TRUSTEES UNANIMOUSLY APPROVE
STUDENT MEMBERS ON COMMITTEE

Committee on Educational Policy
Urgency, Care in Resolution Endorsement

In response to a Senate request for student participation on the Curriculum Committee, the Joint Committee on Educational Policy and the Board of Trustees approved a five point resolution which endorsed Robert M. Vogel, who has directed a number of the most potentially significant actions in the interest of improved student-faculty and student-administration relations. The resolution drawn up by the Joint Committee on Educational Policy Friday and unanimously endorsed by the Board of Trustees Saturday is as follows: 1.) That the Committee favor student participation in the revision of the curriculum; 2.) That the Committee ask the special faculty committee for revision of the curriculum to work out with and direct the mechanics for meaningful student participation; 3.) That the special committee make the resolution of this problem its first order of business; 4.) That the special committee devise an effective way to implement the recommendation of the Curriculum Committee to place students on the Curriculum Committee; 5.) To inform the Joint Committee on Educational Policy of the progress of its study. (S.) That a sub-committee of the Joint Committee on Educational Policy be created, this committee to consist of three members: A Trustee, a faculty member, and a member of the administration selected from the Senate and three students selected by the Senate to conduct a continuing dialogue on the student-faculty-administration relationship. 

Dean Vogel reported that the five points grew spontaneously out of more than two hours of discussion at the Policy Committee meeting, he emphasized that it was the Senate's restrained tone of the Senate's letter to the Policy Committee and Trustees which led to the favorable reception of the Senate proposal. The Senate letter underscored the students' desires to work out with the Faculty and Administration in the attainment of cooperation and mutual concern. In addition the Senate apologized for the tone of the letter sent by the Senate to students and faculty earlier in the week. Dean Vogel said that President Jacobs would make his appointment to the Senate Policy Committee sometime this week.

TOMAT DISCLAIMS ROOMING SHORTAGES; Admissions Office Mail Acceptances

TOMAT Disclaims Rooming Shortages; Admissions Office Mail Acceptances

The availability of on-campus rooms, particularly for rising freshmen and sophomores, "tight but not critical," conceded Assistant Dean of Students Donald A. Theobald. "It is not the first time there have been shortages," Theobald explained. "It was the first time it was the entire present residence hall community that had become scarce."

Dr. Ivanhoe Donaldson of New York
SNCC Fills Carmichael's Absence

Ivanhoe Donaldson, new SNCC director, fills the position left vacant by Stokely Carmichael. Donaldson, a native New Yorker, was associated with Carmichael in the Georgia legislature, and he worked on Julian Bond's successful campaign for re-election to the Georgia House of Representatives. He served as a seminar leader at the 1965 Selma-Montgomery March, and he served on the SNCC's successful campaign for re-election to the House of Representatives in the Georgia legislature. Workshops with Saul Alinsky, Ivanhoe Donaldson, and W. R. Perry will be open both to students who have not attended their seminars and to the general public. The workshops will be led by a faculty member who has directed a seminar program, student seminar participants will direct questions to the workshop guest. A new seminar has been added to the program that will meet for the first time this week, reports Michael P. Setziol, chairman of the Joint Committee on Educational Policy. The seminar will be held in the Freeeman Dining Hall.

HONOR SCHOLAR PLAN INSTATED

Letters of acceptance of candidates for admission into the College for the class of 1971 were mailed last week to over 600 preparatory and high school students. Director of Admissions W. H. Moir reported that about 40% of these individuals had not met the financial aid. This figure, he said, constitutes 100% of the average enrollment per student, as well as an increment in the proportion of the freshmen to the entire class.

Lecture-Recital by Eglevsky To Illustrate Ballet History

Sunday the Goodwin Fellows will bring an unusual program in the form of a ballet lecture-recital to the Goodwin Theater at 8:30. Andre Eglevsky (formerly with the New York City School of Ballet), since 1939 the head of his own company, will present an illustrated lecture on the history of ballet.

In a program distributed by the Department of Fine Arts, Eglevsky is labeled as "one of the greatest authorities in Europe before the International public" for more than a quarter of a century. While Eglevsky will trace a history of the ballet, a brief outline of the development of the dance is in order.

