Rolls Up Seventy-Nine Points to Trinity's Forty-Seven.

BIRCH IS SENSATION IN HIS FIRST COLLEGE RACE

O'Connor, Jepson and Birch Big Point Winners. All Three Make Letters.

On a slow track, made soggy by an all-night rain, and on a rainy af-
fer in the javelin throw, and field men defeated the Trinity run-
ers in a dual meet held at Worcester, on Saturday, April 28, by a score of 79 to 47.

The first thirty-four events Wor-
cester scored ten first places against four for the Blue and Gold. In four events, the century dash, the quarter, the two mile, and the high jump the Blue and Gold won both. Captain Allen, places, while Trinity swept all but one point in the javelin throw.

Birch, Jepson and O'Connor were captured by Birch, in the mile run, by Telge in the broad jump, and by Jepson in the javelin throw.

Montgomery in the broad jump brought

Birch, Jepson and O'Connor placed second, and O'Connor placed third. In fact, the weights, which have been the weakest branch of Trinity track for several years, scored twenty-eight points for eighteen points of the total score.

The big start of the meet, from the standpoint of spectacular performance, was Birch, Trinity sophomore, who leaped clear of the starting line and captured the mile in easy fashion after a tremendous start in the last lap. For three and a half laps Birch was

trailing the field. When he hit the take-off point, however, he cut loose with a driving spurt that carried him from fourth to first in the turn and where he ended. At the finish of the final stretch he increased his lead to the extent of about twenty-five yards. This was a victory over Birch, like a quarter miler, finishing fresh with a ten-yard lead intact. Short-

est of the meet was the trip to

half mile. Here he also ran a new record, and the trip to

last place was not as big a loss as might have been expected.

But he waited just a little too long and was beaten at the tape by two

seconds, but he hit a turn which landed him in a one-yard lead.

Equal in number of points scored came Jepson, with a winning throw of a hundred and twenty-seven feet, second in the second spot, and a third in the high jump. In one of his trials for the broad jump the vege-
table field sprained his ankle so badly that he could not be used in the Meet.
One point below these two leaders O'Connor accounted for himself with a three hundred foot throw, and tied with Jepson for sec-

ond place in the high jump, with two seconds in the hurdle events, scored six points. In the low obsta-
cles race he placed third which was bettering him for a week, and in the long jump he placed fifth, with a leap of fifty feet. In the Keating, with a winning leap of twenty feet, two and three quarter feet over the record of 

Trinity total up to thirty-four.

Part of the meet, a mile and a half in which fast time impossible. This was, coupled with the rain and the fact that the Massachusetts city, was responsible for the poor showing of the Blue and Gold, for the day. For the first time since he has been in inter-

collegiate track, Johnson was

ORTGIES AND NEWMAN STAR FOR TRINITY

Return Game Scheduled to be Played at Hartford on June 9.

Last Wednesday the Trinity base-

ball team was defeated by the Am-

herst Owls. After the game the se-
tinon promenade, is just now re-

ceiving the attention of geologists

who are investigating instability

formations. In a group of the fourteen events Wor-

cester won first and fifth in the

first and fifth inings to

his credit. For Trinity, Newman and Ortgies were the out-

standing stars of the game. In spite of a wind of eighty miles an hour, weather, Newman in center field and Ortgies in left field made numerous remarkable catches. Ortgies, who has

been an honor to any big league

fielder, in addition to their excellent

fielding both men were very effective

with the bat. Amherst scored the first run in the first inning. Tuck walked the first, second and third and on this

play when Piersiel singled. Booth went to third in a wild throw of Tuck in an at-

tempt to put out Pierson. When Piersiel singled. Booth went to third in a wild throw of Tuck in an at-

tempt to put out Pierson. When he hit the ground, Tuck was safe on fielder's line.

This was the first game that

Amherst has caused geologists to inves-

trating the valley of the Connecticut is covered by a sheet of lava which has not had an erosion since 1812. If the lava was not originally the same as the soft earth, they were just previous to the formation of Mt.

As a result of this they have been able to give the best possible image of the geology of the area.

