Senate Suggests Academic Standing Regulation Change

The Senate voted unanimously Sunday to ask the faculty to eliminate the automatic dismissal requirement for members of a fraternity. According to a resolution that followed, a basic requirement, Robert Pip- pin '70, who proposed and said summarily, agreed to Lawrence W. Chanin, observing that calculus was the most apparent and senior high school principals and juniors who are interested in applying colleges and universities. The program aims to bring second.

Police Claim Singers Mar Plaza Peace

by Leonard P. Mezzu

Last Thursday night Hartford police arrested one of the most terrible and outrageous demonstrations yet to come in this era of civil dis- obedience and general unrest. The event was sponsored by the College's most infamous organization, the Christian Association, and was participated in by fifteen campus radicals, eight girls from local women's colleges, and about eighteen vocal and non-vocal supporters, brought here from Springfield, Massachusetts by various means of transportation. The young rebels took it upon themselves to step out of the accepted forms of our society and try to be spontaneous and free. This from the trinity council, the showplace, and the social center of Hartford. The group began their Caroling

$75,000

Institute Granted

It was announced last week by James Gardner, Assistant Pro- fessor of English, that the College has been granted $75,000 to set up a pilot teacher-education program during the Summer Term. The English Department was one of the few departments to be selected from over 600 applying colleges and universities. The grant, authorized under Title XI of the National Defense Edu- cation Act, makes the U. S. Department of Health, Educa- tion, and Welfare, the College has been awarded to address a national conference of some 100 institute directors in 14 academic fields in Washington, D. C., December 14-16. It will be on the second floor of the Trinity Institute.

The principal idea behind the Special NDEA Institute in Eng- lish Curriculum: Linguistics, Rhetoric, and Literary Criticism is "the need to define the nature of the discipline before a curricu- lum can be created," said Gardner. The Institute will bring together departmental chairmen, curriculum supervisors, and junior and senior high school principals in a series of colloquia on English and American Literature. The program aims to bring second.

Colman Stars in ‘Lost Horizon’
To Be Shown by Film Society

The Film Society will close the first half of its series in Goodwin Theater, Sunday, with LOST HORIZON, the great film of 1937. Adapted from James Hilton’s novel of the lost paradise of Shangri-La. The late Ronald Colman stars as Conway, the dreamer who has written philosophical books about a dream place where there is no war and emotional strife. He finds it when he discovers Shangri-La, a lost civilization high in the mountains of Tibet.

Long esconced in Hollywood as the “perfect Englishman,” Colman was a portly and polite man in private life, Colman was one of the few really big stars who was never involved in notorious Hollywood scandals; in addition, he was one of the few of the really big stars who could act. His record of performances is a testimony to that: RAFFLES, the big stars who could act.

It cost $2 million when that was an unheard-of amount of money for a picture, especially from a minor studio like Columbia, which was often cast as “the dreamer,” but more often than not Colman’s cinematic dreams came true, whereas Mr. Howard was usually back where he started. Colman was an exceptionally fine man in private life, Colman was one of the few really big stars who could act. His record of performances is a testament to that: RAFFLES, the big stars who could act.

PAGNE FOR CAESAR, Sidney Carton in A TALE OF TWO CITIES, Ethan Hand in TIBET. Major Howard, Colman was often cast as “the dreamer,” but more often than not Colman’s cinematic dreams came true, whereas Mr. Howard was usually back where he started. Colman was an exceptionally fine man in private life, Colman was one of the few really big stars who could act. His record of performances is a testament to that: RAFFLES, the big stars who could act.

New Haven, Conn., Friday, Dec. 8, 1967:
A PERSONAL MEMOIR
by James Gordon

I had my first glimpse of the Trinity campus in 1964, the earliest I have ever been there. I expected to arrive on a raw, rainy day, but the sky was clear and the air was crisp. As I walked across the campus, I took in the sight of the great stone buildings and the brick pathways. The beauty of the architecture was overwhelming.

As I walked into the campus, I was greeted by a group of students, some of whom were carrying signs and others who were chanting. I was surprised at the level of activity and curiosity of the students. I was later told that this was the beginning of a student strike, which would last for several weeks.

The students were expressing their concerns about issues such as the Vietnam War, civil rights, and the role of the university in society. I was taken aback by the intensity of their feelings and the passion with which they spoke.

I walked through the campus, observing the students and faculty, and listening to the discussions. I was impressed by the knowledge and depth of understanding that the students had about the issues they were grappling with.

