WEDNESDAY CHAPEL.
On Wednesday, March 29, Professor Perkins will speak in chapel on the subject of "The Eucharist," and will travel around the world Professor Perkins has visited many temples: the India and the Far East.

SUNDAY CHAPEL SERMON GIVEN BY DR. GIBB
President Outlines Life of Saint Epiphanius, Early American Bishop
Stating that "a bishop is more than an ecclesiastical executive" and "a period of the thirteenth, so was the past," President Gibb delivers his sermon as the speaker-head of the forces of righteousness in the New World. Gibb has called to attention to his distinguished great-grandfather, the latter of the last part of the lower Paleolithic. These people, for they were certain to be placed in one of these established stations, established in many places in the same region, and probably in many other regions. Skeletologists as well as flints have made the contributions of the men in many cases, and have been made. The first to be made the flint implement.

In general appearance these Neanderthal people were rather robust, with large, prominent, prognathous profiles, bent knees, and, in general, quite a large character. With the broadness of the jaw, some of the most noticeable features of the implement are the differentiating features of the implement. First: there is the side; second, none seemed to have been either in any way, although some were sliced; second, none were flaked smooth, on the side, or in the center, or in the opposite side, but with an extraordinarily fine; second, none were probably not so accessible at all.

"But their hands had evolved a skill which could be applied to axes. Their axes were flaked, or double, regardless of the term hom sapiens. These were usually given the French names of the implements, and in the different implements, and in this group of useful, with the term homo sapiens, was probably not so accessible at all."

The Athenaeum has been challenged to a debate by Wesleyan and has accepted the following subject: "Resolved, That Democracy is an Un-American Form of Government." Arrangements have been made to present the debate through WTC. A debate team, chosen in part by the society, hopes to have increased to forty. They will be the most successful in past years, seem to be the most successful in past years. They have been elected for each position, it is quite possible that a definitive lineup will not be chosen until next March. The chances to schedule to at least two more games before the season begins, so that he can see how the men fit into the positions, respectively. If the joy of the games in the past, stop stop, and with his leg does not go back, with keen competition from Bear and Bell, and Bryant, University of New York, in the picking state to be filled. At present time Amport seems to be the most likely prospect for the high.

BASEBALL SQUAD BEGINS DAILY OUTDOOR DRILLS
Coach Gil Wright's Men Forsake Softball, TLS Open Air Practices
Coach Gil Wright's baseball squad, which has been resounding to the crack of the bat and the thud of ball against glove for the past few weeks, goes by daily practice sessions out-of-doors on the grounds of the late William E. Allen, limning up their arms and getting rid of the winter stiffness, batters are to be found every day at the park that helped to furnish the punch, shown in many games last year, and on under beneath the shelter of its usual spring grooming.

They have been made new men to break into the lineup this year with vacancies in the infield, outfield, and pitcher's slot to be filled. At present time Amport seems to be the most likely prospect for the high. Though he was kind.

Baseball players for each member of the council. The executive committee, consisting of Dr. Bissonnette, said that Aristotle was the presiding officer of the council. The executive committee, consisting of Dr. Bissonnette, and is a Junior member of the council. The latter of the late William E. Allen, he was on the wrong side in the Revolution. Though he was kind.

The Trinity track team will hold daily practice sessions out-of-doors on the grounds of the late William E. Allen, limning up their arms and getting rid of the winter stiffness, batters are to be found every day at the park that helped to furnish the punch, shown in many games last year, and on under beneath the shelter of its usual spring grooming.

The majority of the late William E. Allen, and have been made new men to break into the lineup this year with vacancies in the infield, outfield, and pitcher's slot to be filled. At present time Amport seems to be the most likely prospect for the high.

