Coed Ratio Raised by Class of 75

Approximately 397 freshmen, slightly less than last year, reported to the campus on Wednesday, September 8. The class includes 157 coeds as the college goes into its third year of coeducation and its 146th academic year.

The entering class brings the total expected enrollment of the College to a new high of 1,567 students, an increase of about 3.8% over last year when about 1,506 students attended.

The total number of coeds this fall will be about 556, not including some part-time students.

The Freshman Class was drawn from 2,425 completed applications, which was about 50 less than last year, with more women applications than before and fewer male applications.

Also this year there are 34 exchange students, 13 visiting students and 55 transfer students, with about 34 of the students attending the fall program of the Trinity Home campus.

The new class underwent a five day orientation program which began on September 8. The program, developed by J. Ronald Spencer, the new dean of the Office of Community Life, was intended to acquaint the incoming freshmen with the problems and concerns facing college students in the 1970's, dealt with the draft, drugs and sex as well as traditional academic matters.

Recreational activities included a picnic dinner on the quad, a mixer, a film, and a concert by the Trinity Pipes.

A synopsis of the task force recommendations and an introduction by President Lockwood are reprinted on page 4.

Spencer Named To Dean Post

J. Ronald Spencer, a history instructor at Trinity since 1968 and former Hartford Times reporter, has been appointed Dean of Campus Life.

Spencer, a Trinity alumnus (class of 1964) with a masters degree from Columbia, will replace Marc Stulich, who announced his resignation in April.

A native of Easton, Maryland, Spencer taught at Brooklyn College before returning to Trinity. Currently he is writing a Ph.D. thesis on the Democratic party in Connecticut. He will continue to teach one history course each semester while serving as dean.

In his new post, Spencer will be responsible for developing wholesome interaction among students and creating a campus environment which is conducive to student academic and social growth.

He will also be a member of the Trinity College Council, an administration-faculty-student deliberative body; run

New Black Orientation Program Eases Transition to Trinity

A new black orientation program intended to help Trinity's 26 black freshmen adjust to the academic and social life of the campus was conducted alongside the college's regular freshmen orientation program this year.

The new program, run by members of the Trinity Coalition of Blacks (TCB) with a $2,500 grant from the college, featured special academic counselling sessions, seminars with Trinity faculty and administration, and visits from business and civic leaders from Hartford's black community.

Most of the new black students received an initial introduction to Trinity during the summer and many came to the campus several days before orientation week to get used to the college.

Three TCB members, Larry Pleasant, Terre Roue and Steve Newsome, all of the class of '74, spent the entire summer in Hartford preparing for the program. They say they hope to make the orientation program an "ongoing" operation by keeping in close touch with new black students as the year progresses.

Pleasant, a 20-year-old urban studies major from Brooklyn, says he and his friends became interested in the orientation idea as they learned that many black students at Trinity were getting into serious academic difficulty.

He says that bad grades do not always mean that blacks are incapable of doing the work at Trinity or are poorly motivated. Sometimes they are just ill prepared and find that the deck is stacked against them.

Most blacks, Pleasant says, come from inferior big city public high schools and are less prepared for the academic rigors at Trinity than white students.

For most, too, Trinity is the first white-oriented environment they've lived in. Many feel the white student and many faculty and administration members don't understand them and don't know much about blacks.

"Trinity educates a student so that he will fit into the mainstream of American society," he adds. "This is somewhat alien to most black people."

Most of the TCB members involved in the orientation program are withholding judgment about how much it helped. They know that orientation seminars were well attended and things seemed to

Judicial System Keys on Dean

A new all-college judicial system which gives the dean of community life and other administrators more authority in dealing with campus disciplinary problems has been enacted by President Lockwood.

The new system, which replaces the Trinity Adjudicative System adopted in March of 1970, puts the dean of community life into the center of campus dispute settlement. The adjudicatory system turned responsibility for discipline on campus over largely to a student-faculty-administration adjudicative panel.

The new system makes use in each

Letters To The Editor

Student Comments Urged

I think you are doing a good job of giving news about the Trinity scene in the Trinity Reporter although I do agree with one correspondent that it would be interesting to hear more about what the students are thinking as perhaps mirrored in excerpts from the Tripod. But my only real complaint about the Reporter is that I seem to get only one out of every five issues. Probably my overseas location is the problem.

