to major administrative areas. Considerable headway was made in installing a new, integrated system of computer software for administrative offices. These major initiatives, which perhaps inevitably encountered problems during the conversion period, should all be functioning smoothly by the end of the current academic year.

The College continued its record of careful financial management and finished its 19th successive year with an excess of revenues over expenditures. Endowment funds stood at a record year-end level of \$126.3 million on June 30, 1989.

An important contributor to these results was the Annual Fund, which exceeded its announced goal and achieved a new high of \$2,180,703. The success of our capital campaign has already been noted. The original goal of \$42.0 million was passed early in the fall, and by June 30, the end of The Campaign, the total had grown to nearly \$50.4 million.

We were all deeply saddened by the death of Constance E. Ware, Vice President for Development, during the year. She was a person of extraordinary energy, imagination, and drive. The success of our efforts is testimony to her dedication and to the respect and affection in which she was held by all of Trinity's friends and supporters.

THE CAMPAIGN FOR TRINITY MADE POSSIBLE THE GROUNDBREAKING FOR TRINITY'S FIRST ACADEMIC BUILDING IN MORE THAN TWO DECADES. THE \$9.5 MILLION FACILITY WILL HOUSE THE MATHEMATICS DEPARTMENT, THE COMPUTING CENTER, THE MATHEMATICS CENTER, AND THE DEPARTMENT OF ENGINEERING AND COMPUTER SCIENCE. GROUNDBREAKERS INCLUDED (L. TO R.) PRESIDENT JAMES F. ENGLISH, JR., BOARD SECRETARY WILLIAM R. PEELLE, AND BOARD CHAIRMAN EDWARD A. MONTGOMERY, JR.

COMMUNITY OUTREACH ACTIVITIES INCLUDED HOSTING THE CONNECTICUT SCIENCE FAIR. MORE THAN 600 STUDENTS FROM 135 HIGH SCHOOLS ACROSS THE STATE VIED FOR HONORS IN THE WEEK-LONG COMPETITION. FACULTY MEMBERS JUDGED THE PROJECTS, CONDUCTED TOURS OF TRINITY'S SCIENCE FACILITIES AND SERVED AS MENTORS DURING THE FAIR.

Progress continued in the ongoing effort to strengthen Trinity's ties with the community around it. For the first time, and partly supported by funds contributed to The Campaign for Trinity for that purpose, a regular office was created to help the sizeable number of students wishing to undertake volunteer work find appropriate jobs with local agencies. The College actively encourages community outreach activities on the part of its students, and during the year the first state-wide conference of outreach coordinators and student leaders was held at Trinity.

The heart of the College, however, lies in neither buildings nor administrative services, but in its students and its faculty. Despite the decline in the number of college-age students over the past decade, Trinity is attracting a more numerous and better qualified pool of candidates than ten years ago, and a more diversified one as well. The proportion of minority freshmen has risen from under 10 percent to over 15 percent, and special efforts have been made to assure them a hospitable and supportive environment. Despite a steady increase in the charges we are obliged to set, we still make admissions decisions independently of applicants' financial circumstances and have thus far been able to provide appropriate aid to all those who demonstrate need. Trinity is among the group of selective independent colleges and universities that continue to believe that a policy of aid-blind admissions and need-based aid best serves our basic mission by enabling us to direct available financial aid resources to those qualified students who most need them. Of The Campaign for Trinity's original goal, \$6.0 million was earmarked for financial aid. I am pleased to report that the funds actually received for this purpose totaled over \$6.7 million.

The hallmark of a college like Trinity must be its faculty members' close interaction with students and the consistently high quality of their teaching. We believe, however, that the College will be best able to attract and nurture the finest teachers if it offers them ample opportunity to pursue their own research and remain active in their academic specialties. To this end in recent years, teaching assignments were reduced from six courses a year to five, added funds were made available for faculty research leaves, and, this past year, a regular system of pre-tenure research leaves for junior faculty members was established. The Long Range Plan also called for an increase of seven in the size of the faculty. The last of these positions was authorized by our Trustees in 1988-89, thus completing the original plan. The College is proud of its faculty members, and a summary of their accomplishments over the last 12 months is included in this report.

Among the essential ingredients in Trinity's educational experience are the activities and events that occur beyond the classroom. The vitality and variety of programs in the past year reflect the imagination and initiative of both faculty and students. Among the noteworthy events were: a Convocation on U.S./Soviet Relations featuring a keynote address by former

U.S. Ambassador Arthur A. Hartman; a faculty symposium on Art, Knowledge and Ideology; a town-gown lecture series on "The Politics of Hatred: The Middle East Yesterday and Today"; Black History Month; and the Third Annual Artificial Intelligence Lecture Series. The campus also celebrated "Understanding Technology Day" and "Neuroscience Day" with lectures and demonstrations by our own faculty and visiting experts. The continuum of lectures included a memorial to Martin Luther King, Jr. and discussions of magnetic resonance, medical ethics, feminist theory, robotics, and U.S. fiscal policies, among others.

On the performance side there were stimulating student productions of Chekhov's *Three Sisters* and Cole Porter's *Anything Goes*. The Bloomsbury Theater of London performed both *Medea* and *Agamemnon*, and a group of nationally-known women poets presented a variety of readings in the "Rainbow Sounds" Series.