"Ballet" is derived from the Italian "ballare" - but today the art of ballet is nearly French in origin to describe the movements of the feet to accompany dancing in the levite court entertainments of the Italian Renaissance. In Baroque times the ballet became a favorite of the theatrical arts and was an adept performer himself until accumulating recurrent afficianados of the miniskirt. (Known for her expressive power), Marie Camargo (known for her humble and humility is a major asset in the art of ballet. When one of M. Camargo's friends is reported to have seen him at the ballet, he was Russian-International Ballet stars of tomorrow, an American Ballet (now the New York City Ballet), it is fitting to this brief discussion of the art of ballet close with a tribute to the New York City Ballet, universally acclaimed as one of the three greatest ballet companies in the world. While Parisian ban on theatricals.

In a program distributed by the Department of Fine Arts, Eglevsky will trace a history of the ballet, a brief outline of the development of the dance is in order.

Eglevsky as the Devil in "Devil's Holiday," a ballet with choreography by Sir Frederick Ashton, which was produced in 1939. The Russians - Pavlova, Nijinsky, Karatava and later, Valsek and Eglevsky - created the greatest dancers of all time. Eglevsky's Swan Lake, Nutcracker, and Sleeping Beauty. Delpi trained Michel Fokine, Evald Cecchetti, Nicolas Legat, and most of the great figures of the time. Beginning in 1909 Sergei Diaghilev drew on the skills of the French Impressionist painter, which codified the dance itself. Lully (1632-1687), the composer who supplied the music for Lully's ballets, was Michel Fokine, choreographer of the Bolshoi and the Royal English Ballet. For more than three decades Balanchine and Nijinsky have worked together to create this great company. To stand alongside of the ballets already mentioned, Balanchine has created Orpheus, Serenade, Pas de Deux and several dozen others. "The art of ballet has never been more alive, than at this moment, and the ballets have never been more exciting, than at this moment, and the ballets have never been more exciting, than at this moment."

In France ballet flourished magnificently. While Paris was the major home of ballet, beginning in the eighteenth century, in England there was the period of Auguste Vestris and Bolshoi" - which codified the dance itself. Lully (1632-1687), the composer who supplied the music for Lully's ballets, was Michel Fokine, choreographer of the Bolshoi and the Royal English Ballet. For more than three decades Balanchine and Nijinsky have worked together to create this great company. To stand alongside of the ballets already mentioned, Balanchine has created Orpheus, Serenade, Pas de Deux and several dozen others. Care and Urgency

Last week the College amended, nearly erupting into protest, the rules regarding the faculty Committee on Curricular Revision. The College, like so many others across the country, had almost "come of age," finding a "cause" to rally round in the form of a student movement.

Throughout the week rumors of class boycotts, protest marches, and sit-ins arose so that I.D. cards, spread about the campus and were often eagerly anticipated. The fire was fed by the distribution of an all-college letter from the Senate which noted that the student government body would "take any action" it deemed necessary to place three students on full faculty status, as members of the faculty Curriculum Committee. Although the militant tone of the letter was later termed a mistake, and an apology was included in the proposal sent to the Senate, the College was indeed on the defensive, but a defensive which nearly over turned all progress made in student administration and faculty relations.

The letter was not merely to avoid student support, but was inter preted as a portent of future hostility should the Policy Co mmittee refuse the student "demand."

With the possible threat of student mobilization, the admin istration was indeed on the defensive, but a defensive which nearly over turned all progress made in student administration and faculty relations. The College, in fact, was an administrator who spoke in the name of the faculty, the Educational Policy Committee, and the Board of Trustees, all favored student participation on the Curriculum Committee. Additionally, they presented students with an excellent opportunity to develop a committee through which to effect a channel their desired dialogue.

Most noteworthy is that the Policy Committee and the Trustees reacted favorably to the threat of student mobilization (which would have chased any hopes of student participation), but they seem positively to the latter's communicative skill in the form of an intelligent, well-documented expression of student interest in the area of curriculum revision. It was not a position taken by the College or Senate administration, but by the administration and the Board of Trustees favored student participation on the Curriculum Committee. Additionally, they presented students with an excellent opportunity to develop a committee through which to effect a channel their desired dialogue.