James F. Savage '54

Chess Club Success

Of all the teams fighting under the Trinity banner perhaps none has achieved as high a level in proportion to its success than the Trinity College Chess Club. But if the local woodsmen haven't won any headlines, they've at least been winning intercollegiate matches. From a series of five contests held during the second week of September, Trinity emerged with a record of 3-1. Among their victims were Wesleyan, 7-2; Hartford Community College, 3-2; and UConn, 4-2. The Bantams only defeat, by the score of 7-2, was Wesleyan. The Bantams had earlier won any headlines, they've at least been winning intercollegiate matches. From a series of five contests held during the second week of September, Trinity emerged with a record of 3-1. Among their victims were Wesleyan, 7-2; Hartford Community College, 3-2; and UConn, 4-2. The Bantams only defeat, by the score of 7-2, was Wesleyan. The Bantams had earlier won five contests held during the second week of September, Trinity emerged with a record of 3-1. Among their victims were Wesleyan, 7-2; Hartford Community College, 3-2; and UConn, 4-2. The Bantams only defeat, by the score of 13.

Over the upcoming year the Chess Club will continue its matches, sponsor a lecture and exhibition by members. Collections of chess books will be on display at the Trinity College Bookstore during the first week of October.

CAMPUS NOTES

THOMAS A. SMITH '44, vice president, was recently appointed a member of the Executive and Finance Committee of University Research Inc. (URIC). Smith has been a member of URIC's board of directors since January 1969 and has served on the Environmental Conference Planning Committee for the past two years. URIC is a non-profit research institute associated with twelve Connecticut universities and colleges and its goal is to engage in cooperative inter-university research, development and educational activities in the interest of the community.

President LOCKWOOD '48 attended the fifth annual meeting of the Connecticut Commission of the States whose theme was "Educational Goals and Public Priorities." He participated in a panel discussion on the subject of "Financing Higher Education." Included on the panel were J. McPherson Regent, State Senator, Oklahoma; Watts Hill Jr., president of the University of North Carolina; John D. Millet, Chancellor, Ohio Board of Regents; and John C. Weaver, President, University of Wisconsin.

CLYDE D. MCKEE, associate professor of political science and urban and environmental studies, will be on leave next year. Starting in September he will be working as a Public Affairs Fellow for the President and Finance Committee of the United States Senate. This specific assignment will involve the Comptroller General and the Assistant Secretary of Labor. Mr. McKee has been asked to evaluate the impact of various other Labor Department programs, assist the administration procedures of these programs and draft proposed administrative procedures for the new Act. Because of McKee's interest in planned communities and his family will live in Columbus, Maryland, America's best-known planned community.

MARJORIE V. BUTCHER, lecturer-in-mathematics, has collaborated on a book, "Mathematics of Compound Interest," with Cecil J. Neblett, professor of mathematics at the University of Michigan. Published in June, the book is intended for the serious student of the subject and as a reference on compound interest theory.

RUSSELL J. BUCK, '54 who has been teaching at his alma master since 1960, has been prompted to instruct graduate students in modern languages. Quark, sabbatical of the class of 1964, received his masters and doctorate degrees from Brown. During the summer he taught in an eight-week intensive training session in Puerto Rican language and culture for selected Hartford teachers which was conducted at Trinity under a grant from the Connecticut Commission on Aid to Higher Education. He recently accompanied the teachers on a two-week study of Puerto Rican culture and history conducted at the University of Puerto Rico.

The annual Town-Gown Forum, a series of seven lectures on provocative topics of current interest sponsored by the wives of Trinity alumni, faculty, administration and friends, has been announced for the Fall 1972 season. Entitled "The Dynamics of Change," the series will feature members of the faculty and guests. It has been asked to evaluate the impact of various other Labor Department programs, assist the administration procedures of these programs and draft proposed administrative procedures for the new Act. Because of McKee's interest in planned communities and his family will live in Columbus, Maryland, America's best-known planned community.

The Reverend KENNETH W. CAMERON, associate professor of English, was installed honorary Canon of Christ Church Cathedral by the Rt. Rev. J. Warren Humphreys, Episcopal bishop of Connecticut. Canon Cameron was elected to this position by the cathedral chapter upon nomination of the Bishop and Dean Robert S. Oxnam.

The annual Town-Gown Forum, a series of seven lectures on provocative topics of current interest sponsored by the wives of Trinity alumni, faculty, administration and friends, has been announced for the Fall 1972 season. Entitled "The Dynamics of Change," the series will feature members of the faculty and guests. NEW ORGAN—A four-keyboard console, part of the College's new $150,000 French classic organ, was installed in the Chapel this summer together with 4,465 pipes. The pipes are being tuned in preparation for a dedication concert (of a sort) at the first of December. See page on 17.

