Abe Ribicoff, Seely-Brown To Lead Off Lecture List

SEPT. 24 - Abraham Ribicoff and Horace Seely-Brown, Jr., Con-
necticut's candidates for the U.S. Senate, will be the lead-off speakers
in this year's College Lecture Series. Dr. Ribicoff, a candidate for the
Senate of the Democratic party, will talk on Thursday. Mr. Seely-Brown,
who will discuss "Israel and the New Nations" Thursday at 7:45 p.m.
in the Armistice Affairs Conference Room of 211 of the Chemistry Build-
ing, will talk on Thursday as well.

THE MAN WHO beat former
governor Tom Joad's Lodge 47B to his seat at the Republican Convention
early this year was relatively unknown in the state he served as a Congressman for six terms. His recent popularity has been attributed by many to his pot holder.

The Redding Republican, a local paper, described him as his "Seely-Brown Report to the state, a book which has been
regularly from Washington and the big
splashes he made in the Congression-
ate as a Congressman for six terms.

"He will have no specific topic,"
dr. Meade asserted. "We can also expect him to talk at Trinity," Dr. Meade said.

The third lecture on the list described for the U.S. Senate by the Trinity College ELECTION COMMITTEE chairman, Donald Taylor announced that personal appearances, his discus-
tion hall of the mathematics floor.

The organizational meeting of the TCCsc will be held Wednesday, Sept. 26, at 5 p.m. to elect the first board of directors. Lectures, group discussions
will be held on campus lunch rooms.

The senator will discuss "Israel and the New Nations" Thursday at 7:45 p.m.
in the Armistice Affairs Conference Room of 211 of the Chemistry Build-
ing, will talk on Thursday as well.

"He will have no specific topic,"
dr. Meade asserted. "We can also expect him to talk at Trinity," Dr. Meade said.

Purpose of Trinity Education

Dr. Bobko stated that the purpose of Trinity education at the Freshmen Convocation this evening. The students versed views to be expressed. "AM I WORKING to my capacity. Johnson stressed that such an education is so long for the consumer is not getting his money's worth in education." He felt the time of education should be cut to ten or fifteen years.

"ATTENTION! DO YOU WANT TO WIN $1,000 OR $500?"—football contest, the offer of a sweepstakes offer.

The Indian ambassador will be called a tradition of mysterious protagonists and their strange houses. They have made poems on the essence of death, rituals in transfigured bodies. In the film, the film-maker is able to achieve a sort of decadent imagery, a narcissistic fantasy world. The fraternity which is personally designed to satisfy his narcissism and love of elegance. The members wear beautiful cut masks while trying to seduce their victims. The film is the exploration of the dilemma caused her by this bi-sexual interest. In decadent novels. Both the film and those novels share the same concept that the girl entered into the affair put of a desire for the boy's eyes. The visuals somehow express the hopelessness and inevitable doom of which the latter speaks. THE GIRL WITH THE GOLDEN EYES is a rich film. It will be at the One Web until Thursday and it certainly should be seen.

"THIS LECTURE SERIES is unusual," explained Dr. Meade, "not only in that we took more names and important, constructive figures in the country. Jean Gabriel Albicocco's THE GIRL WITH THE GOLDEN EYES received a fifteen minute selection of color slides of the film. The test consists of a question and a correct answer. When the first correct answer is given, a fifteen minute selection of the film is shown.

"I feel that this is one of the most important lectures of the season," added Dr. Meade, "and I hope that you will try to come to this lecture Wednesday, Sept.-Oct. 23, Trinity Talks will be at the new location, 1414 of the Arts Physics building. Professor Miller, formerly of the physics faculty, will speak on his thesis topic, "Interstellar Dust."

Felix Greene, author of China and the Brownell Club to enter- tain them mainly, he said, "to in- vite them to dinner and informal registration meeting Wednesday, Sept- Oct. 23, Trinity Talks will be at the new location, 1414 Arts Physics building. Professor Miller, formerly of the physics faculty, will speak on his thesis topic, "Interstellar Dust."

The classic synopsis of the decadent novel describes a sensitive romantic of a liberal education. He is often called "ugly American", and it is announced, "We are spending four years preparing for a life that may not see these years rewarded."