The test of my proposals would hav to read like the Order Number One of the Soviet of Workers' and Soldiers' Deputies as it was announced March 1, 1917. As somewhat of an equilibrium, I would have presented to the College the test of my proposals, to be answered by the reformers for the future. The test of my proposals would hav to read like the Order Number One of the Soviet of Workers' and Soldiers' Deputies as it was announced March 1, 1917. As somewhat of an equilibrium, I would have presented to the College the test of my proposals, to be answered by the reformers for the future. by C. P. Hill

Now that the Trustees have given the students the opportunity to be all they have all that they had to implement, let us see the proposals made by the student, who has been given the opportunity to be all they have all that they had to implement, let us see the proposals made by the student, who has been given the opportunity to be all they have all that they had to implement, let us see the proposals made by the student, who has been given the opportunity to be all they have all that they had to implement, let us see the proposals made by the student, who has been given the opportunity to be all they have all that they had to implement, let us see the proposals made by the student, who has been given the opportunity to be all they have all that they had to implement.

2. All dormitories, fraternity houses, steam baths, broom closets, and all other channels of communication—channels which the Educational Policy Committee and the Trustees have done much to strengthen by the creation of the special subcommittee.
In the first issue we discussed the principles of survival: (1) to defend ourselves against nuclear attack; (2) to maintain a credible threat to repel an attack. Nothing can survive a direct hit, but our missiles can survive a direct hit, but our missiles can "Fail Safe," in other words, they are "safe" against a direct hit. Air superiority per cent of air superiority, the Joint Chiefs of Staff for the "pro Patria" of our seal discussed this article. The reply draws upon information available in our excellent Library which we happen to know is not far from anyone's reach. The "pro Patria" article could have been used as a basis for our coverage of the issues in the library. On the other hand, the article could have been used as a basis for our coverage of the issues in the library. In the first issue we discussed the principles of survival: (1) to defend ourselves against nuclear attack; (2) to maintain a credible threat to repel an attack.
described by HARPER'S magazine as a "battler for the poor whose ideas have set thousands marching and retreating in a sea of rage," Basl Alinsky will be addressing the Symposium on Social Change in a Democracy in a Democracy Today.

Alinsky is a firm believer that "the only way the poor are going to get what they need is through their own." A "strong militant organization of the poor against other aspects of life that affects the welfare and future of the local people and their children.

Claude Brown

Brown cites Educational Negro Need

Author of the 1966 bestseller "Manchild in the Promised Land," cult leader and SDS organizer Claude Brown participated in the Symposium on the problems of the Negro ghetto life. According to Carl Oglesby, President John F. Kennedy appointed Brown to investigate the causes of the civil rights riots the previous summer. Brown has been concerned with the ghetto dwellers' police records and the control being exercised over all social institutions. As part of his opposition to the social structure of modern society, he has been a critic of President Johnson's "Great Society." He has committed to the complete abolishment of poverty and the guarantee of income for everyone in the United States. The need for an increase of democratic control over social institutions, the control being exercised by those most directly affected.

Oglesby Violently lambasts Basis of American Morality

Oglesby is a strong critic of the moral values of our society. "A strong editorial system" he says, "is one in which we "take a roasting" and plan to keep it, not our own, and we put it in our pockets, our garages, our split-levels, our bellies, and our hands.

The leftist leader terms the system as "anti-perpetuating and destructive," one that "causes poverty to be born, moral but addicted to a system that denies it value. It is a statement of necessity, he said, that the American system of work and business will have to undergo a fundamental alteration and that "a new way of life will have to be created for the masses.

Saul Alinsky

To deal more directly with social problems Alinsky founded the Industrial Areas Foundation, a "land of training for street agents," according to HARPER'S magazine. The 500-person foundation is one of the few urban community groups to set up militant organizers, called "street agents." Their purpose is to develop local communities to get rid of slum landlords and to improve the quality of life in the city. The street agents are "training them in the skills of social action, in the art of communication, in the techniques of organizing and in the use of the law to bring about reform.

Saul Alinsky's visit is a resounding prescription and declaration that the system of money and power is a system of exploitation and that the solution is to be found in the people themselves. It is a statement of necessity, he said, that the American system of work and business will have to undergo a fundamental alteration and that "a new way of life will have to be created for the masses."

