HENDERSON CHOSEN 1937 PRESIDENT

Sophomores Also Elect Patton, Onderdonk to Office

IVORY OFFICERS ELECTED

T. H. Fanning to be Editor-in-Chief, Brooke, Business Manager of 1937 Annual

Last week the sophomore class elected Franklin Patton, a member of the Class of 1937, to the presidency for the fourth consecutive half-year. Raymond Patton, Jr., also of Washington, was elected Vice-President, and Bruce Onderdonk, of Balboa Heights, C., was re-elected class Secretary-Treasurer. Officers of the 1937 Ivy were also chosen at this time, and resulted in the election of Thomas Fanning of Hartford, Editor-in-Chief, and Joel Graham, Pa., Business Manager. Henderson is a member of the Sophomore-Dining Club, and is a reporter on the Tripod board. He played varsity football for the second year, and is a member of the Psi Psi society. Onderdonk is a member of the Sophomore-Dining Club, and is a reporter for the second year, and was on the Sophomore-Hep-committee. He is a promising pitcher on the baseball squad.

ERRATUM.
The Tripod regrets, and apologizes for, its stupidity last week in misinterpreting the name of the Rev. Dr. George Henderson to be that of Dr. George Wilson. Dr. F. L. Patton, a former president of Trinity, Noely and Mitchell, Jr., felt that a new faculty song was needed one night in Mitchell room they composed one. The first verse was:

"George Henderson is our President in Trinity.
At Trinity College he's pitched his tent.
And now he bosses this wonderful show
That is known as the Trinity Faculty O!"

The song became very popular, and
Several years after graduation, Mitchell met a Princeton graduate at a bar in New York, and the latter said, "We had a faculty song at Princeton which I think had its origin at Trinity." "Well," Mitchell said, "if so, I am one of the culprits," and thought little more about it.

However, when the Rev. Dr. F. L. Patton, a former president of Princeton, was laid to rest two years ago, the "New York Times" in giving a summary of his life and of the many tributes which he had received, said:

"Perhaps the tribute he most appreciated was the stanzas of an old faculty song, still sometimes heard on the Princeton campus: "Here's to Patton, our president!" In Princeton College he pitched his tent:

Now he's boss of this wonderful show.
Here's to Francis Landy O!"

The Princeton graduate was right, and '92 remains in barbers created happiness not only at Trinity College but at Princeton University.

Prepared chemicals caused smoke to issue from the ground as President Ogilvy turned over the first spadeful for the new Chemistry Laboratory. Insert shows Dean Hood and the President doming gas masks preparatory to the further compost of "Chemistry Bluff." (Courtesy of "Hartford Times").

GAS MASKS AND SHOVELS

Down Chemistry Bluff

Commander Ogilvy, Lieutenants Kriebel and Hood Achieve Noble Victory

The day was dark. Rain fell interminably from the dull grey clouds which gathered over the campus. The hour zero approached and from the vicinity of the Jarvis sector marched the advance guard armed with shovels. Commander Ogilvy shouted his commands and Chemistry Bluff was singed out as the focal point for the attack on that long, sleeping section of the campus. Prefaced by an oration which was to justice to Napoleon himself, the first blow was struck.

It was a tolling stroke, for as the Presidential spade buried itself to the hilt, smoke belched forth from the very bowels of Mother Earth, and aeros films rose to meet the saddened skies in a vain protest to the gods above that this was hallowed ground (Continued on page 5.)

PREPARED CHEMICALS

The Time is Right

When the news was given out that the required amount of money had been raised for the Chemical Laboratory I wrote to Dr. Ogilvy that I thought in giving him on his wonderful work and offering to employ him to raise money for another school in which I happened to be vitally interested, he gave the credit to God and the Alumni. I am sure that all the Alumni must feel as one Alumni does, that God is responsible for whatever good has come to the College in that hour. Also that every Alumni who contributed was glad of the opportunity to give to a college which had given us to him.

Last Class Day we rejoiced at the news that an unknown fairy godfather or godmother had recognized the greatest need of our College and that the work had been done in a time possible. It is very fit and right that we should assemble the coming Class Day to express our appreciation to God, to the Donor, to the President, and to each other.

A. H. ONDERDONK, President, Alumni Association.
The problem of the chemistry building has taken priority over all other campus construction at the present time, and it is the intention of the Admissions Council to hire a firm of architects and engineers to draw plans for the new building as soon as possible. The new building will be located on the site of the present chemistry building and will be designed to accommodate both the chemistry and physics departments.