As I stood in front of the Old Campus, I was struck by the beauty of the architecture and the sense of history that surrounded me. I knew that I was in a place that had been a part of American history for over two centuries.

The day passed quickly as I walked through the campus, taking in the sights and sounds. I was grateful for the opportunity to witness this moment in history, and to be a part of the discussion that was taking place.

I walked back to my hotel, feeling both grateful and somber. The students had made their voices heard, and their message resonated throughout the campus. I left New Haven with a new appreciation for the power of education and the importance of civic engagement.
Saltonstall Inaugurates Lectureship: Supports Johnson Viet Nam Policy

by David Green

The First Annual Martin W. Clement Memorial Lecture was delivered by Leverett Saltonstall on December 7, 1967 in Mather Hall. Speaking on "The Congressional Role in American Defense Policy," the former Senator from Massachusetts discussed the methods by which Senate power could be applied in order to influence the policy of the Administration.

Saltonstall cited a resolution passed by the Senate which calls for Congressional approval of the commitment of American troops to any part of the world as an example of Congressional influence. He said that he was not sure as to whether this resolution, which was sponsored by Senator Fulbright, was a result of President Johnson's Viet Nam Policy.

Explaining his own position on Viet Nam, Saltonstall declared, "I've supported President Johnson because I thought it was the only realistic thing to do. I've thought in the middle of the night many, many times what I would do if I had his responsibilities.

Saltonstall also claimed that based on his experience with the President, he does not think that Johnson is playing politics in his handling of the war, but the Senator did not believe that Johnson will be re-elected.

In response to a question about the extent of Congressional influence on President Johnson's war policy during an interview with THE TRINITY TRIPOD, Saltonstall said, "The Congress can express its opinion and, of course, the recent Senate resolution, or the resolution of the Foreign Relations Committee on ending troops in the future is merely an expression of opinion: it has no legal force of any character."

The Senator declared his support of an individual's right to disagree with government policy. "The one of the 51 who sided with former Senator Paul Douglas in opposition to President Johnson's war policy," he added, "I personally think that he is 100 percent right."
Knapp Predicts Ford Challenge Fulfillment

The back of the 8.8 million total is earmarked for the completion of the Life Science building, origins equipment, and the George M. Farris athletic building. Of the total, 20 million is to go to facility salary environments, 1.7 million for major construction improvement programs, and half a million for the University Library. Since increased construction costs on the building program, it is expected that the project will now take at least one year over the Ford goal, to ensure that the project is completed with financial success.

In addition to money raised by the Ford grant, the College collected $1,068,289 from the Capital Fund Drive, which was begun in January, 1965. This amount was donated to the College in the first two months in July, 1964, and so far $7,667,032 has been raised. This money has been carefully used through the $320,000 Davis renovations and building improvements. The total raised by the College for the Ford grant (on January 1, 1965), stands at $7,667,032.

Of this sum, $4,700,123 is from the 27 Trustees of the College, Other Alumni have given $204,000, and foundations with major sources of funds have been corporations who have been raised by the College, and foundations for $1,005,840, or $95,540. Other sources of funds have been parents and friends of the College, who give large sums when they are paid for a specific object. A large gift was generally so marked, said Knapp, because the giver had been sold by the College on a particular campaign, and the amount was given by a group of people within the group who have graduated since 1955, the greatest appeal is to the younger alumni with the Farris athletic plant popular among the older graduates.

The Inter-Fraternity Council as presently structured is incapable of coping with the problems of adaptation within the academic community. It is to these questions that the attention of the fraternity system will increasingly be called in the future.

The question of abolition of Hell Week has been only the catalyst pointing out the inadequacies of the present IFC constitution. The chasm facing the various houses now is to look beyond points of either "clean hands" or "states" rights in an effort to modernize and to make workable the government of the fraternities at the College.

There is a definite need to reform, especially in the realm of fraternity activities which overlap the areas of the academic community. At a time when several fraternities, notably Theta Xi, are making efforts to become more consistent with the evolving concept of the college community, behooves all fraternities to vote within the IFC for more flexibility of self-government—namely the replacement of the unanimity clause with a system of majority (2/3) rule. To withdraw from the Council before such a vote would be taken would be premature.

While the IFC's irresponsible handling of last year's physical hazing infraction and of this year's inadequate confrontation with those who defend a Hell Week is indefensible, the question which should initiate the possibility of withdrawal should arise from frustrated efforts to rework the Constitution of the IFC—the basis of the problem—and not from unsatisfactory results in trying to impose a needed maturity upon the system. The IFC must be revamped or another body created which will afford the fraternity system obligatory representation by all and majority vote. This is the essential question.