Scheuch answered that the value of a liberal education is not necessarily justified by its practical application. Besides the fact that one may enter a profession that is not pecuniarily rewarding, Scheuch also stated, "You are not preparing only for your work, but to live your life out of work."...
Facelift to DKE Planned

As if to be in harmony with the music of the steel-and-cement sounds of renovation and repairs, the summer repair work.

The new addition to the present structure built in 1901 will house a dining room, modern kitchen, lounge, library, and game room. The present house, to be completely renovated, will swell to 18, instead of the present 8.

THE BASEMENT FLOOR of the completed structure will house a game room and/or meeting room, card and billiard room, and storage facilities. A dining hall seating at least 50, a kitchen, bath, and four bedrooms will fill the first floor. The third floor will have a library, lounge, bath, powder room, and five bedrooms.

The new addition will cost $50,000, while the new plumbing and electrical alterations and repairs will take $30,000. Combined, the new work will cost $45,000.

The new addition will not extend beyond the property line in the front. "Because of this condition, plus other factors such as a demand for parking in the rear, southern exposure for recreation rooms, and a 30 per cent savings in construction, Gordon Macmaster, archi, recommended that the addition should be in the front. Raymond Montgomery of New Haven, class of 1905, will head the fund raising drive as alumni chairman.

New Assistant For the Chaplain

This year Reverend Robert Good- win will assist Chaplain J. Moulton Thomas with his duties. He will serve as advisor to the Christian Association and hold Chapel services two mornings a month beginning this Thursday at 11:30.

So far, Trinity has impressed Mr. Goodwin as being "a productive area for the discussion, understanding and staffing of religious faith."

Before his ordination, Reverend Goodwin was a bookseller. During World War II he served in Europe.

He is currently working for a Doctorate of Religious Education at Hartford Theological Seminary. He feels that the challenges facing the Christian Church today is that of adult religious education. He has had experience working for the New Hampshire Congregational Christian Conference of Churches doing home and church schools where special care and leadership were needed.

Rev. Goodwin received his B. A. from Columbia University, and his Bachelor of Divinity from Hartford Theological Seminary. Theological Seminary. Reverend Robert Goodwin. He in order to get the student body, his thoughts of students that will free to write for me. Appointees may be made through Mrs. Haynes in the Chapel office.

The organizational meeting of the Trinity Young Democrats, originally announced for 8 o'clock Wednesday evening, Sept. 26, will be held at 4:30 of the same day.

Ceremony Haltered

MAY 15, 1962 - The annual Honors Day Ceremonies was dramatically interrupted when the 1924 Class of '74, in a daring daytime robbery, successfully abscended from the time-honored Lemon Squeezers.

The coveted instrument was being awarded by the Senior Class to the designated Junior standing from the Arts and Sciences. The Lemon Squeezers from the hands of the Master of Ceremonies.

With today's entry I begin my ninth year of writing columns in your school newspaper for the makers of Marlboro Cigarettes. And in nine years they have been paying me money. You are shocked. You think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who has revelled in Marlboro's pulpits, who has been willing to write about Marlboro without a penny's compensation, you are wrong.

Compared to the very foundation stone of the American Way of Life. Whether you love your work or hate it, our system absolutely requires that you be paid for it. For example, I have a friend, vets Globe, a veterinarian by profession, who simply adores to worm dogs. I mean you can call him up and say, "Doc, let's get that dog wormed." He, let's go back to those days. I mean there is not one thing wrong, I mean you can call him up and say, "Doc, let's get that dog wormed." He, I don't digress. For nine years, I say, I have been writing this column for the makers of Marlboro Cigarettes, and for nine years they have been paying me money. You are shocked. You think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who has revelled in Marlboro's way of life, who has been willing to write about Marlboro without a penny's compensation, you are wrong.

Foiled Again

Another attempt by the college to create convenience for the Trinity student has been foiled again. Thirty-six "check-your-own" coat hangers which were placed in the Mather Hall coat room have been rendered unusable since the keys, which are easily accessible, have mysteriously disappeared — twice.

Nicer. The coat hangers, which cost $116, were placed in Mather Hall last June to help prevent students from mistakenly appropriating coats which were not their own.

During the summer school session, the keys were taken. Replaced on Sept. 8, they have once again vanished before Freshman Week was through.

The perpetrator of this trick might just as well be T. S. Eliot's well-blamed "Macavity: the mystery cat." Mather Hall director Leonard R. Tomat, who believes the keys were taken by teen-agers wandering through the building, is willing to replace them again and test the effectiveness of the hangers in the fall and winter seasons.

