Demonstrators Demand Explanation

Lockwood Says Appointment Group's Deliberations Must Stay Confidential

An emergency meeting of the student Senate called to consider the College's failure to hire Chuck Stone, ended Wednesday night with a march to the President's house to demand answers to student questions.

President Lockwood told a crowd of over 200 that the Joint Committee on Appointments and Promotions deliberations "have to remain confidential." He agreed after an all-college meeting Thursday to hear student complaints but did not answer questions specifically concerning the Stone appointment.

Lockwood reminded the demonstrators of the communication received from the committee declaring their invitation to attend Wednesday's emergency meeting which said "deliberations must be confidential" and that "no member is privileged to discuss its deliberations for any reason for a specific decision.

"There is nothing further that I can say on this appointment by the president.

According to the 1966 Trustees' report and 30-hour sit-in that followed, one student said "tests" were taken 2 years ago because people were not willing to talk.

Asked by Senate President Steve H. Seaway '71 if the committee could reconvene with student membership to reconsider the Stone appointment, Lockwood said, "the answer will have to be 'no' at this time."

Lockwood was pressed for his personal opinion on the committee's failure to discuss the Stone appointment. He said he did not know if a departmental meeting, in progress at the time, would take up the Stone question.

"Maybe Trinity College is so pure it doesn't have to answer Chuck Stone's charges of racism," one student said.

"Race, creed and color will not enter in its considerations as far as I'm concerned...political convictions would not affect the recommendation," Lockwood said.

In a statement read by Wu-Stone "at last night I had been considering Trinity as one of several job offers, but because of the tremendous affirmative con-

President Lockwood addressing 250 students who converged on his office Wednesday night. The president remained calm during most of the questioning; his responses were greeted alternately with laughter and angry shouting.

New Bursary Employment

A change in the Teacher Corps would enable College students to participate on a part time basis in the Alternate Center for Learning in Boardman Hall, according to Dr. Walter Leavitt, special assistant for community affairs.

The Alternate Center for Learning is a day school for students in grades nine and ten, who, due to social or emotional problems, tend to become disruptive elements in the normal classroom situation.

Ivan Backer, special assistant for teaching and social work.

Backer has sent letters urging the passage of this amendment to Senators Thomas Dodd of Connecticut and Senator Robert Byrd of West Virginia, chairmen of the Senate, Senate Labor and Public Welfare Committees.

The passage of this amendment would give College students another chance for involvement in the community, said Backer.

He said that he saw a chance for a work-study program in which students seeking financial aid would be able to work part time with the Teacher Corps in the city.

For students on scholarship, the amendment offers an alternative to the present bursary employment system in which a student works as a college employee.

Students have the chance to put themselves through school by teaching and social work.

Bursary Employment

The city manager's office has received numerous complaints about hazardous driving conditions on the street. The ban on parking will remain in effect indefinitely.

Parking

Hartford Police will tow all cars parked on Summit Street. The city manager's office has received numerous complaints about hazardous driving conditions on the street. The ban on parking will remain in effect indefinitely.

24 Students Take ‘Open Semesters’

Travelling in Africa, studying in Switzerland and working in a reformatory are a few examples of independent study programs that will be pursued by 24 students this semester.

No application for the “open semester” program was rejected, N. Robbins Window, associate dean for educational services said in an interview Sunday afternoon. All 24 of the students, he said, were able to find faculty advisers for their projects.

Leon A. Blais ’71 will work as an administrative assistant to the mayor of Philadelphia, P.A. His adviser is Clyde D. Motter, associate professor of government, and N. Robbins Window, associate dean for educational services.

Robert W. Horn ‘71 will study how the growing demands of the Council for Christian Action of the United Church of Christ are carried off the parish level. He will begin his work in Washington, D.C. His adviser is Frank G. Kirkpatrick, assistant professor of religion.

Stephen R. Zylbersch ‘72 will read and write short stories. He will travel different regions in the United States and Europe. His advisers are Henry J. Muller, professor of English, and Stephen Koh, associate professor of English.

Edward W. Olszewski ‘71 will work for fellowships in educational policy formulation and implementation. At the same time at the Connecticut State Department of Education, study to roles in educational policy. Later, he will concentrate on a position in the Department of Education in the state parliament, New Britain, New Britain. His adviser is Clyde D. Motter, associate professor of government.

Michael W. Rainier ‘71 will work in Martham, Croydon, in the Canadian Regional Center to study family relationships, memory, retarded and emotionally disturbed children. His adviser is Walter W. Oleson, professor of psychology.

Kenneth E. Tabe ‘71 will work as a research assistant to the director at the Tyrone Guthrie Theatre. George E. Nichols, professor of theatre arts, is his adviser.