ATHLETIC SCHEDULES

The recent successes of Trinity's varsity teams have occasioned much discussion on and off the campus concerning radical changes in our athletic schedules. Many of the suggestions have been in favor of competition with larger and more prominent institutions, presumably because of the larger share of publicity for the College on the sports pages of our newspapers would be received by so doing. Such proposals, however, are for the most part unsound, wound, and in the main undesirable. It has been generally held that the best way for a small college to improve its athletic status is by playing good, hard-hitting football, and by building up the student body through its sports programs.

Early Crew at Trinity Recounted by Grenville Kane of Class of '75

In connection with the plans for the revival of crew at Trinity this spring, it is interesting to note the comments of Grenville Kane, Class of '75, who was the president of the crew of 1873. The following is a part of a communication written to the Dean of Men:

"Our first problem was to raise enough money to buy the shell and to pay the expenses of the crew which we had formed. The crew was ready for the water and we had almost the entire of the spring season to work on it. We worked hard and were able to put together a good crew. The crew was made up of three oarsmen who were experienced in rowing and had been rowing together for several years. We were able to row a steady Eight in our shell and were able to win several races.

"Our next problem was to find a suitable place to practice. We decided to use the old site on the river and began training there. We rowed every day and were able to improve our time significantly.

"At that time, the course was a half-mile long and was used for rowing meets. We were the only crew on the course and were able to row our Eight steady without interference. We were able to win the championship of the course and were awarded the championship trophy.

"I am sure that the rowing on the river early in April, which was a new idea in those days. My memory of one of our club members was that he had a rowing stroke that was considered to be the best in the course. He was the only one who could row a steady Eight without breaking into a sweat. He was able to row a steady Eight for a distance of a half-mile and was awarded the championship trophy.

"I remember that the crew started rowing on the river early in April, and the crew's health was a very hard blow one day when the shell filled with water and we had considerable difficulty in getting ashore with the shell. However, we were able to row the course at least twenty minutes and it was a good experience for us.

"The College at that time, of course, was on the old site, and the course was a half-mile long. We had to row the course two times a day, and we were able to row the course in a steady Eight without breaking into a sweat. We were able to win the championship of the course and were awarded the championship trophy.

"We moved to a place called Agawam, a few miles below Springfield, and lived in a farmhouse with the crew. We were able to row on the river and were able to row the course in a steady Eight without breaking into a sweat. We were able to win the championship of the course and were awarded the championship trophy.

"There were eleven crew members in the race, and I think we finished in the first place."
Spring Sports Prospects Encouraging

last too long; if bad, it cannot too early.

The events of nearly every position makes Blue and Gold baseball prospects brighter than they have been for the last few years. In the squad which greeted Coach Dan Jane who has taken over from W. G. Wright's position as tutor of the baseball brigade were enough lettermen to provide a good nucleus. Captain Johnny Johnson has fully recovered from his football injury and will do most of the catching. He will be understudied by Bob Parker who played in the infield last season. Jesse may move Mickey Kobersky from the outfield to first base where his size and aggressiveness will stand him in good stead. Baseball is in fine shape. Hanahan is sure bets on the left hand side while Bob O'Malley, a freshman, has shown the most promise of any 'rookie', will make a fine addition to the infield.

In the outfield, Jesse will choose from Kobersky, Parker and the all-lettersmen, and Jackson, a freshman. At this early date it is evident that there is enough talent on the squad who may push some of Jesse's experienced material back to the bench. Trinity's baseball destiny for 1935 will be decided by the strength of its indoor and outdoor workouts and certainly to better his record of last year. Ralph Hoolihan, a senior, who was out of college last year, and Flaherty, fresh from the mound, will be the best of the new crop.

The early workouts have featured batting—above all else. It is Jesse's idea to keep it that way and to do a lot of running and if the hours spent in batting practice are any criterion, the early work has paid off. There have been plenty of runs to work on this spring.

Track

The outlook of the two track teams, Bar Quest, the head of the Physical Education Department, and Joe Clarke, is certainly too optimistic, but they are waiting with bated breath to see how the Bantam will do in the first meet of the year. Ray Patton, sophomore and leadingusan last year, has shown fine promise in the indoor workouts and seems certain to better his record of last year. Ralph Hoolihan, a senior, who was out of college last year, and Flaherty, a southpaw, will be the best of the mound burden. Keller, a freshman, seems to be the best of the new crop.