In one of his statements about the valley, the Connecticut is covered by a sheet of lava which has not had an erosion since 1812. If the lava was not originally the same as the soft earth, they were just previous to the formation of Mt. Carmel. This fact also gives them an idea of the development of the land.

RUSHING RULES.

There is considerable important work that has to be done by the Non-Fraternity Council before another rushing season rolls round, and college days go on, the next rushing season is close at hand. While it is possible that this editorial may be a party to the agreement next fall, it must still be hoped for, the sake of understanding and good feeling in the community that the chapter will reconsider and withdraw this sort of statement. Even if it does not occur, the other seven fraternity representatives in the Council must clearly realize that the agreement which has already promised possibilities for mutual benefit.

The worst evil of the present agreement is the real danger of non-fraternity campus rushing which is not only expensive to the crowds involved, but which works to the detriment of freshmen in their curriculum work, and which is strictly illegitimate. Now a student a true picture of the crowd which is entertaining him. The IMC rules governing rushing, would enable a fraternity to show a prospect its real campus rushing which is not expected during his college course. This is more fair to both the school and the new man, than the present method of entertaining a man with the hope of winning.

Even informal entertainments prove a freshman from getting an adequate picture of the character of each fraternity. If he may expect if he joins a particular fraternity, every fraternity wants congenial men, and every fraternity can find congenial men in the larger crowd without the tendency of showing his personal reality. It is in this light that the present rules are strung path, and this is more valuable a plan than the former scheme, when an event was made at the meeting that every crowd on campus had broken or tried to break the rules of another time or another. Whether this be true or not, the illegitimate rushing has been done to call forth such a sweeping statement. In a rush agreement should have some teeth. Just what form the power should take, the Council should have power to adequate to what grupal powers. Otherwise the agreement is found without meaning.

VALUE OF LAUREL
Forestry and Paper Industries Information

Every time a letter from an alumnus who protested vigorously that the opinion of the writer of the editorial was not his, or that he was not acquainted with Trinity College that it is a whole anti-law and anti-books.

CLEARING UP A POINT.

Following the issue of an editorial entitled, "It Might Not Win," in the issue for April 19, the editor received a letter from an alumnus who prote- ther are for the free discussion of any serious irregularity in the receipt of which the present rules are strained confidence which prevents him from feeling at home, and will thaw out sufficiently to make him a permanent member. The baseball team has played three games and has yet to win a game.

Another serious defect which came to light in the discussion following the presentation of the resignation of A. H. Palfrey, B. A., is the greater need of clearing up several ambiguous points in the rules as they now stand. There are still many points which are for the most part understood, but which are not clear enough for collegiate use.

The baseball team has played three games and has yet to win a game.

The surest way to make a team fight is to get rid of all the "idiot" written all over his face it was farthest from the thoughts of the writer of the editorial. The question of drinking in colleges is receiving considerable notoriety in press dispatches recently. Most of them state that the problem of lack and constant drinking is confined to a noisy minority. This is true in Trinity as well as with other institutions. The majority is no worse than the other colleges, but is much more serious in Trinity. Nearly 100 species of shrubs, plants and ferns are exported to the University of Paris. Such an inference is false, and is based on thoughts of the writer of the editorial. The question of drinking in colleges is receiving considerable notoriety in press dispatches recently. Most of them state that the problem of lack and constant drinking is confined to a noisy minority. This is true in Trinity as well as with other institutions. The majority is no worse than the other colleges, but is much more serious in Trinity. Nearly 100 species of shrubs, plants and ferns are exported to the University of Paris.

It is planned for all the members of the group to witness to-
HEAVY VOTING AND CLOSE ELECTIONS MARK PRIMARIES

EXCEPTIONALLY HEAVY VOTE CAST IN WEEDEE-Out ELECTION.

TERRILL AND CUNNINGHAM FOR PRESIDENT OF SENATE.

Kennedy and Woolam College Marshal, Noble and Johnson for Athletic Association.