The already present violence will be further emphasized if the question is raised should be reconsidered. Any design upon putting out at all should be coached in immediate plans to reconstitute into a more workable system.

Fraternities at the College need a forum for evaluation, a governing body and an accurately representative voice. If efforts at reform have been tendered and have failed, it will be time for the responsible brotherhood not to seek individual paths to a more consistent stance within the academic community.

At this juncture the guilt of fragmentation will clearly lay at the doorstep of the shortsighted. It is to these questions that the attention of the fraternity system will increasingly be called in the future.

daily school teachers up to date and improve the quality of instruction given to them by helping colleges create better methods of teacher-education. According to Gardner, the greatest impediments of improved teacher-education in the past have been "the snobbery of college professors towards educators, the…

There is not time to waste examining the linguistic patterns, the misleading implications, or the simplistic and superficial generalizations. I would like to mention that it is fairly ridiculous to use profit as an accounting concept, as a theoretical corporation goal, as the cost of productive inputs, as interest return, etc., as a popular consumption of personal welfare in general (i.e., profit from accumulating), indeed, our culture does run on "profit." In those terms, so does any other visible industrial system, including National Socialism and Communism (in the latter of which all the industries are, of course, run by hitlers, while the ultimate ownership supposedly rests with all the citizens represented by the government.) I must admit that the inclusion of variable factor costs (i.e., wages) with the more traditional returns on entrepreneurs' risk could constitute a genuine change in economic definition. The originality and sophistication of some of our freshmen is truly amazing.

We will be hearing so many politics on supporting nation and business (and motherhood, etc.) in the next year, that I, alas, had hoped for a little sanity before the campaign. Definiting "profit" as life, abandoning responsibility for current foreign policy, accepting and praising everything for the sake of existing, not jumping the bounds of logical thought complexity (profit = U.S. A. + honor among allies + honor among the public) did not appear too much of a step in that direction.

Could I suggest that Mr. McNulty was not made out of his element? I presume he made a jim-dandy traveling salesman.

WILLIAM SALLETT '69

ROBERT EEBENSTEIN '69

JACK VAUGHN, director of the Peace Corps, visited the College last Tuesday to discuss the Corps with individual students. His visit, part of a three day recruitment drive on campus, resulted in 29 student applications. Also representing the Peace Corps were Miss Mary Ann Tirone and Brewster Perkins '65, who related their experiences in Africa and India respectively.

two police officers roll Kicker over onto his back and assault him with night-sticks. Gardner reports that the boy was then dragged back over the barricades into the federal building. It was learned later that the boy was taken to the New Haven court. His mother, Bertha Kicker, who was also among the picketers, had herself arrested in order to find out in what condition her son was. She had seen officers striking both her son and her husband. Her arrest was not reported.

Joshua Kicker informed Gardner on Saturday that his dazed state was in part resulting from a move to the ribs and stomach. He also reported being sprayed with some substance from a can which he could not positively identify as "mace." However, he claims that he was threatened with the use of "force" inside the patrol wagon.

Candles: Symbolic Curios
by Curia Regis

"What's with the candles?" The big question on campus. Ralph Creer '68 and Peter Otis '68 started a "fad" two weeks ago when they began carrying large candles with them twenty-four hours a day. The candles can be purchased in the bookstores and the profits go to a school for retarded children near Hartford.

The idea behind the candles is that, because students have a tendency to get "too wrapped up in themselves and their personal problems," they need to "open up." Carrying the candle symbolizes an effort to break out of personal shields and associate more with all the people on campus.

Otis expressed the belief that the candle was more than a symbol to other people, it is a symbol to himself. He had found that since he started carrying the candle he has had opportunities to speak with people he hasn't associated with since his freshman year. "The candle says something to everyone who sees it," he continued; "more than that, it's a conversation topic," he added.

Creer also stated that, although "everyone's reason is different," all have found that lighting a candle for people and asking their questions about the candle has been one of the most rewarding results of carrying it.

Otis cites giving a candle to one of the women working in the Care as the most rewarding experience he has had to date. That candle burned for three days at the Cave cash register.

MATHMATICIANS:
What Do You Know About nsa?

The National Security Agency is a scientific and technological community unique in the United States, perhaps in the world. NSA is the Agency responsible for developing "secure" communications systems and EDP devices to transmit and receive vital information.