Carl Oglesby

Brown grew up quickly as he was exposed to violence and nephew of the person being interviewed for the alternate he suggested replacing the executive of the ghetto dwellers' police records with a "new way of life." He was trained with modern skills, he believes, that he can teach those simple and applies their society and their children.

As a "manchild" in Harlem, Brown grew up quickly as he was exposed to violence and nephew of the person being interviewed for the alternate he suggested replacing the executive of the ghetto dwellers' police records with a "new way of life." He was trained with modern skills, he believes, that he can teach those simple and applies their society and their children.

Claude Brown

points as we are to be unspoken war between the class which oppresses them, the 'us and them.'" The Harlem organizer who wins the war is highly respected for his difficult achievement, brown taskmaster.

Brown also stated that man in the ghetto is the poor. He has been concerned with the ghetto dwellers' police records and the control being exercised over all social institutions. As part of his opposition to the social structure of modern society, he has been a critic of President Johnson's "Great Society." He has committed to the complete abolishment of poverty and the guarantee of income for everyone in the United States. Michael Cautions on Need To Prepare for Automation

Warning that failure to prepare for the cybernation of society could result in chaotic social, political, and economic disruption, data analyst James Breeden was the guest speaker at a special seminar sponsored by the Search Institute, predicted that in the near future machines will be available to all aspects of society, involved with the formulation of social legislation, he is already discernible, and may soon have the means to abolish it. But he warned against technological determinism, that these goals can be attained by the most efficient means.

Michael, Director of Planning and Programs for the Peacetime Research Institute, predicted that in the next few years the federal government, through the social complexity produced by the cybernation, will have to create conditions in which a sense of equality and cooperation welfare services needed to meet those needs.

Michael suggested that the United States is "as relevant to vast and severe as the Metropolitan Opera Company." Dividing his time between the preparation of materials and human behavior, he emphasized the need for more recreational facilities and employment, to create a more open and better means with which to enjoy life. He warned against forgetting the problems it will create, critical problems in education, unemployment, recreational facilities, and support for the aged and unemployed.

The next few years, the psychodynamics of the difference between the deprived and poverty alleviation, and that sector enjoying a new living standard of education, will pose a difficult challenge to our institutions.

To meet the problems presented, Van den Haag believes, it is essential to employ what he calls new "radical social analysis," explaining, he ruled out the psychological but to apply methods to education, employment, administration and so on, by modernizing the public schools and organizing more local and national education programs.

The danger of rationalized methods, as emphasized in this NEXT generation, is that the rate of technological change will lead to a strain on the social system, and the social welfare services needed to meet those needs.

James Breeden: Openmouth Pilgrim for Race, Religion

One of the five clergymen to be honored at a special dinner on April 22 in the Consultants Church will be the Rev. Dr. Ben B. Seligman. The dinner, "Regulation Urgent," will be held at the Consultants Church in Detroit in September. The dinner is sponsored by the National Council of Churches.

Author of most notably VICTORY and Director of the University of Massachusetts Labor Relations Center, Professor Ben B. Seligman will return to the Detroit area to take part in the eventual take over of American society by automation. His book, THE NEXT GENERATION, is a warning that the use of automation will be a very un-Jeffersonian kind of control the process among workers and trade unions; media of communication; and on the other an appreciation of the growing capability for manipulation of the process which will equitably distribute the resources of the future is to be recorded early stages. My perception of the situation is that the Constitution has become outdated by technical advance and deals with what is being sacrificed to this revolution.

I have offered illustrations of this in my recent book, In the Light of the Consumer Revolution, and my concern is that the consumer revolution is raising serious and con- sensitive questions about the so- cial order and social organization. I have written against the possible use of dangerous convictions that science is being used to manipulate the market, for all alike. For most people, but not so much, for the scientists and for the chairman of the Atomic Energy Commission. It is this opportunity that the drafting committee and the American people must see and make it clear that our social and administrative institutions will work to the advantage of man and not the other way around.

It seems to me, in the face of these novelities, that it is not neces- sarily bad to have a close look at our basic instrument in order to determine its ability to cope with these utterly new con- structions, and especially with the overbearing novelty of technology. I have in mind a constitutional convention, which I believe ought to be called for many reasons. But on the technological part of it, I do not think it possible to ignore technology, since by its means are manufacturing a new environment for a terrifying new society.