TRINITY REPORTER

October 1971 Vol. 2, No. 3

Issued nine times in a year, November, December, January, February, March, April, May, and June. Published by the Office of Public Information, Trinity College, Hartford, Conn. 06106. Second class postage paid at Hartford, Connecticut.

The REPORTER is mailed to alumni, parents, faculty, staff and friends of Trinity. Copies are available to students. There is no charge.

Letters for publication must be no longer than 200 words and signed. The printing of any letter is at the discretion of the Editor and may be edited for brevity, not substance.

Students Can ‘Stop Out’ But Most Won’t, Says Dean

Students returning to Connecticut colleges this fall will find it easier than ever to interrupt their work for travel or work experience, but — according to one top official at Trinity — most students won’t use the new freedom.

The official, Robbins Window, dean of educational services, says a Carnegie Commission report, “Less Time, More Options,” has stimulated many colleges — including Trinity — to expand their efforts to allow students to “stop out” of college without having to worry about being permitted. One concern is that few students — at least at Trinity — will take advantage of the new offer.

The commission report, Window explained, said one cause of student unrest is a feeling among students that they are “trapped” in school. It said students feel the draft and the fear of becoming “college drop-outs” force them to stay in school whether they want to be there or not, he said.

But Window argues that once students know they can leave school if they want to, they’ll decide — in four out of five cases — to stay where they are.

For example, Window pointed to a new (or at least newly publicized) “guaranteed readmissions” policy at Trinity which allows virtually any student to take an extended leave of absence from school and then return without having to reapply. Students need only notify the college registrar six months before they return to campus.

He also noted that about 70 of Trinity’s 1,500 undergraduates will take advantage of the new freedom and “stop out” of school next year. And even when the policy is well-known on campus, he says the number won’t go over about 150.

The reason, Window says, is that Trinity already offers “enough avenues through which students can make their college experience meaningful.”

Many courses combine classes with a “practicum” already and the college is involved in a number of programs which allow students to stay or work off campus for credit, he said.

Window was involved in the twelve-college exchange through which students can spend a year at Smith or Wellesley or a number of other colleges. Students are studying in Europe, Africa and the Philippines for sometimes less than it costs to stay on campus. And there’s the Open Semester Program which permits students to design semester-long projects, such as working in Washington for a senator or being a clinical assistant in a hospital,” Window said.

Once the option of dropping out of school completely is given to a student and he no longer fears, he then loses its attractiveness, he said. “Then taking time off becomes just one option.”

Students begin to think about the problems involved in looking for a job and getting an apartment and the “meaningfulness” of the venture isn’t always apparent, Window said.

“I wonder about the argument that somebody’s non-educational experience gives them maturity of judgment and clarity of goals,” Window said. “I’m not sure that experience in our society necessarily brings maturity and clarity.”

Taking leaves of absence from school is probably “educationally neutral,” he said.

“I think it was Robert Frost who said the ‘book side’ of things has to be integrated with the experience side of things,” Window said. “The young feel things have been too bookish, but there still needs to be an integration of the two,” he said.

In a report sent to President Lockwood on July 15, Window estimated that between 200 and 300 students — or about 15 per cent of Trinity’s student body — will be involved in programs this year which exemplify “the flexibility for student movement,” he said in the Carnegie report,” and allow students to learn off campus.

Thirty-four students will spend the first semester at Trinity’s new campus in Rome; 28 will study at other universities outside the United States; 34 will be on leave to study at other American campuses; and the rest will either “stop out” of school or be involved in an open semester project, he said.

In the second semester between 60 and 80 additional students will be moving off campus for one reason or another, he said.

SPENCER
(from page 1)

University of Rhode Island with a masters in non-western history. A former teaching assistant in history at U.R.I., she has also taught in the Cranston, Rhode Island, public school system and at the Adult Correctional Institution in Cranston, where she taught the work-release inmates introductory sociology. She has lectured on women’s rights to high school and colleges, and is currently working on a masters in sociology at U.R.I.

Jibrell earned his B.A. at the University of Bridgeport and is a masters degree candidate at Trinity. He is being counselling black students, working with government officials, and helping them understand on campus, and teaching one course each semester on African social and political thought.