In the primary elections for College officers for the year 1923-1924 an exceptionally heavy vote resulted in close elections for practically every office on the ticket. A total of 179 votes was cast, each with voting for three men. Eleven ballots had to be discarded because of incomplete

For President of the Senate, Terrell and Canningham ran on out over Birmingham, O'Connell, Eastman, Norman and Peet. Terrell was the man with eighty-nine votes, and Canningham a close second with eighty-six.

For Secretary of the Athletic Association Noble and Johnson ran on against any candidate. His total of 134 was a good lead over M. B. Johnson, whose vote was the vote of the most delinquent member. The unsuccessful candidates were Wilcox, Montgomery and T. W. Jones.

Kennedy and Woolam maintained an easy lead for nomination for College Marshal. They ran on against any candidate, but good votes, but Kennedy's 114 and Woolam's 112 were sufficient to eliminate them over F. S. Jones, O'Connell, Peet and Allen.

The race for Chairman of the Union Committee was exceptionally close. Eastman and Deedsman finally won out, but until the last few ballots high man was in doubt. At no time until the close of the tally of ballots exceed four votes. The final result was, Eastman 196, Deedsman 121. Unsuccessful candidates were Herrick and Peet.

Malcolm-Smith and Morris were nominated for Junior Member of the Discipline Committee, with totals of 121 and 120, respectively. Allen, Hadlow and M. P. Johnson were also candidates.

Terrell was on the varsity football squad, and a member of the track team, chairman of the Junior Promenade Committee, and is a member of Sigma Chi. Cunhgham is manager of baseball, managing editor of THE TRIPOD, and is a member of Kappa Delta Chi.

Noble played right tackle on last year's football team, and was a member of last year's baseball team. He is a member of Phi Gamma Delta.

Kennedy is captain-elect of the football team, a member of Kappa Beta Phi, and of Psi Upsilon. Woolam is a letter man in football, and a member of Sigma Chi.

Eastman has served on the Senate this year, and is a member of Sigma Nu. Deedsman was a member of the football team, and is a member of the Academic Society.

Malcolm-Smith is campus representative of The Hartford Courant, and is a member of Phi Gamma Delta. Morris played baseball part of last season, and joined the track team. He has served on the Senate this year, and is a member of Alpha Phi Omega.

Each voter elected for three men for each office. Then the two highest men are placed on the ballots for the final election to be held Thursday, May 3, in the Union from 9 o'clock in the morning until 5 o'clock in the afternoon.

The ticket for the final election follows:

The Senate meeting held April 30, 7:45 p.m.

Immeln presented a petition to have two men selected by the History department to teach Political Science, Social Science, etc. Immelman's petition was seconded, that the Senate adopt this petition.

SINNOCENT STUDENTS BLAME AMERICAN JOURNALISM

Decide that "imitation of American journalistic methods is base of British Press."

An Associated Press report from London, England, tells that the students of Oxford University have finally decided what is the matter with the newspapers in England. At a meeting of the Union Society, which embraces the male student body, it was moved, debated, and determined that "the imitation of American journalistic methods in the base of British Press."

The student who thought up the idea of motion said he believed that English culture was being destroyed and national morality undermined by resort to "American sensationalism" on the part of British Press.

President of Senate: Terrell, Cunningham.

Secretary of the Discipline Committee: Noble, B. B. Johnson, M. B.

College President: Kennedy, S. L.

Chairman of the Committee: Eastman, Deedsman, Deedsman, Cunningham, Cunningham.

Junior Member of the Discipline Committee: Malcolm-Smith, Morris.

STORRS CO-EDS WOULD REFORM THEIR COLLEGE

"Because the college is free from codd and shall prosper and flourish," might well have been added to the Attributes handed down from the Mount.

A scrutiny of the Connecticut Agricultural and Mechanical newspaper reveals that the fact that the college is free from the "Squirrelish" is automatically and thoroughly reforming the institution. It is the college that is free from fads and national morality under the "American journalistic methods in the base of British Press."

The Professor passed him immediately

It was the first question in the course on Sharing—"Why is the handy cap not a handicap?" and the student replied, "Because it can't get lost."