Robert A. Watts ‘72 will travel through Sierra Leone, Ghana and Mali. He will use photography to study the way of life and the use music is played in the region and the way of life of the peoples in the area. His adviser is H. McKim Steele.

Ten students will participate in the open semester studying philosophy and skiing in Vermont with Drew A. Howard, assistant professor of philosophy. The students are Bob B. Carlson ’72, John D. Miculiak ’72, Jonathan A. Goodman ’73, James E. Johnson ’73, Stephen B. Linen ’73, Charles V. Younger ’73, Charles J. Girard ’72, John F. Jordan ’73, William D. Morrison ’72, and Andrew F. Stewart ’70.

Paul W. Buson ’71 will spend a semester on campus writing and organizing a film making and viewing project. He will also plans to edit a film magazine for the College. His adviser is Michael J. Zimmerman ’72 William C. Farmere ’71.

Bennett E. Taber ’71 will work in Ghana. His adviser is H. McKim Steele.

Carlson ’72, J. Bruce McWilliams ’72, John P. Bahrenburg ’72, Marcus R. Farnham ’72, and Robert B. Hurst ’71 will study how the implementation of a proposal that when completed, will attract funds to the College for the implementation of a program of this nature.

The student members of this committee suggested strongly that Mr. Stone be retained in the capacity of director for such a program. The members of the Faculty present did not dissent, and subsequently Mr. Stone’s name was recommended.

As is well-known, Mr. Stone is not to be retained in any capacity. This action on the part of those who decided against keeping Chuck Stone (a group that is as yet anonymous), impugned the integrity of this committee and designated their responsibility. This is most true for the members of the committee who are Faculty members. As such, they are individually well qualified in deciding the eligibility of a man like Mr. Stone.

By so deciding, the people who decided against keeping Chuck Stone (a group that is as yet anonymous), impugned the integrity of this committee and designated their responsibility. This is most true for the members of the committee who are Faculty members. As such, they are individually well qualified in deciding the eligibility of a man like Mr. Stone.

Ephmen Surprise Bantams, 81-69
Winless Frosh Drop Another One

Trinity’s Joe Pantalone tallied a big 29 points but he received only minimal team support as Robie Shults’ hoopsters dropped a disappointing 81-69 decision to Williams in an upset. The defeat lowered the Hilltoppers’ season mark to 5-3. Williams is 3-4.

The final score of the contest does not indicate its true nature: the winners grabbed the lead early in the contest, but they held a mere 34-32 halftime edge. The host Ephmen were able to hold this margin through most of the second half, although the Shultsmen trailed by just three with three minutes remaining. However, a Williams’ spurt at the contest’s close gave them their 81-69 margin of victory.

The biggest factor in the Ban-
tams’ loss was the lack of any scoring punch. The team simply could not generate any movement on offense; they forced a number of bad shots and did not score their first field goal until eight minutes had elapsed in the first half. Williams, on the other hand, shot extremely well and moved out to a 40-22 halftime lead.

The second half was not much different as Trinity simply could not put the ball in the basket. The freshmen were also hampered by Williams’ complete dominance of both boards which limited the Ban-
tams to only one shot each time they got the ball. Leading scorers for Trinity were Nat Williams with 17 points and Mike McGuirk with 10.

The Frosh

Returning to action after a five-
week layoff, the freshman basket-
ball team was defeated by Wil-
liams, 91-60. The loss was the team’s fourth in a row as the frosh are still looking for their first victory of the season.

The only other Hilltopper besides Pantalone to hit double figures was Tom Sasali with 12 points. Trinity will face another tough test tonight when the Bants host Colby, followed by a Saturday contest at Amherst.
Government Credit

Students who work for any declared candidate for governor or state legislature this semester or next year will be eligible for course credit from the government department.

A legislature internship program in which students work at research and staff assistant positions on some states. Your generous contribution will assist students who are interested in pursuing careers in government. ENCLOSE A billfold.

WOULD YOU LIKE TO BECOME A MINISTER?

ORDINATION is without question and for life. LEGAL in all 50 states and most foreign countries. Perform legal marriages, ordinations, and funerals. Receive discounts on costs. Your generous contribution is appreciated. ENCLOSE A billfold.

MECHANICAL ENGINEERING—Engineering or mechanical maintenance departments of steel plants, fabricating works, mining operations, and shipyards. Fuel and combustion departments. Supervision of production operations. Marine engineering assignments in shipbuilding Department. Also: Sales or Research.

METALLURGICAL ENGINEERING—Metallurgical departments of steel plants and manufacturing operations. Engineering and service divisions. Technical and supervisory positions in steelmaking departments and rolling mills. Also: Research or Sales.

