Leadership Conference To Consider Future of Trinity

Faculty, students, administration, parents and alumni are gearing up to step back on Friday and Saturday and examine the development at the College during the past 15 years as well as possibilities for the future.

Nearly 200 persons are expected to attend the two-day leadership conference called "The Decisive Quartet: 1948-1973". Henry S. Dow '68, Life Trustee of the College and conference chairman, will welcome guests at the opening event, a dinner in Mather Hall at 6:30 p.m. on Friday.

Lyman B. Braiden '30, vice chairman of the Board of Trustees, will be toastmaster.

According to Mr. Braiden, Friday night's program will afford the guests the opportunity to learn about life at the 142-year-old College when they meet in small discussion groups with representatives of the student body, faculty and administration.

Saturday's program includes six seminars in which faculty will join with educators from other institutions and with professional and business leaders to discuss the challenges facing higher education. They also plan to show how the College is meeting these challenges as well as to suggest future development plans.

The group favored placing the responsibility of the individual restoring students directly on the fraternities as a whole. One representative suggested that house presidents be alerted if a brother causes trouble in another fraternity.

Another president added that penalty from the own fraternity could be "the most severe" punishment for an "objectionable" person.

"They seemed to agree to "make every building on campus a safe house," said Mr. Heath. "That 'objectionable' people are not welcome in other houses." A proposal to prevent students from becoming intoxicated by urging them to stop drinking soon enough met with some favor.

Finally, the group advocated the placing of men at the door of fraternities during parties to both prevent "objectionable" students from wandering up and down the streets or without cups in their hands and also to prevent objectionable individuals from entering the houses.

The conference will adjourn following a reception and dinner in Rice Hall. Former Trinity president and Life Trustee of the College, G. Keith Fumon '32, will speak briefly.

Bridge, Heath, Students Probe Alcohol Abuses

Presidents of ten fraternities and members of the Medusa met with F. Gardner F. Bridge, director of student affairs, and Roy Heath, dean of students, Friday in an attempt to alleviate the problems of excessive drinking.

They outlined a three-part plan to keep so-called "objectionables" - intoxicated, boisterous, or both - students under control.

The group favored placing the responsibility of the individual restoring students directly on the fraternities as a whole. One representative suggested that house presidents be alerted if a brother causes trouble in another fraternity.

Another president added that penalty from the own fraternity could be "the most severe" punishment for an "objectionable" person.

Ten Professors Commence Sabbaticals; Individual Itineraries Include India, Iraq

Ten members of the faculty have been granted leaves of absence by the College. All have plans to write or do research in their respective fields.

Dr. Arthur Hughes, vice-president, plans to do a considerable amount of writing in various fields. On leave for the entire academic year, Dr. Ralph Chapman, professor of geology, will lecture at the University of Baghdad, Iraq as part of the Technical Assistance Program of the Agency for International Development, financed by a State Department grant. He will be an associate professor of modern languages, and will spend one semester on sabbatical leave for the Christmas term, which he will spend mostly in Germany, where he plans to work on an introductory anthology for German literature classes at the college.

Professor Frederick Owen of the English department is on sabbatical leave this semester where he plans to complete three books and a number of articles. The books include the second edition of "THE CARE FOR POETRY," the second edition of PAULKKER IN THE UNIVERSITY, and a textbook, ENGLISH, A COMPREHENSIVE TEST. The articles will deal with mimesis, punctuation, literary archetypes and the critical theory of Northrop Frye.

Dr. Robert Meade, associate professor of psychology, has been granted a full year's leave of absence. He has been appointed a Fulbright Professor of Psychology to Dalhousie in Agra, India, where he will conduct a research project and supervise the establishment of a laboratory of psychology. He will do no teaching.

Dr. Mario Poliferno, associate professor of mathematics, has been granted a sabbatical leave for the entire academic year. He plans to devote his time to the completion of a text in calculus.

Mr. James Wightman, instructor in economics, is on sabbatical leave for the present academic year. He will conduct research on the effects of local and state taxation policies, and will develop areas in New England for his doctoral thesis.

Three of the faculty will take their sabbaticals next semester. Dr. Edward Bobko, associate professor of chemistry, will prepare a text on elementary organic chemistry.

Dr. Blanchard Means, instructor in government, will work primarily on his doctoral thesis. Mr. Albert Gradman, instructor of philosophy, plans to do some creative writing and research, with a particular interest in the philosophy of law, and to continue progress on a book which he is now writing on individual philosophy.

