Dr. Mathis, Nesbitt Speaking Here

Dr. John Mathis, associate professor of astronomy at the University of Wisconsin, will speak Monday, February 24, at 7:00 p.m., in the Math-Physics Lecture Hall.

Dr. Mathis will give an additional lecture, "The Determinant of Stellar Ages," at 4:00 p.m., February 23, in the Math-Physics Lecture Hall.

Dr. Mathis will also speak at the University of Michigan, where he will give a lecture on "Some Mathematical Models from Stellar Theory and Other Sources." The lecture will be held in the Math-Physics Lecture Hall on Tuesday, February 25, at 8:00 p.m.

Dr. Mathis was a member of the first generation of scientists who explored the use of mathematical models in the study of the universe. His research has contributed significantly to our understanding of the nature of stars and the evolution of the universe.

Categories: Science, Astronomy, Astrophysics

Promotions for Two Instructors

Dr. C. Freeman Napier of the religion department and Dr. Thomas C. Meldrum of the department of mathematics have been appointed to the position of instructor. Dr. Napier and Dr. Meldrum have been members of the faculty for several years and have made significant contributions to the College.

Dr. Napier's research interests include the history of religion and the philosophy of religion. He has published extensively on these topics and has received several grants for his research. Dr. Meldrum's research focuses on the history of mathematics and the development of mathematical concepts. He has published numerous articles and has given many lectures on these topics.

**The Changing College?**

**College Slides Into Secularism**

A Series by David Graybill and Jerome Liebowitz

**The option that Trinity College is a secular college seems not only well-founded but also widespread in circles of faculty, administration, and students themselves. Yet, especially at a time when debate concerning the foundation and character of Trinity's religious tradition continues, it is not as

The FACT that the College remains entirely independent financially from the Episcopal Church and that our student body represents nearly every major denomination is indicative of our non-denominational nature — but merely indicative.

A look back into the history of the college and its foundation can do much to throw light on the reasons for the changing nature of the college from its religious to secular nature.

The predominant Congregational influence in Connecticut during the colonial period led to the frustration of many other denominations in their vain attempts to establish educational facilities where their children could find instruction in the elements of religion, and the Episcopalians were not among the least of these. Yale College had been founded in 1701, and it was formidable task even to dream of setting up in the field of education, but the Episcopalians since the late 18th century had been deep rooted in the Congregationalism of the state and its attendant narrow sectarianism.

American opera fans often believe that except in a very few spiritual circles, the major opera estates exist only in a form similar to the United States view of opera. It is true that there is a significant lack of opera diffusion no longer.

The new Metropolitan Opera National Company means more for the future of opera in the United States than bringing live opera productions to communities where such performances will be enjoyable. It will also provide the future of opera in the United States view of opera. Thanks to the newly formed Metropolitan National Company, opera fans feel that the lack of opera diffusion no longer.

Beattles, Friars, Bishops, Sing?!

FEB. 16 — The Glee Club and three small groups sang at Salisburgy School in Connecticut, this evening. The program was diversified, covering Negro spirituals, American and Italian folk songs, Broadway show tunes, and Trinity songs.

The Glee Club performed the music for their Spring Tour, Southlngton in March, and their recent performance will not be in the works for American opera.

In an age in which self-expression is thought to be one of the few legitimate goals motivating an artist, the young artist who is looking for the finished product, the complete work that captures the expression of the individual, is a different artist and has been a noticeable sacrifice of the ordinary technique of drawing and painting. The desire to create the finished work has worked against the young artist through the elementary stages that are necessary in providing the artist with substance and depth. The lack of good drawing has been evident for the last two years in this student exhibit.

The contention that the work is "stuck" as a result of the pressure upon the creator to produce the finished work is not unfounded. As seen in the close similarity in the structural and pictorial qualities of all the entries from the Norwich Free Academy. The paintings were directly influenced by the tastes of their instructor. Each entry is occupied with the same type of subject matter, throughout the exhibition, and each is done in opaque water colors with a dry-brush technique. Furthermore, each student uses the same type of brush stroke and smooth the same color; however, the success of each composition varied with the respective talents of its creator.

The point to make here is that for too many years, the student has not been permitted a freedom of choice in the selection of subject matter. Thus the finished work does not have the spark to it that comes from an individually inspired subject; instead the composition is often a slickness or finish to which they are the result of forcing a certain set of style and technique upon the students just when they should be experimenting with their own ideas.

