TRIP NOTED
A meeting of all freshmen desirous of a class trip will be arranged by the Executive Board, to take place on Thursday evening, February 17, at 7:30. Present membership of the Class of '38 will be subject to the approval of the principal and other official staffs will be notified.

At a recent meeting of the Executive Board, T. O'Neil Fanning was appointed executive manager, and Bratton M. Porter was appointed student alumni editor.

Office News

On Friday evening, March 25, the Moore lecture will be delivered by Professor Clarence W. Wendell of the University of Texas, at Yale College. The subject of the lecture will be “Sohocles, Seneca, and Shakespere.” Professor Mendell plans to show how certain tragic phenomena, as phrased by Sophocles in the Greek, Shakespeare in the English, and Seneca in the Latin, were later used by the tragedians in their works.

This lecturership was established through the bequest of Charles E. Hoxsey, who died in 1908, and who, in his will, directed two grants for the purpose of demonstrating electrical resonance and standard electrical waves. The presentation of the two lectures is part of the arrangement of a tall coil connected with a tall pole. Two wires ran up or down this pole, which was worth about 20,000 miles in length, and the students had to keep the wire, which was thick.

On January 30 President Ogilvy preached at Westminster School; on February 2, he delivered a lecture at Choate School. On February 20 he will be in the East for the first time, to speak in New York. On February 28 he will deliver a lecture at Loomis School; and in the evening at Williams College.

JESTERS PLAN TO GIVE "KING LEAR" PRODUCTION

Mr. Greenley, Professor Shepard and Professor Allen will direct November's production. The Jesters after their smash hit last fall, "The Warrior's Husband," are now planning a new production which promises to top every previous performance. The play will be put up sometime in the early part of May. The production will be directed by Henry Morgan, chairman of the production committee. Morgan is indeed fortunate in obtaining the services of some men, whose knowledge of the English background of the play will undoubtedly be a great help in its production.

Samuel Benjamin, President of the Jesters, will have the leading part. He has been on the stage since the production of last June's Whipple's "King Lear," and will be on the stage when the Jesters has given his final performance. The character will be played by students of the English department, who have been trained in the study of Shakespeare. On March 1, when he was made assistant secretary of the North East Relief in 1919, and later he received his bachelor's degree from Columbia University in 1924, and his bachelor degree of law in 1928, and a degree in law school in 1930.

Dr. HAROLD C. JAQUITH, '21
Who was recently Appointed Provost.

Dr. JAQUITH TO FILL POSITION OF PROVOST

Alumnus and Former President of Hillsdale College Will Aid in Administrative Duties

The appointment of Dr. Harold C. Jaquith, '21, to the position of Provost of Trinity College was announced last month. This position of responsibility was accepted by the Board of Trustees; it entails the carrying out of some of the administrative duties of the college. Dr. Jaquith, a graduate of the class of 1911 and former head of Hills College Illinois, will take over his new duties on March 1.

Borns in Nauvah, N. H., 1888, he was graduated from the Harvard Public High School in 1907, and four years later he received his bachelor of science degree from Trinity. He received his master's degree at Columbia University in 1914, and his bachelor of divinity degree. Dr. Jaquith has been a trustee of Trinity College since 1920, and since 1931 has been a trustee of the Board of Trustees; it entails the carrying out of some of the administrative duties of the college. Dr. Jaquith, a graduate of the class of 1911 and former head of Hills College Illinois, will take over his new duties on March 1.

The column will run a contest for the Blue and Gold and sink 13 baskets of twenty points in each. This contest is open to any member of the Royal Geographical Society, and to the American Academy of Political and Social Science, and of Phi Beta Kappa.

**PHYSICS LECTURE**

Auditorium lights were dimmed. A group of students sat in the lecture hall, length danced vividly before the audience. It demonstrated high frequency electric current, which is what is known as the Tesla Coil.

Another interesting demonstration was composed of parallel wires through which a current was sent. The wires glowed, were visible, and could be detected. Small Christmas bulbs were placed across the wires, and the variation of the current, going on and off, illuminated the bulbs, lighting up the loop. The current could be short-circuited by placing a copper plate across the wires.

**DA. JUQHTH**

(Continued from page 1.)

Dr. Jaught married Miss Mary Hamilton, a native of the Russian nobility under the Czarist regime, in Serbia in 1925. For his work in the Near East Dr. Jaught was awarded the Order of the British Empire, the Order of King George I of Greece, the Greek Cross of Guerre, and the Greek Red Cross Medal. He is a member of the Royal Society, the Order of the British Empire, the Order of King George I of Greece, the Greek Cross of Guerre, and the Greek Red Cross Medal. He is a member of the Royal Society, the Order of the British Empire, the Order of the British Empire, and a member of the American Academy of Political and Social Science, and of Phi Beta Kappa.