Flames Leap at Phi Psi, Gas Starts Fire in Kitchen

An explosion ripped through the kitchen of the Phi Kappa Psi fraternity house, Thursday morning, as a newly purchased stove burst. The cook, Agnes Macklin, who had just come into the kitchen to prepare lunch said, "I was about three or four steps from the stove. The gas company and the fire department have not yet determined the cause of the explosion. The brothers are in a state of confusion, and the house is in a mess," commented the steward. He said that they would be eating in Mather until the contractors straighten things out.

Frosh Elect Members of 1964 Council

Last week the Class of 1964 elected its 1964-65 Council to represent the freshmen. The nine students elected F.E.C. will serve as a link between the Senate and the freshmen class in matters concerning the student body. The freshmen council representatives are as follows: John Faber, Jason Beagan, and Patricia Fordham.

Of course, Mr. Rozinsky meant trades Accepted

And though the Rozinsky ad in the Trinity Blotter might have been misleading — Rozinsky's sincerity to trade merchandise or sell it at convenient student prices can never be doubted.

Detroit Opens Music Series

The Bushnell Memorial recently released a complete list of the Symphony of Paris, listing the dates of five performances. The listings this year are exceptionally fine and include the best orchestras from America and Europe to the Hartford stage.

The first orchestra scheduled in this series will be the Hartford Symphony on the twenty-sixth of this month. Following on that date will perform Beethoven’s Overture to “The Eroica.”

In November will be the Warsaw Orchestra: $3.00, 2.50, 2.00; 2nd Bal. $2.50, 1.50.

October 13-November 15.

November 23-25.

The final arrangements on the schedule will be made November 20 by Acton’s stage company.

The Merry Jacks Music Series is composed of a former business administration major of the college and a would-be psychologist and music major. "Serenade," a modern arrangement of a 19th century play, rich in melody and music, is presented following the previous evening.

October 23-24-25.

The Bushnell.

At The Athenaeum

Through October 11.

October 11.

At any stationery, variety, book store!

January 6-8.

Paris is a city that moves in the secret lairs. Paris has often been called the seat of the Academie Francaise and to government tradition of education, the arts, and culture in general, the intellectual enjoys a prestige probably unequalled in any other country.

October 23-29.

French scenes, in Avery Court.

At any stationery, variety, book store!

October 13-15.

The Christmas season will deposit the bushnell at $1.50, $2.50, $3.00 and $3.75, or through Mather Hall.

When Johnny Comes Home

By George Whitehead

They stopped, turned around, and stared at what they saw—a Playboy model on the stage.

A little girl asked her who she was; she answered, "June." The name apparently meant nothing to him at all, but he, in turn, was also unable to guess who she was. "Playboy girl?" she asked. He nodded. Then the girl said, "Oh, the model in The Hoomon."

For those of us who saw her, she was the answer to our hopes and desires of seeing one of those goddesses who usually just grace the pages of magazines or the Party Line. She was there.

JUNE, DESPISING A frequent subject in Playboy, is on a mission, and it is for this reason that she was in Hartford. Her favorite role, she said, was "hair girl" and it is her intention to play it in her new picture, "The Candidate," another movie. "The Hoomon," which she is making, is to be directed by one of her "best friends" and is planned to be a "big screen blast" and a "big screen hit."

June, still a bachelor girl, does not want to marry a man who would make her give up her career completely. She also does not want to marry an actor.

Wearing a gain dress and stopping a ginger ale, Miss Wilkinson said, "I don't think that I am sexy. It is what people expect to see, I have to play the part."

WHEN ASKED what she thought of her fellow countrymen, the Beelzebub, she replied that she thought that they were rather scrawny and that the movie was "neatly and effectively contained in this community."

The greatest concern expressed in meetings last week, which were called somewhat hastily, was with the uncontrolled excesses of certain students and the threat of dangerous drinking by intoxicated students.

The clearly definable goal was how to stop both.

The question should be raised as to why these conditions were allowed to develop and now possibly force stringent rules against the students in respect to both driving and drinking.

Could it be that there has been a disregard of the rules of another game called brotherhood? Could it be that there has been this "privacyism," that there is a growing feeling of disregard for the concern of both fraternity brothers and fellow college students?

We wonder how many times a fraternity president, or, in fact, any fraternity brother who is on the sober side has tapped the shoulders of a boisterous brother and suggested that he stay away from the beer and liquor for awhile? We wonder how many times a brother has taken an intoxicated companion out of the driver's seat.

The trouble is not solely on Vernon Street, either. How many times have the junior advisors stepped in when a freshman blackouts or loses control. How many times have the JA's tapped the shoulders of their charges?

No, we are not our brother's keeper. We are his friend, concerned for his welfare.