The early workouts have featured batting—above all else. It is Jesse's idea to keep it that way and to do a lot of running and if the hours spent in batting practice are any criterion, the early work has paid off. There have been plenty of runs to work on this spring.

Teninn

A meeting of candidates for tennis teams was held last Thursday, at which Coach Altman discussed plans for the season. Fifteen men reported as candidates for the squad. Mr. Altman expressed regret for limited tennis facilities on the campus this year, and for that reason intends to carry a small squad of men divided into two groups; the veteran and the junior varsity.

The varsity will play their home matches at the Hartford Golf Club courts. There will be daily practices if the squad in the afternoon on the courts, and because of the difficulty of determining relative positions of men, there will be arranged a series of elimination or trial matches held part of the season.

Sports Sidelights

By O. D. Carberry, '36

There are at present in college three men who hold five of the college track records. The first has just put the shot 40 feet, 1½ inches, has cleared 6 feet, 5 inches in the high jump and dashed the 220-yard event in 22.8 seconds. Alexander holds the record in the discus throw at 127 feet, 1 inch. Warner holds the record in the broad jump with 22 feet, 8½ inches.

The standings of the student groups so far this year for the Alumni Trophy are as follows: A

— Delta Phi, .......... 64
— Sigma Sigma, .......... 66
— Psi Upsilon, ............. 70
— Common Club, ........... 31
— Delta Phi, .......... 35
— DKE, ............ 33
— Neutral Blues, .......... 28
— Alpha Delta Phi, .......... 18
— ATR, .......... 18
— Neutral Blues, .......... 9
— Neutral Gold, .......... 5

The Physical Education Department has on record 126 men who participated in intramural basketball this year, and 166 have played college tennis. These numbers are larger than those of any previous year.

Wesleyan's $18,000,000 cap is one of the best planned athletic buildings that Trinity track team has played in this year. Something like it is surely needed at Trinity.

The three tennis courts which are located east of Cook Dormitory will be excavated soon when work is completed on the Chemistry Laboratory. This will serve to aggravate a situation which now is becoming difficult. When track season opens in April, Trinity will have but four left. A large number of men who have never played tennis, and the same number of students as are enrolled at Trinity has twenty courts, which is in constant use.

The Connecticut State baseball team lost all of its veteran pitchers by graduation last June.

This Friday the Intercollegiate Fencing Association championships will be competed for in the Commodore Strips. Twelve colleges will be represented in a field of one hundred and fifty.

ALUMNI ACTIVITIES

1935

Ed Craig is married and announces the birth of a bouncing boy. He is living in New York, where he is connected with the Schumacher Carpent Company.

Harold Bayley is enrolled in the University of Virginia.

Ade Onderdonk is a master at the St. James School, and is writing for the New York Post.

Nat Clark is working for his degree at Harvard. He is a member of the Harvard and the unidentified Dragon’s polo team of the Boston College.

William McCornick spent last summer in Europe, and is now at the Hartford, Connecticut Trust Company.

Elliot Mayo and Charles Tucker are students at the Tufts Medical School.

William Jackson and Ardon Shaw are at the Columbia Law School.

James Wehber and Harold Knap are students at the Harvard Business School.

Doug Gay has been hunting in Alabama and Florida, and is living at Bald Head Island, N.C.

William Arnold is in the Graduate School of History at Harvard.

Frederick Bashour is teaching chemistry at the State Normal School in New Britain.

Robert Moore and John Bose are working towards their master’s degrees at Trinity.

Joe Flynn, and Seymour Smith are connected with the Travelers Insurance Company of Hartford.

Don Snowden and Andrew Onderdonk are with the Astana Insurance Company in New York.

Jim Baldwin is working for the Phoenix Mutual Insurance Company in Hartford.

Bryant Green is a page boy of the Connecticut State Senate.

John McMillin is at the Harvard Business School.

Don Rankin is teaching at the Friends’ Academy on Long Island.

Hitchcock is attending the Graduate School of Romance Languages at Harvard.

Ralph Benjamin is working for the Borden Dairy Products Company in New York.

Leonard Cole is with the Travelers Insurance Company of Hartford.

Ray Liddell and Ben Shek are studying medicine at the Flowers Medical School in New York.

Bob Shenk is taking his master’s degree in History at Columbia.

Edward Ely and Karl Heitz are assistants in the Trinity chemical department.

GRADUATION WEEK-END.

(Continued from page 1.)