THE TRINITY TRIPD

At the Athenaeum

Exhibit: A Qualified Success

by GEOFFREY FREEMAN and PETER ROGER

The Connecticut Art Awards Show this month at the Wadsworth Atheneum accurately reflects the motivation and current direction of the young, aspiring artists of this generation.

From the three thousand works entered in competition, the final collection represents the best of a variety of mediums and techniques, ranging from linoleum cuts, scratch boards, water-colors, through well executed oils and collages, the students present themselves as extremely expressive.

Nick CANTOR

The point to make here is that for too many years, the student has not been permitted a freedom of choice in the selection of subject matter. Thus the finished work does not have the spark to it that comes from an individually inspired subject; instead the composition is often a slickness or finish to which they are the result of forcing a certain set of style and technique upon the students just when they should be experimenting with their own ideas.

"for re- placement pen tip." Major pen manufacturers use only this kind of pen tip.
Tossed Tomatoes

It is now about time to toss a few rotten tomatoes in with the laurels which have been heaped on this year's senate.

Although we commend the efficiency and accomplishments of the senate, the record of last week's TRIPD0 had one jarring tone throughout: they could not be bothered with "abstract idealist concerns." It was a practical Senate, one in which the best that can be said is that it appears to have been caught up in the realm of idealism, the Honor Code and Religious Requirement

failed.

Well and good that the Senate tended to seatbelts, checked on Cave food prices, improved study halls, etc. It is all well and good that Senator X worked well with Senator A. But we can't help having the impression that a good course in personnel management or linear programming would enlighten these senators in handling management problems.

Well and good that the Senate last term laid the or

ganizational groundwork properly to make a continuation of this program year after year? Can we serve as any criterion for judging the importance of

significant.

extinguished.

First of all, the college handbook is guilty of a grave deception in stating that they do "especially distinguish themselves during their first three years," for it is surely no more unfair to those seniors who have been members of certain fraternities, for example, in the past five years Theta XI has had eleven members on the board; Alpha Chi Omega, 18 members; Sigma Chi, 7; Delta Psi, 7 members; Alpha Chi Omega, 11 members and members; and the

viscosity its study of the papers on the collective and independent work of the members of certain fraternities, what can be done to increase the contributions of this program year after year?

is an indication not merely of the inferiority of the entire student body of Trinity College.

Call for Hebrew

To the Editor:

Several departments of study which have gained the most importance to Trinity, the Religion Department among them, has reached a point where the study of Hebrew and other classical languages is an extremely valuable asset to the student body.

and necessary part of the religion major, among other things. But the study of Hebrew, even as a second

work. It is all well and good that Senator X worked well with Senator A. But we can't help having the impression that a good course in personnel management or linear programming would enlighten these senators in handling management problems.

is an indication not merely of the inferiority of the entire student body of Trinity College.

'The Question is this: what is the meaning of the historical event of Jesus the Christ? Or, in other words, what is the meaning of the human race?'

A Changing Fragile World

by TIMOTHY BROSNAHAN

Censorship or news management, for centuries, has been a world issue but the United States has always also been close to nothing to hide from the world.

Recently, however, correspondents have found themselves in a world in which the world itself has been invaded in just such censorship.

At the Halberstads, NEW YORK TIMES correspondents were held up at gunpoint by the Chinese and Vietname for the past thirty minutes. The Associated Press College of Editors said there had been no serious difficulties between the papers in Vietnam resulting from the American war.

The government, he said, had to present "official optimism" whether well founded or not, while correspondents held to the objective truth.

Halberstads said that he and other journalists had come to prize no view of information all over Vietnam which they used freely, allowing their correspondents to quote what they were told.

As soon as the telegram did not appear, the correspondents air without notice the basic disadvantage of the free press compared to Russia in freedom of the press. In Russia, the press gives the single party line, and its propaganda value is therefore far greater than that of a free press where opinions may vary.

But one battle in the cold war is over, and the U.S. government is attempting to conclude with Russia over Cuba, Castro is using its press to portray the situation.

The press must show a high degree of responsibility in reporting the news as it happens, using ingenuity to find a story behind official news releases, and yet maintaining discretion and not giving false impressions to the world in general, or to a story, false or not to engender to critics; to criticise; to nudge, to flatter, to flatter, to flatter, to flatter, to flatter.