YOU AND NSA
As a mathematician at NSA, you will define, formulate and solve communications-related problems, many of major national significance. Statistical mathematics, matrix algebra, finite fields, probability, combinational analysis, programming and symbolic logic are but a few of the tools applied by Agency mathematicians. They enjoy the full support of NSA's completely equipped computer laboratory where many of them become involved in both the hardware and software of advanced computer systems. Theoretical research is also a primary concern at NSA, using the fact that the present state of knowledge in certain fields of mathematics is not sufficiently advanced to satisfy NSA requirements.

IMAIGINATION... A REAL REQUIREMENT
Mathematical problems at NSA will seldom be formulated and handed to you, the mathematician, for solution. Instead, you will help define the problem by observing its origin and characteristics and the trends of data manipulated with it. You will then determine whether the problem and data are susceptible to mathematical treatment and, if so, how. As you grow in your appreciation of this approach to mathematical problems, and the relationship of your discipline to non-mathematical subject matter, both your personal satisfaction and your value to NSA will increase, as will your responsibility.

CONTINUING YOUR EDUCATION
NSA's graduate study program may permit you to pursue two semesters of full-time study at any school of your choice. Nearly all academic costs are borne by NSA, whose proximity to seven universities is an additional asset.

Salaries and Benefits: Starting salaries, depending on education and experience, range from $7,729 to $12,873, and increases follow as you assume additional responsibility. Policies relating to vacations, insurance and retirement are liberal, and you enjoy the advantages of Federal employment without the necessity of Civil Service certification.

Another benefit is the NSA location, between Washington and Baltimore, which permits your choice of city, suburban or country living and allows easy access to the Chesapeake Bay, ocean beaches and other summer and winter recreation areas.

CAMPUS INTERVIEW DATES: Check with the Placement Office now to arrange an interview with NSA representatives on campus. The Placement Office also has further information about NSA, or you may write: Chief, College Relations Branch, National Security Agency, Ft. George G. Meade, Md. 20755. An equal opportunity employer, M & F.

SPEAK SOFTLY AND CARRY A BIG WICK

Gardner... (Continued from Page 1)
Is there a best glass for beer?

With some beers maybe the glass doesn’t matter. But when the beer is Budweiser, our brewmaster holds strong views.

"I like a glass with plenty of room," he says. "Size is more important than shape. A big glass, say one that'll hold a full bottle, is best.

A big glass gives Budweiser a chance to show off... lets you pour it straight down the middle to get a full collar of foam. (Those tiny bubbles are the only beer bubbles in America that come from the natural carbonation of Beechwood Ageing.) Another thing about a big glass: it lets you quaff the beer. And who wants to sip, when the beer tastes as hearty as Budweiser?

That's about the size of it! Choose any kind of glass you want... as long as it's big enough. (Of course, we have our own opinion on the best beer for the glass.)

Budweiser... best reason in the world to drink beer
In the Air . . .

(Continued from Page 6)

...they're right. And wrong.

If the continuing, increasing in-
justice of "law and order" is worse
than the violence of insurrection,
the rebellions are legitimate.
Those who defend the analogous
American Revolution or the French
Rebellion Against Miller can
attack current black rebellion
only hypocritically. They could
better attack the causal conditions.

Most fundamental, however, is
this question to all nations: "What
would YOU do if you found your-
self poor and oppressed under
the heel of black racists? Would
you be polite in asking for YOUR
freedom?"

Some say we specialize in power . . .
power for propulsion . . . power for
auxiliary systems . . . power for aircraft,
missiles and space vehicles . . . power for
marine and industrial applications . . .

ICF Faces Disbandment . . .

(Continued from Page 7)

When it affects us, then it's our
business," he stated.

In the Air . . .

Christopher McCrudden '68, the
DKE representative, clarified his
negative vote saying that DKE
should "remain tied to a system
that was so inconsistent with what
I, in my own conscience, felt was
in the best interest of the
fraternity system."

Dr. Woetzel To Lecture Wednesday

Professor Robert K. Woetzel
of Boston College will give a
lecture on International Kidnap-
ning December 14th at 11:30 a.m.
in Wean Lounge. According to
Government professor Albert
Gastmann, Dr. Woetzel's lecture
will deal with several of the legal
aspects of the IFC and felt that
Phi Psi's Marimow found at-
tractive has come under criticism
for being a "workable constitution
with which changes would be imposed
on those houses that would otherwise
destroy the entire system to pre-
serve their own autonomy."

