Annual Giving At 68% of Goal
In Eight Weeks of Campaign

The College's current Annual Giving Program has reached 68% of its goal in eight weeks.
The Development Office reported as of January 15 that gifts and pledges toward the 1970-71 Annual Giving Program totaled $238,864. This is 68% of the goal of $350,000, which is the assessed "margin of difference" needed in anticipated income to balance the current operating budget.

Both the Alumnae Fund and the Parents Fund show increases in gifts and pledges over this time a year ago.
The alumnae to date have contributed $154,261 or 77% of their goal of $200,000, ($1 of the needed $3,033 or 29% of its goal and $29,188 or 58% of the goal, the Friends of Trinity Fund had reached $4,298 or 29% of its goal and Foundations (non-corporate) were at $75,000.

At this point, the average gift to the Alumnae or Parents Fund is up over a year ago. To date, 17% alumni and 60 parents have become Anniversary Club Members with individual gifts or pledges totaling $150 to $999, and 24 alumni and 10 parents have qualified as Founders Society Members with gifts or pledges of $1,000 or more.

The report noted a substantial increase in giving from trustees and trustee emeriti. This group, whose contributions are included in the totals of the other funds, has contributed to date $64,253, which is a most significant increase over their final total of $25,100 given to the 1969-70 Annual Giving Fund. Judson M. Rees, director of development, said the results in all categories to date "are most encouraging. This positive response on behalf of trustees, alumni, parents, and friends of the College indicates quite clearly they are aware of Trinity's financial need to preserve the high quality of our academic programs and are willing to support our efforts to sustain them."

Rees noted the substantial increase in giving from trustees with some gifts still to come "as a real inspiration to others and a clear demonstration not only of their generosity but of their conviction in the value of a Trinity education and the wisdom to support the College's program annually."

However, Rees noted, "we must maintain our momentum. It is vital that we reach the $350,000 goal by June 30 if we are to balance the current budget."

The College ended the last fiscal year (June 30, 1970) with a $320,473 operating deficit.

National Science Foundation Awards College $167,000

The College has received a $167,000 federal grant for intensive curriculum review and development over the next three years of various science programs including refining an Urban and Environmental Studies Program.
The grant, awarded by the National Science Foundation, is part of its "College Science Improvement Program," and is designed to "accelerate the development of science capability of predominantly undergraduate institutions and to enhance the capacity for continued self-renewal" says the NSF award.

Under the terms of the grant, some 35 faculty members from seven disciplines and some 30 student research assistants will come to grips with curriculum review and development or be involved in faculty-student research projects.

Dr. Robert Lindsay, professor and chairman of the Department of Physics, is the overall director on campus of the Science Improvement Program. "This grant," said Dr. Lindsay who was the major author of the original proposal sent to the NSF two years ago, "will help bring the natural and social sciences closer together."

He said he sees the "Urban and Environmental Studies program as encouraging this," as well as other projects funded by the grant.
The departments which will benefit from the grant are biology, chemistry, engineering, mathematics, psychology and sociology. In addition, funds have been provided for an extensive study in the summer of 1971 and 1972 by a faculty-student committee for development and refinement of the Urban and Environmental Studies Program.

Three departments, mathematics, chemistry and physics will receive portions of the grant for curriculum development and for special student-faculty research projects all of which will be conducted essentially over the next three summers.
The Sociology Department is being aided to provide for a general buildup in this discipline, to allow for computer rental time and to encourage student experience in lab work.
The Engineering Department and Psychology Department benefit from the grant which will help support a cooperative research program of the two departments to verify a physiological theory relating activation levels to performance levels in certain animals.
The Biology Department will receive funds to be matched by the college to purchase equipment in developing an ecology laboratory. The equipment specified is primarily to aid marine ecology research.

Over the next three years, 1971 through 1973, Trinity will receive approximately $35,000 each year to finance these various programs and studies.