**HERE AND THERE**

Those members of the Senior Class who desire to be helped by the College authorities in securing positions after graduation, are asked to call at the Office of the Alumni Secretary, Room 350, on Thursday, February 17. The Alumni Secretary (who prefers Mr. Hood) will be present from 3 to 5 p.m.

**NOTICE TO SENIORS**

**JUDGE MEIKINS TALKS ON ABRAHAM LINCOLN**

**United States Judge in Special Address Comments on Birth of Great Emancipator**

A special Lincoln's birthday service was held Saturday night at the Chapel. President Ogilvy opened the service with the reading of the Gettysburg Address. In keeping with the spirit of the United States District Court, North Carolina, then spoke on "Lincoln As A Man."

Judge Ogilvy said that world movements are never spontaneous. The Exodus from Egypt, the sacrifice on Calvary, the Reformation, the French Revolution, have all been the result of hundreds of years in the making. In the same manner the first firing on Fort Sumter was a result of years of preparation. The slavery question was settled by a civil war, was preceded by years of preparation of propaganda, by the partition of Plymouth and the Cavaliers of Jamestown was only temporarily forgotten when they founded American liberty together.

War had to be fought we should be thankful that it is over. North and South can now progress together.

Great movements are always controlled by great men who have been prepared. The Lincoln movement was prepared. Lincoln's conscience was less religious than moral. It was against the maintenance of a union of the whole people. Before he was born, he had lived for thousands of years. He had lived a long life of preparation. War had to be fought we should be thankful that it is over. North and South can now progress together.

**SPORTS SIDELIGHTS**

We noticed that Art Mountford had been burning up the basketball courts of late. He has developed the last two games with twenty-two points to his credit in each. This is fair to Flat's record, whom Cap- tain Joe Clarke of Army is leading on the home court midnet the jeers and cheers of the crowd.

Coach Joe Clarke put ’Whitey’ Johnson in the 400-yard relay as the anchor man. If what Seville says is true, it may have been directed toward getting his letter; thus the team got into the 3200 relay. ’Whitey’ came through in top form to nose in ahead of the Coast Guards.

The game with the Alumni has been scheduled for tomorrow afternoon before the last football game of the season. In all, fifteen ex-collegians have been invited to report to the alumni office to participate in the fray. They are divided sharp into two squadoes: the one of more recent graduates and fairly familiar to present Trin supremacy.

The horrible three, just graduated from last year’s class, “Mickey” Ke- rney, Jack O’Brien, and ‘Ozio’ Nelson, who need no introduction to Trinity students, will be here. The French, or ‘mascot’ of the seniors of 1934 that beat the alumni, was led by the sensational scoring forward of the East and Metropolitan circles, Johnny Kennedy, by a 36 to 35 count in the Hopkins Street gym, as Captain Bob Dunn, Fighting Irish, was pitted against the Blue and Gold and sank 19 and 9 tallies, respectively, for the Hilltoppers.

Our investigation reveals that the seniors-only relay which rolled up eighteen points (quite a total in those modest scoring days of last year’s center tag). Those five members of that ’34 team were: Dast, Martens, and DesChamps.

DesChamps was our defensive dynamite, Dunn, a successful half-year on the Jay Vee squad. Kelly was a later-day Captain Dunn, and astriking performer. Here were potential scoring threats from the center tag. Dunn was the speed and scoring ability of the famed Dast-Martens combination.

The Alumni’s five picks, into which the Alumni quintets finds itself divided, all played together as a team during the court set-shots spelled down for the opponents, and into whose ranks Ko- nely was inserted as a guard, led by a successful half-year on the Jay Vee squad.

Kelly was a later-day Captain Dunn, and astriking performer. Here were potential scoring threats from the center tag. Dunn was the speed and scoring ability of the famed Dast-Martens combination.

Trinity Natators Defeat Coast Guard Handily

Aksomitas again sets new pool record in breaststroke; score 59-16, taking first in every event but the backstroke. The competition was dull and the times correspondingly slow. Sole bright spot in the otherwise dull afternoon was the victory of Aksomitas in the 200-yard breaststroke. Leading by a wide margin throughout, he breaststroked and butterflied himself the eight lengths of the pool to set a new pool record of 2:36, thus breaking the old record also held by him. The record-breaking time was unusual in that it occurred despite lack of competition. Aksomitas seemed to be racing against time rather than against his lagging opponent.

Trinity opened the afternoon by defeating Coast Guard in the medley relay, swum by Hill, backstroke, Aksomitas, breaststroke, and Anderson, free-style. Although the race was not close, the time was good. Muir and Aksomitas followed this victory up with an easy win in the 220, leaping through the touch in a dead heat. Each of the Coast Guardsmen came in for a late third.