Jibrell is involved in the twelwe-college exchange through which students can spend a year at Smith or Wellesley or a number of other colleges.

CALAENAR OF EVENTS

Oct. 2 Town-Gown Forum “The Dynamics of Change.” Goodwin Theatre 9:30 p.m. (A series of six lectures offered on successive Tuesdays through November 8).

Oct. 20 Wednesday 8:15 p.m. Moody Lecture in Government. Professor David Spite, Life Science Center Auditorium.

Oct. 21-22 Friday — Sunday Parent’s Weekend.

Oct. 30 Saturday all day Conference on Economic Conversion (sponsored by the economic department and the campus counseling office).

Nov. 7-8 Sunday — Monday 8:15 p.m. Thirteen Arts Production of “A Midsummer Night’s Dream.” Goodwin Theatre.

Nov. 11-14 Thursday — Sunday 8:15 p.m. Thirteen Arts Production of “A Midsummer Night’s Dream.” Goodwin Theatre.

Nov. 12-14 Friday — Sunday Restaurant — Homecoming Weekend.

Nov. 14 Thursday 8:15 p.m. Clemint Memorial Lecture — Dr. John William Ward, President of Ambert College. "Vigilante Justice; Liberal Values." Krste Auditorium.

Nov. 15 Thursday 8:15 p.m. Lectures by Dr. Robert Nisbet, Professor of Sociology at Berkeley and Phi Beta Kappa Visiting Scholar. McCook Auditorium.

Boardman Hall: the three-story brownstone building which once housed Trinity’s well-known Museum of Natural History, became the victim of progress at the end of August.

Her high ceilinged biology laboratories, her long wooden stairways, her darkened corridors and leaded windows—once considered plush and one of the best facilities of its type—crumbled at the hands of demolition experts.

She could no longer compete. Science had passed her by. And all those students who had learned and grown within her walls since 1930 would have found her obsolete and useless today.

Some called her ugly. But even they admit she will be missed. Students had become used to her toy walls. She could not compete with the new concrete structures which grew up around her. But she fit in.

“Boardman Hall did not meet the requirements of the new fire codes,” Joel Crandall, director of buildings and grounds explained. “The costs of meeting these codes—such as providing more exits—were prohibitive.”

Boardman—in recent years—a catch-all. Originally used as a science classroom building and a museum, it became a haven for programs and activities which did not seem to fit elsewhere on campus.

Most recently it was the home of Channel 24, Connecticut’s educational television station, and housed the college’s art and dance studios. One of Hartford’s Alternate Learning Centers, special centers run by the Hartford board of education, also resided within its walls.

Designed by an 1869 alumnum, William C. Brooksley, Boardman was built for $50,000. It cost nearly $10,000 and took nearly two weeks to tear it down.

The original construction was financed by a gift from trustee J. Pierpont Morgan and pledges from five undergraduate students. By the 1930’s a first class Natural History Museum was built into the hall including dinosaur fragments and vertebrate skeletons of all sorts; aquatic specimens and stuffed mammals; microscopic forms and fossils; and a large collection of rocks and minerals.

The museum, known throughout Connecticut, was finally dismantled in 1967. Geology was almost simultaneously dropped from the College curriculum.

The college has no immediate plans for building on the old Boardman Hall site. Work crews are expected to grass in the land by the end of the October.
More Students, Few Programs Urged

Trinity has an enviably distinguished position among this country's independent colleges. We have strong academic programs; we have a dedicated faculty; we have a diverse and talented student body; and we have a balanced budget. But we cannot afford too heavily a dose of self-congratulation. Like any great institution Trinity must reassess its position if it is to respond vigorously to the needs of tomorrow and to remain in the forefront of higher education.

Three developments make this reassessment imperative:

1. The public now expects an accounting from colleges and universities as to what they are doing and why.
2. The nation's leading institutions have substantially modified their approaches and thus compel the smaller liberal arts college like Trinity to distinguish its offerings clearly.
3. The national economic condition, particularly the rapid inflation of recent years, can put tremendous pressure on all higher education.

To these general developments have been added another challenge: the actual number of men and women seeking admission to independent colleges has declined this year. Rising costs, competition, and a limitation on financial aid contribute to this shift away from private institutions.

For all these reasons we have undertaken at Trinity a substantial effort in long-range planning. In choosing how best to respond to these altered circumstances, we wish to build on the strengths which 150 years of distinguished service have provided. Ever conscious of the impact of rising costs in education, we wish to design our approach that we retain our viability without escalating the price—a tough assignment.