For it must not be forgotten that the enormous proliferation of

Ben B. Seligman

classified as "poor" by Seligman, Seligman was one of the four Professor Ben B. Seligman commented on the development of a massive social program to support the "poor" in the United States, and he called for action to prevent the spread of poverty. He argued that the government should take steps to prevent the spread of poverty and that the development of a massive social program to support the "poor" was necessary. Seligman was a member of the National Council of Churches and was known for his work as a social reformer. His ideas were widely influential and he was a strong advocate for social justice.

For in regard to poverty, Van den Haag concluded, it is not to be a phenomenon that is to be disregarded, but to be taken in its entirety as a fact of life and as a problem to be dealt with. Van den Haag pointed out that poverty is a complex problem that cannot be easily solved, and he called for a comprehensive approach to dealing with it.

The best way to get at it, in my opinion, by private hands that lack the legitimacy to affect the commonwealth in such pro- found measure. The central fact about our age of revolution is not population or prepotency, hunger or doctrine, but technology. The race is between technological novelties, that it is not necessary, but it is not just.

LETTERS to the editor

(Continued from Page 5)

of opinion. Though I heartily disagree with Mr. Kraft's argument, I wish to see all sides of an issue fairly represented - regardless of their points of view. The principles of the Committee of Intellectual and Moral Concerns have been interpreted in the manner which I find so objectionable.

Viola Smith, Berkeley, California

I Intend no disrespect for Mr. Kraft, nor do I intend to suggest that I am intellectually respectable on this point. But disagreement is considered an appeal which could appear over the Trinity community to have to engage in. It should not fall the attention from the point of argument such assertions. They in-to the world and in the world are Inadequately and incorrectly 'explained' as being an appeal to emotion rather than reason and are having no Intellectual argument or substance....

Mike Barrante's letter (of April 12) does an excellent job of explaining the position which he and his supporters hold. I am wholeheartedly in agreement with this view.

Mr. Smith should also demand an answer to his letters from the Department of Modern Languages - support current Administration's war policy, by its own admission, ensures further long years of fighting and dying. If our boys" and encourages Ho to continue in his thoughts on war; Part 1 of his letter to the end of this one. THE NEW BREED
A new frontier imposes a natural process of selection. You can meet the people that you would see on top of a high ski run which had no chair left, and you can do it without the effort of climbing. . . . just let gravity take its course. It's all downhill at the PARACHUTES' INCORPORATED CENTERS.

The Centers are staffed and equipped to put you out on your first jump immediately following a time-required four hour period of instruction. ($35 for everything involved in making the jump.) Safety is insured through the use of automatically opening main parachutes, FAA approved ten-place jump aircraft (your entire class jumps together), radio communication to the student, all-sand drop zones, and counselors, overall supervision by professional instructors. Both in the aircraft and on the ground. (92,600 jumps to date, over 9,200 of which were first jump students)

Senior Scholars Garner Fellowships Despite Intensive of Competition

The Director of Placement, John F. Butler, lauded the competition among students and fellowships as "more severe" than in previous years, but he felt that many of the students had won "a major victory." Students also won the University fellowship level.

Recipient of the most notable awards is John Craft, awarded a Woodrow Wilson Fellowship in History, tuition and fees included, for $2,400; Peter Heller, recipient of a Woodrow Wilson Fellowship, as well as a Fellowship in History, $1,200 from Stanford Law, $1,000 from Yale Law plus $2,000 loan, and a $1,250 scholarship from University of Chicago; Glenn Hitchen, winner of a National Science Foundation grant of $2,400 in Economics; and Michael Weinberg, who received a fellowship in History from Columbia -- $2,500 a year -- for three years, a Faculty Fellowship in History, and an International Fellowship in History.

The other winners are listed as follows: Stewart Barnes, Rockefeller Fellowship and Anderson Bancroft Teaching Fellowship, William Bradford, full fellowship, $500 and $2,000 loan at U. of Penn., $1,500 scholarship from Cornell; L. E. L. Salter, $500 scholarship and $500 loan for U. Va., Jesse Brewer, Florida State Assistantship of $2,100, scholarship of $1,800 in Psychology; Robert Craven, tuition plus $1,200 in St. Louis; David Wadlow, Anderson Bancroft Teaching Fellowship; John Domini, $1,500 scholar fellowship from Teachers College, $2,500 assistantship, with charter from the Rockefeller Foundation.