The same cost-check system has worked in other colleges, and it should work here. Up to now it hasn't, and it could well be the college's fault for not realizing that someone — in or out of the Trinity community — would be irresponsible enough to take advantage of an opportunity to defeat an unwritten honor code.

So chalk up a few more points for Macavity, the cat that costs this college an extra $5,000 a year repairing needless damage.

A Challenge

Next week several Senate committees will begin a new study of specific items and ideas garnered from the Undergraduate Evaluation. The committee hopes to re-evaluate the campus opinions and determine the extent to which the E-evaluation was correct in its report.

What happens after these meetings will probably be more important than the meetings themselves.

The Evaluation showed, if anything, that the faculty, administration and student body tend to exist as separate groups alone. It belongs to everyone here — to the administration, the faculty, and the students. It belongs to everyone who hopes to make Trinity College a better place to receive an education in the Liberal Arts.

Now is indeed the time to talk, to discuss, and to act.

It is a time not so much to separate but to meet together; a time not so much to talk as it is to listen, and a time not so much to demand as it is to give.

We are faced with the challenge of creating a more dynamic dimension in communication and understanding.

Praise, Congratulations

“Resolved, that the Trinity College Senate realizes the necessity of obtaining quality speakers for the undergraduate body, and urges to Faculty Lecture Committee to carefully consider choices for the coming year.”

That was last March. The twenty-four senators who voted to pass this resolution can rest easier now that this year's Lecture Series has been announced. Congratulations praise and thanks are in order for those who made the choice: congratulations for having been able to secure such a distinguished variety of prominent and controversial figures from the Outside World — that ever frightening, always fascinating world where politics, misunderstanding and the fight for survival are constantly effecting changes; praise for being so sensitive and perceptive as to name the Lecture Series a most timely, compelling and promising vehicle with which to experience some of that Outside World; and thanks for bringing even this much Outside World to Trinity.

We have taken a giant step forward this year; we have thrown open our shutters. Now let's go out and make the leaves away.

Dodge, Chairman of the Public

Criticism of the use of desalination with these other measures has been
lacking, in a recent magazine article Professor Gilbert White said that desalination
need not be emphasized. Water is plentiful enough to serve our needs if proper
conservation techniques are observed. Many industries, he said, make
virtually no attempt to observe the vast quantities of water they
use.

Desalination expert T. K. Redwood of M. I. T., defending the method of converting sea water
said that the critics of the program did not consider the problem of
distribution. Conservation in some areas would solve any water
shortages which are imminent, but in many arid regions, conservation
alone will not provide adequate resources for fresh water.

Water shortage is a serious problem in this country's southwest. As expansion, increase of area, area, area
semi-arid land will scarce, of water, large irrigation projects show that desalination could be one most economical means of doing so.

THE ECONOMICS of water conversion is vitally important in the area article, U. C. Davis and quality of water are used (in the United States 25 billion gallons of water every day), large irrigation projects show that desalination could be one most economical means of doing so.

DISAGREING WITH THIS view

point was Dean Myron Tribus of the Thayer School of Engineering at Dartmouth College. Tribus said that although basic scientific research is necessary, it should not be emphasized at the expense of engineering problems in the building of desalination plants.

Five pilot plants have been and are in the process of being built to test different methods of desalination. The completed plants are in Freeport, Texas, near San Diego, California and in Webster, South Dakota. One is being built at Roswell, New Mexico, and one is planned at Wrightsville Beach, North Carolina. After they are completed, more will be constructed in the immediate future, Gilliam said. There are two basic types of desalination employed today. The first is distillation, the oldest known method, it can be based on the physical property of heating the salt water to steam which condenses and will solve any water shortages which are imminent. It is possible that these technical advances will not provide adequate resources for fresh water.

BRACKISH WATER, which is found under ground and is less saline than sea water, is manly purified by means of electrolysis. In this method the saline water is passed through an electrical charge and removing electrons. The salt can then be removed from the water by special membranes. This process provides most of the remaining desalinated water not produced. Brackish water, because of its lower salt content, can be desalinated more easily than sea water. W. S. Katz of Ionics, Inc., who spoke with a panel of industrialists at the symposium, said that where possible brackish water should be used before sea water. Plants now exist, he said, which are desalinating brackish water within sight of the ocean. There are several methods when water is desalinated, they include reverse osmosis, which simplified could contaminate two water, one of salt water, one of fresh, separated by a membrane.