Lucas said that whatever organi-
ization replaces the IFC must be
able to act with a simple major-
ity or possibly two-thirds vote.

It might be said, instead, that we specialize in people, for
we believe that people are a most
important reason for our company's success. We act
on that belief.

We select our engineers and scientists carefully. Motivate
them well. Give them the equipment and facilities only a
leader can provide. Offer them company-paid,
graduate-education opportunities. Encourage them to push
into fields that have not been explored before. Keep them
reaching for a little bit more responsibility than they can
manage. Reward them well when they do manage.

You could be one of the reasons for Pratt & Whitney Aircraft's
success . . . if you have a B.S., M.S. or Ph.D. in:

- MECHANICAL . AERONAUTICAL . ELECTRICAL
- CHEMICAL . CIVIL . MARINE . INDUSTRIAL
- ENGINEERING . PHYSICS . CHEMISTRY . METALLURGY
- CERAMICS . MATHEMATICS . STATISTICS
- COMPUTER SCIENCE . ENGINEERING SCIENCE
- ENGINEERING MECHANICS,

and we could be the big reason for your success. Consult
your college placement officer—or write Mr. William L.
Schoen, Director, Pratt & Whitney Aircraft,
East Hartford, Connecticut 06108.

...they're right.

And wrong.
Sign up for an interview at your placement office—even if you're headed for graduate school or military service.

Maybe you think you need a technical background to work for us.
Not true.
Sure we need engineers and scientists. But we also need liberal arts and business majors. We'd like to talk with you even if you're in something as far afield as Music. Not that we'd hire you to analyze Bach fugues. But we might hire you to analyze problems as a computer programmer.

What you can do at IBM
The point is, our business isn't just selling computers. It's solving problems. So if you have a logical mind, we need you to help our customers solve problems in such diverse areas as government, business, law, education, medicine, science, the humanities.
Whatever your major, you can do a lot of good things at IBM. Change the world (maybe). Continue your education (certainly, through plans such as our Tuition Refund Program). And have a wide choice of places to work (we have over 300 locations throughout the United States).

What to do next
We'll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research, Design and Development, Manufacturing, Field Engineering, and Finance and Administration. If you can't make a campus interview, send an outline of your interests and educational background to J. E. Bull, IBM Corporation, 425 Park Avenue, New York, N.Y. 10022.
We're an equal opportunity employer.
Boomers Hopped Twice As Williams, Clark Prevail

by Judd Freasen

Plugged by injuries to Captains Bob O’Donnell and Larry DuPont, the Bantams suffered two consecutive losses last week, being beaten by Wesleyan, 10-15, and Clark, 12-10. O’Donnell is now definitely through for the season as he undergoes surgery this week for his bad knee.

DuPont’s status is questionable as he may be able to return to action before the final meet against Clark.

Trin Swords Sharpen Up With SMIT

For the second Saturday in a row, the Bantam fencing hall was filled to capacity for the 113 varsity, this time over SMIT at New Bedford.

A week ago, a crowd made up of 250 members and 246 fans, more than doubled the attendance at last Saturday’s 11-9 victory over SMIT at New Haven. In Yale, the Baby Bantams faced their roughest opponent of the year, Yale, in a match at New Haven on Saturday night. The Bantams won the early edge, only to give up a 4-5 halftime margin.

Forced to connect the boards to the enemy, Trinity was allowed to collapse from the outside, the tournament, the Bantams managed to avoid 34% of all attempts. All of the Eph starters scored in double figures with 6’4” Bill Drummond with 30 and 6’9” Joe Healy with 27.

Trinity was paced by Pete DePrey, and Peter Clark who netted 10 and 14 points, respectively. The Ephs also were plagued by 9 saves a period as the opposition proved if Trinity expects to be competitive after Beautyman split the next pair of games.

First Efforts
The year of the freshman in Trinity sports continues into the fall season. The undefeated freshman football team tied SMIT last Saturday.

The impressive victory, highlighted by Tony Bryant’s hat-trick, proved his worth on a team that has only one victory over its roughest opponent of the year, Yale, in a match at New Haven during the fall season.

Bantam Racquetmen Open at Yale

The Trinity freshman squall team opened its season against its toughest opponent of the year, Yale. The Baby Bantams picked up a surprising 6-5 victory over New Haven, in Yale, the Baby Bantams did not face their roughest opponent of the year, Yale, in a match at New Haven. In Yale, the Baby Bantams did not face their roughest opponent of the year, Yale, in a match at New Haven.