Trinity began preparation of its proposal for the grant in the spring of 1968 when the Albert C. Jacobs Life Science Center was dedicated which completed a $5.5 million science building program conducted over a 10-year period. The money, mostly raised from private gifts, provided for the Jacobs Center, the McCook Mathematics-Physics Center and improvements in the Kalden Engineering Laboratories.

With the exception of the $2,000 provision for equipment for the marine ecology lab, the NSF grant is all earmarked for curriculum renewal studies and research.
Letters To The Editor

Vale Amicus!

Ode. Sheperd of happy and sad memory wrote the memorable couplet: "Four years and four years in approaching National Collegiate Library and the College catalog of 1888, and one reads of ghost-like names without bodies of metal. So it truly makes me feel that on a person to person basis John Butte was as consequential an influence as any in the last hundred sets. I'm sure, many of the Trinity family will agree that one of the good fortunes of our lives was the first American modern dance company to perform in the U.S.S.R. The tour was extended to include the Paris Fourth of Nations in Paris and London's Sadler's Wells Theatre.

Dr. Robert A. Batts, professor of economics, was nominated by the Democratic Town Committee of Wethersfield to fill the unexpired school board post of Louis Santare, who resigned in December. Dr. Batts was a number of the Democratic candidates in 1962 to 1967 but did not run for reelection in 1967 because of 'socially intolerable' conditions. Dr. Batts has served on the economic; task, faculty of the University of Colorado and was a member of the Silas Deane Plan and was a member of the Slain Deane Junior High School Building Committee (Wethersfield, Conn.).

The National Theatre of the Deaf, which the New York Times called "a stunning achievement," will perform in the Goodwin Theatre of the Austin Arts Center on February 20. The group is being sponsored by the Center, which attempts to bring to the campus at least once a year an outstanding educational or cultural experience for hearing as well as deaf audiences.

The National Theatre of the Deaf is for hearing as well as deaf audiences. It was designed specifically to create a new, vibrant theatre form, one that would be a source of pride to the gifted deaf actors who participate and a source of exuberant pleasure for all who see them.

Nothing "handicapped" is implied about the quality of the performance of this Company.

Dando and Davidson interpreted with signs of the plays illustrated in 18th Century dictionaries and collogiates. Signs are performances. Production in sound consists of professional actors performing the scenes with commentary by Batts.

EUGENE E. WILLSON of Hartford, Hon. '42, recently presented the College Library with his collection of Second World War documents and toys related to the concept of "Sea-Air Power for Peace." Mr. Wilson has displayed the collection for the past four years during the last century following a distinguished career in the Navy. He is now president and vice chairman of the board of United Aircraft Corporation during the World War II period.

Mr. Wilson assembled the collection records the growth of our present weapons systems now deployed around the world and makes a strong plea for the control of nuclear arms.

An original ballet, produced and choreographed by Miss Judy Dowrin '70, was televised by Connecticut Public Television (Channel 24 Hartford) on January 8. The ballet, "John Brown: The End is Not Yet," was the result of Miss Dowrin's senior thesis in American Studies at the College last year. Now an administrative intern at the College, Miss Dowrin was the first student to receive a bachelor's degree in the College.

She has had 14 years of dance experience and is at present conducting classes at the College.

EDWARD GROSPOW, a senior from New Britain, Conn., was selected by the College to attend the National Student Symposium on the Presidency held at the Alfie House in Warren, Virginia in mid-December. Attendees were representatives from the administrations of Roosevelt through Nixon and students attending college across the country.

There were four seminars at the meeting: "The President-Myth or Reality?" "The President and Domestic Affairs." "The President and Foreign Affairs" and "What the Future Holds."
OUTSTANDING TEACHER-Jerold B. Trecker, who teaches history at William H. Hall High School in West Hartford, receives the "Outstanding Capital Area School Teacher Award" at the thirteenth annual dinner on campus. Making presentation for the College are (from left) Dr. Richard K. Morris, professor of education, and Dean Edwin P. Nye.