When pressure is exerted on the salt water the mechanism allows passage to the water but not to the salt.

OLDER METHODS WILL not be discarded, however, as newer processes are developed. Technical advances as well as an increased understanding of the properties of the materials used could result in further improvement of the long-standard processes.

Distillation itself is not a single process but has been used at a basis for several methods of desalination. Processes like these which are already being used could become economically feasible over wider areas if nuclear reactors are able to provide low cost heat.

Man has known of the purification of sea water by distillation since the time of Aristotle. But the plentiful supply of fresh water is most areas made conservation unnecessary.

EXTENSIVE DESALINATION is thus a relatively new field of scientific and technical endeavor. No one method has yet appeared to solve the divergent problems of creating an economically feasible process for desalination.

There is no danger of a water shortage in the Hartford area, Professor Edwin Nye, chairman of the Engineering Department at Trinity, said following the symposium. There are no industries of water in production processes, he said. The symposium was held here, Professor Nye concluded, because much of the machinery as well as the scientific and technical management involved in developing desalination complexes comes from New England.
Eph Soccer Team Ready

WILLIAMSTOWN, Mass., Sept. 18—Williams College soccer coach Clarence Chaﬀee Monday afternoon greeted returning members of last year’s New England championship soccer team and a host of sophomores at the ﬁrst formal practice of this year’s squad. Led by Captain John O’Donnell, the reigning Sampson Cup and Little Three title-holders began work for a tough schedule that includes four home games and four on the road. The Sampson Cup, emblematic of New England soccer supremacy, has never been won by the Little Three title holders in the past three days of the week.

McPhee Greets 40 Freshmen

Ephs booters a high target to shoot on the road. The Sampson Cup, emblematic of New England soccer supremacy, has never been won by the Ephs. In their opening game, they defeated the Bantams, the frosh moved into the second week of practice on Monday. The Ephs, who won the 1-0 loss was encon- tered in Hartford this year the Ephs will be looking for revenge when they host the Tris booters in October.

Both McPhee, who works with the backs, and Wentworth, who handles the line, appear to have excellent potential once the squad gets working as a unit. Another bright spot is the interwhich just under 300 pounds. Having escaped the ﬂu attack that beseged a score of veteran Bantams, the frosh moved into the second week of practice on Monday.

This year’s slate lists three home meets and two on alien soil. After the opener at Coast Guard, the squad comes home to face New Haven, Springfield and Wesleyan before traveling to Amherst to close out the campaign.

Former Area Director Explains Crossroads Africa Program

Sept. 24—John Hubbell, who served two years as an area director for the Crossroads Africa program, explained the purposes and experiences of the operation to students in the Alumni Lounge today.

He was assisted by senior Don Taylor, who spent this past summer in Kenya in the Crossroads program. Hubbell said that the program, which provides the opportunity for American college students to work side-by-side with African workers on projects which are of beneﬁt to African communities, would have about 220 openings for the next summer season.

He estimated that $600 applications would be received.

The cost to the applicant is $900 for the six-week period. Hubbell noted that an additional $800 is provided by the organization, and that the organization received all of its funds from contributions.

He added that it was usually easy for a student to raise his share of the expenses for the trip, but that the 6-year-old organization has had difﬁculty in raising the additional funds.

Although he said that the Crossroads program is generally well of, he expressed concern that there is not enough support from the American people in providing contributions for expenses.

He termed the Crossroads experience “not a joy ride, but an act of commitment that you can’t get here for $900.”

He added that it was usually easy for a student to raise his share of the expenses for the trip, but that the 6-year-old organization has had difﬁculty in raising the additional funds.

Letters ...

(continued from Page 5)

They may be strong enough to command a majority in Congress. No outstanding Saikawa has appeared to form a powerful party either. The two leading public ﬁgures are unavailable: Fronteiﬁl claims to be president from his pleasant exile and General Ayamburo, leader of the revolt against Porres, both seem to be playing South African Delegates and are waiting for the call of the people. It might come too late.

Until then a country that does not know hunger or political anarchy which might bring the people to the ballot box, might not be able to make a choice.

Bulldogs, utilizing a powerful run-well-executed running plays, and a Jordan Olivar, beat the "Jessee-held in the Yale Bowl.

