TERSE SAYING BY LATE DR. LUTHER ESSAY THEME

Dr. Karl Reiland Uses Late Educator's Apothegm to Point out That Child is Personality

One of the apothegms for which the late Dr. Flavel S. Luther, President Emeritus, of Trinity College, was so famous was the essay for Rev. Dr. Karl Reiland, Trin., 1887, and rector of St. George's Church, New York, on the necessity for regarding children to be individuals with personalities. The essay was published in the Bulletin of St. George's Church Sunday School.

God's Kindergarten.

"The late President Luther (Trinity College) was sometime asked to speak on the subject, 'The Problem of the Child and Its Training.' He took advantage of the unfortunate wording of the subject and began his address by saying he could not refer to a child as 'it'. "There is no neuter gender about a child. A child is not a thing but a child,' he said. In one of those flashes of discarnate awareness for which he was famous he lifted the subject from vagueness to vision. Then he added, "The child is not problems they are privileges.' He was a man who knew how to solve problems and to distinguish terms with prevarication. He knew how well to solve problems and to distinguish terms with prevarication. Therefore the essay is not restricted in any way to one or two very English student ought at least to make a good effort to win an award; there are three, and if an essay is not of first class standard, it may be a worthy second or third place.

LAX THINKING RETAINS MANY OLD FALLACIES

Most People Don't or Won't Think Straight, says Professor Perkins in Dialogue on WTIC

Popular misconceptions of scientific phenomena abound in the world simply because very few people either do not take the trouble, or cannot, think straight. Professor Henry A. Perkins of Trinity College told Colonel Francis Parsons of Hartford during a radio interview last evening that people commonly form wrong ideas about many everyday truths which Professor Perkins pointed out and explained are:

"Vibration of the Human Body.
It takes a very simple device like a stretched string to produce a single definite tone. The idea that something as a tree or a human body can vibrate in a great variety of frequencies, which fact makes "huck" of deductions that the human body can be cured or made ill by application of a definite "vibration." A knot is a measure of speed, not of frequency. A head sea has very little effect upon a ship, and water is very hard to compress, he said. The moral of his remarks was: "Communicate more, fix up their things they do not understand, and perhaps you never do understand, and especially avoid the mistake of a mystery out of what he calls science," he said, as a warning that the moral of the every-day truths which Professor Perkins pointed out and explained are:

THE TRIPOD

COMMUNICATIONS

To the Editor of "The Tripod":

The fact has doubtless often come to your attention that it is a common fault of the Trinity campus that judgments of college students are often based on personal considerations such as distance, their names will not help you in making real life decisions. I have no personal interest in the college

In the true spirit of intercollegiate activity we have a rash little chapter called Phi Beta Kappa. As we understand it, it is the policy of "The Tripod" in the future, to devote that part of the paper to signed statements only, not in the original ma-terial, but in the publication of The Tripod. This system means that this is a cowardly and malicious practice, and should be discontinued at once. You may be sufficiently protected by having all volunteer con-tributions initial the paper authorizing the event of any libel suits being brought against the paper, you would have to authorize the professor's signature, and could in the event of any question by the governing au-thorities give help to the libel suits. We are sure that your present policy trends to encourage the regret for per-sonalities and the childish evil of confidential dealings which at the pre-sent time amazes us all.

We hope this is the last signed communication we appear in columns of "The Tripod."

Very sincerely yours,

Y. T. J.

Another St. Patrick's Day draws near and it is well to think about the "time honored fight." To those who are in favor of the "time honored fight" or enjoy knocking down and snatching their fellow students, there is noth-ing to be done but to justify the fight as a tradition, I put the following statement out: "The fight is a tragic, None are perhaps so directly cut up as he. We con-form to the opinion that the fight is a worthy tradit-ion because of high sounding words,—team work, class spirit, college loyalty. It is a blind, unreasoning devotion to mass judgment that forces people to identify themselves completely with a group and take without question all that group's opinions. That is a dangerous and ugly thing. Loyalty does not consist in an arbitrary and complete submis-sion in one's own opinion in that of a group.

The merits of the other class are forgotten at the time of the fight. The day warm friends may become "dawn friends who have not fol-lowed the refusal of the "time honored fight," the dan-gerous, savage. By satisfying the de-sires for physical combat, superiority and aggression, this form of activity is a vul-gar attempt to show the preemi-nence of the right side. I hope they all will be because there is no telling what the mood the writers were in when they had a concert explained to you? The very best heat engines do not utilize more than about one-third of the energy in the heat they use, and cannot go much beyond that because of certain laws which make a complete conversion of heat into mechanical energy impossible. A heat engine must, for which 80 per cent. efficiency is claimed is fraudulent.

A heat engine must, for which 80 per cent. efficiency is claimed is fraudulent.