COMING EVENTS CALENDAR
February 6-21 Connecticut Scholastic Arts Exhibit -- Austin Arts Center
February 14 Recital by Elenaore Paul, Concert Pianist
Goodwin Theatre, Austin Arts Center
Public is invited. Sunday -- 8-15 p.m.
February 20 The Austin Arts Center will sponsor the National Theatre of the Deaf in a play. "Wooyeck" by Georg Buchner. Goodwin Theatre. Admission charge Saturday -- 8:15 p.m.

Hartford '74 Workshop Set

"Hartford '74: How much of it is functioning now and how effective is it?" was the theme of the second Community Educational Workshop planned at Trinity on January 30.

The workshop was again sponsored by Trinity's Office of Community Affairs under the direction of Ivan Backet, special assistant.

The first workshop held in November considered three basic questions: "What is educational excellence?" "How can it be achieved?" "How, specifically, can it be achieved in the City of Hartford?"

More than 100 people from the community participated and Trinity proved to be neutral ground for some sharply contrasting views. Trinity participants included President Lockwood, Vice President Thomas A. Smith and Professor Alexander Mackimine, Jr., chairman of the Department of Education. Small discussion groups were led by Trinity faculty members drawn from a variety of departments. Among the guest speakers were President Homer Babbidge of the University of Connecticut; Melba Balford, Hartford's superintendent of schools; and Lloyd Cablet, assistant superintendent of schools.

Some of the reactions drawn from the first workshop, according to Mr. Backet, are: "People need to be brought together to talk and help understand each other.

"The first time that people from various segments of our city sat down and talked," said a participant.

ECAC To Honor Dave Kiarsis As College 'Player of the Year'

Dave Kiarsis, Trin's record-setting running back, will be honored by the Eastern Collegiate Athletic Association Feb. 16 at the association's annual dinner in New York.

Dave, who is being honored as the player of the year in Division II by the ECAC, will be at the head table with Coach Don Miller at a banquet in the Royal Manhattan Hotel.

Other post season honors heaped on Kiarsis, who led the nation's college division runners with a game average of 171.8 yards, were selection of the senior pre-ened major as:

- First Team Kodak College Division All-American
- First Team All-East Division II
- First Team and top vote-getter All New England College Division Team (UPI)
- Honorable Mention Associated Press All-East
- Second Team All New England Combined Major Univ.-College Division (AP)

Trinity has been awarded $8,315 under a grant from the Connecticut Commission on Aid to Higher Education for college community service programs.

Under the new program, which will be coordinated by Dr. Gustave W. Andrian, professor of modern languages, 25 teachers in the Hartford school system, who work with Puerto Rican children, will be selected for an eight-week training program in Puerto Rican Spanish language, history and culture. There are four phases to the program:

...intensive language instruction for four weeks... a two-week study of Puerto Rican culture and history to be conducted at the University of Puerto Rico... two weeks of exposure to the problems of the Puerto Rican people in the City of Hartford... meetings with Puerto Rican community, with parents and agencies... representatives of the Puerto Rican community will participate in planning this phase of the program... follow-up sessions to assist the teachers to relate what they have learned to their teaching problems.

Assisting Dr. Andrian in the teaching will be Ronald J. Quirk, instructor in moderna languages, and Dr. Martin G. Decker, associate professor of education, who will participate in phases three and four.

Ivan Backet, special assistant in the Office of Community Affairs at Trinity, was responsible for submitting the proposal which went to the Commission requesting the grant. Matching funds from the College will augment the fund, making a total amount available for the program of $12,321.

"The ability of the deaf to sense and communicate things by means other than verbal is absolutely fantastic," says David Hays, the Broadway scenic designer whose verbal is absolutely neutral ground for some... More than 100 people from the community participated and Trinity proved to be neutral ground for some sharply contrasting views. Trinity participants included President Lockwood, Vice President Thomas A. Smith and Professor Alexander Mackimine, Jr., chairman of the Department of Education. Small discussion groups were led by Trinity faculty members drawn from a variety of departments. Among the guest speakers were President Homer Babbidge of the University of Connecticut; Melba Balford, Hartford's superintendent of schools; and Lloyd Cablet, assistant superintendent of schools.