Robert Trumbull of the

And a Responsible Press

by ROBERT TRUMBULL

In the United States, as Senator Keating said, we expect change and improvement. "We tend to forget that some nations have changed for over 3,000 years."

"Today in this reduced world the only news that we can say is that we have been" and "seven" is not the only news we have. We will accept any political system that which is the result of the dynamics of this world. Several suggestions were made by speakers at the International Affairs Conference for Editors, Senator Keating thanked for your support.

DEPUTY ADMINISTRATOR for Operations of the Agency for International Development, Frank Coons commented, "The political blackmail, "cooking" is the only news that we have been. We will accept any political system that which is the result of the dynamics of this world. Several suggestions were made by speakers at the International Affairs Conference for Editors, Senator Keating thanked for your support.

"Because son, this town just ain't what it was."

SECRETARY OF STATE Dean Rusk meets winners of Overseas Press Club awards for reporting foreign affairs by college newspapers. TRIPPO Campus Editor Vincent Osewski is second from right.

"Banking... a young man's business"

While on The Hill, Jack Vaughan '56, majored in economics and found time in a busy schedule to serve on the Student Senate and the Inter-Fraternity Council. His familiar voice on the Trinity campus as a member of the Althouse Society and a broadcaster for WRTC. After a stint in the Air Force as a pilot and 2nd Lieutenant, Jack made a nimble transition to The First National Bank of Boston.

"Today banking is becoming more of a young man's business," Jack commented.

"If you're interested in trust administration, corporate finance on a national or international level, retail services, electronics, marketing, credit and fund management, you'll find that it's part of modern banking at The FIRST."

We will have attractive job openings in June. Make a note to check with Mr. Butler about working with Jack Vaughan. Emory Flower when they're on campus Tuesday, February 25.
Fragile World . . .
(Continued from Page 5)

Sino-Soviet split and, as did another artificial, vast tumor against relate, is a DENTENTE.

It's thought to some extent paralleled those of I-ching Loh, Director of the Nationalist Chinese News Service, who pictured Mao's problem similar to which might occur to President Johnson if he were trying to depose British Prime Minister Bome while at the same time trying to maintain friendly relations with England. Loh discussed the possibility of making the China mainland, argued for an invasion attempt as soon as the Red Chinese face another crisis. He mourned over past opportunities lost because of U. S. opposition to such a move. An invasion of China would not bring Krushchev to Mao's side, Loh believed. Instead, he felt that Krushchev would seize this opportunity to punish Mao and to secure Russia's borders by making large chunks of China for himself.

About the changing world, Harlan Cleveland, Assistant Secretary of International Organizations, said that where before it took five days to discover an Incident on the Arab-Israeli border, today we discovered and solved a crisis within three hours.

Thus, in a world which has shrunk to such an extent that nations hesitate to lose their weapon power on each other for fear of blowing up their own back yards, we must in the words of President Johnson be "strong enough to win a war but wise enough to prevent it."

In PANAMA, Senator Keating gave a situation where the community was at fault and recommended a policy for controlling commissaries in South America.

CRITICIZING Keating's view, Robert Kiley, a Harvard graduate and Vice-President of the World Assembly of Youth, said Keating's position was typical of U. S. foreign policy creators who see communists as the cause of all problems and erroneously adjust their policies accordingly.

Kiley said that the Panama situation could have been predicted easily if we had looked at the youth movements in that country. The communists only took advantage of a ripe situation, he said.

About the changing world, Harlan Cleveland, Assistant Secretary of International Organizations, said that where before it took five days to discover an Incident on the Arab-Israeli border, today we discovered and solved a crisis within three hours.

Thus, in a world which has shrunk to such an extent that nations hesitate to lose their weapon power on each other for fear of blowing up their own back yards, we must in the words of President Johnson be "strong enough to win a war but wise enough to prevent it."

the said College, and that no President or Professor, or other college officer, shall be made ineligible for or by reason of any religious tenet that he may profess, or be compelled by any by-laws or otherwise, to subscribe to any religious test whatsoever.

YET IN SPITE of this advocacy of religious toleration included within the Charter, one cannot possibly ignore that the founders of the College were Anglican and its first Presidents clergy. And even though some of the Trustees of the College were non-Anglican (those primarily to preserve peace and to quash suspicions of sectarianism) it wasn't until 1946 that a President of the College in actuality became a layman who however, still was Episcopal.