He referred, of course, to the Williams' Hunged Cap which you see pictured here. This invention puts an end for all time to the nuisance of hunting for lost caps. As you see, the Williams' cap is hinged on. It's the only college cap that you can lose.

Williams' Shaving Cream is as pleasantly better as the new cap. For Williams' is the fastest beard softer known and, in addition, it is of distinct benefit to the skin. Try giving your face the wholesome care it deserves. You look and feel your best.
GEOLGISTS ON ROCKS

(Ecose from page 1.)

The possibility of a senti at this

Evidence of a vent consists of find- ing blocks of sandstone imbedded in a matrix of igneous rock. As the molten lava flows, a mixture of the two forms of rock. However, thus far in the inves- tigations it has not been definite-

that lava. Specimens taken from the point show clearly the intermingling of the two forms of rock. Two theories may account for this blockage of sandstone in some way were lying on the surface when the molten mass flowed up the valley from Mt. Cur-

In this case the sedimentary rock would be found surrounding the lava, instead of the reverse. Investigation is still proceeding, but whichever way the decision falls, the point adds another inter-

The name is retained in almost an ideal spot for study of earth formations.

WORCESTER MEET.

(Continued from page 1.)

an off day. After running the hur- dles in 18.1 in the trials last week finished below the point places in the meet. The same thing held true in the two-twenty, and a third place in the quarter, which is his specialty, was the best he could do.

Fox, with fresh in both the hundred and two-twenty, was high man for the winners. Equal with him was Thompson, who captured both the high hurdles and the pole vault.

Perry, with a place in the shot put, discus throw and third in the javelin, accounted for his score, which included a score in the fielding of three points. Harvard followed close with high men with six points, first in the quarter, third in the half mile.

The remainder of the Worcester total was evenly divided among the large

The summary:

100-yard dash—(1) Fox, W; (2) Thompson, W; (3) Healy, T; time, 11.1 seconds.

200-yard high hurdles—(1) Landgren, W; (2) Allen, T; (3) Winckler, W; time, 21.7 seconds.

One-mile run—(1) Birch, T; Demick, W; (2) Howard, W; time, 4 minutes 16.2 seconds.

440-yard dash—(1) Hayward, W; (2) Forbes, W; (3) Johnson, T; time, 55.2 seconds.

220-yard low hurdles—(1) Thompson, W; (2) Allen, T; (3) Chokey W; time 28 seconds.

Two-mile run—(1) Johnson, W; (2) Ezzell, W; (3) Parke, T; time, 16 minutes 35.3 seconds.

220-yard dash—(1) Fox, W; (2) Healy, T; (3) Delphos, W; time 24.2 seconds.

600-yard run—(1) Forbes, W; (2) Birch, T; (3) Hayward, W; time, 2 minutes 11.0 seconds.

Pole vault—(1) Thompson, W; (2) Bisbee, T; (3) Durante, W; height, 9 feet 7 inches.

Shot put—(1) Perry, W; (2) between O’Connor, T. and Jenson, T; distance, 22 feet 6 inches.

High jump—(1) Carman, W; (2) Webster, T; (3) Gallo, W; height, 5 feet, 8 inches.

Discus throw—(1) O’Connor, T; (2) Webster, W; (3) Carman, T; distance, 200 feet, 1 inch.

Javelin throw—(1) Jensen, T; (2) Montgomery, T; (3) Curran, W; distance, 127 feet, 4 inches.

Score—Worcester Tech. 70, Trinity 47.

PUBLIC SALES.

We have purchased 120,000 pairs of D. S. Army Military Last Shoes, sizes 8½ to 17, which will the entire surplus stock of one of the largest U. S. Government shoe contractors. This shoe is guaranteed one hundred per cent, solid leather, dark tan color, bellows tongue, drift and water proof. The actual value of this shoe is $10.00. Only a limited amount can be obtained, and once we have sold these, we can offer same to the public at $2.50. Send correct price. Pay postman on delivery; or send money order. If shoes are not as represented, return them postpaid and we shall promptly refund your money.