So our ideal solution, as has been suggested at the meetings, is more shoulder tapping and more. "All right, now haven't you run out of gas?"

The Urge to Scale

During the past few months, Trinity has undergone a minor revolution, a revolution which is manifest in the creation of new departments, the redistribution of responsibility, the formation of a plan to spend nearly 25 million dollars in ten years, and the conversion of numbered grades to letter grades.

This conversion of grades seems to indicate two advantages—de-emphasizing the importance of grades and providing a more reasonable standard. However, as we see it, only the latter aspect really prevails.

With over 60 per cent of the graduating class applying for advanced degrees and competition getting tougher from year to year, it is no surprise that some students will continue constantly to calculate averages by course, semester, and year. The race for top standing is becoming more and more vicious. As much as some students (in the true sense of the word) are at Trinity primarily for the sake of learning and secondarily for entrance into graduate school, many of them feel compelled to balance a suspected hard course with a "gut" so as to insure high enough grades. Letter grades notwithstanding, the problem is realistically insoluble.

But it seems that letters offer also a subtle, added opportunity for fostering competition. This opportunity lies in the device of scaling grades according to a normal curve.

To be sure, scaling was practiced under the old number system, but apparently only sometime after final exams when the professor found his class hadn't learned as much as he had anticipated.

With letter grades, the temptation to scale is alluring, and with the advent of scaling, the danger of promulgation of medians and means is imminent.

It is dangerous scaling.

The first, and probably the most significant, is the aggravation of competition among the students. One hears stories occasionally from other colleges and universities which regularly indulge in the scale and in which students give wrong answers to other students for the sake of bettering their own grades.

A second threat is the tendency of instructors to make exams so impossibly difficult that a median below sixty is condescent.

This is an important conclusion about such an exam is that the instructor is more interested in determining how much a student does not know, rather than the amount of material he has absorbed.

This type of exam can be only frustrating to the student, who, given a proper problem, is able to utilize the particular tools of a particular subject to construct a feasible answer. However, if, after all, he isn't allowed to demonstrate his skills, what possible satisfaction can be obtained from the learning processes?

Other than directing his thoughts toward that printed sheepskin, the student usually loses sight of the goal of education, which is (however idealistic) learning for its own sake.

The Michigan Daily (Collegiate Press Service)

Opinion

Closed System of Fraternities Offers No Unique Advantages

by H. Neil Berkeoom

At one time fraternities and sororities were an integral part of college life. New Greek systems have contained a small percentage of uninitiated members who have been relatively static for a number of years.

The university has passed the peak of its times nor supplements academic life. It is a social organization and we cannot mean that it is an intellectual organizing nor do any of its members have a serious atmosphere which creates friendships of the opposite fraternity. In contrast, personal development.

One substantial element in any person is his personality. The person who is most sophisticated will be able to inculcate his habits, and is thereby an inexorable of his self.

Paradoxically, however, he can learn about himself only in relative ignorance, everything around him. This would mean that if man could live apart from society, he cannot therefore, to move with any aspirations, he must have a broad comprehension of the fantastically complex events which shape his life.

The more limited his exposure, the more likely he is to put his knowledge to use, and by which he will be unable to cope rationally. (Parenthetically, it would be interesting to type the Goldwater movement in these terms.)

The society of fraternities and sororities is that they narrow the range of their own group by cutting off other influences. Take any fraternity or sorority on campus and you will find that the differences members may bring to a house blend, to house society, and to personal development.

The fraternity-sorority member, therefore, has an entirely different way to type. Members come from the same relative environment, the same relative upbringing, the same relative values, the same expectations. This environment, functioning at a subconscious level, reinforces an essential invariance.

A problem of this situation lies in the phenomenon called rush. The fraternity-sorority members who rush are already accustomed to the hypocrisy of it. The members who are able to evaluate a personal change at a conscious level, and by which they instinctively recognize their own.

This is a way, however, to determine who "belongs" and who does not, who people of a certain environmental background, and to instinctively recognize their own.

IFC Reviews Programs for Stunt Night, Competition

ŠEPT. 28.—The Inter-Fraternity Council gathered its first meeting of the year briefly discussed plans for the coming major I.F.C. sponsored events.

Fred Prillaman, president of the I.F.C., told the assembled chapter representatives that the annual Gimzo contest, a part of the I.F.C., would be held on Homecoming weekend, November 7th and 8th.

Prillaman also announced that plans for a proposed stunt night were now being considered by the individual fraternities and would be finalized at the next meeting of the Council.

Before ending the meeting, Prillaman informed the representatives that the annual I.F.C. sponsored events.