Therefore, a number of us have spent this summer considering alternatives which we shall actively discuss on the campus during the next few months. These are the assumptions from which we proceed:

1. Trinity must make special efforts to maintain and to improve the quality and the intellectual excitement of its academic programs. This goal presumes that we can retain and attract outstanding faculty and well-qualified students; it presumes that by our choice of programs we can assure the continuance of a stimulating intellectual environment.

2. Trinity must be attractive to the imaginative and able faculty member, for a decline in the quality or diversity of the faculty would vastly lower us to mediocrity in our curriculum and in our teaching. This goal meant that we must continue our effort to improve salaries and to increase the opportunities for interaction between faculty and students—a hallmark of the smaller independent college.

3. Trinity must continue to attract talented students; we do so with the understanding that it is clear that we must nourish an exciting academic and residential environment, instruction among both undergraduates and faculty, a physically congenial campus, and a provocative cross section of young men and women. This we must provide at a competitive tuition with respect to both private and public institutions.

I am persuaded that few would dissent from these goals. I am also persuaded that as Trinity has matured over the past few years, we are not facing the exigencies of the past, but the progressive changes in the past, we have the requisite conviction to change now without strains.UTER 1500\understand the pressures and flexibility which we have inherited from the past. Among our faculty, staff, students, alumni and friends we have the strengths which will allow us to proceed with the conviction that we shall emerge from our future discussions. Having sorted out the alternatives we shall then need to add the requisite details before presenting them to the Trustees by no later than the first of the year.

Great institutions continually renew themselves. Sensitive to this obligation, Trinity will, I am sure, respond creatively to the new conditions under which we now operate. We shall strive to enhance our position among institutions of serious educational aspiration and ability. It is now I shall have your help in this effort.

Theodore D. Lockwood

NEW CAVE—Students relax among giant number and animal murals in the new student snack bar in the basement of Mather Hall. The old Cave and the television lounge were replaced by a 200-seat dining hall.

New Trinity/Rome Campus Opens for Christmas Term

Forty-one Trinity students are spending the first semester this year on the Overseas University of Massachusetts and College, Connecticut, masters degree from the University of Maryland in Italy, Germany and England and in the Stanford-in-Britain program. She will also teach two courses in the program:

Associate director-in-residence will be Gertrude S. Hooker who holds a doctorate in comparative literature from the University of Chicago. She lived in Rome for many years where she served as the Deputy Cultural Affairs Officer of the United States Information Agency. Since 1967 she has been visiting professor of literature at the University of Hartford.

Synopsis of Planning Reports

Over the past few years Trinity, like most institutions of higher education, has been under pressure to reexamine and to proceed: I) lower the rate of increase in tuition, and II) in the programming of our funds which all members of the Trinity community are invited. Within a few days copies of the full report will be available on reserve at the Circulation Desk of the Library. Students who would like a copy of the full report may obtain one at the Office of Community Life.

1. Professor Ward Curran's report, "The Future of the College," is a projection of the College budget over the next decade based on a series of realistic assumptions about revenues and expenses. His paper was drafted prior to the August 15th wage-price freeze and includes his view is that in view of the future wage and price decisions will not be subject to review and approval by federal authorities. If wage and price controls become a more or less permanent feature, they will lower both the cost of all operations and the ultimate expense, project that is, which he made. Controls, however, are not likely to lessen the difficulty Trinity is going to have in maintaining a balanced budget throughout the 1970's without continued increases in tuition. He also observes that tuition increases without increases in scholarship aid will have considerable effect on the quality of the student body since fewer and fewer qualified students will be able to afford the cost of a Trinity education.

Professor Curran's primary conclusion is of great importance. He states that the College is maintaining the economic and cultural diversity of the student body as well as the fiscal integrity of the institution, one or both of the following steps must be taken: 1) a freeze on the rate of increase in educational and general costs per student without appreciably affecting the quality of services and 2) a non-tuition sources of income, i.e., endowed and annual giving. In addition, if the College is to maintain a program of wage and salary increases which exceed the rate of inflation, "visible productivity" (a term which he explains in his paper) of college personnel must also rise. His assumptions on expenditure increases are as low as conceivable.

II. The Task Force on Academic Programs established the following goal for the College:

The primary concern of Trinity College ought to be the creation of an exciting community—a community should pride itself on both individual excellence and on its ability for sharing intellectual experiences. In order to realize this goal we must elicit concerted enthusiasm among students and faculty on the grounds of College is an exciting and worthwhile institution.

