State Director Discusses COMP Program

UConn Student Anger

Lacy: Violations Stop Or Cars Go

BY DAN COTTA

By Sept. 29—UConn students today announced that three hypothetical attack plans, only one of which would produce three to five hundred degrees of radiological contamination, would be possible in the northeastern United States try at Connecticut College, Dr. Christenson elaborately documented his charge that the Clark administration would be unable to protect the student body, not just the students of the Connecticut College's site, from such attacks. Promising Additions
It is with pleasure and expectation that the Trinity students and faculty have been following the progress of the new science building. This building will house the physics and chemistry departments, and will provide a focal point for scientific research and education. The building is designed to meet the needs of both students and faculty, and will be a valuable addition to the campus.

Bank Heist Rebuilt
To the Editor:

We were interested in Professor Bankwitz's recent statement in the Trinity Tribune that he believes that the U.S. should increase its armaments in response to the growing threat of nuclear war. We believe that this is a dangerous and shortsighted policy, and that it will only serve to escalate the arms race between the U.S. and the Soviet Union.

First, Professor Bankwitz states that the U.S. should not reduce its armaments. We believe that this is a dangerous policy, as it will allow the Soviet Union to gain an advantage in the arms race. The U.S. should reduce its armaments in order to reduce the risk of nuclear war.

Second, Professor Bankwitz states that the U.S. should increase its armaments. We believe that this is a dangerous policy, as it will only serve to escalate the arms race between the U.S. and the Soviet Union. The U.S. should reduce its armaments in order to reduce the risk of nuclear war.

We believe that the U.S. should reduce its armaments in order to reduce the risk of nuclear war. We believe that the U.S. should also increase its diplomatic efforts in order to reduce the risk of nuclear war.

Sincerely,

Fine Arts and Science Centers To Be Built

Science Building Slated

by WILIAM NILES

OCT. 5—A campaign to build a modern physics and mathematics building at Trinity was announced in-heim by President Albert C. Jacobs at the College's annual Business and Industry Luncheon.

Speaking before a gathering of some 500 businessmen and students from the Great-er-Fort Worth area, the president said that a new physics building will help to promote new opportunities and eliminate existing constraints in both research and teaching.

He said that the new building would allow the College to compete with other institutions in providing modern and efficient facilities for physicists and mathematicians.

The new building would be designed to accommodate the growing number of students majoring in physics and mathematics, and would also provide space for additional laboratories and classrooms.

The new building would be built on the site of the existing physics building, and would be funded through a combination of gifts and grants.

FA Drive Nears Goal

by WILIAM NILES

OCT. 5—The drive to raise $15 million for the Fine Arts Center at Trinity College is near completion, according to President Albert C. Jacobs.

"We have received a number of substantial gifts, and I am confident that we will meet our goal in the next few weeks," said Jacobs.

The Fine Arts Center will provide facilities for music, art, and theater, and will be located on the campus of Trinity College.

Faculty Welcomes Proposed Building

by WILIAM NILES

OCT. 5—The Fine Arts Department at Trinity College was formally dedicated yesterday, with a special dedication service held in the new building.

"This is a day of great pride for Trinity College," said President Albert C. Jacobs.

The new Fine Arts Center will provide facilities for music, art, and theater, and will be located on the campus of Trinity College.

Dr. Jacobs Emphasizes Role of Art

by WILIAM NILES

OCT. 5—President Albert C. Jacobs emphasized the importance of art in education at the dedication of the Fine Arts Center.

"Art is a vital part of education," said Jacobs.

"It is important that we provide our students with opportunities to engage in artistic endeavors, and to appreciate the beauty and meaning of art."

Taylor tossed TD pass to nip Ephsmen, 8-6

The Larries finished strongly in the final minutes, restored "to working order" for the ninth time in the last 12 games.

Larries next foe

If Larries' season isn't saved against Bantams, the last resort seems a 9-6 win. Coach Buzz Peterson says: "A 9-6 win would be excellent." He said the Larries usually won in close contests when the season was on the line.

The Larries scored twice in the final minutes.

The point after attempt failed, but this was of little consequence as Mike Schulenberg kicked a 24-yard field goal. Minutes later, on the very next play, Green cleaned up the middle way.

The Trinity Pipes and Drums and the Larries' William's Weston Field, staged a reception in memory of the late Dr. Albert E. Willits, Count and his wife. The reception was held in their honor, following the game, in memory of the late Dr. Albert E. Willits, Count and his wife.

209 ZION STREET (Below the Rocks)
Frosh Football Talent Skimpy

With only 21 candidates reporting for tryouts, Trinity College football fans were hoping for something good. The need was there, just one year after losing 29 players. The optimism was tempered by the realization that in the new Valley he would have to do more than his predecessor, Fred Prilla, who was a defensive player.

The guard candidates, all three years indicators of putting together a winning team, included five years at Trinity. Merrill Yavin-Barlow, a graduate of Suffield Academy, is one of the finest punters in the state. Lucien DiFazio, a graduate of Bulkeley, is one of the best backfielders in the state. The remaining of the backfield is also quite promising. Louis Levett, a graduate of Wethersfield High, is ranked as one of the finest backs in the state; and the temporary addition of Doug Anderson, who started in the first half of last year's frosh squad, shows promise.

As strong as the backfield is, the front would have to be marked as an area of need. There was not one back who was the center as high school, only one who was a center at the college level. All backs should improve from the one-year experience.

The tackle position requires someone who is a strong header of the ball, in order to play against the better teams. All backs should improve from the one-year experience.

The team as a whole looked promising. The offense seemed to have a 50-50 chance of being a formidable unit. The defense would be a major area of concern, with not enough time is avail-

Frosh Scrimmage Suffed

SEPT. 17 — The Trinity football team played to its first opposition Wednesday in a scrimmage with Suffield Academy. The remainder of the backfield still needed to be decided. The tackle positions were the only ones that could be decided. The team as a whole should benefit from the exposure to the first opposition. Amherst rounds out the first bunch, and the halfbacks looks again, as he has not yet jellied as a whole. Last Friday's scrimmage was an end to the fourth and added two men to the sixth and that period. The team as a whole looked promising. Lucien DiFazio, a graduate of Bulkeley, is one of the best backs in the state. The remainder of the backfield is also quite promising. Louis Levett, a graduate of Wethersfield High, is ranked as one of the finest backs in the state; and the temporary addition of Doug Anderson, who started in the first half of last year's frosh squad, shows promise.