Political Scientist To Give Lecture On West Berlin

Dr. Carl Christoph Schweitzer, professor of political science at the Free University and the Teachers University in West Berlin, will speak next Monday at 8:00 p.m. in McCook Auditorium. The lecture, “Democracy in West Berlin,” is sponsored by the College Lecture Committee.

Dr. Schweitzer, former special assistant to the president of the German Republic, obtained his Ph.D. degree from Oxford University in 1946. After the war, he returned to the University of Freiburg in Germany and received his Ph.D. in 1949.

Since 1948, Schweitzer’s special area of study has been International Relations.

Select Faculty Member To Direct Fellowship Programs

Dr. Robert M. Vogel, Chairman of the Committee on Graduate Fellowships, has appointed various faculty members to evaluate the qualifications of seniors with the capability of being awarded Fellowship grants.

In choosing the men who will be responsible for distributing information of the scholarships, Dr. Vogel has appointed faculty members with an interest in the field in which the fellowship is given.

The members of the committee and the fellowships which they represent are: Dr. Albert C. Jacobs, Student; Dr. George B. Cooper, Marshall, Henry, and others for study in Great Britain; Dr. Murray S. Stedman, Jr., Woodrow Wilson. Also; Dr. Edmond Lall, Career, Dashiell, and Rockefeller.

All requests for posters can be made through the Office of the President. Requests must be in one week before the desired date for the poster. There is a slight charge for the poster, depending on the size and details required.

Dr. Gustave W. Andrian, Fulbright and others for study abroad outside Great Britain; Captain, Wendell E. Kraft, Dr. J. Wendell Burger, and Robert C. Stewart, National Science Foundation and other science fellowships; John F. Butler, fellowships for law and business administration.

Placement

Dean Tate and Dean Poor of Yale Law School will hold a group meeting in Alumni Lounge October 15, 4 p.m. for all undergraduates interested in Yale Law School.

On October 15, they will hold individual interviews. See Placement Secretary for appointments as soon as possible.

October 19, Professor John Cook of Northwestern University will be in the Senate Room.

October 16, Dean Karl Hill of Tuck Graduate Business School will be in Alumni Lounge, and Dean R. R. Laity of Duke Law School will be in the Senate Room.

Appointments with the Placement Secretary are necessary. October 19, Dean Larkin of Boston College Law School will be in the Senate Room.

...don’t pour it down the side?

(We'd rather you wouldn't)

Of course, a lot of people do pour beer down the side of the glass. They say it keeps the head down. It does sure. And we think that's a shame.

Maybe it sounds silly, but we spend more dollars on just the bubbles than any other brewery in America. Instead of pumping them in mechanically, we let Budweiser create its own bubbles with our exclusive Beechwood Ageing and natural carbonation. It takes a lot longer to do it this way. But it's worth it.

When those bubbles get together at the top of your glass you've got a better head, a cleaner taste, a smoother, more drinkable beer. Budweiser even smells better (really ... just take a sniff next time you pour).

So let that Budweiser fall right down the center of your glass. Let it splash around and froth and foam. We went to a lot of trouble brewing the finest beer on earth, and we'd hate to think you'd missed even one little bubble.

Budweiser— that Bud...that's beer!
'Cats Win 14-7 on Last-Minute Score
by Mike Weinberg

In 51 seconds the game would have been over. In 51 seconds Joe Kolwe, Rick Russell, and half a dozen others would have been heroes. In 51 seconds Trinity would have broken a six game losing streak. In 51 seconds...

But the Bates Bobcats, acting like the soldiers of Rome, had different ideas. Their last minute touchdown was all it took to snap hundreds of sun-soaked Bantam boosters back into the grips of reality and hand Trinity a stinging 14-7 loss.

What would have happened if Tom Carr hadn't plunged over the goal line in the closing seconds of action? For the time being, let's wipe this unpleasantly from our memories.
Inside Shots

Apathy is a familiar word on the Trinity campus, for Joe Tri's has been accused of being apathetic about everything from athletics to zoology. In the first-mentioned field, at least, an effort is being made to combat this attitude. This is being done by a group called the Sports Committee, and last Tuesday I had the pleasure of attending their organizational meeting.

The group is well-represented by both athletes and non-athletes. One of its objectives is to attract at least two members of each fraternity on campus in order to facilitate its drive to increase the turnout at athletic events. By judicious use of money allocated by the senate, the committee plans to publicize the campus, mail all the major athletic events at home.