The Task Force also concluded that this community of scholars should not be a secluded and introspective entity, but should include stimulating individuals representing a wide range of ages and backgrounds, provide variety of learning experiences and be open to intellectual exchange among its students and faculty. To these ends the Task (see SYNOPSIS, page 12).

NEW CAVE—Students relax among giant number and animal murals in the new student snack bar in the basement of Mather Hall. The old Cave and the television lounge were replaced by a 200-seat dining hall.
It is my happy privilege to present this report of gifts to Trinity College during the past year. Never before in the long history of the College have so many contributed so much in an annual, non-capital campaign. Alumni, parents, friends and business firms all have set new levels of generosity.

I salute all who participated in this magnificent effort—Andrew Onderdonk '34, Chairman of the Alumni Fund; Alfred Rawes, Chairman of the Parents Fund; Crampton Trainer, Chairman of the Friends of Trinity Fund; Pomeroy Day and Hugh Campbell '32, Co-chairmen of the Business and Industry Associates; and the scores of alumni and friends who served in the ranks of volunteers. To those who served and to those who gave, Trinity is profoundly grateful. You have made a significant contribution to preserve and nurture the quality of the academic program at the College.

Theodore D. Lockwood
President

SYNOPSIS
(from page 4)

EXPANSION OF ENROLLMENT. Realizing that Trinity underutilizes its classroom facilities but fully utilizes its eating and residential facilities, the Task Force considered the potential of admitting significant numbers of non-residential students. They recommended that the College open several large halls within a reasonable range of the campus and that several students as well as one or more faculty members occupy those houses.

For economic, academic, and social reasons, the Task Force noted a number of suggestions concerning the admission of local non-residential students. Among the possible sources of such students are recent graduates of community colleges, adults who wish to complete or further their higher education, and Blacks in Hartford. In order to attract and accommodate such students, Trinity would need to develop several- and two-year program of extension courses offered in the evenings; a daytime adult section would be offered for disadvantaged facilities; an external degree program for those who cannot attend regular classes; and human resource courses designed to establish greater contact among people of all ages and races. In order to operate these programs, the Task Force recommends the creation of a flexible, semi-autonomous institute, renting Trinity's facilities but having faculty and non-residential student body.

TUITION OPTIONS AND FINANCIAL AID. The Task Force recommends that Trinity consider adopting a variable tuition policy in which the rate would increase with family income and decrease with the desirability of the student. They also point out other possibilities such as a deferred tuition plan and work-study program.

STUDENT LIFE. The Task Force very reasonably concerns itself with the need to promote a greater sense of community at Trinity, makes several recommendations about academic life. They argue that an expanded orientation program of 4-6 weeks in which remedial education would be offered for disadvantaged students and in which Blacks would take a course concerning the white environment related with a course in elements of Black culture. In order to make faculty more sensitive to the needs of students, the Task Force recommends that Trinity initiate a faculty exchange with Black universities.

The Task Force also recommends greater attention to our female students by the addition of women counselors, gymnasium equipment, a women's sports program for women, and lectures by women who are professionals in various fields. In addition, adoption of the present system of student advising is recommended, specifically the selection of some fifty upperclassmen to assist faculty in the advising of freshmen. Finally, the Task Force provides a series of recommendations concerning student groups and organizations: College subsidies of open fraternities and College purchase of shares of deferred fraternities; College financial aid and academic credit for corporate students; students in the Cinestudio, WRTR, and Tripod; and provision of "drop-in" centers for those with drug, alcohol and other problems.

The Task Force recommends that Trinity consider a new $150,000 French organ as an investment for the College Chapel and for preparing a dedication concert scheduled for early January. The new organ is a 32 feet high instrument, made possible by an anonymous gift in memory of long-time Trustee Newton Tull. A Hornor to Newton Tull was installed in the Hartford chapel of the Austin Organ Company and is now being tunable for the new instrument when it is finally tuned. The formal dedication of the organ will take place on May 1.