The Bulldogs, under head coach Jordan Olivar, beat the "Jessee-held in the Yale Bowl.

In the first quarter, quarterback Don Taylor fumbled on the second play and Yale marched practically unscathed for a touchdown and a 7-0 lead. The Bulldogs repeatedly beat the Bantams to the punch in the line and moved smoothly on the ground. Trinity alternated between their usual 5-3-3 and 5-4-2 defense and the standard Oklahoma 5-4-2 pattern, while Yale stuck mostly to a Syracuse-type defense using a six man line. Trinity occasionally switched to an eight man line in an effort to step Yale's running machine.

In the second quarter, sophomore quarterback Merrill Yavinsky started Trinity moving on second down play after halfback John Sten-crey had been stopped. Yavinsky gained five yards around end and then Tom Calabrese shook loose for eleven more and a first down. Trinity's pass protection was excellent all afternoon except for a couple lapses, one being in the next play when Yavinsky was caught for a 12 yard loss. The Yale defense held and Bruce MacDouglall was called off the bench to punt Trinity out of danger.

TRINITY'S FIRST STRING LINE re-entered the game and held the Yale offense for the first time in the game. Calabrese again swept the end and picked up 10 yards. After hitting George Guiliano and John Wardlaw for passes of 15 and five yards, Taylor threw a perfect 45 yard strike to end Sam Win-ner. Several plays later, working out of the "shotgun formation", Taylor again hit Winner for Trinity's first score. Taylor threw to Guiliano for the points after, and Trinity led 8 to 7.

The Bulldogs quickly initiated a 78 yard scoring march to take the lead 14-7. Time running out in the first half, Trinity looked to the air and completed an eight yard jump pass to Guiliano and a 50 yard to Winner before the guns sounded. After the halftime break, the Trinity offense held Yale before. The first Eli offensive ended with an unsuccessful field goal attempt and the second with Yavinsky "red dogging" (O'Connell from his corner back position for a nine yard loss. Don Taylor once again got his team going on a beautifully executed 10 yard screen pass to Calabrese, who ran another 32 yards with the help of some downfield blocking. Taylor kept the Valvers guessing all afternoon with his left half ball handling and fakes. However, the drive was stopped two plays later when a pass was intercepted inside the Yale ten yard line.

The BANTAM FRONT WALL could not withstand the Yale attack and the Bulldogs moved methodically and swiftly downfield. O'Connell ran for 33 yards to set up Yale's third score and game clinching blow. Higdon got seven more around end and halfback Pat Cusimano smashed across from four yards out. The two point at-tempt was successful and Trinity trailed 28 to 0.

In the last quarter, Yavinsky put on a brilliant display of passing and running to engineer the second Trinity touchdown. He rolled out for five yards and followed it up with a 17 yard pass to John Fen- rich. Next Calabrese and Ward-law each gained seven yards on halfback pitchouts. Calabrese bul-lowed for another seven and pulled in a 13 yard pass from Yavin-sky. Two plays later, Yavinsky spotted Feenrich in the end zone and the newest of Trinity's ends made a sensational leaping catch while fending back and fighting off a Yale defender. Trinity's narrow eight point def-icit was widened to fourteen by Calabrese, who ran another 32 yard line.

BANTAM BRIFS...HALFBACK Bill Campbell injured his ankle early in the first period and left the game. Changes are slim that he will recover in time for next week's opener. Stencrey was hampered early by a pulled hamstring muscle and ineffective on offense.... Wurdfay drew praise from Coach Jessee for his tremendous defen-sive play. He covered his territory flawlessly and was in on five tackles.

Captain Mike Schulenberg and center Bill Fox led the defense with six tackles apiece....scout Tom Crawford made five during his brief time on the bench.....Calabreuse, Yavinsky, and Guiliano al-so played well on defense and each turned in four unassisted tackles....

Taylor had a fine day completing six out of 10 passes for 119 yards. Yavinsky hit on five for nine and 74 yards. Winner caught three passes for 81 yards and a touch-down.

Bantam Passing Catches

Eye Of Yale's Head Coach

This is the text of an interview with Yale head football coach Jordan Olivar by TRIPOD reporter Joe Martire following Sat-urday's scrimmage at the Yale Bowl.