Class of 1895 last June, and the first of its kind, is reported as indicating that the facilities and accommodations of the Dean’s Dining Hall are admirably suited for such affairs. Secretaries of the reunion classes are urged to get in touch with the Alumni Secretary regarding the details of their classes toward such reunions, and also for any aid that they may need in organizing their reunions.

FRESHERM ELECTIONS.

Robert D. O’Malley of Hartford was elected president of the Freshman Class, and Francis G. Jackson of Westbrook, Maine, and John H. Wilson of Bal­timore were also elected vice-president and secretary-treasurer, respectively.

YOUR SPRING VACATION

WALDO M'C NUTT SPEAKS ON STUDENTS AND WAR

Urges Youth to Join in Mass Protest Against Warfare

"We are against the further militarization of youth," was stated by M’Cruft, head of the American Youth Congress, in an informal talk given in the Economics room last Thursday. The talk was followed by questions from the audience, and a preliminary to the program of the Anti-War meeting planned for this month, and will be held at the College.

Mr. M’Cruft, who is also organized for the American League Against War and Fascism, and Field Counsel for the A.M.W. of the A.L.W., referred to the decline of the strikes which are to be staged in colleges and high schools throughout the nation during the year, in protest against war preparations. The object is to prevent imperial war and militarism of youth. Specifically, the program is being waged against the universities of the United States as the R.O.T.C. and the M.C.T.

In relation to the strikes which are to occur on April 12, Mr. M’Cruft explained his views, which are also the views of the American Youth Congress.

Johnny Butler is employed by G. E. Company in Hartford.

William Moore is married to Rhea Jackson of Memphis, Md.

M. A. Canfield is at Harvard. He is a member of the Debate and Dramatic Society.

There's something about a Chesterfield —

There's one thing I especially like about Chesterfields — entirely aside from the fact that it's a milder cigarette — and I've heard a number of people say the same thing...

While I'm smoking Chesterfield I never get little crumbs of tobacco in my mouth — the tobacco doesn't spill out and that adds a lot to my pleasure of smoking them...

I notice more and more of my friends smoke Chesterfields.

NEW CHEMISTRY LABORATORY. (Continued from page 1.)

which has gone into the preparation of plans for its construction. Professor Krieble and a member of the firm of McKim, Mead & White, the architects, have visited every college laboratory in New England and several in other sections. They have studied them not only for their arrangement but also for the ventilation systems and materials used for floors, desk tops, plumbing and other details.

James Smith, of the firm of McKim, Mead & White, who is doing the drawings, has been actively engaged in the past on the building of laboratories at Wesleyan and Amherst. Mr. Smith has expressed great satisfaction on having the opportunity with the Trinity Laboratory to surpass his previous efforts.

There will be several innovations in the building which are not always included in such edifices. The auditorium will accommodate the entire student body. The problems of seating, exits and ventilation have been worked out and the hall, to be equipped with a projection room containing the most modern apparatus for showing of slides and sound motion pictures, will fill a much-needed place in the life and efficiency of the College.

There will also be a tower on the building which will house the Department of Astronomy and its equipment. A new telescope, the gift of Mrs. J. W. Hewitt, whose husband made the lens, will be installed in the tower. Mr. Hewitt's brother was a classmate of William G. Mather, '77. A small library fitted out in memory of Professor Krieble's predecessor, Professor R. B. Riggs, will occupy a part of the building. The Library will contain all the chemical journals now stored in the College Library, together with other books on Chemistry for use of the members of the Department and advanced students. Finally, chemical research will be stressed. The building has been designed to provide private laboratories for each member of the staff as well as additional rooms which can be turned over to specific projects. It is expected that the industrial concerns of Hartford will use, in cooperation with our Department of Chemistry, the exceptional research facilities which will be offered.

The science of Chemistry has been and is subject to even more revolutionary change than any other of the important sciences. A branch of the subject taught today may decline in importance within the next ten years. Continuing discoveries introduce changes in emphasis. It is, therefore, important to have the facilities for teaching Chemistry as flexible as possible. Professor Krieble and the men who have designed the building have worked with the idea in mind that the building may be adapted to take care of any development in the different branches of the science. The present status of Chemistry is not final. Trinity's new Chemical Laboratory will allow for possibility of growth.

It is most fitting that each and every Alumnus, undergraduate and friend of Trinity College should feel deeply grateful to the Anonymous Donor who has made a great gift to the field of education, and who has made possible another forward step in the growth and service of Trinity College.