The Reverend G. Monroe Royce suggests that Trinity was "founded as a protest against sectarianism" and the Charter seems to support this thesis. And in the late nineteenth century the Episcopal Church itself still viewed Trinity as its favorite son.

While ignored by Churchmen, in their spirit and for their interest, it was to be admin-

EXCITING THINGS HAPPEN AT FORD MOTOR COMPANY!

Good news
for aficionados of medium-cubed V-8's
who prefer to remain shiftless!

Four-on-the-floor is fine but not everyone's cup of tea. If you're an automatic devotee, we think you'll be cheered by what Ford Motor Company transmission engineers have designed in the way of exciting goodies to go with our newer hotter V-8's.

It's a spanking new 3-speed automatic drive that adds more muscle without extra muscle in Comet, Fairlane and Ford models for '64. Among its many virtues: less avoidance ... fewer parts ... smoother take-offs ... up to 50% more go in low ... extra braking in downhill work ... whisper-quiet in Neutral! ... quarterback-style passing performance.

The men at Ford who design such intricacies as transmissions are not just walking slide rules or talking computers. They're men who get excited about cars and the fun of driving them. They enjoy meeting challenges like "Design a new automatic drive with stick-shift performance built right in." Frankly, they are among the most avid car buffs around and it shows in their work!

More proof of the exciting things that happen at Ford Motor Company to bring brighter ideas and better-built cars to the American road.

By George Whitehead

"I find myself wanting to write Bad Poetry, poetry that will not subvert the standards, that subverts the beauty in the middle of the last century, largely because of the emergence of electrical and molecular theory. The Norwegian-born mathematician also attributed, in part, the growth of graph theory to interest in the "four color problem." This problem, as explained by Dr. Ore, requires proof that, using only four colors, any map can be arranged so that no two adjacent areas are colored the same.

"Everyone feels there should be a solution," said the speaker, but no one has produced a proof.

In our experience, superior individuals from every graduate and undergraduate educational discipline find successful careers in a major agency such as the Thompson Company. Staff members in our New York Office alone represent nearly three hundred colleges and universities here and abroad.

Your career with us. You may be surprised to learn that while an advertising company may have artistically creative people, it depends just as much on people who are imaginative and inventive in other ways.

Our business is selling. Communicating through the written and spoken word is how we sell. You must possess the ability to speak and write well so your ideas may be shared and understood.

We are looking for the kind of men who wish and are able to assume substantial responsibility early in their business lives. To such men we offer a remarkable chance to grow and develop—one seldom found in any firm.

Previous advertising experience is not required. Basically, our interest is in the nature of a person rather than in his specialized knowledge and abilities.

We offer you a standard starting salary, no cut-and-dried training program. Beginning salaries are individually considered and compare favorably to those of other national firms. We hope you tailor your own development program, based on your interests, your abilities, your goals. Your program will differ from other men's programs just as you differ from other men.

When you join us you will work side by side with experienced advertising men. Your growth will be based on your own initiative, your own development. There are no age or seniority requirements to limit the responsibility you can earn.

We encourage you to follow your curiosity into all phases of advertising, because we want you to become a well-rounded practitioner as rapidly as possible. Experienced advertising men are eager for younger people to join them entirely so that they may develop your capabilities. Additionally, you are free to delve into every nook and cranny of advertising through our annual series of professional and college classes. You learn from men who are experts in their fields.

About men who join us. A remarkable number of college men who have joined us in the past decade have remained with us and are enjoying varied, exciting careers.

Because of our emphasis on early growth, relatively young men commonly handle major responsibilities in many phases of our business—both in this country and abroad.

All initial assignments are in New York City or Chicago, but we may move other offices in the United States and throughout the world; and if you are interested, you may request a transfer later on.

If you wish to be a candidate, you must graduate in 1964 and be able to join us by June of 1965. You may obtain further information at the placement office. Please check there regarding the possibility of a personal interview. We shall be on campus March 4.

practical connection and network problems can be represented and solved by this branch of mathematics.

Yale's Sterling Professor of Mathematics described how graph theory, after many years of relative obscurity, developed strongly in the middle of the last century, largely because of the emergence of electrical and molecular theory. The Norwegian-born mathematician also attributed, in part, the growth of graph theory to interest in the "four color problem." This problem, as explained by Dr. Ore, requires proof that, using only four colors, any map can be arranged so that no two adjacent areas are colored the same.