CHEMICAL ENGINEERS—Technical and supervisory positions in coke works, including production of by-product chemicals. Fuel and combustion departments, including responsibility for operation and maintenance of air and water pollution control equipment. Engineering and metallurgical departments. Steelmaking operations. Also: Research or Sales.

INDUSTRIAL ENGINEERING—Positions in steel plants, fabricating works, shipyards, and mines. Engineering and maintenance departments. Supervision of steelmaking, rolling, manufacturing, and fabricating operations. Also: Sales.

CIVIL ENGINEERING—Fabricated Steel Construction assignments in engineering, field erection, or works management. Steel plant, mine, or shipyard assignments in engineering, construction, and maintenance. Supervision of production operations. Sales Department assignments as line salesman or sales engineer (technical service to architects and engineers).

ELECTRICAL ENGINEERING—Steel plant, fabricating works, mining operations, and shipyard electrical engineering, construction, and maintenance departments. Technical and supervisory positions in large production operations involving sophisticated electrical and electronic equipment. Also: Research or Sales.

MINING ENGINEERING—Our Mining Department operates coal and iron ore mining operations and limestone quarries, many of which are among the most modern and efficient in the industry. This 10,000-man activity offers unlimited opportunities to mining engineers. Also: Research.

NAVAL ARCHITECTS AND MARINE ENGINEERS—Graduates are urged to inquire about opportunities in our Shipbuilding Department, including the Central Technical Division, our design and engineering organization. Also: Traffic.

OTHER TECHNICAL DEGREES—Every year we recruit loopers with technical degrees other than those listed above. Seniors enrolled in such curricula are encouraged to sign up for interviews.

ACCOUNTANTS—Graduates in accounting or business administration (24 hours of accounting are preferred) are recruited for training for supervisory assignments in our 9,000-man Accounting Department.

OTHER NON-TECHNICAL DEGREES—Graduates with degrees in liberal arts, business, and the humanities are invited to discuss opportunities in the Sales Department. Some non-technical graduates may be chosen to fill openings in steel plant operations and other departments.

WHEN YOU SIGN UP be sure to pick up a copy of our booklet, “Careers with Bethlehem Steel and the Loop Course.” It tells it like it is.

Come as you are!

FEBRUARY 3, 1970

Now’s the time to sign up at your placement office for an interview with the Bethlehem Steel Loop course recruiter. This could be the start of something big!

And just what IS the Bethlehem Steel Loop Course? Glad you asked! It’s our management development program for graduates with bachelor’s or advanced degrees.

Bethlehem loopers (195 to 200 every year) spend four swinging weeks at our home offices in Bethlehem, Pa. Then, primed with information about the entire corporation and rarin’ to go, they report to the appropriate plants or departments for their first assignments. Then, onward and upward! Where would YOU fit into the Loop Course? Check your degree or the one most similar to it:

MECHANICAL ENGINEERING—Engineering or mechanical maintenance departments of steel plants, fabricating works, mining operations, and shipyards. Fuel and combustion departments. Supervision of production operations. Marine engineering assignments in shipbuilding Department. Also: Sales or Research.

METALLURGICAL ENGINEERING—Metallurgical departments of steel plants and manufacturing operations. Engineering and service divisions. Technical and supervisory positions in steelmaking departments and rolling mills. Also: Research or Sales.

CHEMICAL ENGINEERS—Technical and supervisory positions in coke works, including production of by-product chemicals. Fuel and combustion departments, including responsibility for operation and maintenance of air and water pollution control equipment. Engineering and metallurgical departments. Steelmaking operations. Also: Research or Sales.

INDUSTRIAL ENGINEERING—Positions in steel plants, fabricating works, shipyards, and mines. Engineering and maintenance departments. Supervision of steelmaking, rolling, manufacturing, and fabricating operations. Also: Sales.

CIVIL ENGINEERING—Fabricated Steel Construction assignments in engineering, field erection, or works management. Steel plant, mine, or shipyard assignments in engineering, construction, and maintenance. Supervision of production operations. Sales Department assignments as line salesman or sales engineer (technical service to architects and engineers).

ELECTRICAL ENGINEERING—Steel plant, fabricating works, mining operations, and shipyard electrical engineering, construction, and maintenance departments. Technical and supervisory positions in large production operations involving sophisticated electrical and electronic equipment. Also: Research or Sales.

MINING ENGINEERING—Our Mining Department operates coal and iron ore mining operations and limestone quarries, many of which are among the most modern and efficient in the industry. This 10,000-man activity offers unlimited opportunities to mining engineers. Also: Research.
