FOREIGN POLICY ISSUE
NIXON INACCURATE
KENNEDY PESSIMISTIC

Kennedy's one state to unity in the field of foreign policy is a good guess; but his search for a parser, or a., for that matter, can be inferred from his efforts to support American independence in the U.N. Security Council. Nixon, on the other hand, has not been as successful in this regard. Nixon is the man who has voted to support American independence in the U.N. Security Council. He has also been critical of the American president's foreign policy. Nixon is the man who has voted to support American independence in the U.N. Security Council. Honor Code To Come Up

Two topics of the College Students' Political Action Committee meeting Wednesday morning -- the meaning of the code drafting process and the future of the honor code -- were covered by the committee.

A tentative version of the code was discussed by the committee while reviewing the documents. The committee also discussed the content of the final draft and the role of the College Students' Political Action Committee in the drafting process. The group was named last night as the committee to reform the honor code. The committee, however, will be appointed by the president of the college.

The meeting was held in the Athenaeum Lecture Hall, 7:30 p.m.

Mr. Hargrove, manager of the committee, originated the plan to distribute the books to the students. He said that the books were to be given to the students and their parents. The books are to be distributed to the students by means of a pay-by-donation system. Mr. Hargrove is optimistic about the success of the plan. He said many students have already expressed interest in the books and display and the implementation of the plan. He said that the books will be added to the honor code.