"Everyone feels there should be a solution," said the speaker, but no one has produced a proof.

The "Trees" is better than the "Tree" and the "Tree" is better than the "Trees". This problem, as explained by Dr. Ore, requires proof that, using only four colors, any map can be arranged so that no two adjacent areas are colored the same.

"Everyone feels there should be a solution," said the speaker, but no one has produced a proof.
Varsity Ups Record to 10-5
With 67-59 Win at Kings Pt.

by BILL LINN

Great Neck, L. I., N. Y. The Bantams' tenacious defense, led by Bob Leghorn's 23 points, the Bantams defeated the U. S. Merchant Marine Academy 67-59 tonight.

The triumph, the Bantams' 10th a
gainst five losses, assured the
Bantams of a winning season with four games to play.

Leghorn's 23 markers boosted his
season total to 99. Three points by "Legs" against Coast Guard
here last Saturday might give
him 100 for his career, a feat
unprecedented in Bantam annals.

Though Jim Belfiore was held below his average tonight with 11
points, John Fenner and Joe Horlehan accorded Leghorn fine
support with season highs of 12 and 10 tallies, respectively.

Jimmy Stewart paced the Mer-
chants tonight for 26 points, the Bantams' third high score.

The Bantams moved into an early
lead, but Kings Point took the play away from them mid-way
through the first half, and
T. S. M. scored a lead of 30-21 at the break. In the second
half, though the Blue and Gold quickly went into the lead and stayed there the remainder of the road.

Trinity-84 Colby 57
Feb. 14 -- Winning more de-
cisively than the final 84-75 score
would indicate, the Bantams whip-
ped the Colby Mules tonight for
their ninth victory against five
losses. Colby is now 7-5.

"Trinity had to rally to gain a 30-
all tie at the break, in the second
half," said Coach Bultman. "But
Leghorn caught fire in the second
half and finished with 22 tallies,
raising his career total to 974.

Jim Belfiore connected on 11 of
23 shots from the field, sank all
17 shots from the foul line and
finished with 22 tallies, in addition to missing the final 84-75 score
by a hit double-figures for the Mules.

Both clubs were in excellent
shape at the start of the game, but
Trinity's attack in the second half
poured in bucket after bucket, and
only the lack of time prevented
the Bantams from overtaking the Ban-
tams.

In retrospect, the Bantams pos-
tioned themselves for the final score, Wesleyan shot 23 points from the free-throw line, 40 at the basket, 39
and 34, 57-40, 78-56. Shortly there-
after Coach McWilliams lifted his starters, in an attempt to consolidate the a more respectable
score.

Trinity-57 Wesleyan 62
Feb. 11 -- Using a collapsing
type defense with devastating ef-
fect, Wesleyan stymied the Ban-
tams' attack, in the second half
and registered 63-27 victory.

It was the Cardinals' sixth win
in six attempts against Trinity, as
Wesleyan's record slipped to 8-5.

In the first half, the Blue and
Gold led 17-11, 24-9, and 38-15, literally ran the Bantams off the
court. The prep school quintet
performed its best half in the col-
lege ranks, as he took the 100- and
200-yard sprints in 22.2 and 45.8
seconds respectively.

Mike Hickey had a field day against the Blue and Gold defense in 10 minutes the diminutive guard
scored 10 points through the cords.
Donny, Ehrhardt, suffered a sprained ankle, lasted only five minutes. Donny was forced to sit out all most of the first half.

In contrast to the 42 points scor-
ed by Wesleyan in the first half only manage 29 counters in the back half, but managed the Bantams' four points.

Inside Shots

by Dave Trochtenberg

It was a pleasure to once again improved play of Rick Hassel and Bob Morretti, in a game that Bantams "couldnt miss" from the floor, and Bob's eight rebounds were second only to John Pantricia's ten in that department. Rick Hassel's 23 points, the visitors' faltering zone, with Barry Leghorn effectively bottled up, made it possible for Bob's eight was to connect from long range, and the Bantams' chances for able trouble settling up their best at that point. Wes-leyan was held to 21 points, fre-
quently losing the ball without getting a shot off.

In retrospect, the Bantams pos-
tioned themselves for the final score, Wesleyan shot 23 points from the free-throw line, 40 at the basket, 39
and 34, 57-40, 78-56. Shortly there-