The fifty-yard dash proved a good competition as Fanning of Trinity, respectively, touched the touch in a dead heat. Barber and Steadman of Coast Guard in the 200-yard breaststroke, Trinity swept the race.

The fifty-yard dash proved better than either of the winning times, the respective times of 3:17.8 and 3:57.4 setting new Boston University records. No one did the medley relay and 400-yard relay with respective times of 3:17.3 and 3:57.4 setting new Boston University records. No one did the medley relay and 400-yard relay with respective times of 3:17.3 and 3:57.4.

OOSTINGMEN TO MEET NORWICH UNIVERSITY

Hilltoppers Hope to Break Into Win Column This Evening in Game With Cadet Horsemen

This evening a victory-starved Trinity basketball quintet will once again try to break into the win column when they take on the Horsemen from Norwich Military Academy at the old Municipal Coliseum. The Hilltoppers, who are smarting under the sting of four consecutive losses, will take the court against the Cadets, who have been defeated on their own court only once this past year.

Little is known about the strength of the visitors, but they, too, will be gunning extremely hard for a triumph, for they remember only too well the 60-0 and 51-0 defeats of the past two football seasons.

Coach Ray Oosting will start the same five that he has relied on in the last two games, Captain Jim Kenney and Art Mountford in the backcourt, Jack Carey and Dick Lindner at forwards, and Ray Ferguson at the pivot post. Mountford has gone on a scoring spree in the last two games, netting the ball for twenty-two points in total. Kenney was beset with hard luck in the Boston University game, when he had three fouls called on him in the first few minutes. In the Brown game he showed his true ability as a guard, holding the highly-touted Bill Platt to four field baskets, only one of which Kenney was responsible for. The other three men have played their usual good games with Jack Carey coming in for a good share of praise in the Brown battle. Others who may see action are Jim Collins, Bob Randall, Hank Kins, Bobby O'Allley, Al Hopkins, and Eddie Morris.

The underdog freshman squad will play the preliminary game at 7:30. The Ericksonmen are trying to increase their number of wins to three, the other two victories having come at the expense of Bard and Haverford.

Little is known about the strength of the visitors, but they, too, will be gunning extremely hard for a triumph, for they remember only too well the 60-0 and 51-0 defeats of the past two football seasons.

PERKINS' BOOK

(Continued from page 1.)

during the past summer. The remaining illustrations are line drawings. The book, which is being published by Prentice-Hall, is about eight hundred and seventy pages long and contains some four hundred problems. Dr. Perkins stated that he did not try to economize on the number of pages by putting all the difficult matters in fine print as is the usual custom in physics books.

Dr. Perkins started this book in May, 1927, but actually, after taking into consideration innumerable interruptions, the longest being a round-the-world trip during his Sabbatical leave from Trinity a few years ago, he has spent seven years on it. "College Physics" will not be a survey course such as is given at Trinity in Physics A, but rather a thorough course especially suited to men who are really interested in science. For this reason it will undoubtedly be used in many scientific and technical schools. It is much the same type of book as Kimball's "College Physics", used at Trinity for several years, in this respect.

ALUMNI NEWS

pointed as Curriculum Specialist and Textbook Writer with the Bureau of Indian Affairs, on which he will commence work in the latter part of August. Last summer Mr. Boyce worked on the staff of the Progressive Association's Summer Workshop in secondary education at the Sarah Lawrence College in Bronxville.

Harry C. Neff, '11, of Adams, Mass., is promoting sports in his home town. Last week Mr. Neff was in charge of the International Intercollegiate Ski Meet.

Many alumni are expected back for the Varsity-Alumni basketball game to be held on Washington's Birthday.

Roger Motten, '37, of Wethersfield, Conn., is working for the Engineering Department of the City of Hartford. In his spare time, Mr. Motten officiates at the Trinity swimming meets and basketball games.

The Reverend Cranston Brenton, '09, died December 21, 1937.

B. U. SWIMMING MEET

(Continued from page 3.)

men taking firsts in the 220-yard swim and the 150-yard backstroke and emerging high-point man for the afternoon. Star of the day for B. U. was Ferguson, distance man, who placed in the 220 and won the 440. Fanning showed promise of turning in a high score when he won the 50-yard dash and led the 100 until the last lap when he seemed overtaken by sudden lurches.

As Aksomitas won the breaststroke, but the real competition in this event came between Bob Connar and Gould, who swam almost a dead-heat until the last few seconds, when Conner with a burst of effort forged ahead of Gould to win by a finger's length. In the excitement Aksomitas' victory was almost overlooked by the cheering spectators.

The diving showed higher perfection and better form than was evident in the meet Thursday. The first and second in this event, scarcely hoped for by the Hilltoppers, clinched the meet for Trinity as already shown.