QUESTION: 'Coach Olivar, did you notice any improvement in this year's Trinity squad as opposed to last season's predominantly jun-ior team?'

ANSWER: 'There was quite a noticeable difference between the two. Last year's team was unable to give my first string much oppo-sition at all, but this afternoon Trinity gave my fellows quite a battle for four quarters.'

QUESTION: 'What did you think of your offensive attack?'

ANSWER: 'It was a well balanced attack and pretty good over-all. Dan Jessee has helped to form a fine team. You can tell by watching them that they are a well coached and drilled ball club. I was im-
pressed also with the running of number 25 (Calabrese). He's quite a runner - good speed and balance. By the way, who is number 147? He did quite a job out there on us that second half.'

QUESTION: 'Is he only a soph-
more, his name is Taven?'

ANSWER: 'Dan really has a future in that youngster, he's going to be tough. He and Taylor can really throw that football. You've got quite a smooth passing attack.'

QUESTION: 'What were some of the weaknesses you noticed to-day?'

ANSWER: 'That's hard to say because we haven't scouted Tri-nity and I was primarily concerned (continued on Page 8)
Interview... (continued from Page 7)

with my own team this afternoon. Your pass defense started to col-
lapse near the end of the game. Your linemen were also being beat-
een to the punch."

QUESTION: "Weren't you running,

through our tackles quite a lot?"

ANSWER: "Yes, but I don't know

if you could call that a weakness

on your part. Offensive tackle

happens to be one of our strongest

points and that off-tackle drive

series is our "bread and butter"

play. We were able to pick up three

or four yards pretty consistently

through the tackle holes. Because

of our line size we can utilize

this for tackle power runs, whereas

you had to depend on outside pitch-

outs and sweeps as well as an

aerial attack. Also that number

89 (Fenrich) made two terrific

catches, especially the touchdown

gain. I wasn't worried when Yav-

insky threw the pass because my

boy was right on 89. The next

thing you had a touchdown. That end

has a fine pair of hands and trem-

endous spring in his legs. He

should be tough to stop along

with 84 (Sam Winner)."

Saturday, NOV. 12, 1955 - This has

been a great day! The largest crowd

in Trinity football history, some

3,000 fans, turned out to watch

the finest football team in Trinity

history defeat Wesleyan by a 46-6

count for the fifteenth victory in

a row—the conclusion to two con-

secutive undefeated years!

Football coach Dan Jessee has

the nation's longest unbroken head-

coaching tenure at one college.

He began his 31st season at Trinity

College this fall. His record at

Trinity: 132 victories, 55 defeats

and six ties.

Prosh Soccer

Lacks Depth

This year's freshman soccer

team, under the direction of coach

Robert Shults, will open their

season with a home game against

the University of Hartford on

October 11. The frosh booters will

be out to improve on the 4-2 record

of last year's squad.

Coach Shults is optimistic about

the chances of his team. From

what he has been able to see in

early practices, he expects to have

a very good forward line. Led by

Bob Oehs, who will play center-
foward, and Craig Dowey and,

Tom Sebree, who will play right

and left wings respectively, the

line should be very effective. With

several good insides to insert in

the line-up, Coach Shults feels that

the offensive unit will possess a

combination of speed and scoring

ability.

The defense will be led by Ted

Bartlett and Ben Tribken at the

full-back positions. They have both

demonstrated good speed and abil-

ity as well as good "soccer sense".

The nets will be filled by Bill

Schweitzer, who went unscored

upon last year as goalie for the

University School, or Harwood

Loomis, who played his high school

soccer at the Amity Regional High

School.

The weakest part of the line-up

will probably be the half-back line.

Mel Evarts is the only experi-

cenced half-back on the squad, and

he will undoubtedly see a great

deal of action at center-halfback.

Coach Shults has been experiment-

ing with former linemen to find two

boys who can fill the wing-halfback

positions.

It is interesting to note that seven

team members of the frosh soccer

squad were captains of their

respective high school teams and

six of them were selected to all-

league teams.

The thing that troubles Coach

Shults most about this year's squad

is the lack of depth in key positions.

He is confident, however, that is

he can keep his squad healthy and

avoid injury to key personnel, the

frosh will have a good season.

Although it is hard to predict the

outcome of any of the games be-

cause freshmen classes vary so

much from year to year, the Shults-

men will be doing their best to

improve on the fine performance

of the Class of '65 last year.
