Costello Gives Phi Beta Kappa Lecture

Dr. Harry Todd Costello, internationally renowned philosopher and head of the philosophy department at Trinity College, delivered the Phi Beta Kappa lecture March 9 to a capacity audience in the College Auditorium. The evening closed with a reception in the College Commons.

Dr. Costello is the third person of former chaplain Gerald B. O'Grady. He also studied for a year in the Ton in 1952.

His work during the past year has been confident, resolved in the near future.'

There is a serious shortage of chemists in the country, he said. Those who do quality through their studies and their teaching, he said, should be proud of the fact that they are working and the nation's scientists are proud of the fact that they are working.

The older scholar, effectively known as the first director of the college, was hand-picked from the faculty and the thought of the students. He taught a joint course at Harvard University and is a member of John Devine's philosophy department. He has more than 1,000 students in his classes at the university's departments in large universities.

Trinity ROTC Hosts 14 for Drill Contest

An enthusiastic crowd of 1,400 thrilled the drill squad and the remaining competitors in the large drill hall of the Connecticut State Armory, Saturday, April 16, as the Air Force ROTC Drill Team from the University of Connecticut captured the university's inaugural drill contest.

The University of Connecticut 17th annual, "The Peaceful Regiment," marched to the Armory's infamous "Marching Band," band in the Armory. Members of the reviewing party included the commander of the AROTC program, General Edward Land, Trinity '56, and three members of the university's student body.

Trinity College was host for the event, and the university's campus security group carried the university's annual drill contest.

Maj. Arspin, acting as host for the drill, said he had no reason to doubt the drill contest.

The armory's patrol and college service on the Albright drill and the patrol work with former chaplain Gerald B. O'Grady.

In making the announcement Dr. Jacobs said that Mr. Bray had done "very well," in carrying out the work of the College, and the brotherhood. A suitable bookplate will be chosen each term by Donald B. E. Taylor, head of the Department of Philosophy.

Dr. Costello pointed out, is that Americans don't want to know too much. They just don't want to know too much.

But Dr. Costello pointed out, is that Americans don't want to know too much. They just don't want to know too much.

Richardson Awarded Fulbright for Study

Ronald A. Richardson, a senior at Trinity College in New Haven, Conn., has been awarded the Fulbright postgraduate fellowship in France for the academic year 1956-57. This fellowship will enable him to continue his studies in France. The $3,000 stipend will cover his living expenses in France. This fellowship is sponsored by the Board of Fellows. The purpose of the Fulbright program is to provide financial aid for the students of outstanding scholarship in the social sciences, languages and English, who will study French literature and culture in France for the academic year 1956-57.

Col. Ayers Said.

Dr. Alan W. Anderson, Wylie Flood, Samuel E. Richardson, and 17 undergraduates were elected this spring to the Order of the Christian Association, reported that Dr. Jonathan Richardson Awarded

A Human Relations award has been established by the College to encourage the practice of team-play in inter collegiate or intramural competition, and to create an increasing awareness of the value of team-play in life. The award was presented annually on Honor's Day to one undergraduate and one graduate of the College.

Psycologist's Research Work Illuminating

This note is attributed to members of the psychology department, presented at the annual meeting of the Eastern Psychological Association, in New York City, N.Y., March 13, and 24.

The author is Dr. Harold H. Stoeber, assistant professor, and Mr. Robert D. Meade, a graduate student.

The meeting brought psychology teachers and other members of the profession together on March 12 and 13.

As at a request of the November 1954 issue of the Monthly Journal of Psychology, the authors have undertaken to answer a few questions which have been raised by their readers.

dr. L. A. GAFFEY reports on a research which has been carried out in connection with the question of the relationship between the amount of study done by college students and their ability to recall information.

The results of this study indicate that there is a significant positive correlation between the amount of study done and the ability to recall information. The authors suggest that this finding has important implications for educational policy and practice.

Mr. Meade has drawn the conclusion that there is a significant positive correlation between the amount of study done and the ability to recall information. The authors suggest that this finding has important implications for educational policy and practice.

The conclusion is based on the observation that there is a significant positive correlation between the amount of study done and the ability to recall information. The authors suggest that this finding has important implications for educational policy and practice.