Freezing of Water.
Hot water will freeze more quickly than cold water only if the water has been boiled (which drives out the air) and if when the two experimental pans are set out the temperature is above freezing and gradually lower. Big telescopes do not magnify the stars; they simply set on an eye 150,000 times larger than the human eye, thus drawing in 100,000 times more light into focus and making stars invisible to the unaided eye visible as points of light. Bullets fired from a rifle fall just as rapidly as they do when dropped from the hand, but their tremendous speed carries them to the mark before they can fall very far.

Not only mild, but a mild cigarette that satisfies!

Above is a photograph of the Chesterfield cigarette packet.

(Continued from page 1.)

Magnetism Not Energy.
Magnetism is not energy and a magnet therefore cannot pull material any great distance. It can develop energy sufficient to pull a piece of iron a short distance, but then the process stops.

A person cannot teach physics in school after having had only one school year.

The very best heat engines do not utilize more than about one-third of the energy in the heat they use, and cannot go much beyond that because of certain laws which make a complete conversion of heat into mechanical energy impossible. ATHLETIC NEWS
Coach Ray Oosting's track squad, consisting of about thirty-five candidates, has been reporting at the gym for early training workouts three times a week for the past two weeks. Several glaring vacancies will have to be filled this year due to the graduation of several of last year's brilliant performers, and Coach Oosting will have a hard time filling their places. The schedule which is printed below is difficult to one, unless the squad gets down to some good hard workouts, a successful season cannot result. Charlie G. Jackson, '28, is captain of the team.

The schedule is as follows:

April—5—Spaulding.
May—5—Massachusetts Aggies (here).
May—12—Eastern Intercollegiates (at Worcester).
May—20—Clark University (here).

The baseball squad, under the direction of Coach John Merriman, has been working out daily in the gym preparatory to going outside for practice. The only outstanding vacancy from last year is at shortstop, due to the fact that "Bill" Burgoff, ex-'29, failed to return this year. All of the regulars have reported along with about twenty new candidates.

The regulars from last year are: Captain Whitaker, Mastronarde, Cutter, Lerner, Hardman, Sturm, Cooper, Solms, Kardys, '31, Blauvelt, '31, Rosenbaum, '31, Kostin, Neutrals, '30. Baldwin, Alpha Delta Phi, Hardman, Alpha Chi Rho, O'Leary, Sigma Nu.

JUNIOR-VARSITY RECORD.
Jan. 11—C. Ag. Frosh, '35
Jan. 16—New Britain, 46
Jan. 21—New Britain, 13
Feb. 10—Laurel Business, '35
Feb. 16—School for Deaf, '35
Feb. 28—School for Deaf, '35

Total, 185
Won 2, lost 4. Average 333.

has the human side in spite of everything."

Before the concert Professor Spaulding pointed out the significance of Romanticism in music and its place in the world today. He gave a brief outline of the composer's works and their purpose and moods in the writing of the music. It is remarkable how much better one can understand a concert when one has a general idea of the theme upon which the work is based.

This week there should be a much greater attendance. The second concert will be on the Musical Drama.

THE MUSICAL DRAMA.
Operative Program.

Explanatory Remarks by Professor Spaulding.
I
Overture Oberon,......... Weber
II
Aria, "The Evening Star", (Tannhauser), .................. (Wagner)
Walter Marsh, Baritone.
III
Aria from "Robert the Devil", (Meyerbeer)
Mrs. Giles Blague, Soprano.
IV
Nocturne from "The Midsummer Night's Dream", .. (Mendelssohn)
Walter Marsh, Baritone.
V
Aria—Diebardi Halle, ..(Wagner)
Mrs. Giles Blague, Soprano.
VI
Overture "Euryanthe",..(Weber)
Dorothy Bethuel Mulhern, Accompanist

We state it as our honest belief that the tobaccos used in Chesterfield cigarettes are of finer quality and hence of better taste than in any other cigarette at the price.

NOVEL READING.

Who reads novels today? If this question were put to the average person, the answer we would get back is: "The well known Trinity Tail or Lincoln High School," while the next question would be: "The New Barber Shop or Main Street Bond Hotel." These vultures of the profession, in this modern age, are continually looking for new material to supply the demand. These former, knowing no differences between what is fitful and obscene and what is merely harmless, are devoting all their energies to the writing of novels, and their chief interest is in form, as they themselves have said: "It deposits. There are a dozen years or so, to pick the actual fiction value of a novel, and we have no means of knowing when a book is not only to get him. Why? Because they want their institutions to live according to their ideas, and they know how to do it, absolutely, certainly, securely—by getting the child. They know well that the child is privileged in no other way—potential—not an 'it', to be laid aside as of slight consequence for a dozen years or so, to pick up most any ideas—chance scattered in the atmosphere of vague responsibility. "It makes all the difference in the world what your symbol of devotion is, and when you see the oldest Church with its Madonna put the child at the center of sacretness and follow the idea through to definite results, you can at least get a notion for celebration, for civilization and for reformation. No, Dr. Luther was right about the child, he is not an 'it' but a God-given spiritual entity, not a mathematical problem but a divine privilege."