At the meeting Tuesday, officers were elected and sub-committees were set up. The new officers are president, Joe Hourihan; vice-president and treasurer, Sandy Marger; secretary, Buzz Dewey. In addition, the captains of the three leaders, John Jewett, is an auto-engineer department who has long been recognized as being devoted to athletics at Trinity and who, I am told, also plays a mean game of leaels.

Four sub-committees were set up. The poster committee is headed by Robert Boss, the letter committee is under the chairman-ship of Tom Kelly, and Joe Harrard directs the idea committee. The fourth group is the publicity committee, and is composed of the executive committee and the other committee chairman. Its purpose will be to plan a rally for either Amherst or Wesleyan weekend.

Twenty-one men attended the initial meeting, and it was announced that any additional interest is welcomed. The next meeting will be on Thursday, October 8, at 10:00 p.m.

On the sports scene last week: due to a prior commitment, I missed the football game Saturday, but anyway, a hard-fought game lost in the final 51 seconds doesn't need any comment from this corner to excite the after-math of frustration. Students must have heard that we have a pretty good soccer team this year, judging from the turnout at the M.I.T. game. Several people asked me whom I was rooting for, with enthusiasm after seeing the final 10 minutes. It's an exciting team, one which can provoke the approval even of those who know little about the game.

Thank You Dept. Bob Ochs has flashed in streaks, it must be remembered that this was only his first contest, as triumphant three for the Techmen. The team has proved under the fire of competition that it has speed, desire, depth, plenty of scoring punch, and true color in the persons of "Ous" and "Schwartz".

With luck, and the kind of play they exhibited Saturday, this could be Trinity's year for success. On Wednesday the soccer team journeys to Amherst to face the University of Massachusetts. Last year the Bantams easily defeated UMass by a score of 5-2. After last Saturday's performance, one expects a repeat, but the Bay Staters will probably be tough, especially on their home grounds.

TOUCHDOWN! — Springing Loose for a 37 yard run in the third quarter, Trinity's Tom Sanders (40) heads for the endzone and scored a touchdown for Trinity, while keeping the Bay Staters from the rear before they could be knocked out of the picture.

McDaniel Potte

Bantam Booters Whitewash Tech

by Dave Trachtenberg

A large crowd of soccer fans and curious students assembled by the soccer field Saturday to see if the high-flying Bantam booters could live up to their pre-season rating. Those who came to see played to ooh and ah at the Bantams' routine of maneuvering a wealth of talent. This was not evident, however, as the Bantams played as if they could read each others minds.

They dominated play from the outset and, although it was several minutes before a shot was taken, no one doubted that a Trinity score was inevitable. And scores they did, as Bob Ochs took a pass and flipped the ball from Ochs over to Tom Sallah, making the first tally at 13:32 of the first period, Dan Swander, blasted a shot off their only two shots of the half, and goals by Schweitzer proved in-pregnable.

The irrepressible Junior livened the contest with his leaping catches of corner kicks and high-pitched delirium, which delighted and amazed the partisan throng as he took charge during the brief flurry of the Techmen's counter-attack. Trinity started fast in the third period, and kept pressing until these tactics paid dividends when, with 8:52 gone, a shot by Sallah was deflected by the goalie out to forward Ochs, about 20 yards out. Ochs, last year's high scorer along with Dan Schweitzer, blasted a shot which cleared the mixer in front of the goal, and on to the goalpost, and over the line.

Although this was the first-tally of the afternoon, the score could easily have been higher. Trinity came away with a hard-fought, and scoring on two other occasions. Once, Mark Josephson zoomed in, all alone on the right corner of the goal, but his shot from about twenty yards out was blocked as the brilliant Tech center forward charged to cut off the shot. Late in the second period, Trinity barely missed getting on the board when a cross by Josephson was deflected across the goal mouth by Ochs and booted outside, with Dan Schweitzer, blasted a shot which cleared the mixer in front of the goal, and on to the goalpost, and over the line.

The majority of the second half was evenly matched, as coach Dath and his 34 players proved under the fire of competition that it has speed, desire, depth, plenty of scoring punch, and even color in the persons of "Ous" and "Schwartz".

With luck, and the kind of play they exhibited Saturday, this could be Trinity's year for success. On Wednesday the soccer team enters into more serious training, as the Bay Staters will probably be tough, especially on their home ground.

This Week In Sports

Wednesday, October 7 — Freshman Soccer Home Vs. Salisbury 3:30
Saturday, October 10 — Varsity Soccer Home Vs. Tufts 2:00

Saturday, October 10 — Varsity Soccer Away Vs. Tufts 2:00

UMass 3:30

Salisbury 3:30

TUESDAY, OCTOBER 6, 1964