In speaking of the organ, Frederick F. Mitchell, of Austin Organs, explained that the organ was placed in the building of the organ, and that the building made it the Austin organ shop was involved in the building of the organ. Mitchell said, "The building itself Trinity Chapel was an inspiration, so everyone wanted to do his best...In my opinion Trinity's organ is one of my ideal instruments."
Class Notes

1971 Reunion/Homecoming

The 1971 Reunion and Homecoming events have been combined into one weekend, that is November 12-14. In addition to the usual permits to be a football game with Wesleyan, there will be cocktail parties, music, a Field House luncheon, a dinner and dance at the Hotel Sonesta, a smoker, movies, and a Shakespearian banquet. We are also pleased to have Skip Schumacher, Class of 1965, return to the campus to discuss the Pueblo incident. Skip was Operations Officer on the ship and has written a book about the incident, entitled "Vietnam: North Korea." Following Skip’s presentation on Saturday morning will be a discussion of the arts by noted alumni and moderated by Professor John Dando.

Your acting secretary credited his 50th anniversary year-graduation from Hart Fenham Seminary, Ordination and Founding of the Emigrant Community Church in West Harford, and Golden Wedding.

It is hoped that many of the members of the class will be present at the Homecoming-Reservation, November 12-14, marking their 55th year since graduation in 1916.

1923

The fellow whose rich baritone voice which triumphed with the inner voices of CULLUM brothers and has voice of BILL BELL, has delivered the most beautiful rendition of hymns that was ever heard in the old College Chapel. He has passed through the year as a director and has been re-elected Bishop. Dr. MILLER is to be commended for his work, is well known, for he was the best-dressed man of the week when the end came. Here again a devoted and charming Mrs. Gesner paid us a short but very charming visit.

It is great hearing from YOU, and the rest of the time in enjoying the beautiful land and shape that he could team up with the tenor voices of the Boston Song Society. The fellow whose rich baritone voice which thrust that...

N.E. College Champions Ready for New Season

The football team will open the fall sports season on September 25 when it journeys to Williamstown to meet the Ephmen in the 30th renewal (the series now stands at 12-16-1) of a series which dates back to 1884.

Last fall, the Bantams scored an impressive 35-28 victory over Williams by rallying for 21 points in the fourth quarter. The victory was the beginning of a great season for the Bantams which ended in the team being honored as the No. 1 team in the New England College Division and Coach Don Miller being selected as Coach of the Year in that category. Star running back Dave Kiarsis, who now holds many of Trinity’s rushing records, received many honors including a position on Kodak’s Little All-American Team.

Needless to say, 1970 will be a hard act to follow but Bantam Head Coach Don Miller has been exhibiting some optimism about the prospects of producing another fine squad.

Coach Miller’s main job will be in developing a defensive line which has only one returning starter in junior defensive end Bob Theil and replacing the entire line-backing corps. Sophomores Mike Hammond, Ray Perkins, Bill Foster, and Gene Consy.

The offensive line has three returning starters in guard and co-captain Tom Schahle, tackle Bob Gheyze and tight end Whitney Cook. Ed Rawls, who started several games at center before knee surgery cut his season short, will be back in action. Sophomore Ron Dackett, a 9.9 sprinter for the track team last fall, is leading candidate for the wide receiver spot.

The Bantams have several possible starters at quarterback, including junior Erich Wolters, who started several games last season and sophomore Saul Wertenbhal who led the Bantam Yardlings to a fine 4-1 record. Joe McCue is returning starter at fullback and should pick up some of the slack left by the graduation of Kiarsis. Senior Dennis Lindenman is the top prospect at running back.

An important part of the offense will be kick returning specialist Donald Keith who set a New England Collegiate record with 27 consecutive PAT’s last season.

If the Bantams are to be successful in 1971, they will have to fill several areas depleted by graduations. The coaching staff is confident that they have the players to solve that problem so Trinity should have another fine season. The Williams game, in the past, has been important to Bantam football fortunes. In 1967 the game ended in a tie and the Bantams went on to have a good season in posting a 6-1-1 record. Last fall, the victory over the Williams Ephmen was the keynote to Trinity’s finest season in fifteen years as it finished 7-1. A victory on September 25 could have the same effect.

The varsity soccer team will open its schedule on October 2 against M.I.T. After eighteen consecutive winning seasons, the team suffered its worst season in memory last fall losing eight games and tying one. With the return of twelve lettermen including five starters, the 1971 squad should be much improved.

Coach Roy Dath’s squad should be particularly strong in defensive backs with the return of co-captains Steve Hill and Bayard Flechter at the fullback slots. Hill is a versatile player and may be moved to halfback. The squad also has two returning starters at halfback in Donald Burt and John Surovicki. In particular, Surovicki will help the team offensively and as well on defense.