Some of the reactions drawn from the first workshop, according to Mr. Backet, are: "People need to be brought together to talk and help understand each other.

"The first time that people from various segments of our city sat down and talked," said a participant.

The National Theatre of the Deaf was started by the Eugene O'Neill Memorial Theatre Center in Waterbury, which also offers a theatre program in which Trinity students of theatre arts have been involved.

MARRIAGES
1964 Mr. and Mrs. John T. Lowrey to Marion E. Kendrick, October 27
1965 John K., Clementi III to Jill Burridge, November 12
1967 Paul M. Stine to Mary B. McCabe, September 22

BIRTHS
1948 Mr. and Mrs. Joseph V. Failiczak David James, November 7
1964 Mr. and Mrs. Charles R. Klotz Christine Callanfield, March 12
1965 Mr. and Mrs. George M. Coryell, Jr., George Myer III, November 10
1967 Mr. and Mrs. Geoffrey G. Tilden Rebecca, May 1
1970 Mr. and Andrew H. Masse, Jr., Elise, November 26

ENGAGEMENTS
1970 James P. Cornelison to Katherine S. Killborne
Raymond P. Pech to Eva Langshign

West Hartford, Conn. 06107

We of Twenty-nine have sent our prayerful sympathy and love to PETIE and Janet HOUGHTON on the recent loss they suffered in the passing of Pete's father. We hope they are very happy in their new home and surroundings in Nova Scotia. Also, we hope and pray that MBURNEYS and their dear daughter, Vera, are enjoying Hawaii not only for its beauty, but for the healthfulness of its climate. We are sorry to hear that health is one of the reasons the MBURNEYS are now in our 50th State.

Congratulations to NORTH and IRON PITCHEER on the fine work of their daughter, Lorin Jean, a nurse, doing special work and work.

TO YOUR SECRETARY is grateful to have had a successful invitation exhibit at the Hartford National Bank & Trust Company in West Hartford and then, to have been invited to hold a December exhibition at the State-Dime Savings Bank now in progress in West Hartford.

Of course you have all been checked -- the fall of 1971 for our 45th Reunion. Please save this treat for yourself and your dearly beloved wife.
Thanks to a thoughtful gift of an electric cart from Mrs. William J. Burton, mother of John J. Burton '53, the Class Notes now have an easier time ferrying water, tape and other equipment from the Ferris Center to the athletic fields. Shown here are trainee Leo Houel (left) and student assistant Dan Russo.

ROBERT TOLAND, David '74 and WILLIAM B. STARKEY with two sons attending Trinity, Noah H. and Robert W.

FRANK HOAR’s daughter, Stephanie, married Thomas Einstein of New York City, September 26.

MOTHERHOOD is now responsible for Cash and Credit Administration for the Bielorussian Corporation, Indianapolis.

WILBUR JONES has been promoted to regional representative at the African American Institute, P.O. Box 2117, Addis Ababa, Ethiopia.

FRED BROWN is marketing manager for Sanders Associates, Amherst, N.H.

My apologies to JIM ORELLY for misquoting his letter of last May which I recently rediscovered. Jim is with Unitar Carbide in New York doing financial analysis in the agricultural chemicals group. Jim, Maryjane, and their four children, live at 19 Garden Way, Bloomfield Terrace, London. They have recently married Janet Rome, a Connecticut fellow.

Mae LOORD is now on the staff at the Air Force Academy in Colorado Springs as an instructor in the Department of Aeronautics. Ed wrote that he’s “enjoying the work, the mountains, and the football coach team. My daughter is now five months old—probably too young for this skiing winter, but she should be ready before my four year tour here is finished.”

BOB McCLELLAN and his wife, the former Rebecca Freeman of Winston-Salem, N.C., are now living in New Haven. Bob is currently head of the German Department at Hamden Hall Country Day School. EARL PETERSON writes that he has a new job and a new house. Carl is with Honeywell Information Systems as a senior technical editor, and the new house is at 48 Buckingham Drive, Darien, Mass.