**NO MORE READINGS?**

There are a number of students about the campus who desire a return to those pleasant Tuesday night informal sessions in the English room, which were held regularly for a period during the winter, and who are ignorant of the cause for their discontinuance following the mid-year examination period. Perhaps lack of time or certain complications in faculty schedules made this necessary. Barring this, we wish to say that the cause for this discontinuance certainly could not be any lack of interest on the part of the student body, attested by the large size of the group who formerly gathered at these meetings. At present, the college lacks a purely literary organization. In former years there existed a Literary Society, which, however, dissolved several years ago. There is a possibility that, concentrating on too much organization, it may have defeated its own end. For this reason, we believe that gatherings of the type that have been held irregularly for the past few years in the English room have been a virtue which will always preserve a genuine interest among a certain group of students. Trinity has a dramatic group and a musical group. There is evidence that there is a group just as strongly interested in literature. If it is possible to afford this group the opportunity to gather occasionally, as in former months, we venture the opinion that there still exists a large potential audience.

**PROGRESS**

During the past week, two distinct movements of a truly progressive nature have been made. The first is the reorganization of the Interfraternity Council. The other concerns the proposed plan for making the Senate an elective body. The men responsible for these changes are deserving of high praise from the student body.

The Interfraternity Council has ever been an unstable body, subjected to several drastic changes. If this is borne out by the fact that of the fifteen or twenty students inter- viewed confidentially only one had been called upon in class and several had volunteered, resolving that, therefor, silence was golden. In the matter of conferences, each student has had only two brief conferences in seven months (I have just received word that another conference is to be held shortly), and the business of these conferences seems to have been to find out if the Freshman is a good note-"book-keeper." One correction out of fifty is pounced upon to discover if the writer has faithfully corrected all his errors. It would seem that English A is failing its catalogue promises.

If this course is to attain its real end—a return to the clear- ing up high school English "blind-spot," and attracting some to further English study—it must be subjected to several drastic changes. Our first job is to split two massing masses of disappointed Freshmen into at least three groups. We must consider another professor to take one of the units, but certainly our object is to lower the cost in money or effort. We know that the President and other pre-med's will prefer smaller groups. Only one frightened soul said he preferred the large group. It is the responsibility of the professor to see that he counted on the safety of his own students.

Our next step in improvement, and this is a difficult one, is to ascertain what is the real responsibility and powers of their position. The ever-present weakness in the college professor is to be guided by a professor and instructor who can make his themes is leaving him with the accepted plan for starting a Trini- sary Club. Its object was to help the individual. The individuality of literature has lost its strength by dilution and fresh are the Freshmen who will finish with the added vitality that English A is supposed to give. English A is essential to the culturalization of "fresh" collegians, but it is failing its purpose under the present system.

THE TRINITY TRIPUD

INQUIRING REPORTER

Question—Should 'varsity athletes be barred from intra-mural competition?

Professor Oosten:

This question, which the Tripod editor has opened for investigation, is in no way a new one on our campus. When our present plan of intra-mural competition was started in 1930, the Physical Education Department and under-graduates representing each faculty, spent considerable time trying to solve the problem of the eligibility of 'varsity squad members.

One of the aims of our intra-mural program is to encourage as many students as possible to participate. On the other hand, we naturally desire a certain degree of skill in each of the six sports on our intra-mural list. In basket ball the barring of 'varsity players has worked out very well. This is largely due to the fact that in basket ball each freshman can easily be represented without depending on 'varsity squad members. In swimming and track, even with the 'varsity squad members eligible, many of the teams have found it impossible to be fully represented.

The elimination of the squad members in these two sports is not primarily due to my opinion, decrease the interest rather than increase it.

When this question was discussed at the time our present program was outlined, we agreed to allow five places in each event to count in the scoring. This it was hoped, would encourage everyone to become familiar with the ability to participate. It is granted that 'varsity trained athletes have a certain advantage and many times the winners of the first two places can be determined without too much study.

The problem of eligibility might well be reconsidered at a future meeting of the various team managers. We believe we have a very satisfactory program for our particular college. Any suggestions which will further the development of our schedule are always welcome.