Music had a particularly productive year with the debut of two new campus ensembles: the Trinity Gospel Choir and the Trinity Community Orchestra. The Hartford Symphony Orchestra and Organist John Rose combined to present a dazzling chapel concert called "Music in a Gothic Space," while the Concert Choir joined with Symphony musicians in a Bach and Stravinsky cantata and concerto performance. The Chapel Singers not only performed on campus, but also entertained audiences in England on a June tour. The chapel was also the setting for a "February Festival for Organ" featuring artists from both on and off campus.

Our students' energies also find healthy outlets in athletics where 40 percent of the student body takes part in varsity sports—with remarkable success. The men's basketball team won its fourth ECAC championship in six years and posted a 22-3 season record. The women's softball team won the NIAC title, and the undefeated men's track team was the NESCAC champion. The hockey team had a remarkable 19-7 season, but fell in the ECAC semifinals after winning the title the three previous years. Other fine seasons were enjoyed by the women's track team that lost only twice in ten outings, and by the 5-2-1 football team that had its ninth straight winning season. We take pride in our student-athletes and in the balance between academics and athletics that we and the other members of the New England Small College Athletic Conference have achieved.

Outreach activities play an increasing role in the Trinity experience as more of our students interact with the Hartford community through volunteer service and internships. The College encourages these activities and is an active member of Campus Compact, a national organization that

focuses attention on public service. Over 60 percent of our students pursue internships with Hartford businesses, cultural organizations, health care and social service agencies and federal, state and local government offices.

The College continued its ten-year partnership with Hartford Hospital and The Institute of Living in addressing neighborhood concerns through the Southside Institutions Neighborhood Alliance (SINA). This year SINA began implementing its plan for selective purchase of deteriorated properties adjacent to the three institutions and rehabilitation for low-income tenants. SINA also "adopted" the nearby Betances Elementary School in an unusual partnership with the public school system. Among the recent accomplishments were a book drive which stocked the school library with 4,000 books and periodicals; a teachers' lounge refurbished by the Institute of Living; and educational visits for the children to Hartford Hospital and Trinity. SINA also marked the seventh year of its Scholar of the Month Program that recognizes the academic achievements of Hartford high school students.

As I conclude my years at Trinity, I wish to express my thanks to the many colleagues whose loyal support made my time here so pleasant: four successive Faculty Secretaries, three successive Deans of the Faculty, dedicated vice presidents for Development, for Student Life, and for Finance, and many others. I am especially grateful to our Trustees and their two successive, exemplary chairmen: George W. B. Starkey '39, M.D. and Edward A. Montgomery, Jr. '56. And above all, I thank my wife, Isabelle, who cheerfully devoted eight years of her life to my job and this College. These have been very fulfilling years for us, and we wish equal satisfaction to Tom Gerety and Adelia Moore as they begin their years in the President's House and inaugurate a new and extraordinarily promising period in the life of this College.

JAMES F. ENGLISH, JR.
Retired President

PRESIDENT GERETY BEGAN HIS TERM WITH A CONVOCATION ADDRESS PLEDGING CONTINUED COMMITMENT TO INCREASING MINORITY REPRESENTATION AMONG STUDENTS AND FACULTY, AND IMPLEMENTING A NEW, STRONG POLICY AGAINST RACISM ON CAMPUS.

Epilogue: President Tom Gerety

November, 1989

By all rights this annual report belongs to Jim English, who has described earlier the capstone year of his Trinity presidency. As his successor, I marvel at the many accomplishments of his administration, which have made Trinity one of the nation's great liberal arts institutions. On behalf of the Trinity community, I extend our gratitude to Jim for his gifted stewardship, and wish him and Isabelle a long and fulfilling retirement.

The presidential transition over the summer was accomplished smoothly due, in large part, to the warm welcome and generous help of the faculty and staff. Even my decision to return the president's office from the remote Downes tower to the traditional, more accessible Williams location was accepted with good grace despite the domino effect it had on various administrative offices.

To date, much of my time has been devoted to getting acquainted: with the faculty, students, and staff, with the city of Hartford, and with the larger Trinity community of alumni, parents and friends. As I said in my inaugural address, I have no detailed plan to offer now, but I do have a sense of where we must put our energies.

Our foremost commitment will be to preserve Trinity's liberal arts heritage and strengthen its intellectual resources. We must do all we can to see that this institution reflects the diversity of America and the world. We must nurture our faculty, inspire our students, and keep alive the classical traditions from which we draw our strength. We also reaffirm our commitment to our neighbors and to our city. Our urban location is one of our unique assets and, despite its contradictions, offers enrichment and sustenance to our many undertakings.

In the months ahead I trust that many of you will share your ideas and hopes for Trinity's future with me. As we enter the nineties, this College has the resources and the will to make the decade a time of uncommon accomplishment.

TOM GERETY
President

TRINITY'S COMMITMENT TO DIVERSIFYING ITS STUDENT BODY WAS REAFFIRMED IN THE OPENING CONVOCATION ADDRESS BY PRESIDENT GERETY. A VITAL PART OF THIS VENTURE IS THE ANNUAL MINORITY WEEKEND THAT GIVES PROSPECTIVE STUDENTS THE OPPORTUNITY TO MEET WITH TRINITY FACULTY SUCH AS PROFESSOR DAVID HENDERSON OF THE CHEMISTRY DEPARTMENT.