A question mark in the defensive alignment will be at goalie with the graduation of last year’s starter Dick Wood. Junior Charles Gonyer and senior Charles Ray are returning varsity goalies but neither of them has had much action on the varsity. Competing with them will be a fine goalie up from last year’s freshman team, Glenn Preminger.

Lack of offense was Dath’s big problem last year and it will have to be solved this fall if the season is to be a successful one. Doug Snyder is the only returning member of the varsity’s forward line so much will depend on the showing of sophomores Paul Goualing and Pete Heimann who both started on the freshman squad.

The Bantams face a demanding schedule including Brown and Middlebury who are regularly among the top ten teams in New England. M.I.T. and the Little Three will again provide stiff opposition.

This should be another challenging fall in soccer for the Bantams, but the season’s end should find Trinity with a much improved record.

Trinity crew pulls one and three quarter lengths ahead of Fitzwilliams College, Cambridge to win the semifinals of the Henley Royal Regatta in July. Earlier the Bantams had defeated Pembroke College and Emmanuel College. Trinity lost in the finals to a strong University of London crew by one and a quarter lengths.

Soccer Opens with M.I.T.

The varsity soccer team will open its season on October 2 against M.I.T. After eighteen consecutive winning seasons, the team suffered its worst season in memory last fall losing eight games and tying one. With the return of twelve lettermen including five starters, the 1971 squad should be much improved.

Coach Roy Dath’s squad should be particularly strong in defensive backs with the return of co-captains Steve Hill and Bayard Flechter at the fullback slots. Hill is a versatile player and may be moved to halfback. The squad also has two returning starters at halfback in Donald Burt and John Surovicki. In particular, Surovicki will help the team offensively and as well on defense.

A question mark in the defensive alignment will be at goalie with the graduation of last year’s starter Dick Wood. Junior Charles Gonyer and senior Charles Ray are returning varsity goalies but neither of them has had much action on the varsity. Competing with them will be a fine goalie up from last year’s freshman team, Glenn Preminger.

Lack of offense was Dath’s big problem last year and it will have to be solved this fall if the season is to be a successful one. Doug Snyder is the only returning member of the varsity’s forward line so much will depend on the showing of sophomores Paul Goualing and Pete Heimann who both started on the freshman squad.

The Bantams face a demanding schedule including Brown and Middlebury who are regularly among the top ten teams in New England. M.I.T. and the Little Three will again provide stiff opposition.

This should be another challenging fall in soccer for the Bantams, but the season’s end should find Trinity with a much improved record.

Cross Country Ready to Face Tough Schedule

Hard times have fallen upon the Trinity cross-country team. Last fall, the Bantams had a second consecutive season without a victory. The 1971 squad should be improved over last year but much will depend on the performances of returning lettermen Bob Haff, Rick Ricci, and captain Bob Halpern.

A major factor in the team’s lack of success in recent years has been a lack of depth. The varsity should have some help in this department this fall with four promising runners arriving from last year’s freshman team. Greg Bartlett, Fred Francis, Jay Muller and David Stabler all received their freshman numerals in 1970.

A big boost for the squad will be the coaching of Craig Phillips of Manchester, Connecticut. Phillips was a member of the cross-country teams at Manchester High School and at the University of North Dakota where he graduated in 1968 with a B.A. in Physical Education. In addition to his duties with the Trinity cross-country team, Phillips is employed as a physical education instructor in the Manchester school system and is an assistant varsity track coach at Manchester High School.

The Bantams will face another challenging schedule this fall beginning with a dual meet on October 2 in Maine against Bates College.

Woman Coach Joins Staff

“After dealing with an all-male staff it should be a novel experience having Jane on the staff,” commented Athletic Director Karl Kurth concerning the appointment of Miss Jane Millspaugh; the first woman ever to teach in the Trinity Athletic Department. “With her experience, she should provide great impetus to our women’s athletic program.”

Miss Millspaugh, a native of Engwedlog, New Jersey and a graduate of Springfield College with a B.A. in Physical Education, is currently studying for an M.A. in education at Trinity under an award given to her as a graduate assistant. This fall she will teach women’s physical education courses and coach women’s field hockey. The team has a six-game schedule, including opponents such as Yale and Miss Porter’s School. Miss Millspaugh will also be responsible for all women’s extracurricular activities and coach intercollegiate lacrosse, squash and tennis in addition to field hockey.

Before coming to Trinity, the versatile sports enthusiast was a physical education instructor and varsity swimming coach at Brockton (Mass.) High School.