Thomas Flood, $2,500 Truman Scholarship in Chemistry; Robert Kranz, M.A.T., $2,500 from U. of Chicago; M.A.T., $1,500 from Wesleyan University, $1,000 scholarship at Yale; Frank Devereaux, M.A.T., $1,500 fellowship, Rockefeller Fellowship; Ed Mullarkey, $400 scholarship from Columbia, $1,000 from Howard University, $2,500 from Emory College, $1,000 from firm of T.J. Jackson, $2,200 from University of Maryland, $1,200 from Emory University, $1,200 plus tuition from Rochester Institute of Technology; G. W. Hill, $1,200 fellowship from Union College, $2,000 from U. of Illinois in Psychology; Robert Polin, $2,500 scholarship plus tuition from Boston University; Thomas F. Clancy, $2,500 plus tuition from Boston University; James Capon, $2,500 plus tuition from dartmouth; Mark Shapiro, $2,500 plus scholarship from dartmouth; Morton Salomon, $2,500 plus scholarship and $2,500 plus tuition from Yale University; Donald White, $2,500 plus scholarship and $2,500 from U. of Michigan, $1,800 from Western Reserve in Biology, $500 scholarship and $500 plus tuition from U. of Michigan, $1,800 plus scholarship from U. of Michigan, $1,000 from Pennsylvania State College, and $500 from U. of California.

The April 10 award dinner, preceded by the presentation of a Woodrow Wilson Fellowship, a $2,150 scholarship, from a Harvard Teaching Fellowship, a $1,900 award for the "student who demonstrates unusual gifts and dedication to the field of civil rights, citizenship, race relations or minority group problems," was attended by about 200 students, faculty and invited guests.

Among those present were Governor William H. Scranton, his wife, Mrs. Scranton, and a host of other officials.

The Senator, who has served as chair of the Committee on Curricular Revision of the committee, told Miles plans to let him stay in the balcony.

Moderator Dando repeatedly called for disorder when the audience hurled jeers and catcalls at the author of the book. But the sound of scratched 78 records floated up and away from the audience.

The speaker invited the audience to "sit down," but the sound of jeering and catcalls continued until the audience settled down.

The audience booted, cheered and clapped as the author of the book took his seat in the balcony.

The second annual Samuel S. Fishzohn Memorial Lecture was given by L. B. J. and Biology Professor J. Wendell Butler, as guest of honor, annually recognized for the "student who demonstrates unusual gifts and dedication to the field of civil rights, citizenship, race relations or minority group problems." The George M. Ferris Athletics Center

The architect's sketch of the new Ferris Athletic Center illustrates how the additions will interrelate with the existing Field House and Swimming Pool. The new varsity basketball building (A) will house two courts and feature retractable bleachers with 2,500 seating capacity. Additional 1,000 chairs can be accommodated for commencement and other special events. The main floor will contain an entrance foyer and an administrative unit. The second floor will have a press gallery and provide expanded office space for the physical education staff. The incorporation of this building, the field house will have greater utility as an indoor practice area for football, basketball, and track and other sports, and will also house the men's equipment room, laundry and training rooms. Ramps will connect the building to the others for easy access.

The new squash and gymnastics building (C) will add eleven singles courts to the six in Trowbridge. The west end of the building will be devoted to gymnasiums, to be filled with a new varsity basketball building (B), which will replace the burdensome and restrictive portable floorboards which have been used for basketball in the Field House since 1946. Kurth eagerly anticipated the full use of the Field House for earlier spring sports practices. The Intramural Building will replace the pre-war Alumni Hall, thus accommodating permanently daytime competition rather than evening scheduled events, Kurth pointed out. This unit will comprise two basketball courts, a volleyball area, and a special section for non-competitive physical education activities.

The physical education building (D) will house facilities for intramural basketball, volleyball, and for non-competitive PE activities. The new locker facility (B) will include showers, visiting team rooms, wrestling room, and other parts of the proposed and desirable physical education complex, to be constructed at an estimated cost of $2.4 million.

The architectural firm of Jeter & Cook have agreed to a deadline date of June 10 for the submission of working drawings for the approval of the College, as represented by the Trustee Building Committee. Following a confirmation of the plans, the College will be prepared to award a contract to a construction firm after the necessary bidding.

The President described the new facilities that will be available for the spring semester: squash, racquets, gymnastics, and special purpose units for physical education and non-competitive activities. Jacobs then expressed the underlying attitude held by the College toward athletics and the spirit in which the Ferris Center was inaugurated: "We are devoted to the idea that physical education and competitive athletics, intercollegiate and intramural, should be conducted as part of the total educational experiences of the undergraduate. The George M. Ferris Athletic Center for the first time will enable us to make this concept a reality." 

President Albert C. Jacobs points out particular facets of projected $2.4 million four-unit athletic complex to George M. Ferris, life trustee and frequent patron of the College, for whom the complex was named tonight.

Kurth then expressed concern over the need for all areas of the campus to be well maintained. He believed that the College does not indulge in athletics for the sake of athletics, but for the enrichment of the educational experience of the undergraduate. The George M. Ferris Athletic Center is, and will continue to be, regarded as a course of instruction, not an appendage," He emphasized that all the facilities will be available to all students. The principle of intercollegiate and intramural, should be conducted as part of the total educational experiences of the undergraduate. The George M. Ferris Athletic Center for the first time will enable us to make this concept a reality."

The George M. Ferris Athletic Center for the first time will enable us to make this concept a reality."

Citing further alterations, Kurth looked forward to providing the faculty with their own locker area, as well as assigning some rooms for offices, use. A final addition, Kurth previewed, might be a stadium for the new outdoor basketball area, and a special section for non-competitive physical education activities. The last phase will follow the clearing of the rear area of the baseball and tennis courts by installing a freshman baseball di

Karl Kurth
Vyn Sets Record in Vault
Track Loses to RPI

Despite two first place finishes by distance runner Bill Shortill and hammer thrower performance by Fred Vyn in the pole vault, the Trinity men's track team soundly defeated Wesleyan earlier this year. For R.R.I., it was their opening meet of the season. 

In the pole vault, Vyn broke the old school mark by nearly eight inches. Clearing the bar at 17'-6 1/2" Vyn needed only one attempt to erase Don Macissee's 17'-6 1/4" record to claim the record for less than a year. Other top performers for the Bantam men were: Jesse River, Pete Schwartz, Mike Cancelliere, and Dan Barret. 

Unfortunately, points for Trinity in victory in the outdoor pole vault were not to be. Vyn failed in the hurdle, and a third-place finish in the triple jump, while Pete Schwartz jumped 40'4 3/4" in the triple jump to win the event. 

Vyn's score is the difference of 48-1/4 victory as the Bantams fell 75-57 to Wesleyan. 

As Wes Men Slide Ashore, Bantams Clobber Amherst

Problems Persist in 11-2 Loss

Undefeated Jeffs Whip Lacrosse

A dreary, cold, and rainy Saturday afternoon set the mood for lacrosse at the Trinity field as the Bantams became the fourth victims of the undefeated Amherst team 11-2. In their third consecutive loss for the home team, Amherst scored the only four goals of the day.

Captain Alex Levi and starting goalie Bob Drury managed to hold the visitors to a single goal late in the 1st period as they struggled against Amherst's powerful attack.

The hosts found the mark again in the 2nd period and it proved to be the difference in the game. The Blue and Gold duffers slashed the Bantams 12-2 in the 11th minute, the first goal of the season for the Jeffs.

Brenton Passoment, who played a strong cage for the Blue and Gold, marched unchallenged down the center line of fans who continued to ignore the visiting team. The Jeffs had a chance to get on to winning ways but fell five goals down the 1st and 1st half of the 2nd period.

Brenton Passoment, who played a strong cage for the Blue and Gold, marched unchallenged down the center line of fans who continued to ignore the visiting team. The Jeffs had a chance to get on to winning ways but fell five goals down the 1st and 1st half of the 2nd period.

In this drought, the Bantams put up a good fight against Amherst but were unable to score.

The hosts found the mark again in the 2nd period and it proved to be the difference in the game. The Blue and Gold duffers slashed the Bantams 12-2 in the 11th minute, the first goal of the season for the Jeffs.
